

Design, delivery, and assessment of WASH in schools programs

EH590R e-course

Course Announcement

January 13th-May 4th 2016

Course Objectives:

1. Identify critical planning activities, such as assessing current school WASH conditions and existing capacity;
2. Collaborate with key stakeholders at local, district, and national level;
3. Select appropriate behavior change approaches and child-friendly facilities; and
4. Establish school data management and information systems to engender accountability and sustainability

Participants have included UNICEF staff, government officers, and NGO workers.

The course has been rolled out **six times** between 2010-15. There have been **over 365 graduates from over 70 countries!**

Recent case studies resulting from this course: <http://tinyurl.com/WinSLearning>

*Successful completion of the course confers a **certificate of completion**.*

The course **is taught live over the internet** in order to foster interaction and learning.

The purpose of this course is to support applied learning on developing, executing, and evaluating sustainable and inclusive WASH in Schools interventions in collaboration with local, sub-national and national stakeholders and will cover the key lessons learned from peer-reviewed and grey literature. Participants from Emory, UNICEF, NGO, and government offices throughout the world, will share challenges, successes, and lessons learned from a variety of experiences. Participants will come to this course with a wide variety of experience and background in the sector. Some may have experience with WASH programming in general, WASH in schools programs in particular, or may be new to the field. As such, the course has been designed to cover the basics of WASH in schools programming, as well as provide enrichment for those with significant experience. We will likely find that similar challenges are echoes across field staff from different country contexts.

Course organizer:

Matthew Freeman, MPH PhD
Assistant Professor
Emory University

Module Facilitators from:

Emory University, UNICEF,
Sustainable Impact,
CARE Water Team

Ten Course Sessions

Course Times: Once every two weeks, 13:00-14:30GMT

Expression of interest deadline: November 15, 2015 | Send payment by December 1, 2015

Cost: \$600 per person paid to Emory University
