**Join current EU-funded research and
innovation projects through the
Horizon4Ukraine initiative**

EUROPEAN RESEARCH COUNCIL

ERC WORK PROGRAMME 2023

ERC (European Research Council) is a public body for funding of scientific and technological research conducted within the European Union (EU).

Researchers from any field can compete for the grants that support pioneering projects. The ERC competitions are open to top researchers also from outside the union. Grant applications are assessed by qualified experts.

Excellence is the sole criterion for selection; there are neither thematic priorities, nor geographical quotas for funding. The aim is to recognise the best ideas, and confer status and visibility to the best research in Europe, while also attracting talent from abroad.

CONSOLIDATOR GRANT

COST | EUROPEAN COOPERATION IN SCIENCE AND TECHNOLOGY

The European Cooperation in Science and Technology (COST) provides international research funding for researchers to set up their interdisciplinary research networks in Europe and beyond. These bottom-up networks run for 4 years and help to build capacity.

Through these networks, the so-called COST Actions, COST provides funds for organising meetings, training schools, short term scientific missions or other networking activities in a wide range of scientific topics. This way it promotes global networking of national-funded research.

Participants are invited to submit COST Action proposals contributing to the scientific, technological, economic, cultural or societal knowledge advancement and development of Europe. Multi- and interdisciplinary proposals are encouraged.

**UKRAINIAN PARTICIPANTS
MAY BE MAIN PROPOSERS,
SECONDARY PROPOSERS FOR
COST ACTIONS AND MAY
JOIN THE RUNNING ACTION.**

**TO BROWSE ACTIONS
