000	Network Setup Assistant
	Introduction
	This assistant will help you set up a connection to the Internet using your Internet service provider (ISP) or local network service.
	You must be able to connect to the Internet using an AirPort wireless network, a dial-up telephone modem, a DSL modem, a cable modem, or a local area network (LAN).
	To begin, create a network location to save your setup information.
	What do you want to name this location?
	Location Name: Location (8/9/07 12:09 PM)
	You can name the location anything you want, such as "home", "work", or the name of your ISP.
	More Info
	Go Back Continue
6. Select the option	I use a telephone modem to dial my ISP and click on Continue
000	Network Setup Assistant
	How Do You Connect to the Internet?

- OI use AirPort to connect to the Internet wirelessly.
 - I use a telephone modem to dial my ISP.
- O I use a DSL modem to connect to the Internet.
