

all about biogas

Renewable Energy Workshop for Beginners

In this two-day beginner's workshop, you will:

Learn...

- the theories and mechanics of biogas
- how to successfully make and properly use biogas
- how to build effective, low-cost digesters

Take Home...

- a copy of *The Complete Biogas Handbook*
- a CD with a heap of wonderful information

You will also have the option to purchase a 200-gallon biodigester kit!

Tuesday & Wednesday
October 19 - 20, 2010
9am - 5pm

Chatham University, Eden Hall Campus
Richland Township, Allegheny County

Would you like to know how to generate biogas as an alternative fuel? What is biogas, and what produces it? How can you use it? Would you like to know how to make really cheap, practical biogas digesters to use at your farm, home or business? Then this two-day workshop, led by the founder of Vahid Biogas, is for you!

\$125 PASA members | \$150 all others | Space is limited to 35 to facilitate focused learning.
Lunch will be provided on both days. All other meals and accommodations are the responsibility of the participant.
For info on affordable accommodations at Eden Hall, please call Rebecca at 814.349.9856 x 20 or email Rebecca@pasafarming.org.

about the presenter

David House, founder of Vahid Biogas & author of *The Complete Biogas Handbook*

Your presenter and coach, David House, is the founder of Vahid Biogas, an alternative energy consultancy. He is the author of *The Complete Biogas Handbook*, and has lectured and taught a variety of subjects in more than 20 countries. David was recently featured in an article on American Public Media's *Marketplace* and is a Featured Columnist for *Renewable Energy World*.
