This work has been written with four main aims: to introduce students in their early studies to the basic pathological processes that underlie all diseases; to relate the disease process to the clinical symptoms and signs that are manifest to the patients, and are noted and interpreted by the clinician; to provide factual detail about the common and important diseases so that students are aware of the predisposing factors, local and distant effects, and the natural outcome in each case; and to indicate the relevant ways in which laboratory investigation can establish the true nature of the illness and monitor its progress and response to natural therapy.

[Regional Geography of the United States and Canada, Tom L. McKnight](#) , 2004, 0131014730, 9780131014732. The well-known author of this best-selling book focuses on landscape appreciation of the regional geography of the United States and Canada. He emphasizes the description and interpretation of North American landscapes, including their development. Issues such as ecosystems, urban changes, agriculture, and inland waterways are all visited in depth. Up-to-date maps and information make this book different from any other on the market; it covers such topics as: the North American continent; the physical environment; population; cities; regions; the Atlantic Northeast; French Canada; megalopoli; the Appalachians and Ozarks; the inland South; the Southeastern coast; the Heartland; the Great Plains and prairies; the Rocky Mountains; the intermontane West; the California region; the Hawaiian Islands; the North Pacific coast; the boreal forest; and the Arctic. Not only an excellent desk reference for geographers and geologists, this book can be an excellent addition to any home or school library.

[Fiji, , , Brij V. Lal](#) , 2006, 0112905897, 9780112905899. The main purpose of the British Documents on the End of Empire Project (BDEEP) is to publish documents from British official archives on the ending of colonial and associated rule and on the context in which this took place. The Republic of the Fiji Islands, is an island nation in the South Pacific Ocean, east of Vanuatu, west of Tonga and south of Tuvalu. The country occupies an archipelago of about 322 islands,

of which 106 are permanently inhabited; in addition, there are some 522 islets. The islands came under British control as a colony in 1874. It was granted independence in 1970. This publication sets out the documentary progress to independence. The book, divided into seven chapters, contains documents covering the political and economic background to Fiji's constitutional evolution; the aspirations and national interests of Fijians; the London constitutional conference and its aftermath, July 1965 - September 1967; the Alliance government, January 1968 - September 1969 and finally documents leading towards independence and the achievement of independence. The book is based overwhelmingly on hitherto unpublished Colonial Office records which documents Fiji's progress over a ten-year period leading to independence in 1970.

[Volume 1, , Bingen Yang](#) , 2005, 0127877673, 9780127877679. Stress, Strain, and Structural Dynamics is a comprehensive and definitive reference to statics and dynamics of solids and structures, including mechanics of materials, structural mechanics, elasticity, rigid-body dynamics, vibrations, structural dynamics, and structural controls. This text integrates the development of fundamental theories, formulas and mathematical models with user-friendly interactive computer programs, written in the powerful and popular MATLAB. This unique merger of technical referencing and interactive computing allows instant solution of a variety of engineering problems, and in-depth exploration of the physics of deformation, stress and motion by analysis, simulation, graphics, and animation. This book is ideal for both professionals and students dealing with aerospace, mechanical, and civil engineering, as well as naval architecture, biomechanics, robotics, and mechatronics. For engineers and specialists, the book is a valuable resource and handy design tool in research and development. For engineering students at both undergraduate and graduate levels, the book serves as a useful study guide and powerful learning aid in many courses. And for instructors, the book offers an easy and efficient approach to curriculum development and teaching innovation. * Combines knowledge of solid mechanics--including both statics and dynamics, with relevant mathematical physics and offers a viable solution scheme. * Will help the reader better integrate and understand the physical principles of classical mechanics, the applied mathematics of solid mechanics, and computer methods. * The Matlab programs will allow professional engineers to develop a wider range of complex engineering analytical problems, using closed- solution methods to test against numerical and other open-ended methods. * Allows for solution of higher order problems at earlier engineering level than traditional textbook approaches.

The book assumes no prior background in geometric control theory; however, a firstyear graduate course in linear control systems is desirable. Since not all control researcherstoday are exposed to geometric control theory, the book alsoadopts a tutorial style by way of examples that illustrate the geometric andabstract algebra concepts used in linear geometric control. In addition, thematrix calculations required for the studied control synthesis problems oflinear multivariable control are illustrated via a set of running design examples.As such, some of the design examples are of higher dimension thanone may typically see in a text; this is so that all the geometric features of thedesign problem are illuminated.

From buying and selling PC hardware to product development and selling services, "Start Your Own Computer Business: The Unembellished Guide" offers a realistic picture of making it on your own. Bestselling author, Morris Rosenthal, has 15 years of experience in the computer business, building and repairing thousands of PCs and helping hundreds of customers. The book mixes practical advice and cautions with real-world anecdotes of successes and failures. Dollars and cents play a prominent role in the book, as Rosenthal stresses that the real challenge of succeeding in the computer business is the business part of the equation. Managing employees, inventory and scarce financial resources are covered,

along with how to remain sane and when to quit. The book is illustrated with a series of original cartoons on the computer business subject.

[Imagining Religion: From Babylon to Jonestown, Jonathan Z. Smith](#) , 1982, 0226763609, 9780226763606. With this influential book of essays, Jonathan Z. Smith has pointed the academic study of religion in a new theoretical direction, one neither theological nor willfully ideological. Making use of examples as apparently diverse and exotic as the Maori cults in nineteenth-century New Zealand and the events of Jonestown, Smith shows that religion must be construed as conventional, anthropological, historical, and as an exercise of imagination. In his analyses, religion emerges as the product of historically and geographically situated human ingenuity, cognition, and curiosity simply put, as the result of human labor, one of the decisive but wholly ordinary ways human beings create the worlds in which they live and make sense of them. "These seven essays . . . display the critical intelligence, creativity, and sheer common sense that make Smith one of the most methodologically sophisticated and suggestive historians of religion writing today. . . . Smith scrutinizes the fundamental problems of taxonomy and comparison in religious studies, suggestively re-describes such basic categories as canon and ritual, and shows how frequently studied myths may more likely reflect situational

incongruities than vaunted mimetic congruities. His final essay, on Jonestown, demonstrates the interpretive power of the historian of religion to render intelligible that in our own day which seems most bizarre."Richard S. Sarason, Religious Studies Review

[Phase-Modulated Optical Communication Systems, Keang-Po Ho](#) , 2005, 0387255559, 9780387255552. Fiber-optic communication systems have revolutionized our telecommunication infrastructures currently, almost all telephone land-

line, cellular, and internet communications must travel via some form of optical fibers. In these transmission systems, neither the phase nor frequency of the optical signal carries information only the intensity of the signal is used. To transmit more information in a single optical carrier, the phase of the optical carrier must be explored. As a result, there is renewed interest in phase-modulated optical communications, mainly in direct-detection DPSK signals for long-haul optical communication systems. When optical amplifiers are used to maintain certain signal level among the fiber link, the system is limited by amplifier noises and fiber nonlinearities. Phase-Modulated Optical Communication Systems surveys this newly popular area, covering the following topics: - The transmitter and receiver for phase-modulated coherent lightwave systems - Method for performance analysis of phase-modulated optical signals - Direct-detection DPSK signal with fiber nonlinearities, degraded by nonlinear phase noise and intrachannel effects - Wavelength-division-multiplexed direct-detection DPSK signals - Multi-level phase-modulated optical signals, such as the four-phase DQPSK signal. Graduate students, professional engineers, and researchers will all benefit from this updated treatment of an important topic in the optical communications field.

What art student doesn't groan at the hackneyed problems too often assigned in art classes, such as a still life and chianti bottles, old chairs, and large cloths draped over the whole scene? Here, in the first book ever of its kind, is a collection of interesting and original ideas for drawing projects, contributed by art instructors from all over the United States (and a few from Canada, Great Britain, and Australia) who have invented successful alternatives to humdrum exercises. The accompanying illustrations demonstrate ways in which their students have addressed the assignments and are included to help the reader visualize what might result from the written description. This book will be a welcome resource for art teachers and students in high school, college, graduate programs, and art schools, as well as artists undertaking independent study. Among the 100 drawing ideas are: * Drawing with a piece of charcoal held between the toes--to explore how limitations often bring out great creativity. * Adopting a mouse's-eye view of a still life--an unusual twist on perspective drawing. * Making a

self-portrait that does not show the head but tells something significant about the artist through the depiction of other parts of the body--an original way of investigating "Who am I?" * Constructing a figure from assembled objects and then drawing it--for those times when a live human model is unavailable. * Creating a personal visual representation of the blues musical genre--to discover how one art form engenders another.

[Space Grunts, Dayton Ward](#) , 2009, 0981895743, 9780981895741. Space Grunts is the third anthology of the Full-Throttle Space Tales series. Edited by Dayton Ward, Space Grunts contains 18 hard-hitting tales of soldiers in space, by established and rising-star authors. Dispatches from the front lines contained in this volume: "98 Hill" by Julie McGilliard: A young soldier far from home writes a letter to her mother, describing the overwhelming experience of fighting an enemy on a distant planet. "The Thing with Private Leon's Face" by David Boop: A mysterious entity takes on the form of a dead soldier, bringing with it a harsh message for humanity. "Blowback" by Derek Tyler Attico: A genetically-engineered subspecies of Humanity has finally had enough of being second class citizens. Time to send in the Marines! "Rush" by Jeff D. Jacques: In the aftermath of a devastating ground battle, a lone soldier discovers there's more to the enemy than meets the eye. "Price of Command" by Irene Radford: Continuing the adventures of Katie Talbet, younger sister of the O'Hara brothers from the Stargods Trilogy, when she is asked to betray the outlawed family she has just found and learned to love after a twenty-year separation. "Target Market" by James Swallow: Near-future war is big business, and big ratings! "Unchained" by Selina Rosen: Stashes was the planet of the damned; at least that's what it was called by the soldiers who got sent there...those who survived, anyway. "It's Not A Game" by Jean Johnson: For a soldier, racing through a forest is never a game. "Truth Metric" by Geoffrey Thorne: A commanding officer faces the unpleasant duty of notifying a parent about the death of their son, and explaining how and why he died. "Finders Keepers" by Scott Pearson: Unknown aliens attack the starship Alliance and render the entire crew unconscious...except for a lone Marine who finds herself trapped in a deadly game of cat-and-mouse with a single intruder who has friends on the way. "Who Stand and Wait" by Bradley H. Sinor and Susan P. Sinor: A soldier returns home after a long deployment, only to find that things are most certainly not the way he left them. "An Assessment of the Incident at Camp Righteous" by Nayad A. Monroe: A theocracy plots damage control over a political disaster within a human-run prison camp on an occupied planet. "Flashback" by Anne Stringer and Jason McDowell: A soldier on the run for murder escapes Earth and joins a far-flung foreign legion. "Granny's Grunts" by Alan L. Lickiss: What happens when your daughter is captured by aliens? If you're a retired soldier whose past exploits are the stuff of legend, then you go round up your old squad and go get her yourself. "Shin-Gi-Tai" by Robin Wayne Bailey: See what a hardened warrior and her alien lover will do to stop a generations-long war which has all but destroyed both sides. "Across the Endless Sea" by John Coffren: The term "lifer" takes on a whole new meaning as one soldier volunteers for a decades-long stealth mission into enemy territory; the vanguard for a massive invasion...of Earth! "Widow's Weeds" by Kirsten Beyer: Colleen Conway is no longer the wife of a

military officer. Now, she's a military widow, and she has a few things to say about that. "A Fresh Perspective" by Dayton Ward: An alien race comes calling, interested in whatever resources it can take from Earth, and unimpressed with any resistance which might be offered by anyone already living there.

[An American Family in World War II, Ralph Lee Minker, Sandra O'Connell, Harry Butowsky](#) , 2005, 1595710817, 9781595710819. On the morning of December 7, 1941, life for families across America was forever changed by events over which they had no control, but were to witness and play a part. An American Family in World War II is the moving story of one of those families ? told largely in their own words. When Ralph ?Lee? Minker Jr. entered U.S. Army Air Cadet training in 1943, he began a correspondence with his parents and two teenage sisters; letters that describe the rigors of pilot training and ultimately his life at ?this air base I call home, ? as he flew 37 combat missions over Nazi Germany. The letters from the family members to Lee bring a vibrant reality to the home front ? rationing, bond drives, and the daily tension of war ? through the people who lived it. Woven together with commentary by the editors, this is an intensely personal and richly detailed account of life in America during the harrowing days of WWII.

Affinity Separations: A Practical Approach is a new collection of affinity-based purification protocols with an international authorship from across the life sciences. The introductory chapter outlines recent advances in ligand-coupling, matrix choice, and operating modes. The second chapter describes methods for obtaining quantitative data from affinity processes. There are specific chapters describing methods for the affinity separation of proteins, nucleic acids, and oligosaccharides. Methods for immunoglobulin purification and immunoaffinity protocols are discussed in a further chapter, and the use of affinity tags in the recovery of engineered proteins in another. Finally, modern techniques for cell separations are outlined. The book presents detailed laboratory protocols together with troubleshooting advice and reviews of recent developments. It is aimed at bench scientists, both those in analytical research laboratories, and those non-specialists looking to apply affinity methods in their work.

These include growing concerns about the environmental impacts of fisheries, the role of ecological interactions in determining population dynamics, and the incorporation of uncertainty and precautionary principles into management advice. The book draws upon examples from tropical, temperate and polar environments, and provides readers with a broad understanding of the biological, economic and social aspects of fisheries ecology and the interplay between them. As well as covering 'classical' fisheries science, the book focuses on contemporary issues such as industrial fishing, poverty and conflict in fishing communities, marine reserves, the effects of fishing on coral reefs and by-catches of mammals, seabirds and reptiles. The book is primarily written for students of fisheries science and marine ecology, but should also appeal to practicing fisheries scientists and those interested in conservation and the impacts of humans on the marine environment. * particularly useful are the modelling chapters which explain the difficult maths involved in a user-friendly manner* describes fisheries exploitation, conservation and management in tropical, temperate and polar environments* broad coverage of 'classical' fisheries science * emphasis on new approaches to fisheries science and the ecosystem effects of fishing* examples based on the latest research and drawn from authors' international experience * comprehensively referenced throughout* extensively illustrated with photographs and line drawings

[Interpreting the Qurn: Towards a Contemporary Approach, Abdullah Saeed](#) , 2006, 0415365384, 9780415365383. How is the Qur'an - central to all Muslim societies - to be understood today in order to meet the needs of these societies? Abdullah Saeed, a distinguished Muslim scholar, explores the interpretation of the ethico-legal content of the Qur'an, whilst taking into consideration the changing nature of the modern world. Saeed explores the current debates surrounding the interpretation of the Qur'an, and their impact on contemporary understanding of this sacred text. Discussing the text's relevance to modern issues without compromising the overall framework of the Qur'an and its core beliefs and practices, he proposes a fresh approach, which takes into account the historical and contemporary contexts of interpretation. Inspiring healthy debate, this book is essential reading for students and scholars seeking a contemporary approach to the interpretation of the Qur'anic text.

[Agriculture in World History, Mark B. Tauger](#) , 2010, 0203847482, 9780203847480. Civilization from its origins has depended on the food, fibre, and other commodities produced by farmers. In this unique exploration of the world history of agriculture, Mark B. Tauger looks at farmers, farming, and their relationships to non-farmers from the classical societies of the Mediterranean and China through to the twenty-first century. Viewing farmers as the most important human interface between civilization and the natural world, Agriculture in World History examines the ways that urban

societies have both exploited and supported farmers, and together have endured the environmental changes and crises that threatened food production. Accessibly written and following a chronological structure, *Agriculture in World History* illuminates these topics through studies of farmers in numerous countries all over the world from Antiquity to the contemporary period. Key themes addressed include the impact of global warming, the role of political and social transformations, and the development of agricultural technology. In particular, the book highlights the complexities of recent decades: increased food production, declining numbers of farmers, and environmental, economic, and political challenges to increasing food production against the demands of a growing population. This wide-ranging survey will be an indispensable text for students of world history, and for anyone interested in the historical development of the present agricultural and food crises.

[The Best of Both Worlds: Finely Printed Livres D'artistes, 1910-2010, Jerry Kelly, Grolier Club](#) , 2011, 156792431X, 9781567924312. Artists' books always contain art, and the art often serves as the primary reason for the book's existence. And the history of bookmaking, since the Gutenberg Bible, contains examples of books whose typographic and design excellence is immediately apparent and beyond dispute, but which contain no art. Occasionally, the two worlds intersect and overlap, resulting in books as noteworthy for their artwork as their printing, as praiseworthy for their artistic content as their design and manufacturing. In this full color selection of 77 books from Europe and the Americas, the authors select, and comment upon the "best of both worlds": books whose pages reveal the best graphic work of the past century; artwork from the hands of masters as diverse as Braque, Calder, Dine, Hockney, Mapplethorpe, Matisse, Maillol, Picasso, Oldenburg and Rivers coupled with memorable texts orchestrated by the best designers, printers, and binders. At once a visual feast and a provocative tour through well- and lesser-known titles, the primary thesis this book suggests is that one world does not have to be sacrificed at the expense of the other. In the hands of expert collaborators, a book can incorporate the best of both worlds the artistic and the bibliophilic to provide a vehicle that both exalts the contents and celebrates the messages.

[People Die: A Novel, Kevin Wignall](#) , 2002, 0743241886, 9780743241885. JJ is a model employee. He does his work quietly and competently, and he keeps his nose clean. But JJ's job is murder for hire, and when the kind of company he works for undergoes restructuring, people don't get fired -- they get fired upon. So for the first time in his life, JJ is not just a predator; he's the prey, and he doesn't even know why. All he knows is that the people close to him are being killed, former allies are turning against him, and the only person offering help is the best friend of one of his victims. It's one of the golden rules -- never become involved with a target's friends or family, with the people who loved him. But JJ's running out of options, and, despite himself, he's drawn by the lure of passing through that door, from his side of death to theirs. Much more than a straightforward hitman caper, People Die is a rare debut, combining tongue-in-cheek sensibility with heart-in-mouth suspense to provide killer entertainment.

Everything would be in black and white, except maybe for the girl in pink polka-dot tights, and this really great music would start to swell in the background. All of a sudden, you wouldn't be able to help it -- you'd be a part of the story, you'd be totally sucked in. You'd be in this place, filled with big lies, mysterious secrets, and a tween girl turned sleuth...Zoom in on thirteen-year-old Dani Callanzano. It's the summer before eighth grade, and Dani is stuck in her nothing-ever-happens town with only her favorite noir mysteries at the Little Art movie theater to keep her company. But one day, a real-life mystery begins to unravel -- at the Little Art! And it all has something to do with a girl in polka-dot tights...Armed with a vivid imagination, a flair for the dramatic, and her knowledge of all things Rita Hayworth, Dani sets out to solve the mystery, and she learns more about herself than she ever thought she could.

[On the Road to Babadag: Travels in the Other Europe, Andrzej Stasiuk](#) , 2012, 0099507145, 9780099507147. Andrzej Stasiuk is a restless and indefatigable traveller. His journeys - by car, train, bus, ferry - take him from his native Poland to small towns and villages with unfamiliar yet evocative names in Slovakia, Hungary, Romania, Slovenia, Albania, Moldova and Ukraine.'The heart of my Europe,' he writes 'beats in Sokolw, Podlaskie and in Husi, not in Vienna.' 'Where did Moldova end and Transylvania begin,' he wonders, as he is being driven at breakneck speed in a hundred-year-old Audi - loose wires hanging from the dashboard - by a driver in shorts and bare feet, a cross swinging on his chest. In Comrat, a funeral procession moves slowly down the main street, the open coffin on a pick-up truck, an old woman dressed in black brushing away the flies above the face of the deceased. On to Soroca, a baroque-Byzantine-Tatar-Turkish encampment, to meet gypsies. And all the way to Babadag, near the shore of the Black Sea, where Stasiuk sees his first minaret, 'simple and severe, a pencil pointed at the sky'.Here is an unfamiliar Europe, grappling with the remnants of the Communist era and the arrival of capitalism and globalisation. Original, precisely observed and lushly written meditations on travel and memory.

[A handbook of diction for singers: Italian, German, French, David Adams](#) , 2008, 0195325583, 9780195325584. Now in its second edition, A Handbook of Diction for Singers is a complete guide to achieving professional levels of diction in Italian, German, and French, the three major languages of the classical vocal repertory. Written for English-speaking singers and offering thorough, consistent explanations, it is an ideal tool for students and an invaluable reference for voice teachers, vocal coaches, and conductors. The book combines traditional approaches proven successful in the teaching of diction with important new material not readily available elsewhere, presenting the sounds of each language in logical order, along with essential information on matters such as diacritical marks, syllabification, word stress, and effective use of the variety of foreign-language dictionaries. Presented in an attractively concise format, the book goes into greater detail than comparable texts, providing specific information to clarify concepts typically difficult for English-speaking singers. Particular emphasis is placed on the characteristics of vowel length, the sequencing of sounds between words, as well as the differences between spoken and sung sounds in all three languages. Featuring significantly expanded coverage of each of the three languages and illustrated with numerous examples, this second edition of A Handbook of Diction for Singers is an exceptional text for courses in diction and a valuable reference source for all vocalists.

[Beyond Reason: The Murder of a Mountie, Robert Knuckle](#) , 1997, 0968204309, 9780968204306. Beyond Reason is Robert Knuckle's third book in the genre of true crime. Once again, he combines a meticulous eye for research with a storyteller's touch to recreate an intriguing real-life drama based on what many consider to be the most interesting story in all the files of the Royal Canadian Mounted Police. A desperate, lawless couple, once referred to as Canada's Bonnie and Clyde, are hiding inside a motel room. A wild-west gunfight ensues where one Mountie is killed and two others badly wounded. The only RCMP to escape shoots the female fugitive in the back as the couple flees the scene in a police cruiser. This leads to an extended trail of mayhem and hostage-taking that runs through several farms on the back roads of south western Manitoba and, in turn, ignites one of the biggest manhunts in the history of the province.

Determined to get noticed, Lindsey is finally on the cusp of being named VP creative director of an elite New York advertising agency, after years of eighty-plus-hour weeks, migraines, and profound loneliness. But during the course of one devastating night, Lindsey's carefully constructed life implodes. Humiliated, she flees the glitter of Manhattan and retreats to the time warp of her parents' Maryland home. As her sister plans her lavish wedding to her Prince Charming, Lindsey struggles to maintain her identity as the smart, responsible twin while she furtively tries to piece her career back together. But things get more complicated when a long-held family secret is unleashed that forces both sisters to reconsider who they are and who they are meant to be.

[Classical Indian Philosophy of Mind: The Nyaya Dualist Tradition, Kisor Kumar Chakrabarti](#) , 1999, 0791441717, 9780791441718. This book examines psycho-physical dualism as developed by the Nyaya school of Indian philosophy. Dualism is important to many world religions which promote personal immortality and to morality which promotes free will. For the Nyaya, the self is a permanent, immaterial substance to which non-physical internal states like cognition belong. This view is challenged by other Indian schools, especially the Buddhist and Carvaka schools. Chakrabarti brings out the connections between the Indian and the Western debates over the mind-body problem and shows that the Nyaya position is well developed, well articulated, and defensible. He shows that Nyaya dualism differs from Cartesian dualism and is not vulnerable to some traditional objections against the latter. A brief discussion of the Samkhya and the Advaita theories of the self and the critique of these views from the Nyaya standpoint are included, as well as a discussion of a classical Nyaya causal argument for the existence of God.

[The Graves Are Walking: The Great Famine and the Saga of the Irish People, John Kelly](#) , 2012, 080509184X, 9780805091847. A magisterial account of the worst disasters to strike humankind the Great Irish Potato Famine conveyed as lyrical narrative history from the acclaimed author of The Great Mortality. Deeply researched, compelling in its details, and startling in its conclusions about the appalling decisions behind a tragedy of epic proportions, John Kelly's retelling of the awful story of Ireland's great hunger will resonate today as history that speaks to our own times. It started in 1845 and before it was over more than one million men, women, and children would die and another two million would flee

the country. Measured in terms of mortality, the Great Irish Potato Famine was the worst disasters in the nineteenth century it claimed twice as many lives as the American Civil War. A perfect storm of bacterial infection, political greed, and religious intolerance sparked this catastrophe. But even more extraordinary than its scope were its political underpinnings, and *The Graves Are Walking* provides fresh material and analysis on the role that Britain's nation-building policies played in exacerbating the devastation by attempting to use the famine to reshape Irish society and character. Religious dogma, anti-relief sentiment, and racial and political ideology combined to result in an almost inconceivable disaster of human suffering. This is ultimately a story of triumph over perceived destiny: for fifty million Americans of Irish heritage, the saga of a broken people fleeing crushing starvation and remaking themselves in a new land is an inspiring story of revival. Based on extensive research and written with novelistic flair, *The Graves Are Walking* draws a portrait that is both intimate and panoramic, that captures the drama of individual lives caught up in an unimaginable tragedy, while imparting a new understanding of the famine's causes and consequences.

[Ancient Greek Literature, K. J. Dover](#) , 1997, 0192892940, 9780192892942. This historical survey of Greek literature from 700 BC to 550 AD concentrates on the principal authors and quotes many passages from their work in translation, to allow the reader to form his own impression of its quality, including Homer, Plato, Aristophanes, and Euripides. Attention is drawn both to the elements in Greek literature and attitudes to life which are unfamiliar to us, and to the elements which appeal most powerfully to succeeding generations. Although it is recognized that this appeal lies above all in the most creative and inventive period (700-300 BC), an account is given of the eight hundred years which followed, which saw the impact of earlier inspirations. Poetry, tragedy, comedy, history, science, philosophy, and oratory are all examined through the available literature. This new edition has been revised to take account of recent scholarship, such as the influence of oriental traditions of Greek literature, and includes several new translations and a thoroughly updated bibliography.

[Judges, , David Pannick](#) , 1987, 0192159569, 9780192159564. Supreme Court Justice Felix Frankfurter once observed that the ideal judge must possess three qualities--all of which are disinterestedness. But as David Pannick points out in this irreverent, informative, and highly entertaining volume, not all judges live up to Justice Frankfurter's standard. One American judge, when asked by a lawyer of Japanese descent for more time to prepare a case, shot back, "How much time did you give us at Pearl Harbor?" Others go to the opposite extreme, uninterestedness, and fall asleep during the trial, or knit, or read the paper. One English judge fell asleep so often that barristers would drop huge law books to the floor to wake him up again. Full of such illustrative examples and anecdotes, *Judges* offers a revealing portrait of the judicial systems of America and England. It is a vastly amusing book, but it has a serious purpose--to make us think more critically about officials whom we elect for life, who have the power to strike down laws, and whose mistakes, even if later reversed, can have a devastating impact on the people involved. How are judges selected? Is it wise to select supposedly impartial judges from the ranks of lawyers, who spend their careers in highly partisan and heated argument for one side of an issue? Should a judge who has spent his entire career in corporate law be allowed to hear cases in criminal court, as sometimes happens? (One English judge, appointed to the bench after a successful career in libel practice, claimed it was "fun trying Chancery matters of which I had no experience at all"--but how the litigants felt is another matter.) How are judges disciplined when they misbehave? And what changes are needed in this important but hitherto neglected area of government? Judges have a weighty responsibility; they repeatedly do what most of us seek to avoid: make decisions. These decisions can have serious consequences: a man may go to prison, a woman may lose her house or the custody of her children, or an entire segment of the population may lose their civil rights. Pannick's light touch does not deflect from this book's serious aim--to remind people that it is vital to subject judges to the same critical standards to which the other branches of government are held.

[The First Touch of Light, Ruth Pettis](#) , 2009, 0143011200, 9780143011200. A POWERFUL STORY ABOUT THE DEVASTATING IMPACT OF WAR ON ONE NEW ZEALAND FAMILY. 1940. George does his duty and enlists. The day before his departure he marries his sweetheart, Ellen. But four years of separation and the pressures of war create devastating changes. Ellen has had an affair and borne a child and, traumatised by his experiences, George retreats into a rage-filled silence. After years of bearing the brunt of George's bitterness, Ellen finally snaps. Years later Ellen's daughter travels to Italy, retracing the journey of the man she had thought of as her father. THE FIRST TOUCH OF LIGHT is the second and final novel by the late Ruth Pettis. It is a moving story of war and grief and loss, and a compelling portrait of a marriage under impossible stress.

[Unauthorized Portraits, Edward Sorel](#) , 1998, 0375702040, 9780375702044. From one of America's most brilliant satirical artists: his best, his funniest, his most deliciously wicked and memorable caricatures of the past thirty years. Here are history's great and near great--166 heroes, rogues, fools, and geniuses: from Moses leading his kvetching people ("Some miracle! If I don't get pneumonia, that'll be a miracle") through the parted Red Sea waters, to George Gershwin teaching Fred Astaire a dance step, to Madonna seen as a horseperson of the apocalypse ; from Brahms dozing off as Liszt plays, to Rodin auditioning models, and Reagan as Robin Hood, taking from the poor and giving to the rich. Here are such fabulous targets for the satirist's pen as LBJ, Nixon and the Watergate Gang, a holstered Jimmy Carter at high noon in

the hostage crisis, and a poignant Dan Quayle as the central figure in a comic strip about a man who wants a little respect. And it's pure pleasure to watch Sorel portray Tom Wolfe in his famous white suit or Woody Allen and Mia Farrow caught in *The Storm*, or draw a bead on such superstars as Picasso and John Updike, Barbra Streisand, Colette, Truman Capote, and the entire cast of *Casablanca*. Each of the book's three sections--"History," "Entertainment and the Arts," "Politics"--has a wry autobiographical introduction, and every drawing has its own pithy, informative caption. Here's wit aplenty, visual and verbal--a splendid satirical view of the wise, the beautiful, the clever, and the flawed, over the centuries, who loom large in our lives and in our imaginations. From the Hardcover edition.

The Oxford Handbook of Pensions and Retirement Income is the only comprehensive review available of the latest research, policy-related tools, analytical methods and techniques, and major theoretical frameworks and principles of pension and retirement income. Featuring over forty contributions from leading academic and professional experts, the handbook draws on research from a range of academic disciplines to reflect on the implications for current and future provision of pension and retirement income of demographic ageing, the changing financial circumstances of nation states, and globalization. An indispensable desk reference for researchers and practitioners in the area, it is also essential for policymakers and those with broad interests which include this very important area. [Stress, Trauma, and Wellbeing in the Legal System, Monica K. Miller, Brian H. Bornstein](#) , 2013, 0199829993, 9780199829996. All individuals face stress in their daily lives, but this is often particularly true for those who enforce the law, administer justice, or are forced into the legal system. Uncontrolled strain can result in negative behaviors, burnout, risk-taking, and physical and psychological symptoms ranging from colds to depression and suicide. This, in turn, can have a dramatic impact on the functioning of the legal system as a whole. On the other hand, contact with the legal system has the potential to promote wellbeing for many individuals, such as victims who feel that justice has been served and jurors and judges who feel they have helped preserve the integrity of the legal system. *Stress, Trauma, and Wellbeing in the Legal System* presents theory, research, and scholarship from a variety of social scientific disciplines and offers suggestions for those interested in exploring and improving the wellbeing of those who are voluntarily (police, probation officers, civil plaintiffs, lawyers, judges, court staff) or involuntarily (jurors, criminal defendants, witnesses, children, the elderly) drawn into the legal system. This comprehensive volume is an invaluable resource for those interested in protecting the wellbeing of individuals in the legal system, particularly criminal justice professionals, judges, attorneys, forensic psychologists, psychiatrists, social workers, researchers in psychology, criminology, and sociology, and students in each of these areas.

With concise, application-oriented discussion of topics and self-test problems the text encourages students to monitor their own comprehension. The seventh edition is updated with additional examples, homework problems, and illustrations to increase student understanding. The text lays the groundwork for subsequent studies in fields such as fluid mechanics, heat transfer and statistical thermodynamics, and prepares students to effectively apply thermodynamics in the practice of engineering.

What if you were given a map to a magic that could change the worst moment of your life...for a price? From two all-stars of dark fantasy, Christopher Golden and Tim Lebbon, coauthors of *Mind the Gap*, comes this terrifying new thriller of magic and dangerous passions, where an ordinary man searches the magical landscape of an extraordinary city for the chance of a lifetime. Barely six months after leaving New Orleans, history professor Max Corbett

is returning to a place he hardly recognizes. The girl he loved and lost is dead, and the once-enchanted city has been devastated by Hurricane Katrina. Max has not thought much beyond Gabrielle's funeral until a strange old man offers him a map, and an insane proposition. . . Forget all the stories about magic you think you know. . . It looks like an ordinary tourist map, but the old man claims that it is marked with a trail of magical moments from New Orleans's history that just might open a door to the past. But it is a journey fraught with peril as Max begins to uncover dark secrets about both his dead love and the city he never really got to know. How is Gabrielle linked to an evil group from the city's past? And can Max evade them long enough to turn back the clock and give Gabrielle one last chance at life? From the Trade Paperback edition.

The Chesapeake Bay watershed covers 64,000 square miles and drains parts of six states and Washington, DC. Along with its 400-plus rivers and creeks, the Chesapeake boasts 4,600 miles of tidal shoreline suitable for kayaking. Sea kayaking is booming in the Chesapeake region, and the state of Maryland is fully supporting paddlers in finding access and creating routes and safe places to

explore. This new guide will describe dozens of trips along the Eastern and Western shores, in the Bay proper, and in its tributaries. Trip descriptions will include important information on put-ins and take-outs, winds, and currents, equipment, paddling techniques, and safety issues. The authors enliven their instruction with informative sidebars on topics such as salt marsh ecology, wildlife, and social and maritime history. They also touch on low-impact paddling techniques, hypo/hyperthermia awareness, and many other paddling-related topics.

As other complex systems in social and natural sciences as well as in engineering, the Internet is hard to understand from a technical point of view. Packet switched networks defy analytical modeling. The Internet is an outstanding and challenging case because of its fast development, unparalleled heterogeneity and the inherent lack of measurement and monitoring mechanisms in its core conception. This monograph deals with applications of computational intelligence methods, with an emphasis on fuzzy techniques, to a number of current issues in measurement, analysis and control of traffic in the Internet. First, the core building blocks of Internet Science and other related networking aspects are introduced. Then, data mining and control problems are addressed. In the first class two issues are considered: predictive modeling of traffic load as well as summarization of traffic flow measurements. The second class, control, includes active queue management schemes for Internet routers as well as window based end-to-end rate and congestion control. The practical hardware implementation of some of the fuzzy inference systems proposed here is also addressed. While some theoretical developments are described, we favor extensive evaluation of models using real-world data by simulation and experiments.

[Dante and his circle, with the Vita nuova: poems, Dante Alighieri, Dante Gabriel Rossetti](#) , 1993, 0942208099, 9780942208092. The young Dante's poems to Beatrice (Vita Nuova) & love sonnets by 14 Italian Renaissance poets. Dante Alighieri & fourteen of his contemporaries (including Guido Cavalcanti & Giotto, with an homage by Boccaccio) explored in Italian the love, poetry tradition of the Provençal troubadours. Many of these poems respond directly to each other, sometimes tauntingly. Dante Gabriel Rossetti (the Pre-Raphaelite painter), who translated all these poems, includes as the centerpiece Dante Alighieri's famous work of his youth, the Vita Nuova, a series of poems to Beatrice with a meticulous analysis of how he wrote them. The new impetus given by the ambition of Dante & these poets in northern Italy established a viable Italian literature. These poems are startlingly human in content, marking the first major break with the religious straitjacket of the Middle Ages. The text is modernized to rid it of Rossetti's antiquarian bent (thee, thou, etc.) & is gender-sensitive.

[The TRUE Happiness Recipe: How to Stop Your Job from Killing You and Create Work-Life Harmony Everyday, Will Marr](#) , 2012, . The TRUE Happiness Recipe focuses on how to thrive in a workday. The reason is clear. Your work dominates your feelings about happiness. We are designed to be productive. To make a difference even. Sure, bad work is stressful, but good work is enriching. After all, our work should be a source of meaning, growth, and yes, even identity. That's true whether our primary work is raising children or running a company. But our true work is not separate from our lives and our relationships. We can't be strong and happy in one part of our life, while being weak and miserable in another. It just doesn't work that way. Research shows our true work is the key lever of our entire quality of life. The TRUE Happiness Recipe is a cookbook for happiness, filled with original recipes that apply the new science of human habit formation to help you create a formula for change that is as simple as following a recipe in a cookbook. Mastering the recipe may take practice, but anyone, anywhere can do it.

A colorful guide covering the basics of replacing a traditional lawn with a wide variety of easy-care, no-mow, drought-tolerant, money-saving options that will appeal to today's busy, eco-conscious homeowner. Americans pour 300 million gallons of gas and 1 billion hours every year into mowing their lawns, not to mention 70 million pounds of pesticides and \$40 billion for lawn upkeep. No Wonder the anti-lawn movement is thriving, as today's eco-conscious consumers realize that their traditional lawns are water-hogging, chemical-ridden, maintenance-intensive burdens. Lawn Gone!, from award-winning gardening blogger Pam Penick, is the first basic introduction to low-water, easy-care lawn alternatives for beginning gardeners, written in a friendly style with an approachable package. It covers all the available time-saving options: alternative grasses, ground cover plants, artificial turf, hardscaping, mulch, and more. In addition, it includes step-by-step lawn-removal methods, strategies for dealing with neighbors and homeowner associations, and how to minimize your lawn if you're not ready to go all the way.

The daughter of a Pentecostal preacher who sells insurance on the side, and the best friend of a lively beauty who moves to the big city to pursue a career in interior design, Jolie is all too aware of her family's closet full of secrets and long-held distrust of outsiders. Nevertheless, she throws caution to the wind when she meets Sam Lense, a Jewish anthropology student from Miami, who is in town to study the ethnic makeup of the region. Jolie and Sam fall recklessly in love and dream of beginning a life together, far away from Jolie's buried past. But their affair ends abruptly when Sam is discovered to have pried too deeply into Hendrix's dark racial history and he becomes the latest victim in a long tradition of small-town violence. Twelve years later, when a black businessman from Memphis returns to Hendrix to do right by his father's memory, Jolie and Sam are brought together again. They are forced to revisit the unresolved issues of their young love and finally shed light on the ugly history of Jolie's hometown. A complex and compulsively readable Southern saga, continuing in the tradition established by Marjorie Kinnan Rawlings

and brought into the new millennium by writers like Karen Russell and Kathryn Stockett, *American Ghost* was inspired by Janis Owens extensive research on a real lynching that occurred in 1934 in Marianna, Florida. *American Ghost* is a richly woven exploration of how the events of our past haunt our present.

A former bill collector, skip-tracer and legal coordinator for a number of third-party collection agencies, Martha Godman unlocks the secrets of bill collecting. By understanding how collection agencies work, the tricks bill collectors and skip-tracers use to find out your most private information, and the psychological tactics they use to bully debtors into paying off debt, you will be able to deal confidently with collection agencies and safeguard your rights as a debtor. Godman also provides basic strategies to handle debt: from negotiating with bill collectors and other methods of paying off unruly debt, like buying time and raising funds; to identifying if you may have a problem preventing debt and the resources that can help you better control you finances. It's not a crime to be in debt, but it is a crime when debtors rights are compromised by a collection agency *Confessions of a Bill Collector* is the first step to personal and financial freedom.

[An Ecological Approach to Perceptual Learning and Development, Eleanor Jack Gibson, Anne D. Pick](#) , 2000, 0195118251, 9780195118254. The essential nature of learning is primarily thought of as a verbal process or function, but

this notion conveys that pre-linguistic infants do not learn. Far from being "blank slates" that passively absorb environmental stimuli, infants are active learners who perceptually engage their environments and extract information from them before language is available. The ecological approach to perceiving--defined as "a theory about perceiving by active creatures who look and listen and move around"--was spearheaded by Eleanor and James Gibson in the 1950s and culminated in James Gibson's last book in 1979. Until now, no comprehensive theoretical statement of ecological development has been published since Eleanor Gibson's *Principles of Perceptual Learning and Development* (1969). In *An Ecological Approach to Perceptual Learning and Development*, distinguished experimental psychologists Eleanor J. Gibson and Anne D. Pick provide a unique theoretical framework for the ecological approach to understanding perceptual learning and development. Perception, in accordance with James Gibson's views, entails a reciprocal relationship between a person and his or her environment: The environment provides resources and opportunities for the person, and the person gets information from and acts on the environment. The concept of affordance is central to this idea; the person acts on what the environment affords, as it is appropriate. This extraordinary volume covers the development of perception in detail from birth through toddlerhood, beginning with the development of communication, going on to perceiving and acting on objects, and then to locomotion. It is more than a presentation of facts about perception as it develops. It outlines the ecological approach and shows how it underlies "higher" cognitive processes, such as concept formation, as well as discovery of the basic affordances of the environment. This impressive work should serve as the capstone for Eleanor J. Gibson's distinguished career as a developmental and experimental psychologist.

[Reticence of Ravens, M. M. Gornell](#) , 2010, 1608300390, 9781608300396. Time and events have turned Hubert James Champion III into a morose man trying for the last year to escape into California's Mojave Desert--somewhere a little north of Route 66 on the way to Arizona. No longer a practicing psychologist and FBI collaborator, Hugh now owns Joey's mini-mart, a half-defunct gas station with no gas, no supplies, and little food for customers. Opening hours variable. He has become a man hiding out from the world, and himself--trying to seek redemption among the creosote and Palo Verde trees. His main companions these days are an aged desert dog, and the unkindness of sometimes raucous, but usually reticent ravens. But Hugh soon senses that he can't escape--especially when a "special" young woman with red Medusa-like hair, and covered in her father's blood is brought to him one Sunday evening. Turner Jackson has been murdered, and LoraLee Jackson is the main suspect. In quick order Hugh is drawn into proving LoraLee's innocence by both locals and unwanted East Coast intruders. Add the sudden appearance of LoraLee's previously unknown brother, a bulldog FBI agent with an agenda of his own, and Hugh's cousin Della's love-sick ex-husband--not to mention multiple shootings, exploding drug-labs, and most importantly, Hugh's past demons rearing their ugly heads once again. No, Hugh cannot escape having to find a murderer--or his own past.--Website.

[A Spy's Guide to the Kennedy Assassination, E. B. Held](#) , 2013, 1482684160, 9781482684162. In the highly emotional period following the tragic 1963 assassination of President John F. Kennedy, indications that the Soviet KGB and/or the Cuban DGI intelligence services had clandestine operational relationships with the assassin Lee Harvey Oswald were suppressed by Soviet and Cuban as well as American authorities. Had the authorities not done so, the situation could have spun out of control and a nuclear holocaust might well have resulted. As more and more information has been revealed, especially since the end of the Cold War, the existence of separate KGB and DGI operational relationships with Oswald is obvious to experienced intelligence officers. So, imagine the panic of Soviet Premier Nikita Khrushchev 13 months after the Cuban Missile Crisis when he learned that a low level KGB spy named Oswald had just assassinated the President of the United States. No, the KGB did not direct the assassination but yes, the assassin Oswald had worked for the KGB. Imagine the reaction of Cuba's Fidel Castro, who knew that Kennedy personally supported persistent CIA efforts

to kill him and had expressly warned the Americans that he was prepared to retaliate in kind. Yes, Oswald had offered to attempt killing Kennedy on Fidel's behalf but did Cuban intelligence officers ever imagine that Oswald might actually succeed? And imagine that you were America's new President Lyndon Johnson. What would you do? If only the Cubans were involved then you might simply bomb the island back to the stone ages. But what if the nuclear armed Soviets were implicated as well? E.B. Held brings the Kennedy Assassination to life, including photos and walking tours of key sites in Washington, New Orleans, and Dallas. A retired CIA operations officer and former Director of Intelligence and Counterintelligence at the Department of Energy, Held provides a straightforward explanation based on undisputed historical facts of the relationship between Oswald and the Soviet, Cuban, and American intelligence services.

This volume combines the principles of systems engineering with those of architecting (the science and art of creating, designing, planning and certifying new structures) for a problem-solving approach to the design of large, complex projects. It offers new conceptual models to engineers involved in the design of spacecraft, launch vehicles, aircraft and communication, computer or defence systems. With insights derived from real-world examples of major systems success and failures, this volume offers engineers the opportunity of saving time and money. Highlights of the book include a detailed examination of the conceptual design phase, a heuristic approach to the teaching methods and a look at the various interrelated subjects of architecting.
