The Brown-headed Cowbird is known to use the nests of more than 200 other bird species, and cowbirds in general are believed to play a role in the decline of some migratory songbird populations. These brood parasites - birds that lay their eggs in the nests of others - have long flourished in North America. Because brood parasitism has evolved independently in various bird families, information on this adaptive strategy is of great ecological interest and considerable value to wildlife management. Cowbirds and Other Brood Parasites is an important reference on these cunning creatures that enhances our understanding of both their behavior and their part in the natural world.

[Migraine : Manifestations, Pathogenesis, and Management: Manifestations, Pathogenesis, and Management, , Physiology and Biophysics Robert A. Davidoff Professor of Neurology, and Molecular and Cellular Pharmacology at University of Miami School of Medicine](#) , 2002, 0198031351, 9780198031352. Migraine: Manifestations, Pathophysiology, and Management, Second Edition, is a much expanded, updated monograph that focuses in detail on migraine's diverse variations, its pathophysiology, and its treatment. Authored by a clinician/scientist who himself suffers from migraine, the book's premise is that the clinical significance of migraine and its treatment are intelligible only if the physician understands the anatomical, physiological, and pharmacological factors underlying both head pain and the other manifestations of migraine. The book provides clear clinical descriptions of the myriad of specific migraine syndromes, and discusses the rationale for, and elements of, a sensitive, inclusive patient history. Also covered are important but sometimes ignored topics such as environmental triggering of migraine and myofascial syndromes. The Second Edition also bridges the gap between basic science and clinical practice by explaining those substantive advances made in understanding fundamental mechanisms of head pain and aura. Recent knowledge about genetics, hormonal changes, cerebral circulation, nitric oxide, peptides, central sensitization of trigeminal neurons, and the role of periaqueductal gray

matter buttress the discussion of basic mechanisms. On the treatment side, the Second Edition reflects the impressive advances in pharmacological approaches to migraine. There is a greatly expanded section on the triptans and their mechanisms of action, and rationales and practical information about the use of all other viable anti-migraine and prophylactic drugs. Psychobiological aspects of stress and stress management, elimination of environmental stimuli, the educational facets of management, and aspects of the patient/physician interaction so crucial in the treatment of migraine are all discussed. Special problems associated with the care of women, children, the elderly, patients with intractable headaches, and emergency department patients are thoroughly reviewed. In sum, this scholarly, well-referenced book offers in one volume a comprehensive scientific and clinical discussion of migraine headache.

[The Republic of Letters: A Cultural History of the French Enlightenment, Dena Goodman](#) , 1996, 0801481740, 9780801481741. In the first major reinterpretation of the French Enlightenment in twenty years, Dena Goodman moves beyond the traditional approach to the Enlightenment as a chapter in Western intellectual history and examines its deeper significance as cultural history. She finds the very epicenter of the Enlightenment in a community of discourse known as the Republic of Letters, where salons governed by women advanced the Enlightenment project "to change the common way of thinking". Goodman details the history of the Republic of Letters in the Parisian salons, where men and women, philosophes and salonnières, together not only introduced reciprocity into intellectual life through the practices of letter writing and polite conversation but also developed a republican model of government that was to challenge the monarchy. Providing a new understanding of women's importance in the Enlightenment, Goodman demonstrates that in the Republic of Letters men and women played complementary - and unequal - roles. Salonnières governed the Republic of Letters by enforcing rules of polite conversation that made possible a discourse characterized by liberty and civility.

Goodman chronicles the story of the Republic of Letters from its earliest formation through major periods of change: the production of the Encyclopedia, the proliferation of a print culture that widened circles of readership beyond the control of salon governance, and the early years of the French Revolution. Although the legacy of the Republic of Letters remained a force in French cultural and political life, in the 1780s men formed new intellectual institutions that asserted their ability to govern themselves and that marginalized women. The Republic of Letters introduces provocative explanations both for the failure of the Enlightenment and for the role of the Enlightenment in the French Revolution.

humor, heartache, and the murkier sides of keeping family secrets, *Hidden Hurts Revealed* by A. Jean Evans-Jennings is an explosive portrait of how children of rape and incest can survive what haunts them. Boldly transparent, this candid memoir reads like a convincing soap opera, though the levels of depravity and indifference towards children are utterly shocking. With chapter titles like "Inside I Cried: Enough Is Enough," "The Son That Wasn't Mine," and "Responding to a Sister's Plea for Help," the author shares what it is like to move past childhood incidences of incest and rape in order to become a good parent and a loving partner. As she recounts her harrowing journey and how it is she was able to ultimately face her demons so that she might begin to live life on her own terms, her message is not at all about letting bygones be bygones, but to examine, biopsy, and cast off the cancerous memories of one's past.

[The Illuminator](#), Brenda Rickman Vantrease , 2005, 1429909811, 9781429909815. It is England, in the late fourteenth

century, a time when the whim of a lord or the pleasure of a bishop can seal nearly anyone's fate. The printing press has yet to be invented. Books, written only in Latin or Norman French, are rare and costly, painstakingly lettered and illuminated with exquisite paintings---far beyond the reach of ordinary people. But there are cracks in the old feudal order---and in the absolute power of the Church. Finn is a master illuminator who works not only for the Church but also, in secret, for the heretical Oxford cleric John Wycliffe. Under the nose of the powerful Abbot of Broomholm, Finn illuminates pages for Wycliffe---an English translation of the Bible, meant to bring the word of God to the masses. And Finn has another secret, one that will lead both himself and his beloved daughter into ever-increasing peril. Lady Kathryn, the mistress of Blackingham Manor, is a widow who finds herself caught between the King's taxes and the Church's tithes. To protect her sons' inheritance, she strikes a bargain with the abbot---Kathryn will take in the illuminator and his daughter, and gain the monastery's protection. What begins as a hesitant friendship between Finn and Lady Kathryn grows into a passionate alliance that touches off a chain of betrayals, tragedies, and unexpected acts of heroism. Richly detailed and irresistibly compelling, *The Illuminator* is a glorious novel of love, art, religion, and treachery at an extraordinary turning point in history.

The first American frontier lay just beyond the Appalachian Mountains and along the Gulf Coast. Here, successive groups of pioneers built new societies and developed new institutions to cope with life in the wilderness. In this thorough revision of his classic account, Malcolm J. Rohrbough tells the dramatic story of these men and women from the first Kentucky settlements to the closing of the frontier. Rohrbough divides his narrative into major time periods designed to establish categories of description and analysis, presenting case studies that focus on the county, the town, the community, and the family, as well as politics and urbanization. He also addresses Spanish, French, and Native American traditions and the anomalous presence of African slaves in the making of this story.

A book by kids to help your kids deal with cancer in the family When Abigail and Adriennes mom told them she had cancer, they were afraid. When the two sisters (then ages 11 and 9) couldnt find any books for kids that explained what might happen to their mother and what they might expect, they decided to write one themselves. The result? Our Mom Has Cancer, a humorous, honest, hopeful account of the year their mother underwent treatment for breast cancer, delightfully illustrated with drawings by Abigail and Adrienne. This is by far the best of several childrens picturebooks written about a parent with cancer. Because it is written and illustrated by two sisters, it conveys what kids want to know. It [shows] the passage of time during treatment, and it [shows] that people were loving and kind and hopeful in the midst of a rotten time This book is excellent, and I would recommend it to any parent who has been diagnosed with cancer.--a mom from Cedar Rapids, Iowa

[Nonlinear Time Series: Nonparametric and Parametric Methods, Jiangqing Fan, Qiwei Yao](#) , 2008, 0387693955, 9780387693958. This is the first book that integrates useful parametric and nonparametric techniques with time series modeling and prediction, the two important goals of time series analysis. A distinct feature of this book is that it applies many modern nonparametric estimation and testing ideas to time series modeling and model identification, while outlines many useful ideas from more traditional time series analysis. This will enable readers to use modern data-analytic techniques while keeping in touch with traditional approaches, and make the book self-contained. Such a book will benefit researchers and practitioners in various fields such as econometricians, meteorologists, biologists, among others who wish to learn useful time series methods within a short period of time. The book also intends to serve as a reference or text book for graduate students in statistics and econometrics.

[Women, Social Leadership, and the Second World War: Continuities of Class: Continuities of Class, James Hinton](#) , 2002, 0199243298, 9780199243297. The associational life of middle-class women in twentieth-century England has been largely ignored by historians. During the Second World War women's clubs, guilds, and institutes provided a basis for the mobilization of up to a million women, mainly housewives, into unpaid part-time work. Women's Voluntary Service, which was set up by the Government in 1938 to organize this work, generated a rich archive of reports and correspondence which provide the social historian with a unique window into the female public sphere. Questioning the view that the

Second World War served to democratize English society, James Hinton shows how the war enabled middle-class social leaders to reinforce their claims to authority. Displaying 'character' through their voluntary work, the leisured women at the centre of this study made themselves indispensable to the war effort. James Hinton delineates these 'continuities of class', reconstructing intimate portraits of local female social leadership in contrasting settings across provincial England (towns large and small, shire counties, the Durham coalfield), tracing complex and often acerbic rivalries within the voluntary sector, and uncovering gulfs of mutual distrust and incomprehension dividing publicly active women along gendered frontiers of class and party. This study reminds us how much Britain's wartime mobilization relied on a Victorian ethos of public service to cope with the profoundly un-Victorian problems of total war. The women's associations so evocatively explored here reached the apex of their effectiveness during the Second World War, sustaining an uneasy balance between voluntarism and the expanding power of the state. In the longer term female social leaders found themselves marginalized by bureaucracy and professionalization. The stories told here demonstrate that the Second World War changed English society far less than is often assumed. It was not until the 1950s and 1960s that practices and attitudes laid down in the nineteenth century finally lost their purchase.

[Computational Molecular Evolution, Ziheng Yang](#) , 2006, 0198566999, 9780198566991. The field of molecular evolution has experienced explosive growth in recent years due to the rapid accumulation of genetic sequence data, continuous improvements to computer hardware and software, and the development of sophisticated analytical methods. The increasing availability of large genomic data sets requires powerful statistical methods to analyse and interpret them, generating both computational and conceptual challenges for the field. Computational Molecular Evolution provides an up-to-date and comprehensive coverage of modern statistical and computational methods used in molecular evolutionary analysis, such as maximum likelihood and Bayesian statistics. Yang describes the models, methods and algorithms that are most useful for analysing the ever-increasing supply of molecular sequence data, with a view to furthering our understanding of the evolution of genes and genomes. The book emphasizes essential concepts rather than mathematical proofs. It includes detailed derivations and implementation details, as well as numerous illustrations, worked examples, and exercises. It will be of relevance and use to students and professional researchers (both empiricists and theoreticians) in the fields of molecular phylogenetics, evolutionary biology, population genetics, mathematics, statistics and computer science. Biologists who have used phylogenetic software programs to analyze their own data will find the book particularly rewarding, although it should appeal to anyone seeking an authoritative overview of this exciting area of computational biology.

[Who Do You Think You Are?: A Memoir, Alyse Myers](#) , 2008, 1416543058, 9781416543053. "At the heart of this memoir is a compelling mystery. Shortly after Alyse Myers's mother dies, Alyse and her two sisters are emptying their mother's apartment, trying to decide what to discard and what to keep. Alyse covets only one thing - a wooden box that sits in the back of a closet. Its contents have been kept from Alyse her entire life. That box, she hopes, will contain answers to her questions: Who were her parents really, and why did her mother settle for so very little in her life?" "We are transported back in time to the 1960s, to a working-class neighborhood in Queens, New York. It is not a happy home. Alyse's parents are young and good-looking, but they constantly veer between their mutual attraction and contempt. Her parents argue bitterly about everything - money, family, and her father's constant sickness. Her father drifts in and out of their apartment, and what his illness portends is never discussed. After he dies, Alyse's mother, at age thirty-three, retreats to the kitchen table with her cigarettes and resentment, determined to stay there forever." "Alyse, on the other hand, yearns for more in life, including the right to escape. After a childhood of harrowing fights, abject cruelty, and endless uncertainty, Alyse adamantly rejects everything about her mother's life, provoking her mother's infuriated demand, "Who do you think you are?" "A heart-wrenching and ultimately uplifting portrait of a mother and daughter, Who Do You Think You Are? explores the profound and poignant revelations that often come to light only after a parent has died. Balancing childhood memories with adult observations, Alyse Myers writes with candor and eloquence of her journey to adulthood."--BOOK JACKET.

[Philosophy As Fiction: Self, Deception, and Knowledge in Proust, Joshua Landy](#) , 2009, 0195389352, 9780195389357.

Philosophy as Fiction seeks to account for the peculiar power of philosophical literature by taking as its case study the paradigmatic generic hybrid of the twentieth century, Marcel Proust's *In Search of Lost Time*. At once philosophical--in that it presents claims, and even deploys arguments concerning such traditionally philosophical issues as knowledge, self-deception, selfhood, love, friendship, and art--and literary, in that its situations are imaginary and its stylization inescapably prominent, Proust's novel presents us with a conundrum. How should it be read? Can the two discursive structures co-exist, or must philosophy inevitably undermine literature (by sapping the narrative of its vitality) and literature undermine philosophy (by placing its claims in the mouth of an often unreliable narrator)? In the case of Proust

at least, the result is greater than the sum of its parts. Not only can a coherent, distinctive philosophical system be extracted from the Recherche, once the narrator's periodic waywardness is taken into account; not only does a powerfully original style pervade its every nook, overtly reinforcing some theories and covertly exemplifying others; but aspects of the philosophy also serve literary ends, contributing more to character than to conceptual framework. What is more, aspects of the aesthetics serve philosophical ends, enabling a reader to engage in an active manner with an alternative art of living. Unlike the "essay" Proust might have written, his novel grants us the opportunity to use it as a practice ground for cooperation among our faculties, for the careful sifting of memories, for the complex procedures involved in self-fashioning, and for the related art of self-deception. It is only because the narrator's insights do not always add up--a weakness, so long as one treats the novel as a straightforward treatise--that it can produce its training effect, a feature that turns out to be its ultimate strength.

[What Money Can't Buy: The Moral Limits of Markets](#), Michael Sandel , 2012, 0141969806, 9780141969800. Should we pay children to read books or to get good grades? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars, outsourcing inmates to for-profit prisons, auctioning admission to elite universities, or selling citizenship to immigrants willing to pay? Isn't there something wrong with a world in which everything is for sale? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life--medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. In *What Money Can't Buy*, Sandel examines one of the biggest ethical questions of our time and provokes a debate that's been missing in our market-driven age: What is the proper role of markets in a democratic society, and how can we protect the moral and civic goods that markets do not honour and money cannot buy?

[The Siren Years: A Canadian Diplomat Abroad 1937-1945](#), Charles Ritchie , 2011, 1551996782, 9781551996783. Charles Ritchie, one of Canada's most distinguished diplomats, was a born diarist, a man whose daily record of his life is so well written that it leaps from the page. In wartime England, Ritchie, as Second Secretary at the Canadian High Commission, served as private secretary to Vincent Massey, whose second-in-command was Lester B. Pearson, future prime minister

of Canada. In a perfect position to observe both statecraft and the London social whirl that continued even during the war, Ritchie provides a fascinating, perceptive, and (surprisingly) humorous picture of the London Blitz the people in the parks, the shabby streets, the heightened love affairs and the vagaries of the British at war. There are also glimpses of the great, and portraits of noted artists and writers that he knew well. A vivid document of a period and a wonderful piece of writing, *The Siren Years* has become a classic. From the Trade Paperback edition.

[The Jesus I Never Knew, Philip Yancey](#) , 2008, 0310295815, 9780310295815. There is no writer in the evangelical world that I admire and appreciate more. Billy Graham Philip Yancey helps reveal what two thousand years of history covered up. What happens when a respected Christian journalist decides to put his preconceptions aside and take a long look at the Jesus described in the Gospels? How does the Jesus of the New Testament compare to the new, rediscovered Jesus or even the Jesus we think we know so well? Philip Yancey offers a new and different perspective on the life of Christ and his work his teachings, his miracles, his death and resurrection and ultimately, who he was and why he came. From the manger in Bethlehem to the cross in Jerusalem, Yancey presents a complex character who generates questions as well as answers; a disturbing and exhilarating Jesus who wants to radically transform your life and stretch your faith. The Jesus I Never Knew uncovers a Jesus who is brilliant, creative, challenging, fearless, compassionate, unpredictable, and ultimately satisfying. No one who meets Jesus ever stays the same, says Yancey. Jesus has rocked my own preconceptions and has made me ask hard questions about why those of us who bear his name don't do a better job of following him.

It seeks to clarify the central terms of elite discourse, some of which have entered the everyday political vocabulary - 'elitism', 'power elite', 'establishment', 'elite consensus', 'iron law of oligarchy' and 'mass'.It explores the ways in which the descriptions of power relationships can subtly be infiltrated by the values of the observers. For this ECPR Classics edition Professor Parry has added an introduction reviewing significant new developments in elite political science.

[Tackling Benefit Fraud, Great Britain. National Audit Office](#) , 2003, 010292063X, 9780102920635. The Department for Work and Pensions (DWP) spends about 100 billion per year on welfare benefits, more than a quarter of central government expenditure. It is estimated that some 2 billion pounds are lost each year due to fraudulent claims, mostly for Income Support, Jobseeker's Allowance and Housing Benefit. This report by the National Audit Office examines the scale and nature of benefit fraud, as well as the success of the DWP and local authorities to tackle the problem. Overall, the report concludes that fraudsters will continue to operate whilst the gain from cheating outweighs the risk of detection and the likely penalty. The programmes implemented to address the problem have produced some good results, but more needs to be done, such as: dissemination of good practice in order to raise regional performance regarding detection and prevention of fraud and reduce regional variations; and more research to estimate the level of fraud and to evaluate the deterrent effect of the different sanctions available. Currently, DWP policy restricts the use of cautions and penalties to frauds below 1,500. Raising this limit would allow greater flexibility in the use of these options as alternatives to prosecution in borderline cases.

[Emotionally Healthy Spirituality: Unleash a Revolution in Your Life in Christ, Peter Scazzero](#) , 2011, 0849946425, 9780849946424. What Are You Missing? Peter Scazzero learned the hard way: you cant be spiritually mature while remaining emotionally immature. Even though Pete was pastor of a rapidly growing church, he did what most people do: avoid conflict in the name of Christianity ignore his anger, sadness, and fear use God to run from God live without boundaries Eventually God awakened him to a biblical integration of emotional health, a profound relationship with Jesus, and the historical practices of contemplative spirituality. It created nothing short of a spiritual revolution, utterly transforming him and his church. In this best-selling book Pete outlines his journey and the signs of emotionally unhealthy spirituality. Then he provides seven biblical, reality-tested ways to break through to the revolutionary life Christ meant for you. Emotionally Healthy Spirituality is presently used in more than twenty-six countries to equip churches in a deep, beneath-the-surface spiritual formation paradigm that truly transforms lives.

[The Global Stock Market: Issuers, Investors, and Intermediaries in an Uneven World, Dariusz Wjck](#) , 2012, 019966630X, 9780199666300. Why do some companies stay out of stock markets? How crucial are stock markets for competition between financial centres? How can local information help investors outperform the market? Whilst mainstream financial economics treats stock markets as consisting of anonymous actors interacting in space, with no consideration of the friction caused by distance or geography, this book offers a comprehensive and up-to-date picture of the global stock market by focusing on the relationships between issuers, investors, and intermediaries, and how these relationships impact on the performance of stock markets and the economy of cities, countries, and the world. The book uses rich data and global case studies to examine the rise of emerging markets, the impact of the global financial crisis, the revolution in the stock exchange business model, and the continued dominance of London and New York as stock market centres. Drawing on economic geography, financial economics, sociology, history, and globalization studies, the book explores the geographical constitution and footprint of stock markets and contributes to the broader debate on the role of stock markets in the global economy. Its conclusions are relevant to investors, companies issuing stocks, exchanges, analysts, investment banks, and policy-makers.

[Raw Life, New Hope: Decency, Housing and Everyday Life in a Post-apartheid Community, Fiona C. Ross](#) , 2010, 1919895272, 9781919895277. The Cape Flats, that windswept, treeless, barren, sandy area between two oceans at Africa's southern tip, is home to more than a million people, approximately one quarter of Cape Town's population. Many live in the sprawling shack settlements that ring the city. The post-apartheid state is attempting to eradicate such settlements by providing formal houses in planned residential estates. This book is concerned with the residents of one such shack settlement, The Park, who moved to new, formal' houses in The Village, at the turn of the millennium. Based on 17 years of work, the ethnography introduces readers to core social science topics and modes of theorising. There are few sustained studies of the lives, aspirations and coping strategies of people in impoverished circumstances in South Africa. Still fewer take a longitudinal perspective. This approach has allowed the author to trace how ordinary people attempt to live in accord with their ideals of decency under almost impossible circumstances and to trace the effects of

material changes in their lives after 1994 -- including democratic transformations and, significantly for the residents, the provision of RDP housing. The book's chapters are separated by illustrative breaks (photographs, anecdotes, recipes, philosophical reflections on subjects that arose during conversations, maps etc.) that elicit a sense of the everyday, the provocations it poses and how people engage with and attempt to solve the problems of poverty. Detailed descriptions, lively characterisation, verbatim quotes from interviews and conversations give a sense of the particularity of people's lives and make the characters come alive to readers. An accessible and jargon-free style creates a novelistic feel which will appeal to lay readers as well as academics.

This book addresses a dilemma at the heart of counter-terrorist policy: is it ever justifiable to torture terrorists in order to save the lives of others, the so-called 'ticking bomb' scenario? The book opens with an analysis of the pure moral argument from the standpoint of the individual as torturer. It then looks at the

issues that arise once a state has decided to sanction torture in certain situations: how to establish factually that the situation is urgent, deciding who to torture, training people to carry out torture, and the efficacy of torture as a means of gathering information. The final part examines attempts to operate legal systems which tolerate torture; how they relate to the criminal law notion of necessity and to international human rights norms. After examining the utilitarian arguments for torture, and the impact on a society of permitting torture, the author presents a powerful argument for maintaining the absolute legal prohibition.

[Against the Modern World : Traditionalism and the Secret Intellectual History of the Twentieth Century: Traditionalism and the Secret Intellectual History of the Twentieth Century, Mark Sedgwick](#) , 2004, 019988241X, 9780199882410. The first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States. In the nineteenth century, at a time when progressive intellectuals had lost faith in Christianity's ability to deliver religious and spiritual truth, the West discovered non-Western religious writings. From these beginnings grew Traditionalism, emerging from the occultist milieu of late nineteenth-century France, and fed by the widespread loss of faith in progress that followed the First World War. Working first in Paris and then in Cairo, the French writer Rene Guenon rejected modernity as a dark age, and sought to reconstruct the Perennial Philosophy-- the central religious truths behind all the major world religions --largely on the basis of his reading of Hindu religious texts. A number of disenchanted intellectuals responded to Guenon's call with attempts to put theory into practice. Some attempted without success to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalism finally provided the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and at the end of the twentieth century began to enter the debate in the Islamic world about the desirable relationship between Islam and modernity

[The Structure of Evolutionary Theory, Stephen Jay Gould](#) , 2002, 0674006135, 9780674006133. The worlds most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time a landmark publication, both for its historical sweep and for its scientific vision. With characteristic attention to detail, Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism: that natural selection works on organisms, not genes or species; that it is almost exclusively the mechanism of adaptive evolutionary change; and that these changes are incremental, not drastic. Next, he examines the three critiques that currently challenge this classic Darwinian edifice: that selection operates on multiple levels, from the gene to the group; that evolution proceeds by a variety of mechanisms, not just natural selection; and that causes operating at broader scales, including catastrophes, have figured prominently in the course of evolution. Then, in a stunning tour de force that will likely stimulate discussion and debate for decades, Gould proposes his own system for integrating these classical commitments and contemporary critiques into a new structure of evolutionary thought. In 2001 the Library of Congress named Stephen Jay Gould one of Americas eighty-three Living Legends people who embody the quintessentially American ideal of individual creativity, conviction, dedication, and exuberance. Each of these qualities finds full expression in this peerless work, the likes of which the scientific world has not seen and may not see again for well over a century.

[Chinese Social Policy in a Time of Transition, Douglas Besharov, Karen Baehler](#) , 2013, 019999031X, 9780199990313.

The story of China's spectacular economic growth is well known. Less well known is the country's equally dramatic, though not always equally successful, social policy transition. Between the mid- 1990s and mid-2000s-the focal period for this book-China's central government went a long way toward consolidating the social policy framework that had gradually emerged in piecemeal fashion during the initial phases of economic liberalization. Major policy decisions during the focal period included adopting a single national pension plan for urban areas, standardizing unemployment insurance, (re)establishing nationwide rural health care coverage, opening urban education systems to children of rural migrants, introducing trilingual education policies in ethnic minority regions, expanding college enrolment, addressing the challenge

of HIV/AIDS more comprehensively, and equalizing social welfare spending across provinces, among others. Unresolved is the direction of policy in the face of longer-term industrial and demographic trends-and the possibility of a chronically weak global economy. Chinese Social Policy in a Time of Transition offers scholars, practitioners, students, and policymakers a foundation from which to explore those issues based on a composite snapshot of Chinese social policy at its point of greatest maturation prior to the 2007 global crisis.

[Combat Leader to Corporate Leader: 20 Lessons to Advance Your Civilian Career, Chad Storlie](#) , 2010, 0313383324, 9780313383328. Military training and experience provide a superb foundation for excelling in business. The executive search firm Korn Ferry discovered in a 2006 study that CEOs with military experience out-performed their civilian peers. "Combat Leader to Corporate Leader: 20 Lessons to Advance Your Civilian Career" outlines 20 lessons describing how veterans can apply their universal military training to succeed and excel in the business world. Combat Leader to Corporate Leader teaches Army, Navy, Marine, and Air Force veterans and non-military professionals how to apply successfully the skills that have made the U.S. military successful. The book is divided into four sections and aligned with military combat planning tools: (1) understanding the company and business environment, (2) planning a robust solution, (3) rigorous execution to meet the plan's goals, and (4) improving people and process for better results. Each section offers specific examples, advice, and formats that directly address the challenge of translating military experience into business skill sets. Among other issues, the book will teach vets how to showcase military experience and value to get hired, how to apply combat experience to a career in business, how to avoid the mistakes veterans commonly make in the workplace, and how to customize and translate their own unique military experiences to their business. At the conclusion of the book, veterans and non-veterans alike will have the skills to understand, plan, execute, and improve their careers and business ventures.

[Richard B. Zabel, James J. Benjamin](#) , 2009, 0979997585, 9780979997587. As the United States strives for a vigorous and effective response to radical Islamist terrorism around the globe, our country remains embroiled in an important and difficult national debate over when and how to detain and prosecute suspected terrorists. As part of this debate, some have argued for the creation of new, untested legal regimes to preventively detain and/or prosecute persons suspected of complicity in terrorism. However, often missing from the discussion is the fact that the federal courts are continuing to build on their proven track record of serving as an effective and fair tool for incapacitating terrorists. We have updated our May 2008 report, In Pursuit of Justice, to include cases and developments from the past year. Our research shows a conviction rate of more than 91% since September 11, 2001 and many notable successes in a wide variety of terrorism prosecutions.

[Cisco IOS Cookbook, Kevin Dooley, Ian Brown](#) , 2006, 0596554826, 9780596554828. Never has something cried out for a cookbook quite as much as Cisco's Internetwork Operating System (IOS). IOS is powerful and flexible, but also confusing and daunting. Most tasks can be accomplished in several different ways. And you don't want to spend precious time figuring out which way is best when you're trying to solve a problem quickly. That's what this cookbook is for. Fortunately, most router configuration tasks can be broken down into several more or less independent steps: you configure an interface, you configure a routing protocol, you set up backup links, you implement packet filters and other access control mechanisms. What you really need is a set of recipes that show you how to perform the most common tasks, so you can quickly come up with a good configuration for your site. And you need to know that these solutions work: you don't want to find yourself implementing a backup link at 2 A.M. because your main link is down and the backup link you set up when you installed the router wasn't quite right. Thoroughly revised and expanded, Cisco IOS Cookbook, 2nd Edition, adds sections on MPLS, Security, IPv6, and IP Mobility, and presents solutions to the most common configuration problems, including:

- Configuring interfaces of many types, from serial to ATM and Frame Relay
- Configuring all of the common IP routing protocols (RIP, EIGRP, OSPF, and BGP)
- Configuring authentication
- Configuring other services, including DHCP and NTP
- Setting up backup links, and using HSRP to configure backup routers
- Managing the router, including SNMP and other solutions
- Using access lists to control the traffic through the router

If you work with Cisco routers, you need a book like this to help you solve problems quickly and effectively. Even if you're experienced, the solutions and extensive explanations will give you new ideas and insights into router configuration. And if you're not experienced--if you've just been given responsibility for managing a network with Cisco routers--this book could be a job-saver.

Her words are the very particular stones and weather, the rivers and homes, the creatures and people, trapped and free in their momentary events, in their momentary landscapes, the resonances, fears and joys of the many worlds of her poems. The ten papers that make up this volume were originally presented at a conference on 'The Greek and Roman Historians', held at the University of Leeds in 1983. Some of the articles investigate in detail the assumptions, prejudices and methods, which were brought to their works by writers as separate in time as Herodotus and Ammianus, as opposed in outlook as Thucydides and Dionysius, or as different in practical approach as Xenophon, Plutarch and Tacitus. Other papers, more wide-ranging in scope, examine respectively the validity of the traditions about early Rome, the function of historical writing in Rome of the second and first centuries BC, and the contemporary and later source material for the Caesarian tyrannicides. In an Epilogue the editors discuss the main themes that emerge from the collection.

[Delivered from Distraction, Edward M. Hallowell, M.D., John J. Ratey, M.D.](#) , 2005, 0345490983, 9780345490988. In 1994, *Driven to Distraction* sparked a revolution in our understanding of attention deficit disorder. Widely recognized as the classic in the field, the book has sold more than a million copies. Now a second revolution is under way in the approach to ADD, and the news is great. Drug therapies, our understanding of the role of diet and exercise, even the way we define the disorder all are changing radically. And doctors are realizing that millions of adults suffer from this condition, though the vast majority of them remain undiagnosed and untreated. In this new book, Drs. Edward M. Hallowell and John J. Ratey build on the breakthroughs of *Driven to Distraction* to offer a comprehensive and entirely up-to-date guide to living a successful life with ADD. As Hallowell and Ratey point out, attention deficit disorder is a highly misleading description of an intriguing kind of mind. Original, charismatic, energetic, often brilliant, people with ADD have extraordinary talents and gifts embedded in their highly charged but easily distracted minds. Tailored expressly to ADD learning styles and attention spans, *Delivered from Distraction* provides accessible, engaging discussions of every aspect of the condition, from diagnosis to finding the proper treatment regime. Inside you'll discover whether ADD runs in families, new diagnostic procedures, tests, and evaluations, the links between ADD and other conditions, how people with ADD can free up their inner talents and strengths, the new drugs and how they work, and why they're not for everyone. Exciting advances in nonpharmaceutical therapies, including changes in diet, exercise, and lifestyle, how to adapt the classic twelve-step program to treat ADD, sexual problems associated with ADD and how to resolve them, strategies for dealing with procrastination, clutter, and chronic forgetfulness. ADD is a trait, a way of living in the world. It only becomes a disorder when it impairs your life. Featuring gripping profiles of patients with ADD who have triumphed, *Delivered from*

Distraction is a wise, loving guide to releasing the positive energy that all people with ADD hold inside. If you have ADD or care about someone who does, this is the book you must read. From the Hardcover edition.

[Norman Franks](#) , 2005, 1904943098, 9781904943099. Ton-up Lancs is a welcome reassessment of a study which first appeared under the 'Claims to Fame' series. Since that publication years ago, information and photographs continued to be sent to and researched and collected by the author, so much so that a complete revision was necessary, with a new 100-sortie aircraft added to the list, and with many more photographs of the aircraft and men who flew in these very special Avro Lancs. Each aircraft's history is recorded, supported by stories from aircrew that flew them, along with what happened to them once - or if - they survived. The most famous is 'Queenie' (W5868), the only one still in existence and which can be seen in the Bomber Command Hall at the RAF Museum, Hendon. She, as with some others, has some controversial accounting regarding the actual number of operations flown, which the book covers in full. Such controversies can also be explained by the detailed listing of each raid flown by each pilot and crew during 1942-1945, on sorties all over Hitler's Third Reich, Northern Italy, during support missions before and after D-Day, as well as in attacking V1 rocket launcher sites in Northern France. supported by over 200 photographs reproduced throughout the book, many from personal albums which have not been published before.

The book helps the reader realize the body and the mind are not two independent essences to be treated separately, but must be treated as a single whole. The reader gains insight into the power and results of natural and spiritual healing from a science-oriented practitioner. The unique book, written in easy-to-understand terms, is a desktop guide to health for those interested in the preservation of health and the maintenance of karma. The writer is unique. Her educational and scientific background is not normally associated with the gift of natural healing. Traditional science has not quite recognized a gift such as this without analytical proof. Yet, history and folklore traces individuals with the natural healing gift throughout the ages. This book is a modern day encounter between friends and their documented journey together, battling the ravages of cancer, and their ultimate victory.

[Without Apology: Andrea Dworkin's Art and Politics, Cindy Jenefsky, Ann Russo](#) , 1998, 0813318262, 9780813318264.

Without Apology illuminates the politics and artistic practices of Andrea Dworkin, arguably one of the most daring, innovative, and controversial feminists in the United States. Coauthor of civil rights antipornography laws, life-long political activist, and international lecturer and consultant on issues of sexual violence and exploitation, Dworkin has a prolific and distinguished writing career. She has published thirteen books of fiction and nonfiction, and her work has been translated into twelve languages. This is the first-ever book-length analysis of Dworkin's feminist politics and the first critical analysis to examine her controversial political ideas in light of the literary dimensions of her prose. Cindy Jenefsky, with Ann Russo, looks at Dworkin's major nonfiction works including *Woman Hating*, *Pornography: Men Possessing Women*, and *Intercourse* in terms of the rhetorical dynamics animating her political ideas. Also included within this analysis are Jenefsky's lengthy interviews with Dworkin, which focus on her identity as an artist and on the artistic principles guiding her work. The result is a novel reinterpretation of Dworkin's politics and a brilliantly clear analysis of the political nature of artistic practice for readers interested in literary and rhetorical criticism, feminist theory and activism, the volatile debates over pornography and civil rights, and the relationship between contemporary sexual practices and male power systems.

Purchasers can download a free scanned copy of the original book (without typos) from the publisher. 1909. Excerpt: ... LESSON XII. DOMINANT DESIRE; SOVEREIGN WILL. Aphorism XVII informs us that "The Three Principles--Substance, Motion and Consciousness-- are equally under Law." The leading scientific minds of the day hold that the Reign of Law is operative not only over matter and motion, but also over mind. There are but few psychologists who hold otherwise, although a few are reluctant to admit that the operations of human volition are caused, and such therefore hold on to the old dogma of "causelessness" although candidly admitting that the only other alternative is the theory of Chance. This reluctance may be explained by the influence of the old theology which held that the admission of cause in volition would annul the doctrine of "free will" (in the sense of free choice), and would destroy man's moral responsibility. The theologians, however, do not accept the alternative of Chance, but murmur something about "special provisions of Providence," without explaining what they mean by this. But all denials of the operation of universal law on the mental plane are in direct defiance of the modern scientific knowledge of the laws of psychology, and the common experience of the race which informs us that people act and choose because of motives and reasons. And all human education is based upon this understanding and principle. The trouble with the theologians is that they confuse Law, Order, and Sequence, with the old fetish of Fate, Destiny, and Predestination. They recognize the logical absurdity of holding one morally responsible for doing what for all eternity it has been predestined, predetermined, or fated one should do. When Determination is divorced from Predetermination, a new light is seen. Notwithstanding the

theological reluctance, its advocates nevertheless act as if psychological laws...

[From Paris to Peoria : How European Piano Virtuosos Brought Classical Music to the American Heartland: How European Piano Virtuosos Brought Classical Music to the American Heartland, Southwestern Baptist Theological Seminary R. Allen Lott Professor of Music History School of Church Music](#) , 2003, 0195348893, 9780195348897. It's difficult to imagine Franz Liszt performing in Peoria, but his contemporary and foremost rival, Sigismund Thalberg, did just that. During the mid-nineteenth century, Americans in more than a hundred cities--from Portland, Maine to Dubuque, Iowa to Mobile, Alabama--were treated to performances by some of Europe's most celebrated pianists. From Paris to Peoria deftly chronicles the visits of five of these pianists to the America of Mark Twain. Whether performing in small railroad towns throughout the Midwest or in gold-rush era California, these five charismatic pianists--Leopold de Meyer, Henri Herz, Sigismund Thalberg, Anton Rubinstein, and Hans von Bulow--introduced many Americans to the delights of the concert hall. With humor and insight, R. Allen Lott describes the glamour and the drudgery of the touring life, the transformation of American audiences from boisterous to reverent, and the establishment of the piano recital as a viable artistic and financial enterprise. Lott also explores the creative and sometimes outlandish publicity techniques of managers seeking to capitalize on prosperous but uncharted American markets. The result of extensive archival research, From Paris to Peoria is richly illustrated with concert programs, handbills, caricatures, and maps. A companion website, www.rallenlott.info, includes a comprehensive list of repertoires and itineraries, audio music examples, and transcriptions of selected primary sources. Certain to delight pianists, musicologists, and historians, From Paris to Peoria is an engaging, thoroughly researched, and often funny account of music and culture in nineteenth-century America.

[Democracy and the New Religious Pluralism, Thomas Banchoff](#) , 2007, 0195307224, 9780195307221. Religious pluralism is everywhere in today's politics. Increased immigration flows, the collapse of communism, and the globalization of communications technologies have all fostered a wider variety of religious beliefs, practices, and organizations within and across democratic societies. This is true in both the United States and Europe, where growing and diverse minority communities are transforming the political landscape. As a result, controversies over such things as headscarves and depictions of Mohammed are unsettling a largely secular Europe, while a Christian majority in the US faces familiar questions about church-state relations amidst unprecedented religious diversity. Far from receding into the background, religious language pervades arguments around established issues such as abortion and capital punishment, and new ones such as stem cell research and same-sex marriage. In Democracy and the New Religious Pluralism, leading scholars from multiple disciplines explore these dynamics and their implications for democratic theory and practice. What are the

contours of this new religious pluralism? What are its implications for the theory and practice of democracy? Does increasing religious pluralism erode the cultural and social foundations of democracy? To what extent do different religious communities embrace similar -- or at least compatible -- ethical and political commitments? By seeking answers to these questions and revealing religious pluralism as both a source of animosity and a potent force for peaceful engagement, this book offers a revealing look at the future of religion in democratic societies.

[In the Wake of Terror: Medicine and Morality in a Time of Crisis, Jonathan D. Moreno](#) , 2004, 0262633027, 9780262633024. The war on terrorism and the threat of chemical and biological weapons have brought a new urgency to already complex moral and bioethical questions. In the Wake of Terror presents thought-provoking essays on many of the troubling issues facing American society, written by experts from the fields of medicine, health care policy, law, political science, history, philosophy, and theology. One of the first potential casualties of catastrophic circumstances is civil liberties. In the past, medical experiments conducted for national security purposes have violated ethical standards, and this book questions whether current policy provides sufficient safeguards against further abuses. It also focuses on public health issues, offering contrasting views on the extent to which civil authorities should be allowed to restrict freedom of movement in the name of national security and debating whether aggressive public health interventions improve public confidence and cooperation or detract from them. A major area of concern is preparedness for future terrorist attacks. Chapters are devoted to ethical issues involved in the development, distribution, and rationing of vaccines and antidotes; resource allocation and medical triage; the moral duties of emergency health workers and other first responders; and the obligations of private entities such as managed care organizations and pharmaceutical companies. Contributors also address the implications of terrorism for our health insurance system and the role of genetic advances in bioterrorism. Underlying all of these issues, the authors argue, is the need to maintain a spirit of social solidarity, which can in turn only be achieved if preparations are publicly acknowledged and generally regarded as both prudent and fair.

[Naughty Madge and Other Old-Fashioned Children's Stories, Bothwell Press](#) , 2013, 098553530X, 9780985535308. This is a compilation of old-fashioned children's stories--probably from the late nineteenth century--originally published by M.A. Donohue Company in the early 1900s. While politically incorrect by today's standards, the stories are entertaining and shed light on an earlier time in our nation's history. The book includes numerous engravings from the period. Note: For the most part, this book is a facsimile reproduction of a book originally published in the early 1900s. As such, this new book preserves the imperfections in the original book. We believe these imperfections (such as broken type or other typesetting irregularities) convey a sense of the cultural context of the original work and add to the enjoyment of the text.

[A Loonie for Luck, Roy MacGregor](#) , 2002, 0771054807, 9780771054808. In February 2002, the greatest hockey teams

this country could muster headed to Salt Lake City to compete in the Winter Olympics. Our men and women hoped to go all the way to the finals, but it had been fifty long years since the Canadians had won Olympic gold. In the past, they had come close - it was just that luck always seemed to be against them. This time, however, their chances to end the long drought were good. The women looked set for a medal - although the all-powerful American team stood between them and the ultimate prize. The Canadian men faced strong opponents, too, but prospects were good for the all-star team assembled by the great Wayne Gretzky. And this time, both teams had a secret weapon. So secret, in fact, they didn't even know it existed. At first. Like all good secrets this one was too good not to pass along. Under the surface at centre ice, Trent Evans had hidden a Canadian loonie. The expert ice maker had been invited down from Edmonton to help install the ice for the Games, and this was his little good-luck charm for our Olympic hockey teams. Perhaps, he figured, the guys could use some "home ice" advantage. "A Loonie for Luck is the true story of that loonie and the magic it wove at Salt Lake City. It follows Wayne Gretzky, Trent Evans, and the men's and women's teams through their time at the Games. And it pays tribute to the role of superstition and chance in hockey - a part of the sport not always acknowledged, but one that brings real magic to the game. With the close co-operation of Wayne Gretzky and Trent Evans, Roy MacGregor tells the inside story of how the coin came to be in Trent Evans' pocket and then buried under centre ice. He tellshow, throughout the Games, the loonie was in danger of being uncovered as the secret began to spread, and how, as the tournament progressed, with the players in need of every break they could get, the good luck miraculously held. This true story, brilliantly illustrated by Bill Slavin, is full of suspense, humour, and charm. It will delight every Canadian who felt a surge of pride for our athletes at Salt Lake City.

[Integrated Learning, Ken Gnanakan](#) , 2011, 0198074360, 9780198074366. This book upholds the idea of learning and education as a means to individual development and social empowerment. It presents a holistic picture, looking at learning as an integral part of one's social and physical life. The book broadly covers: " Creativity in classroom education with a focus on interdisciplinary approach and positive teacher-student interaction " The essence of good education with a deep concern for the impact on the social order " Teachings of Indian and Western educational thinkers-Gandhi, Confucius, Plato, Freire, and Tagore-and their commitment to individual well-being " Application of learning to real-world situations Accessible and reader-friendly, it will be an indispensable resource to students and teachers of educational studies and to the general reader interested in the true spirit of education.

[The Madman's Middle Way: Reflections on Reality of the Tibetan Monk Gendun Chopel, Donald S. Lopez Jr.](#) , 2007, 0226493172, 9780226493176. Gendun Chopel is considered the most important Tibetan intellectual of the twentieth century. His life spanned the two defining moments in modern Tibetan history: the entry into Lhasa by British troops in

1904 and by Chinese troops in 1951. Recognized as an incarnate lama while he was a child, Gendun Chopel excelled in the traditional monastic curriculum and went on to become expert in fields as diverse as philosophy, history, linguistics, geography, and tantric Buddhism. Near the end of his life, before he was persecuted and imprisoned by the government of the young Dalai Lama, he would dictate the Adornment for Nagarjunas Thought, a work on Madhyamaka, or Middle Way, philosophy. It sparked controversy immediately upon its publication and continues to do so today. The Madmans Middle Way presents the first English translation of this major Tibetan Buddhist work, accompanied by an essay on Gendun Chopels life liberally interspersed with passages from his writings. Donald S. Lopez Jr. also provides a commentary that sheds light on the doctrinal context of the Adornment and summarizes its key arguments. Ultimately, Lopez examines the long-standing debate over whether Gendun Chopel in fact is the author of the Adornment; the heated critical response to the work by Tibetan monks of the Dalai Lamas sect; and what the Adornment tells us about Tibetan Buddhisms encounter with modernity. The result is an insightful glimpse into a provocative and enigmatic work that will be of great interest to anyone seriously interested in Buddhism or Asian religions.

undergraduate students and where they attend school, as well as the costs of attendance, and the characteristics of the students who receive federal financial aid.
