[Literary Theory: An Introduction, Terry Eagleton](#) , 2011, 1118306295, 9781118306291. A quarter of a century on from its original publication, *Literary Theory: An Introduction* still conjures the subversion, excitement and exoticism that characterized theory through the 1960s and 70s, when it posed an unprecedented challenge to the literary establishment. Eagleton has added a new preface to this anniversary edition to address more recent developments in literary studies, including what he describes as the growth of a kind of anti-theory, and the idea that literary theory has been institutionalized. Insightful and enlightening, *Literary Theory: An Introduction* remains the essential guide to the field. 25th Anniversary Edition of Terry Eagleton's classic introduction to literary theory. First published in 1983, and revised in 1996 to include material on developments in feminist and cultural theory. Has served as an inspiration to generations of students and teachers. Continues to function as arguably the definitive undergraduate textbook on literary theory. Reissue includes a new foreword by Eagleton himself, reflecting on the impact and enduring success of the book, and on developments in literary theory since it was first published.

[Great Transformations: Economic Ideas and Institutional Change in the Twentieth Century, Mark Blyth](#) , 2002, 0521010527, 9780521010528. Mark Blyth argues that economic ideas are powerful political tools as used by domestic groups in order to effect change since whoever defines what the economy is, what is wrong with it, and what would improve it, has a profound political resource in their possession. Blyth analyzes the 1930s and 1970s, two periods of deep-seated institutional change that characterized the twentieth century. Viewing both periods of change as part of the same dynamic, Blyth argues that the 1930s labor reacted against the exigencies of the market and demanded state action to mitigate the market's effects by "embedding liberalism" and the 1970s, those who benefited least from such "embedding" institutions, namely business, reacted against these constraints and sought to overturn that institutional order. In *Great Transformations*, Blyth demonstrates the critical role economic ideas played in making institutional change possible and he rethinks the relationship between uncertainty, ideas, and interests on how, and under what conditions, institutional change takes place. Mark Blyth is an assistant professor of political science at the Johns Hopkins University specializing in

comparative political economy. He has taught at Columbia University, and at the University of Birmingham, UK. Blyth is a member of the editorial board of the Review of International Political Economy.

[Guide to the liverworts of North Carolina, Marie L. Hicks](#) , 1992, . North Carolina is home to 66 genera and 195 species of liverworts--small, mosslike plants occupying moist microhabitats that form an inconspicuous part of the vegetation. Marie L. Hicks' Guide to the Liverworts of North Carolinaprovides the first complete field guide to the hepatic flora in North Carolina. The volume offers a key to genera, species descriptions, distribution maps, a glossary, and 120 original drawings of liverworts as they appear in North Carolina. North Carolina's varied physiography creates a diversity of flora, ranging from boreal plants in the mountains to subtropical plants in the coastal plain. Collections of hepatics in North Carolina have been sporadic over the years, and knowledge of their distribution within the state has accumulated gradually. Guide to the Liverworts of North Carolinabuilds on earlier field studies, including those of Hugo L. Blomquist and R. M. Schuster, to provide keys and illustrations to aid identification. This important, comprehensive field guide will also be useful in states adjoining North Carolina and is designed for students, botanists, and all those interested in identifying local liverworts.

[Deconstructing the Mind, Brunswick Stephen P. Stich Professor of Philosophy and Cognitive Science at Rutgers University](#) , 1996, 0198026080, 9780198026082. Over the last two decades, debates over the viability of commonsense psychology have been center stage in both cognitive science and the philosophy of mind. Eliminativists have argued that advances in cognitive science and neuroscience will ultimately justify a rejection of our "folk" theory of the mind, and of its ontology. In the first half of this book Stich, who was at one time a leading advocate of eliminativism, maintains that even if the sciences develop in the ways that eliminativists foresee, none of the arguments for ontological elimination are tenable. Rather than being resolved by science, he contends, these ontological disputes will be settled by a pragmatic process in which social and political considerations have a major role to play. In later chapters, Stich argues that the widespread worry about "naturalizing" psychological properties is deeply confused, since there is no plausible account of what naturalizing requires on which the failure of the naturalization project would lead to eliminativism. He also offers a detailed analysis of the many different notions of folk psychology to be found in philosophy and psychology, and argues that simulation theory, which purports to be an alternative to folk psychology, is not supported by recent experimental findings.

[The End Of Reform: New Deal Liberalism in Recession and War, Alan Brinkley](#) , 2011, 030780710X, 9780307807106. At a time when liberalism is in disarray, this vastly illuminating book locates the origins of its crisis. Those origins, says Alan Brinkley, are paradoxically situated during the second term of Franklin Delano Roosevelt, whose New Deal had made liberalism a fixture of American politics and society. The End of Reform shows how the liberalism of the early New Deal which set out to repair and, if necessary, restructure Americas economy gave way to its contemporary counterpart, which is less hostile to corporate capitalism and more solicitous of individual rights. Clearly and dramatically, Brinkley identifies the personalities and events responsible for this transformation while pointing to the broader trends in American society that made the politics of reform increasingly popular. It is both a major reinterpretation of the New Deal and a crucial map of the road to todays political landscape.

Subtitle: How To Succeed Where Others Fail This is a guide to creating loving, stable stepfamily relationships. Written by a psychologist and stepmother, this book is for stepparents who want to make the most of their situation and learn how to be resilient, happy, and confident in their relationship with their spouse and their stepchildren. The stories in this volume are drawn from clients that the author has counseled as well as her own adventurous life as a stepparent. To other struggling stepparents who feel they are drowning in their situation, she offers hope, encouragement, and realistic coping strategies. She provides proven techniques that help individuals succeed in their new marriages, build caring relationships with their stepchildren, and bolster their emotional life in general. "This gem of a book reveals how stepparenting, in spite of the pitfalls, can be done well and be immensely rewarding for the whole family." [Interference Alignment: A New Look at Signal Dimensions in a Communication Network, Syed A. Jafar](#) , 2011, 160198474X, 9781601984746. Interference alignment is a radical idea that has recently emerged out of the capacity analysis of interference networks. In a relatively short time, this concept has challenged much of the conventional wisdom about the throughput limits of both wired and wireless networks. The technique is based on the idea that if interference or undesired signals are collectively engineered to occupy as low a dimensional space as possible, the

desired signals can be more efficiently conveyed and recovered. *Interference Alignment: A New Look at Signal Dimensions in a Communication Network* introduces the concept via a series of simple linear algebraic examples that very effectively convey the central idea of interference alignment. The ideas behind the various communication theoretic instantiations and applications of the technique are illustrated through simple examples that come across as neat little puzzles which enables the reader to quickly understand the topic. *Interference Alignment: A New Look at Signal Dimensions in a Communication Network* provides both a tutorial and a survey of the state-of-art on the topic. The numerous concretely stated open problems sprinkled throughout tee up issues for further research for the reader. The presentation style of this tutorial is informal, favoring broad intuition over mathematical rigor and is written to be accessible to graduate students, researchers and professionals working in communication, signal processing, networking or information theory.

Michael Davis, a leading figure in the study of professional ethics, offers here both a compelling exploration of engineering ethics and a philosophical analysis of engineering as a profession. After putting engineering in historical perspective, Davis turns to the Challenger space shuttle disaster to consider the complex relationship between engineering ideals and contemporary engineering practice. Here, Davis examines how social organization and technical requirements define how engineers should (and presumably do) think. Later chapters test his analysis of engineering judgement and autonomy empirically, engaging a range of social science research including a study of how engineers and managers work together in ten different companies.

[Bring Down the Walls: Lebanon's Post-War Challenge, Carole H. Dagher](#) , 2002, 0312293364, 9780312293369. 'Lebanon is more than a country, it is a message': these words of Pope John Paul II illustrate Lebanon's post-war endeavor to preserve its age-old Christian-Muslim coexistence and power-sharing formula and to invalidate Samuel Huntington's assumption of a 'Clash of Civilizations.' Lebanon's current challenge is also the challenge of a whole region, the Middle East, where the fate of minorities, including Eastern Christians, reveals the prospects of democracy, pluralism and political participation. Carole H. Dagher, a journalist for Lebanese media as well as an academic, presents an insightful account on how Christian and Muslim communities emerged from the sixteen year-old Lebanese war, what their points of friction and their common grounds are, and what the prospects of Lebanon's communal representation system and pluralistic society are. She describes the central role played by the Holy See and John Paul II in bridging the gap between Christians and Muslims in Lebanon, and analyzes the impact other countries such as Syria, Iran and Saudi Arabia have had on the power game and, conversely, the impact of Christian-Muslim interaction on the future of the Arab-Israeli peace process. Bring Down the Walls draws crucial lessons from the recent history of Christian-Muslim relations in Lebanon.

Our guide provides straight-forward, no-nonsense information coupled with candid reviews based upon over 20 years of cruising experience. Not all cruise lines or ships are ideal for every family. Recognizing this, we perform a detailed review from a family-friendly perspective of ninety-seven ships across the seven major cruise lines. You certainly have many choices when planning a cruise; however, most guides are produced for a broad audience of cruisers. Cruising as a family requires special considerations. Although the selection process is similar to that of other cruisers, families need to employ different criteria when selecting nearly all aspects of a cruise. We walk you through the selection process, discuss pre-cruise planning and then take you on board with tips and tricks for making the most of your cruise vacation. This guide is a must read for anyone who is planning to cruise with kids.

[The Creation of the Intelligence Community: Founding Documents, Center for the Study of Intelligence \(U.S.\)](#) , 2007, 0160909376, 9780160909375. President Truman shuttered the Office of Strategic Services (OSS) as an unneeded, wartime-only special operations/quasi-intelligence agency. The State Department, the Navy, and the War Department quickly recognized that a secret information vacuum loomed and urged the creation of something to replace OSS. These previously declassified and released documents present the thoughtful albeit tortuous and contentious creation of CIA, culminating in the National Security Act of 1947. The declassified historic material dissects the twists and turns and displays the considerable political and legal finesse required to assess the many plans, suggestions, maneuvers and actions that ultimately led to the establishment of the Central Intelligence Agency and other national security entities, which included the incorporation of special safeguards to protect civil liberties. Copies of selected intelligence documents and a timeline of milestones in the creation of the USIntelligence Community from 1941 through 1964 are included in this resource.

Together, they are compelling evidence that religion should embrace the reliable knowledge of the world that science provides, while at the same time science should respect and nourish humankind's need for spiritual sustenance. 'Miracles are explainable,' Raymo paraphrases the writer Tim Robinson, 'it is the explanations that are miraculous'. For anyone drawn to reflect on life's meaning and purpose, Chet Raymo's uncompromising skepticism and reverence for mystery will affirm and inspire.

[The Silver Box, John Galsworthy](#) , 2008, 1406588784, 9781406588781. John Galsworthy OM (1867-1933) was an English novelist and playwright. He is viewed as one of the first writers of the Edwardian era; challenging in his works some of the ideals of society depicted in the preceding literature of Victorian England. He won the Nobel Prize for literature in 1932. Notable works include The Forsyte Saga (1906-1921) and its sequels, A Modern Comedy and End of the Chapter. From the Four Winds was Galsworthy's first published work in 1897, a collection of short stories. These, and several subsequent works, were published under the pen name John Sinjohn and it would not be until The Island Pharisees (1904) that he would begin publishing under his own name. His first play, The Silver Box (1906) became a success, and he followed it up with The Man of Property (1906), the first in the Forsyte trilogy. Along with other writers of the time such as Shaw his plays addressed the class system and social issues, two of the best known being Strife (1909) and The Skin Game (1920).

Stephen King is no stranger to the realm of literary criticism, but his most fantastic, far-reaching work has aroused little academic scrutiny. This study of King's epic Dark Tower series encompasses the career of one of the world's best-selling authors and frames him as more than a "horror writer." Four categories of analysis--genre, art, evil, and intertextuality--provide a focused look at the center of King's fictional universe. This book reaches beyond popular culture treatments of the series and examines it against King's horror work, audience expectations, and the larger literary landscape.

[The Sandalwood Tree: A Novel, Elle Newmark](#) , 2011, 141659793X, 9781416597933. From incredible storyteller and

nationally bestselling author Elle Newmark comes a rich, sweeping novel that brings to life two love stories, ninety years apart, set against the backdrop of war-torn India. In 1947, an American anthropologist named Martin Mitchell wins a Fulbright Fellowship to study in India. He travels there with his wife, Evie, and his son, determined to start a new chapter in their lives. Upon the family's arrival, though, they are forced to stay in a small village due to violence surrounding Britain's imminent departure from India. It is there, hidden behind a brick wall in their colonial bungalow, that Evie discovers a packet of old letters that tell a strange and compelling story of love and war involving two young Englishwomen who lived in the very same house in 1857. Drawn to their story, Evie embarks on a mission to uncover what the letters didn't explain. Her search leads her through the bazaars and temples of India as well as the dying society of the British Raj. Along the way, a dark secret is exposed, and this new and disturbing knowledge creates a wedge between Evie and her husband. Bursting with lavish detail and vivid imagery of Bombay and beyond, *The Sandalwood Tree* is a powerful story about betrayal, forgiveness, fate, and love.

[Algebra: Volume II: Fields with Structure, Algebras and Advanced Topics, , , Falko Lorenz](#) , 2007, 0387724877, 9780387724874. The present textbook is a lively, problem-oriented and carefully written introduction to classical modern algebra. The author leads the reader through interesting subject matter, while assuming only the background provided by a first course in linear algebra. The first volume focuses on field extensions. Galois theory and its applications are treated more thoroughly than in most texts. It also covers basic applications to number theory, ring extensions and algebraic geometry. The main focus of the second volume is on additional structure of fields and related topics. Much material not usually covered in textbooks appears here, including real fields and quadratic forms, the Tsen rank of a field, the calculus of Witt vectors, the Schur group of a field, and local class field theory. Both volumes contain numerous exercises and can be used as a textbook for advanced undergraduate students. From Reviews of the German version: This is a charming textbook, introducing the reader to the classical parts of algebra. The exposition is admirably clear and lucidly written with only minimal prerequisites from linear algebra. The new concepts are, at least in the first part of the

book, defined in the framework of the development of carefully selected problems. - Stefan Porubsky, *Mathematical Reviews*

[Centauri Dreams: Imagining and Planning Interstellar Exploration, Paul Gilster](#) , 2004, 038700436X, 9780387004365.

Why, today, would anyone undertake a plan to launch a spacecraft some 30 years in the future, and on a journey that would take some 40 years to complete? Paul Gilster investigates the science, and the spirit, of the NASA and JPL researchers who are actually at work on just such a project. From the reviews: "Gilster introduces the challenges of imagining and planning interstellar exploration by leading readers through the difficulties of reaching and exploring the nearest bright star, Alpha Centauri. Seeded by ideas and concepts of the late Robert Forward, the narrative is framed as a learning process undertaken simultaneously by writer and reader. Although Alpha Centauri is astronomically nearby, a postulated trip by robot spacecraft, followed by manned exploration, would take 50 to 1,000 years, depending on the type of spacecraft propulsion used. Various methods for interstellar travel are introduced and discussed, including solar sails that use the power of starlight, nuclear fusion, antimatter hybrid systems, and beamed laser propulsion. One challenge is to get there in a reasonable time so that funding support, public interest, and events on Earth will not divert attention from the mission. Another challenge is timing the mission relative to available technology, because with better technology it might be possible to send a later robot on the same mission in less time. The book has no figures, tables, or

illustrations but does include 30 pages of notes and an adequate 14-page index. Though the concepts presented are often fanciful, this book will appeal to readers who wonder about the future of exploration beyond the solar system.

Summing Up: Highly recommended. General readers; professionals." (W. E. Howard III, CHOICE, March 2005)

[Exposed: Inexcusable Me... Irreplaceable Him, Shannon M. Deitz](#) , 2012, 0985250305, 9780985250300. EXPOSED is a true modern day love story between God and a girl and the enemy who wants to tear them apart. Shannon Deitz spent nearly two decades of her life in the darkest valleys of self-destruction, believing she was unworthy of God's love. After witnessing as a child the sex and drug-induced downfall of her older sister, Shannon turned away from her Catholic faith and upbringing and found herself caught in a wild and carefree lifestyle. She drank, partied, and sought comfort in abusive relationships, only to be raped not once but twice by two different men. Years later, after an intense spiritual battle within, Shannon found herself at rock bottom, where she finally understood the truth that her life had never belonged to her. It had always belonged to God. Exposed: Inexcusable Me . . . Irreplaceable Him is one woman's courageous journey down the path of spiritual self-discovery. This book offers faith-based encouragement for teenagers and adults who have suffered physical or emotional abuse. Through the extremely personal, no-holds-barred account of one woman's journey down a self-destructive path, it addresses such issues as spiritual warfare, the need to be loved, and the need to relinquish control of one's self to God.

This book describes the basic facts, concepts and ideas of polymer physics in simple, yet scientifically accurate, terms. In both scientific and historic contexts, the book shows how the subject of polymers is fascinating, as it is behind most of the wonders of living cell machinery as well as most of the newly developed materials. No mathematics is used in the book beyond modest high school algebra and a bit of freshman calculus, yet very sophisticated concepts are introduced and explained, ranging from scaling and reptations to protein folding and evolution. The new edition includes an extended section on polymer preparation methods, discusses knots formed by molecular filaments, and presents new and updated materials on such contemporary topics as single molecule experiments with DNA or polymer properties of proteins and their roles in biological evolution.

The story caame to me by way of Bibiji Inderjit Kaur, whose grandmother told stories to her when she was a little girl. Bibiji would sit on Grandma's bed, along with her siblings and cousins, and Grandma would relay story after story - of heroes and heroines, good and evil and real and imaginary creatures. What they all had in common was the thread of integrity: the theme of spirit winning over darkness. Bibiji wrote a book called *STORIES TO WIN THE WORLD*, and in that book I found this story. I have adapted it to speak to young children as well as older ones. In my retelling, the families have names that are significant. For example, Angulee in punjabi means "finger" and Lobha means "greed." The pipal tree that is central to the story also has meaning. the pipal tree, with its heart-shaped leaves is held in reverence in India. It is said that Lord Krishna was born under a pipal tree. Author Data: Shakta Kaur Khalsa is a former Montessori teacher. In 1990, she combined her teaching experiences with 28 years of practicing yoga and began teaching yoga classes to 300 school children each week. [Cognition, Evolution, and Behavior, Sara J. Shettleworth](#) , 2009, 0199886385, 9780199886388. How do animals perceive the world, learn, remember, search for food or mates, communicate, and find their way around? Do any nonhuman animals count, imitate one another, use a language, or have a culture? What are the uses of cognition in nature and how might it have evolved? What is the current status of Darwin's claim that other species share the same "mental powers" as humans, but to different degrees? In this completely revised second edition of *Cognition, Evolution, and Behavior*, Sara Shettleworth addresses these questions, among others, by integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition, in the broadest sense--from species-specific adaptations of vision in fish and associative learning in rats to discussions of theory of mind in chimpanzees, dogs, and ravens. She reviews the latest research on topics such as episodic memory, metacognition, and cooperation and other-regarding behavior in animals, as well as recent theories about what makes human cognition unique. In every part of this new edition, Shettleworth incorporates findings and theoretical approaches that have

emerged since the first edition was published in 1998. The chapters are now organized into three sections: Fundamental Mechanisms (perception, learning, categorization, memory), Physical Cognition (space, time, number, physical causation), and Social Cognition (social knowledge, social learning, communication). Shettleworth has also added new chapters on evolution and the brain and on numerical cognition, and a new chapter on physical causation that integrates theories of instrumental behavior with discussions of foraging, planning, and tool using.

[Living Well... Despite Catchin' Hell: The Black Woman's Guide to Health, Sex and Happiness, Melody Theresa McCloud](#) , 2010, 0964355477, 9780964355477. Sex, health, happiness and wealth...you know you want it! And there's no better time than now for having it all and 'gettin' it good! But sometimes factors get in the way, and it can be hell. Disparaging images in the media. The subject of misogynistic lyrics and derogatory comments. Colorism. The largest demographic of women who live as head-of-household and a growing shortage of marriage-minded (and marriage-worthy) Black men. These are just some of the ways Black women proverbially 'catch hell' in today's society. As if the attack on their image

and psyche isn't enough, Black women also disproportionately suffer from killer diseases such as diabetes, cancer, infant mortality, HIV/AIDS and more. Yet despite all the psycho-social attacks (the 'hell') Black women face, they have the lowest rate of suicide compared to other demographics and many live phenomenally well as cherished wives, trailblazing professionals and entrepreneurs. But these struggles are rarely validated, and these successes rarely acknowledged. *Living Well, Despite Catchin' Hell* is a book that does just that. It provides head-to-toe medical advice on heart disease, diabetes, HIV/AIDS, fibroid tumors and other medical diagnoses, and it acknowledges the direct effect such social rejection and attacks (the 'hell') that Black women experience on a near-daily basis have on their psyche and physical health. How some Black women hurt their own lives and well-being will also be examined. The physician-author's groundbreaking 'Rejection Connection' flowchart clearly demonstrates how these social stressors significantly contribute to the continuing state of Black women's health. It serves as a much needed eye-opener, not only to women readers, but also to media executives, health professionals, sociologists and others who seek to understand and mitigate the causative factors adversely affecting today's Black woman. With an upbeat approach (and with health as the common thread woven through each section), *Living Well, Despite Catchin' Hell* is professional medical advice, sexology, sociology, psychology, dashes of pop culture and hefty doses of personal responsibility. It is the one-source, go-to health reference Black women need in order to live healthy, happy, long and strong in the 21st century.

[Giving God a Good Time, Patricia C. Campbell](#) , 2010, 0982997809, 9780982997802. Are You Ready to Give God A Good Time? As provocative as that may sound, it is actually a profound spiritual truth. Life is meant to be lived fully, completely, and joyfully. God (or whatever you choose to name the Source of Your Being) experiences life through us, as us. So the very best way we can honor the gift we call life is to give God a good time. All the time. Patricia C. Campbell uses personal stories, humor, and spiritual ideas to teach us not only HOW to give God a good time, but that is alright to do so. In fact, it is the way to live a full and evolving life.

[With Her Machete in Her Hand: Reading Chicana Lesbians, Catrina Rueda Esquibel](#) , 2009, 0292782101, 9780292782105. With the 1981 publication of the groundbreaking anthology *This Bridge Called My Back: Writings by Radical Women of Color*, Cherré Moraga and Gloria Anzalda ushered in an era of Chicana lesbian writing. But while these two writers have achieved iconic status, observers of the Chicana/o experience have been slow to perceive the existence of a whole community lesbian and straight, male as well as female who write about the Chicana lesbian experience. To create a first full map of that community, this book explores a wide range of plays, novels, and short stories by Chicana/o authors that depict lesbian characters or lesbian desire. Catrina Rueda Esquibel starts from the premise that Chicana/o communities, theories, and feminisms cannot be fully understood without taking account of the perspectives and experiences of Chicana lesbians. To open up these perspectives, she engages in close readings of works centered around the following themes: La Llorona, the Aztec Princess, Sor Juana Inés de la Cruz, girlhood friendships, rural communities

and history, and Chicana activism. Her investigation broadens the community of Chicana lesbian writers well beyond Moraga and Anzalda, while it also demonstrates that the histories of Chicana lesbians have had to be written in works of fiction because these women have been marginalized and excluded in canonical writings on Chicano life and experience.

[The Right To Belong: Citizen and National Identity in Britain 1940-1960, Richard Weight, Abigail Beach](#) , 1998, 1860641083, 9781860641084. The period 1940-1960 was a time of considerable change in British society. It saw the emergence of mass democracy, a world war and then unprecedented affluence. Change brought uncertainty among Britain's elites, which in turn encouraged them to reflect more acutely on the direction the nation was taking. Questions were posed: what was the social role of ordinary men and women in 20th-century Britain? What were their needs, their rights, their responsibilities? How did they stand in relation not only to the State but to their regions and communities? And how were those objects of loyalty or disloyalty defined? Who, in other words, were the British, and by what processes did they come to be so considered?The contributors explore the development of these ideas by a variety of individuals and organizations, and the relationship between these opinion-makers and political parties. They also examine the extent to which their conclusions were translated into social policy in an attempt to shape the evolution of modern Britain.

[Tinkering toward Utopia: A Century of Public School Reform, David B. TYACK, Larry Cuban, David B Tyack](#) , 2009, 0674044525, 9780674044524. For over a century, Americans have translated their cultural anxieties and hopes into dramatic demands for educational reform. Although policy talk has sounded a millennial tone, the actual reforms have been gradual and incremental. "Tinkering toward Utopia" documents the dynamic tension between Americans' faith in education as a panacea and the moderate pace of change in educational practices. In this book, David Tyack and Larry Cuban explore some basic questions about the nature of educational reform. Why have Americans come to believe that schooling has regressed? Have educational reforms occurred in cycles, and if so, why? Why has it been so difficult to change the basic institutional patterns of schooling? What actually happened when reformers tried to "reinvent" schooling? Tyack and Cuban argue that the ahistorical nature of most current reform proposals magnifies defects and understates the difficulty of changing the system. Policy talk has alternated between lamentation and overconfidence. The authors suggest that reformers today need to focus on ways to help teachers improve instruction from the inside out instead of decreeing change by remote control, and that reformers must also keep in mind the democratic purposes that guide public education.

Make Every Step Count on Your Leadership Journey How did American Military leaders in the brutal POW camps of North Vietnam inspire their followers for six, seven, or eight years to remain committed to the mission, resist a cruel enemy, and return home with honor? What leadership principles engendered such extreme devotion, perseverance, and teamwork? In this powerful and practical book, Lee Ellis, a former Air Force pilot, candidly talks about his five and a half years of captivity and the fourteen key leadership principles behind this amazing story. As a successful executive coach and corporate consultant, he helps leaders of Fortune 500 companies, healthcare executives, small business owners, and entrepreneurs utilize these same pressure-tested principles to increase their personal and organizational success. In *Leading with Honor: Leadership Lessons from the Hanoi Hilton*, you will learn: -Courageous lessons from POW leaders facing torture in the crucible of captivity. -How successful teams are applying these same lessons and principles. -How to implement these lessons using the Coaching sessions provided in each chapter. In the book's Foreword, Senator John McCain states, "In *Leading with Honor*, Lee draws from the POW experience, including some of his own personal story, to illustrate the crucial impact of leadership on the success of any organization. He highlights lessons and principles that can be applied to every leadership situation." This book is ideal for individual or group study as a personal development,

coaching, human resource development, or executive training resource.

Root-lesion nematodes of the genus "Pratylenchus" are recognised worldwide as one of the major constraints of crops of primary economic importance. "Pratylenchus" spp. comprises around 70 nominal species of worldwide distribution which parasitize a wide variety of plants. The book consists of ten chapters and presents summarised and specialised information concerning the importance of the "Pratylenchus" species in: agricultural crops, and their world distribution (chapter 1); taxonomy, systematic, general morphology and diagnostic traits of "Pratylenchus" spp. including new technologies based on biochemical and molecular analyses (chapters 2-6); biology, epidemiology, ecology, host-parasite relationships, and pathogenicity (chapters 7-9). Finally, it illustrates different management strategies for "Pratylenchus" species, including, crop rotation, host-plant resistance, chemical control, soil solarisation, and biological control (chapter 10).?

[Republic, Wallis Peel](#) , 2006, 0954726820, 9780954726829. This is an exciting historical adventure set in the time of Oliver Cromwell. Sarah Turner is a young Bristol widow, rescued from a loveless, arranged marriage when her husband was shot in the back. Now she is free and works as a courier for Parliament, 'run' by Martin Penford, who had been her late father's executor. She thrives on the risk of the work and liases with a Parliamentary Army officer James Hawkins, at a special spot near her home village of Yate. She seems to lead a charmed life until on one visit she stumbles upon an horrific scene which changes her whole way of life. Now danger breathes at her side and, at the same time, she is attracted to Hawkins. Despite clashing violently, as each has a rigid opinion of a female's place in life, they marry but it is an independent marriage, which irritates James but pleases Sarah. She has twins who are looked after by the female servants because she soon becomes utterly bored by what has become a humdrum life. On a ride out, she bumps into two strangers who proceed to turn her life upside down. She is back doing what she is good at, revelling in this fresh charge of adrenaline until her life is put in jeopardy. With Charles II in exile, and the Puritans increasing their dull sway, the future of England is in the balance. More sober now, and aware of fresh dangers, she and James appear to grow

apart as they each hold differing political views. They have little conversation and each suspects the other of another interest. It takes a third party's actions to make them see sense finally and come down on the same political side for the sake of England.

Butch Chan, a soon to be legendary detective, is stalking the cold mean streets of Chicago. Here is prose so raw, and soulful, it strikes the heart and the funny-bone with equal force. 1960s Chicago is rendered so deftly, I can still feel those chill winds blow"--Felicia Ward. DYING FOR A CHANGE is the story about a girl who looks like a boy. Her best friend is a boy who looks like a girl. Together they find a killer of a boy who wants to be a girl. Summer, 1965, and the living is far from easy. The civil rights movement occupies the press. The Watts Riot is heating up Los Angeles and Chicago is hotter than little sister with the pox in August. Chan Parker has no interest in politics. She has her own thing going running numbers for mobster Al Frattini. She prefers quiet no-fuss nights alone with jazz. Her most prized possessions are a shiny black-on-black convertible T-Bird and a reel-to-reel collection of music. But Chan is dying for a change. She needs to get away from the mob. She's fed up with the schemes and scams that keep Negroes broke and broken, she wants something more legit, but what? When Miss Dove, a famous drag queen from a North Side bar, is murdered, her best friend Henrietta Wild Cherry begs Chan to act. Chan and Henrietta go on a mad romp through Chicago, from low life bars to mob dens to find the murderer, and in Chan's case, a new life.

[Of Wolves and Men,](#) , 2004, 0743249364, 9780743249362. Originally published in 1978, this special twenty-fifth-anniversary edition of the National Book Award finalist includes an entirely new afterword in which the author considers the current state of knowledge about wolves and recent efforts to reintroduce wolves to their former habitats in American wilderness areas. Humankind's relationship with the wolf is based on a spectrum of responses running from fear to admiration and affection. Lopez's classic, careful study won praise from a wide range of reviewers and went on to improve the way books about wild animals are written. Of Wolves and Men reveals the uneasy interaction between wolves and civilization over the centuries, and the wolf's prominence in our thoughts about wild creatures. Drawing on an astonishing array of literature, history, science, and mythology as well as considerable personal experience with captive and free-ranging wolves, Lopez argues for the necessity of the wolf's preservation and envelops the reader in its sensory world, creating a compelling picture of the wolf both as real animal and as imagined by man. A scientist might perceive the wolf as defined by research data, while an Eskimo hunter sees a family provider much like himself. For many Native Americans the wolf is also a spiritual symbol, a respected animal that can make both the individual and the community stronger. With irresistible charm and elegance, Of Wolves and Men celebrates scientific fieldwork, dispels folklore that has enabled the Western mind to demonize wolves, explains myths, and honors indigenous traditions, allowing us to further understand how this incredible animal has come to live so strongly in the human heart.

Brands that thrive and profit from employee and customer empowerment generate significantly greater awareness and revenues, while also decreasing the costs of marketing, selling, and customer service. However, employees must engage in public, real-time conversations. And most people are not professional communicators. Achieving those outcomes requires new skills, business processes, governance, measurement, and infrastructure. In addition, leaders must learn new ways of managing risk, while helping employees build and manage external

relationships in real time. Now, in *The Most Powerful Brand on Earth*, social business pioneers Chris Boudreaux and Susan Emerick help you successfully manage all these changes. Drawing on their experience leading social media transformations at IBM and other top companies, they present frameworks and case studies from key innovators that show how to -Leverage the surprising dynamics of online influence -Plan, execute, and manage the development of key relationships -Measure outcomes and performance in effective and useful ways -Resolve crucial security, privacy, and regulatory issues that arise when others represent you online -Gain crucial support from leaders, participants, and other stakeholders -Empower the people and teams you attract, hire, and support -Navigate cultural and process changes that will make or break your program -Preview trends that will shape your social empowerment programs in coming years

Once again, Sarah Anne Johnson offers insightful interviews with some of today's most popular and accomplished writers. Steeped in a thorough knowledge of each writer's work, Johnson asks about a range of topics on the writing craft, nurturing fictional ideas, and the daily practice of writing. The authors offer insights and practical advice that will delight their fans and be cherished by aspiring writers. Michael Cunningham recalls how the structure of *The Hours* evolved as he wrote it. Edwidge Danticat honors the Haitian storytelling tradition she encountered in her childhood. And Jonathan Lethem reflects on working from inside and outside the literary establishment. Johnson's interviews have been praised for her "thoughtful and knowledgeable questions" (*Bloomsbury Review*) that "provoke thoughtful responses from her subjects" (*Publishers Weekly*) and provide "an opportunity to participate in intimate and often illuminating dialog" (*Library Journal*). Her previous collection, *Conversations with American Women Writers* (UPNE, 2004), was described as "17 miniature instruction books on craft" by *Publishers Weekly*. William Randolph Hearst was a figure of Shakespearean proportions, a man of huge ambition, inflexible will, and inexhaustible energy. He revolutionized the newspaper industry in America, becoming the most powerful media mogul the world had ever seen, and in the process earned himself the title of "most hated man in America" on four different occasions. Now in the second volume of this sweeping biography, Ben Procter gives readers a vivid portrait of the final 40 years of Hearst's life. Drawing on previously unavailable letters and manuscripts, and quoting generously from Hearst's own editorials, Procter covers all aspects of Hearst's career: his journalistic innovations, his impassioned patriotism, his fierce belief in "Government by Newspaper," his frustrated political aspirations, profligate spending and voracious art collecting, the building of his castle at San Simeon, and his tumultuous Hollywood years. The book offers new insight into Hearst's bitter and highly public quarrels with Al Smith (who referred to Hearst papers as "Mudgutter Gazettes") and FDR (whose New Deal Hearst dubbed the "Raw Deal"); his 30-year affair with the actress Marion Davies (and her own affairs with others); his political evolution from a progressive trust-buster and "America first" isolationist to an increasingly conservative and at times hysterical anti-communist. Procter also explores Hearst's ill-considered meeting

with Hitler, his attempts to suppress "Citizen Kane," and his relationships with Joseph Kennedy, Charles Lindbergh, Louis B. Meyer, and many other major figures of his time. As Life magazine noted, Hearst newspapers were a "one-man fireworks display"--sensational, controversial, informative, and always entertaining. In Ben Procter's fascinating biography, Hearst shines forth in all his eccentric and egocentric glory.

[Palladius of Helenopolis: The Origenist Advocate, Demetrios S. Katos](#) , 2011, 0199696969, 9780199696963. This book is the first monograph devoted to the life, work, and thought of Palladius of Helenopolis (ca. 362-420), an important witness of Christianity in late antiquity. Palladius' Dialogue on the Life of St. John Chrysostom and his Lausiaca History are key sources for our knowledge of John Chrysostom's downfall and of the Origenist controversy, and they both provide rich information concerning many notable ecclesiastical personalities such as John Chrysostom, Theophilus of Alexandria, Jerome, Evagrius of Pontus, Melania the Elder, Isidore of Alexandria, and the Tall Brothers. Demetrios S. Katos employs late antique theories of judicial rhetoric and argumentation, theories whose significance is only now becoming apparent to late antique scholars, to elicit new insights from the Dialogue regarding the controversy that resulted in the death of John Chrysostom. He also demonstrates that the Lausiaca History deliberately promoted to the imperial court of Pulcheria a spiritual theology that was indebted to his guide Evagrius and more broadly to the legacy of Origen, despite Jerome's recent attacks against both. Palladius emerges from this account not merely as a peripatetic monk, his own preferred self-portrait that has prevailed in most modern accounts, but as an ecclesiastical statesman who passionately supported both the causes and ideas of his associates in the most pressing controversies of his day. The study will also be valuable for scholars of late antiquity working in the areas of asceticism, spirituality, pilgrimage, hagiography, and early Christian constructions of gender, for all of which Palladius' works are important sources.

[Footsteps in the Dark, Georgette Heyer](#) , 2007, 0099493691, 9780099493693. The Priory may be ramshackled in appearance, but Peter, Margaret and Celia, who have inherited it from their uncle, love it for its rambling charm. But

there's more to this house than is at first apparent: for years hardly a single person has set foot in the place, and even their uncle chose to live in a different house, far away from this particular property. Local wisdom says that the house is haunted. And when things start going bump in the night, it certainly seems as if something ghostly is walking the Priory's halls. Then a murder is committed. Does the key to solving the crime lie in the realm of the supernatural? Or is the explanation much more down to earth?

[Richard Parker: Objectspace Masters of Craft, Richard Fahey, Richard Parker](#) , 2011, 0987650203, 9780987650207.

Richard Parker: Master of Craft surveys the career and practice of this defining figure within New Zealand ceramics, with works loaned from leading public and private collections around the country. The curator, Richard Fahey, says "Parker had his own picture of what a pot should look like", and that although Parker's practice is grounded within the traditions of studio ceramics, "as an artist, his innovative approach seeks to redefine for us new ways we may understand the decorative object." At a pivotal moment in his career Richard Parker abandoned the known in terms of how to make a pot and what it should look like and developed his own unique ceramics vocabulary. This singular vision has sustained his career for over 30 years and produced works that are uniquely recognisable. Parker is noted for a variety of distinctive decorative forms frequently embellished with dashes, dots and dribbles in luscious glazes of red and green, black and cream, and his signature green and gold.. Accompanying the exhibition is a lavishly illustrated 120 page publication, written by Richard Fahey, which describes: the local ceramics context that Parker developed within; his work and style of production; a biographical profile and a consideration of his standing in New Zealand ceramics, followed by a timeline of Parker's exemplary career.

Despite the importance of group communication processes, they remain elusive and difficult to understand, and the type of theory necessary to make sense of these processes differs from those commonly found in the social sciences. This collection of essays advances a unique perspective on group decision-making which is complementary to approaches taken in management, psychology and sociology. As the new edition of this book demonstrates, a number of strong theoretical frameworks have developed over the past 15 years together with considerable empirical evidence. The essays are distinctive both in their explicit focus on communication processes and in their location in a unique intellectual tradition. As such the book serves
