## **Big Miss - Pressure on Valuations?**

- Big miss 3Q PAT was well below (c19%) our expectations, primarily on lower topline growth due to the industry wide slowdown in anti-infectives. We believe this is a temporary phase and growth should get back to normal from 4Q. However, we revise CY11-13 EPS estimates by 2-6% & TP to Rs2,200 (roll over to Dec'12E EPS). Upside remains limited in view of high valuations that may now come under pressure due to this disappointment & the proposed widening of the price control net. Stay Neutral.
- **Topline growth slows** After recording healthy growth (+12%) in 1HCY11, 3Q witnessed a slowdown (+4% YoY vs. Citi Est of +13%), as Pharma (biz excl exports) grew by 7% YoY. This low growth was despite four new launches last quarter (including two patented drugs *Votrient* & *Revolade* & a *Stiefel* derma product) & aggressive sales force expansion. While oncology, derma, CVS & metabolic registered double-digit growth, mass market & anti-infectives disappointed due to a weak season & high base.
- PAT well below expectations Higher RM/sales (inferior product mix increasing branded generics contribution) & higher SG&A (sales force expansion related) added to topline woes and led to a significant drop in EBITDA margin (c30%, -587bps YoY, -495bps QoQ) lowest in the last ten quarters. PAT declined (-8% YoY) despite higher interest income & lower tax rate and was c19% below our expectations.
- Revising estimates & TP We lower our topline and EPS est. for CY11/CY12/CY13 by 4%/4%/4% & 6%/2%/3% respectively. Over the longer term, we expect GLAX to grow faster than the market on new launches & aggressive sales force expansion forecast topline & PAT CAGRs of 14% & 16% respectively over CY11E-13E. We roll forward to Dec'12E EPS and arrive at a TP to Rs2,200/sh (Rs2,170/sh earlier).
- Potential Catalysts a) Higher than expected product launches especially from the patented basket & vaccines; b) Inorganic/dividend initiatives to utilize cash on books (cRs21bn) on its books; c) Vaccine launches: Synflorix, Infarix-Hexa; d) New branded generics launches; e) implications of the recently proposed DPCO 2011 provisions likely negative

### Company description

GSK Pharmaceutical is one of the largest pharmaceutical companies in India and operates in the branded formulations space across a wide range of therapeutic areas such as anti-infectives, dermatology, gynecology, diabetes, oncology, cardiovascular and respiratory as well as vaccines. GSK has consistently featured among the top-5 companies in the highly fragmented Indian market and has maintained a market share of over 4%. It has registered single digit revenue CAGR over the past five years but growth rates have picked up over the past two years and are expected to remain in the double digit range.

### Investment strategy

We rate GSK Pharma Neutral (2), with a TP of Rs2,200. While we rate GSK as a good play on the stronger IPR regime and growing penetration of healthcare in India, we expect any upside to be gradual over a number of years. Although GSK has plans for launching several new products in the vaccines, dermatology and branded generics space, we expect a lag before any material step up in growth rate and profitability. In the interim, with an EPS CAGR of 14.5% (CY10-13E) and no near-term catalysts, we see limited upside over the next 12-18 months.

#### Valuation

Our target price of Rs2,200 for GSK Pharma is based on 25x Dec 2012E earnings. Given its steady earnings growth, we believe P/E is best suited to value GSK Pharma. GSK has traded at 15-60x in the past 7-8 years, with a median of c23x over the last five years. GSK launched its first patented product in India two years back and has announced plans to launch a few more over the next two years. While we expect greater clarity on the implementation of the IPR regime over the next few years, we believe that the upside on this front for most companies is likely to be limited in the near to medium term. As such, we believe that 25x is a suitable fair-value multiple.

#### **Risks**

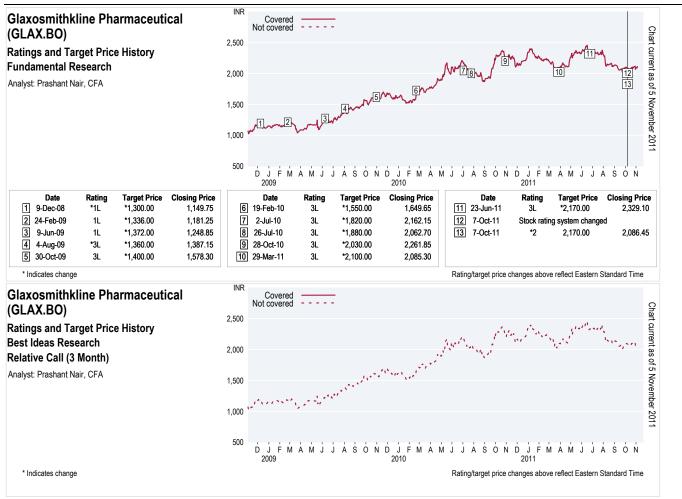

The key upside risks to our hypothesis include: a) Higher than expected product launches - esp. from the patented basket & vaccines; b) Any accretive acquisitions, given the sizeable cash balance (cUS\$450m+) on its books. The key downside risks to our hypothesis include: a) Slowdown in Indian market growth, given that GSK operates entirely in this market and is among the top 5 companies; b) Further price control related regulations in India, given more than 20% of the current revenues are from price controlled products. Any of these risk factors could cause the shares to deviate from our target price.

#### Guide to Citi Investment Research & Analysis (CIRA) Fundamental Research Investment Ratings:

CIRA's stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned. Investment Ratings: CIRA's investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of CIRA management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Relative three-month ratings: CIRA may also assign a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may highlight a specific near-term catalyst or event impacting the company or the market that is anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) will indicate the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of NASD/NYSE ratings-distribution-disclosure rules, most preferred calls correspond to a buy recommendation and least preferred calls correspond to a sell recommendation. Any stock not assigned to a most preferred or least preferred call is considered non-relative-rated (NRR). For purposes of NASD/NYSE ratings-distribution-disclosure rules we correspond NRR to Hold in our ratings distribution table for our 3-month relative rating system. However, we reiterate that we do not consider NRR to be a recommendation.

Prior to October 8, 2011, the firm's stock recommendation system included a risk rating and an investment rating. **Risk ratings**, which took into account both price volatility and fundamental criteria, were: Low (L), Medium (M), High (H), and Speculative (S). **Investment Ratings** of Buy, Hold and Sell were a function of CIRA's expectation of total return (forecast price appreciation and dividend yield within the next 12 months) and risk rating. Additionally, analysts could have placed covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and/or trading in the company's securities (e.g. trading suspension). Stocks placed "Under Review" were monitored daily by management and as practically possible, the analyst published a note re-establishing a rating and investment thesis. For securities in developed markets (US, UK, Europe, Japan, and Australia/New Zealand), investment ratings were:Buy (1) (expected total return of 10% or more for Low-Risk stocks, 15% or more for Medium-Risk stocks, 20% or more for High-Risk stocks, and 35% or more for Speculative stocks); Hold (2) (0%-10% for Low-Risk stocks, 0%-15% for Medium-Risk stocks, and 0%-35% for Speculative stocks); and Sell (3) (negative total return). For securities in emerging markets (Asia Pacific, Emerging Europe/Middle East/Africa, and Latin America), investment ratings were:Buy (1) (expected total return of 15% or more for Low-Risk stocks, 20% or more for Medium-Risk stocks, 30% or more for High-Risk stocks, and 40% or more for Speculative stocks); Hold (2) (5%-15% for Low-Risk stocks, 10%-20% for Medium-Risk stocks, 15%-30% for High-Risk stocks, and 20%-40% for Speculative stocks); and Sell (3) (5% or less for Low-Risk stocks, 10% or less for High-Risk stocks, and 20% or less for Speculative stocks).

Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm.
