What's HY? It's an unheard-off diet, And cows are happy not to try it. Pulitzer Prize-winning poet Richard Wilbur turns his sharp eye to the noble alphabet and imagines what life would be like without these 26 little-but powerful - letters. Packed with humor and witty subtleties, the verse in this captivating picture book is splendidly matched by Caldecott Medal winner David Diaz's hilariously clever illustrations. Richard Wilbur has twice been awarded the Pulitzer Prize and has also been honored with the National Book Prize, the Bollingen Prize, and the American Academy and Institute of Arts and Letters Gold Medal for Poetry. David Diaz won the Caldecott Medal for the illustrations in "Smoky Night," written by Eve Bunting.

[The Accidental Bride, Denise Hunter](#) , 2012, 1401686222, 9781401686222. When a wedding reenactment turns real, Shay finds shes an accidental bride. Shay Brandenberger is raising her daughter in Moose Creek, Montana, on her childhood ranch, nestled against the Yellowstone River. Despite the hard work, she cant seem to keep her head above water and now the bank is threatening to foreclose. She prays for a miracle, but the answer she receives is anything but expected. Having agreed to play the bride in the Founders Day wedding reenactment, Shay is mortified to be greeted at the end of the aisle by none other than Travis McCoy, her high-school sweetheart the man who left her high and dry for fame and fortune on the Texas rodeo circuit. Then the unthinkable happens. Thanks to a well-meaning busybody and an absentminded preacher, the make-believe vows result in a legal marriage. But before Shay can say annulment, Travis comes up with a crazy proposal. If she refuses his offer, she may lose her home. If she accepts, she may lose her heart. Shay isnt sure if the recent events are Gods will or just a preachers blunder. Will trusting her heart to the man who once

shattered it be the worst mistake of her life? Or could their marriage be the best accident that ever happened?

[Looks to Die For](#), Janice Kaplan , 2007, 1416538666, 9781416538660. As the wife of a prominent Beverly Hills plastic surgeon, a dedicated mother of three, and an absolutely fabulous decorator to the stars, Lacy Fields is stunned to the tips of her Chanel-manicured toenails the night the police barge into her house and haul her husband off in handcuffs. With her handsome Dan accused of murdering a young wannabe actress named Tasha Barlow, Lacy turns her talent from tracking down priceless antique furniture to chasing a clever killer. Lacy is sure her husband has been wrongly accused -- but how to explain his mysterious behavior? Known as the Saint of Hollywood for his skill with a scalpel, Dan seems to be keeping a secret or two. Still Lacy won't lose her faith or her determination to find the real murderer. With her best friend Molly Archer, a hot L.A. casting agent, at her side, Lacy tracks suspects ranging from a sleazy network TV star to an advertising exec who shoots Super Bowl commercials set on the moon. Is Tasha's loyal hometown friend really an enemy? Did an ex-con from her past return to destroy Tasha's new life? Lacy Fields will stop at nothing to protect her family -- whether it's searching for the person who framed her husband or keeping the black hair dye away from her fourteen-year-old daughter. Cleverly pairing the day-to-day details of suburban life with delicious insider glamour, *Looks to Die For* marks the debut of a savvy and stylish new voice in suspense fiction.

[EGFR Signaling Networks in Cancer Therapy](#), John D. Haley, William John Gullick , 2009, 1597453560, 9781597453561.

The epidermal growth factor (EGF) receptor and its downstream signal transduction networks have been implicated in the ontology and maintenance of tumor tissues, which has motivated the discovery and development of molecularly targeted anti-EGFR therapies. Edited by John Haley and William J. Gullick, *EGFR Signaling Networks in Cancer Therapy*, is separated into two sections. The first of which probes the molecular pathways and the intersection of signaling networks which are frequently deregulated in human cancers, with a view to describing EGF receptor in a tumor tissue specific context. Meanwhile, the second section illustrates the many ways in which EGF receptor contribute to abnormal survival and migration signaling in cancer cells and to epithelial to mesenchymal transition and metastasis. The book also describes the mitogenic, survival, adhesive and migratory pathways within a framework of interacting subsystems that

contribute to the activity and physiological regulation of the receptor in normal and neoplastic tissues. Even though there is still much to learn, this volume explores this fascinating system with compelling information.

[The Fruitful Darkness: A Journey Through Buddhist Practice and Tribal Wisdom, Joan Halifax](#) , 2004, 0802140718, 9780802140715. In this masterwork of an authentic spirit person (Thomas Berry), Buddhist teacher and anthropologist Joan Halifax Roshi delves into the fruitful darknessthe shadow side of being, found in the root truths of Native religions, the fecundity of nature, and the stillness of meditation. In this highly personal and insightful odyssey of the heart and mind, she encounters Tibetan Buddhist meditators, Mexican shamans, and Native American elders, among others. In rapt prose, she recounts her explorationsfrom Japanese Zen meditation to hallucinogenic plants, from the Dogon people of Mali to the Mayan rain forest, all the while creating "an adventure of the spirit and a feast of wisdom old and new (Peter Matthiessen). Halifax believes that deep ecology (which attempts to fuse environmental awareness with spiritual values) works in tandem with Buddhism and shamanism to discover the interconnectedness of all life, and to regain lifes sacredness. Grove Press is proud to reissue this important work by one of Buddhisms leading contemporary teachers.

In The Assassination of the Archduke, Greg King and Sue Woolmans offer readers a vivid account of the lives - and cruel deaths - of Franz Ferdinand and his beloved Sophie. Combining royal biography, romance, and political assassination, the story unfolds against a backdrop of glittering privilege and an Imperial Court consumed with hatred, taking readers from Bohemian castles to the horrors of Nazi concentration camps in a compelling,

fascinating human drama. As moving as the fabled romance of Nicholas and Alexandra, as dramatic as Mayerling, Sarajevo resonates with love and loss, triumph and tragedy in a vibrant and powerful narrative. It lays bare the lethal circumstances surrounding that fateful Sunday morning in 1914, examining not only the Serbian conspiracy that killed Franz and Sophie and sparked the First World War but also insinuations about the hidden powers in Vienna that may well have sent them to their deaths. With a Foreword from the Archduke's great-granddaughter, Princess Sophie von Hohenberg, and drawing on a wide variety of unpublished sources and with unique access to previously restricted Hungarian and Czech archives, including Sophie's diaries and family papers, King and Woolmans have written the most comprehensive account of this momentous event available in English. In doing so, they offer readers an intriguing and startlingly revisionist look at this most famous of Archdukes, his family, and their momentous collision with destiny in 1914.

It has often been claimed that without drastic conceptual innovations a genuine explanation of quantum interference effects and quantum randomness is impossible. This book concerns Bohmian mechanics, a simple particle theory that is a counterexample to such claims. The gentle introduction and other contributions collected here show how the phenomena of non-relativistic quantum mechanics, from Heisenberg's uncertainty principle to non-commuting observables, emerge from the Bohmian motion of particles, the natural particle motion associated with Schrödinger's equation. This book will be of value to all students and researchers in physics with an interest in the meaning of quantum theory as well as to philosophers of science.

The Roman Republic was one of the most civilized societies in the ancient world, ruled by elected officials whose power was checked by a constitution so well crafted that it inspired the founding fathers of the United States of America. Here Philip Matyszak describes fifty-seven of the foremost Romans of the Republic, spanning the centuries from its birth to its bloody death and including the best and the worst of the Roman elite: Licinius Crassus, a kind father and loving husband who crucified slaves by the thousands, or Cato the Censor, upright and incorruptible, xenophobic and misogynistic. Supported by a wealth of pictorial and archaeological detail, these personal histories provide an overview of the development and expansion of Rome, encompassing foreign and civil wars as well as social strife and key legislation. The biographies are supplemented by time lines, data files, and special features that highlight different aspects of Roman culture and society.

Cataloging the legacy of the American punk rock pioneers Black Flag, this photo documentary uses stark, contrasting portraits to share the stories of the die-hard fans who wear the iconic four-barred logo tattooed on their skin. From doctors to homeless punks, stories range from the intensely personal to the absurd as each larger-than-life soul mugs for the camera. Adding to the idea that mixed messages can come from one unifying design, each image is highlighted with a personal quotation, a name and bio, and a Black Flag favorites list. Captured during an extensive tour through the United States, Canada, and Western Europe, this collection serves as a visual testimony to the hyper-distilled mythology that the band is more prevalent now than when it was in service, and serves as a soundtrack for those living as self-imposed cultural outsiders. Interviews with former members of the band, tattoo artists, photographers, and other relevant luminaries round out this ethnography and serve to spotlight Black Flags vicious live performances, forward-thinking work ethic, and indisputable reputation for acting as both champions and destroyers of the punk rock culture that they helped create.

[Words Work: Activities for Developing Vocabulary, Style, and Critical Thinking, Thomas A. Carnicelli](#) , 2001, 0867095652,

9780867095654. "Like many English teachers," Tom Carnicelli says, "I've felt my students would read, write, and even think better if they knew more about words." The solution he offers couldn't be simpler: integrated activities in which students explore words and, at the same time, develop their language arts and thinking skills. This way teachers can pay more attention to word study - without sacrificing other parts of the English curriculum and without resorting to word lists and memorization. In "Verbal Charades," for example, students play a verbal version of charades, using all the language arts in the process; while "Verbal Clusters" is a weeklong set of writing and reading tasks designed to foster in-depth understanding of a group of related words. A third activity adds writing and thinking tasks to the traditional root and prefix method of learning words. To help teachers use the activities, the second section of Carnicelli's book - a brief, nontechnical history of the English vocabulary - discusses the differences between native words and borrowed (loan) words. The third section, on writing style, offers activities in which students analyze the kinds of words used by often-studied writers such as Frost, Hemingway, and Thoreau. Students also explore writing in different styles themselves, as they learn the special advantages of a balanced style, combining the best features of native and borrowed English words. The final section, "Word Study and Cultural Values," aims to give students greater awareness of the cultural values embodied in the words they encounter - in sports, clothing, food, relationships, government, education, and more. Also, in an activity based on Bartlett's Familiar Quotations, they explore, in depth, certain key cultural concepts such as courage, patriotism, and nonviolence. Words Work couldn't be more effective or easier to use. All the activities have been tested in middle and high school classrooms, and there are twenty-one figures that can be duplicated as hand-outs, along with additional teaching suggestions. Included, too, are actual samples of student work.

[Achtung Panzer!, Heinz Guderian](#) , 2012, 1780225806, 9781780225807. This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

[The Architecture of Innovation: The Economics of Creative Organizations, Josh Lerner](#) , 2012, 0191645966, 9780191645969. The developed world is struggling with unsustainable promises and unappealing choices, and sustained

economic growth represents one of the few ways out. And over the centuries, growth in advanced economies has been strongly linked to innovation. Despite the vast amounts written about innovation over the years, understanding of its drivers remains surprisingly limited. This book, by top Harvard Business School professor Josh Lerner, seeks to remedy this shortfall. It highlights that while organizational economists have made strides in understanding what combinations of incentives and organization structure can encourage innovative breakthroughs, many of these insights have not yet received the attention they deserve in the real world, or been developed in ways that can easily be applied in real situations. The author focuses on two models for encouraging innovation, the corporate research laboratory and the start-up. Each model, while proven and successful, also faces significant challenges and ambiguities. A central argument is that there remains considerable potential for hybrids between these two approaches. This book draws on important research in economics and reviews different approaches to innovation, combining this with a series of case examples to explore the challenges that face start up firms, large firms, and nations. It is essential reading for anybody faced with the challenge of innovation.

[Logic List English: Rhyming Words Ect, Volume 1, Tony Sandy](#) , 2009, 0976783282, 9780976783282. The author of this book is a classroom assistant in Scotland. He conceived of this book series after struggling to learn a foreign language and wondering what stumbling blocks someone new to English would have, in increasing his or her own knowledge of the language. He also sought out and discovered ways to actively build up vocabulary and introduce grammar to the learner through usage i.e. samples, rather than trying to teach the rules and letting them acquire the vocabulary, which he considers back to front as a process. The ideas behind this series are not totally original but their format as workbooks is as far as he knows, as is their use at all levels (Secondary, Remedial, Adult Literacy and Second Language learning). It

is hoped that this set of volumes will help reduce the growing trend in illiteracy, by reproducing easily assemble material, through teaching memorable patterns in all areas as the series progresses. In the authors opinion, language should be taught scientifically as with Mathematics - one symbol at a time, then in combinations and variations, that is letters, words, phrases, sentences, paragraphs, essays. Language is music (sound) and this links to Math's through harmony of effort as in poetry or song, its highest, most enjoyable form - where both sorts of sound come together (instrumental and vocal).

An unidentified gunman had sped off with her two little boys, leaving her screaming on the side of the road. For more than a week, the people in the tiny town of Union, South Carolina rallied around the young mother. They combed the woods and neighborhood parks for the missing children and prayed for their safe return, while FBI teams launched a massive manhunt. No one ever suspected that the pretty 23-year-old who tearfully pleaded for her children in front of millions of TV viewers could be capable of such a heartless act...until she led police to the watery graves of her young sons. Now, as a shaken community confronts its outrage and sorrow, a stunned nation asks how it could have happened.

[The Arab Uprisings: What Everyone Needs to Know, James L. Gelvin](#) , 2012, 0199891753, 9780199891757. Beginning in December 2010 popular revolt swept through the Middle East, shocking the world and ushering in a period of unprecedented unrest. Protestors took to the streets to demand greater freedom, democracy, human rights, social justice, and regime change. What caused these uprisings? What is their significance? And what are their likely consequences? In an engaging question-and-answer format, The Arab Uprisings explores all aspects of the revolutionary protests that have rocked the Middle East. Historian James Gelvin begins with an overview--What sparked the Arab uprisings? Where did the demands for democracy and human rights come from? How appropriate is the phrase "Arab Spring"?--before turning to specific countries around the region. He looks at such topics as the role of youth, labor, and religious groups in Tunisia and Egypt and discusses why the military turned against rulers in both countries. Exploring the uprisings in Libya and Yemen, Gelvin explains why these two states are considered "weak," why that status is important for understanding the upheavals there, and why outside powers intervened in Libya but not in Yemen. Next, Gelvin compares two cases that defied expectations: Algeria, which experts assumed would experience a major upheaval after Egypt's, and Syria, which experts failed to foresee. He then looks at the monarchies of Morocco, Jordan, and the Gulf, exploring the commonalities and differences of protest movements in each. The final chapter discusses the implications of the uprisings. What do they mean for the United States? For Iran? Has al-Qaeda been strengthened or weakened? What effects have the uprisings had on the Israel-Palestine conflict? What conclusions might we draw from the uprisings so far? For anyone wishing to understand the dramatic events in the Middle East, The Arab Uprisings is the place to turn.

[The Nature of Nurture: Biology, Environment and the Drug-exposed Child, Ira J. Chasnoff](#) , 2001, 0970776209, 9780970776204. The figures appear to be overwhelming. Eighty percent of children removed from their homes by child protective services are removed because of drug and alcohol problems in the family. More than half of mothers placing their babies for adoption through private agencies have used drugs or alcohol during pregnancy, and children could

suffer from Fetal Alcohol Syndrome, which manifests itself in behavioral problems, learning disabilities, and even organ malformation. When Love is Not Enough Despite these statistics, families continue to adopt and care for these children, believing that with enough love they can overcome obstacles. In *The Nature of Nurture*, Dr. Ira J. Chasnoff reveals that it takes more: it takes knowledge, skills, and understanding. In easily accessible language he provides the reader an enlightened approach for managing a child's behavior based in theory, proven through the research, and grounded in his own extensive experience. Case Studies Written for foster and adoptive parents, educators, as well as health care and social service professionals, *The Nature of Nurture* presents the latest data, analysis, and insight complimented by case studies taken from real-life stories of children and families who have been at The Child Study Center, the clinical center of Children's Research Triangle for the evaluation and treatment of high-risk children and their families. Clear and Concise Coverage Contents Include: Discussions of risk factors for both infants and growing children prenatally exposed to alcohol or drugs, specifics of Fetal Alcohol Syndrome (FAS) or Fetal Alcohol Spectrum Disorders (FASD), and possible behavior problems, including biologic basis of behavior. Dr. Chasnoff also explains home, family, and classroom factors in behavioral change, emotional issues, and learned patterns of behavior. In addition, the book presents details on developing an intervention strategy (promoting desired behaviors, using social reinforcers, teaching prosocial behavior and problem-solving, and identifying and replacing inappropriate behavior). Through careful examination of these topics and more, the author shows that teaching a child to manage his or her behavior becomes its own mechanism for reinforcement. The book includes drawings and charts to better illustrate technical concepts.

[From 0 to 1: An Authoritative History of Modern Computing, Atsushi Akera, Frederik Nebeker](#) , 2002, 0195140257, 9780195140255. Computers and their origins have a fascination both for scholars and for ordinary readers, but much of the existing literature on the history of computing is too specialized to interest the general reader. This collection is broad in scope, offering an authoritative and up-to-date introduction to the history of computing. It gives an overview of two centuries in the history of information processing and detailed coverage of a number of more recent topics, including PC software, user interfaces, and the Internet. By integrating the technical, business, and policy aspects of the history of computing, the authors explain how and why computers were created, and how they were shaped by the intent of their

creators. All of the contributors are experts in their fields, writing clearly and avoiding jargon to make this book accessible to a wide range of general readers, students, and historians and computer professionals.

[Catholic higher education: a culture in crisis, Melanie M. Morey, John J. Piderit](#) , 2006, 0195305515, 9780195305517.

Catholic higher education in the United States is undergoing dramatic changes, driven largely by the virtual disappearance of nuns, brothers, and priests from Catholic university campuses. Today Catholic colleges and universities are dealing with critical questions about what constitutes Catholic collegiate identity. What are appropriate ways to engage the Catholic tradition across all sectors of university life? What constitutes a critical mass of committed and knowledgeable Catholics necessary to maintain religious identity? What is an appropriate level of knowledge and religious commitment for those who lead, govern, and teach at Catholic institutions and how do they acquire it? Many people have strong - and strongly differing - opinions about the current state of Catholic higher education. Melanie M. Morey and John J. Piderit, S.J., wade into these waters with a study of 124 senior administrators at 33 Catholic colleges and universities across the United States. Exceptionally candid appraisals by administrators across a varied landscape attest that a cultural crisis is looming at a number of Catholic institutions. Based on their research, Morey and Piderit describe the present situation and offer concrete suggestions for enhancing Catholic identity, culture, and mission at all Catholic colleges and universities. The authors define the critical issues and analyze and address them by using the rich construct of culture, particularly organizational culture. They provide four different models of how Catholic colleges and universities can operate and successfully compete as religiously distinctive institutions in the higher education market. After identifying the content of the Catholic tradition - intellectual, moral, and social - the authors analyze present performance among institutions in all four models. They derive criteria for identifying religious cultural crisis at institutions and provide specific policy proposals for enhancing religious culture. They also suggest principles for effectively leading and managing cultural change. Morey and Piderit offer the first in-depth cultural analysis of the Catholic character of Catholic universities and colleges at a crucial time for these institutions. With new research and practical applications, this book is an invaluable resource for Catholic educators and anyone concerned about the future of Catholic higher education.

[Unity and Discord: Music and Politics in Contemporary Tibet,](#) , 2004, 0954196163, 9780954196165. This book examines the role music has played as a political tool in the struggle over Tibet since the 1950s, and exposes some of the consequences of this politicisation on the musical traditions themselves and on Tibetan cultural identity. It draws on interviews with Tibetans brought up in Tibet carried out by TIN researchers, as well as a range of published and unpublished material. The study provides a historic retrospective of the transformation of Tibetan musical culture during the past half-century. Introducing the ideologies that were brought to bear on Tibetan music as Tibet came under the control of the People's Republic of China in 1951, it describes the development of the actual policies implemented until the early 1980s. It then investigates the vibrant Tibetan pop music scene that has emerged since the late 1980s. Further

parts of the book analyse in details the use of music for Chinese state propaganda, as well as the way Tibetans have used music to express dissent and resist Chinese political, social and cultural domination. It examines the explicit messages and subtexts of propaganda, and questions its effectiveness. It also examines the varying forms of Tibetan 'protest songs', the metaphors used for escaping censorship, the state's reactions and its ultimate failure to fully control the feelings and perceptions of Tibetans. Finally, the book addresses the reactions to the extensive change and in particular, sinicisation of Tibetan musical culture in Tibet. Lyrics of many songs presented in the original Tibetan or Chinese as well as in English translation offer a unique insight into contemporary Tibet and its living musical culture.

Greville Sixsmith, a once powerful intelligence executive, retires to Melbourne to write his memoirs, memoirs so potentially explosive that his flat is watched night and day by members of the Australian and British Secret Services. . and by members of the Provisional IRA who have been tipped off that the

memoirs contain the identity of a British mole at the top of their organisation. Little do they realise that the British have installed Sixsmith in order to feed them false information. That is until they break into his flat and torture the truth from Sixsmith himself. The one surviving IRA man sets off across Australia in order to tell his controller that the memoirs are a hoax. Hard on his heels are two Intelligence officers who will do anything to stop him. . .

Skillfully edited by John McNally, Bottom of the Ninth: Great Contemporary Baseball Short Stories collects nineteen contemporary baseball short stories from a successful mix of well-established writers, lesser-knowns, and a few up-and-comers. These stories are characterized by the same dramatic elements that draw people to the sport itself: the mythologizing of players, the obsessions and romance of the game, the bonds between players and fans, parents and children. From a key play, a missed catch, a chance lost, these are tales of characters facing high stakes and calls to action, metaphorically and literally, in the bottom of the ninth.

[Wild Hope: On the Front Lines of Conservation Success, Andrew Balmford](#) , 2012, 0226035972, 9780226035970. Tropical deforestation. The collapse of fisheries. Unprecedented levels of species extinction. Faced with the plethora of gloom-and-doom headlines about the natural world, we might think that environmental disaster is inevitable. But is there any good news about the environment? Yes, there is, answers Andrew Balmford in Wild Hope, and he offers several powerful stories of successful conservation to prove it. This tragedy is still avoidable, and there are many reasons for hope if we

find inspiration in stories of effective environmental recovery. *Wild Hope* is organized geographically, with each chapter taking readers to extraordinary places to meet conservation heroes and foot soldiers and to discover the new ideas they are generating about how to make conservation work on our hungry and crowded planet. The journey starts in the floodplains of Assam, where dedicated rangers and exceptionally tolerant villagers have together helped bring Indian rhinos back from the brink of extinction. In the pine forests of the Carolinas, we learn why plantation owners came to resent rare woodpeckers and what persuaded them to change their minds. In South Africa, Balmford investigates how invading alien plants have been drinking the country dry, and how the Southern Hemisphere's biggest conservation program is now simultaneously restoring the rivers, saving species, and creating tens of thousands of jobs. The conservation problems Balmford encounters are as diverse as the people and their actions, but together they offer common themes and specific lessons on how to win the battle of conservation and the one essential ingredient, Balmford shows, is most definitely hope. *Wild Hope*, though optimistic, is a clear-eyed view of the difficulties and challenges of conservation. Balmford is fully aware of failed conservation efforts and systematic flaws that make conservation difficult, but he offers here innovative solutions and powerful stories of citizens, governments, and corporations coming together to implement them. A global tour of people and programs working for the planet, *Wild Hope* is an emboldening green journey.

[Characterization of Biomaterials, Amit Bandhyopadhyaya, Susmita Bose](#) , 2013, 0124158005, 9780124158009. One of the key challenges current biomaterials researchers face is identifying which of the dizzying number of highly specialized characterization tools can be gainfully applied to different materials and biomedical devices. Since this diverse marketplace of tools and techniques can be used for numerous applications, choosing the proper characterization tool is

highly important, saving both time and resources. Characterization of Biomaterials is a detailed and multidisciplinary discussion of the physical, chemical, mechanical, surface, in vitro and in vivo characterization tools and techniques of increasing importance to fundamental biomaterials research. Characterization of Biomaterials will serve as a comprehensive resource for biomaterials researchers requiring detailed information on physical, chemical, mechanical, surface, and in vitro or in vivo characterization. The book is designed for materials scientists, bioengineers, biologists, clinicians and biomedical device researchers seeking input on planning on how to test their novel materials, structures or biomedical devices to a specific application. Chapters are developed considering the need for industrial researchers as well as academics. Biomaterials researchers come from a wide variety of disciplines: this book will help them to analyze their materials and devices taking advantage of the multiple experiences on offer. Coverage encompasses a cross-section of the physical sciences, biological sciences, engineering and applied sciences characterization community, providing gainful and cross-cutting insight into this highly multi-disciplinary field. Detailed coverage of important test protocols presents specific examples and standards for applied characterization

The Art of Walking: A Field Guide is a unique look at walking as a mode of artistic practice and is the first book to explore this fascinating subject of how walking can be used as an artistic medium. An introductory essay identifies breaks and continuities between walking artists now and the pedestrian activities of the historic- and neo-avant-gardes of the early- and mid-20th Century, respectively. Subsequent visually-led sections deal with recent art engaging with different types of walkers including

pilgrims, peripatetic writers and philosophers, dandies, drifters, marchers, stalkers, tour guides and dog walkers. Artists to be evaluated include Marina Abramovic and Ulay, Vito Acconci, Dennis Adams, Francis Als, Keith Arnatt, Tim Brennan, Stanley Broun, Bruce Nauman, Sophie Calle, Janet Cardiff and George Bures Miller, Jeremy Deller, Simon Faithfull, Hamish Fulton, Regina Jos Galindo, Mona Hatoum, Akira Kanayama, Richard Long, The Long March Foundation, Melanie Manchot, Yoko Ono, Adrian Piper, Simon Pope and Krzysztof Wodiczko.

[Crafted Prayer: The Joy of Always Getting Your Prayers Answered, , Graham Cooke](#) , 2004, 0800793803, 9780800793807. What is the difference between a prayer crafted to God's will and one that comes from our own imaginings? It's all in the answer. As Graham Cooke explains in this surprising spiritual adventure, miracles happen when we learn to discern God's intent in each trial and difficulty and ask Him to achieve His own purposes. This "new" method of prophetic prayer actually searches out the Bible's own principles for looking beyond the natural into the supernatural and seeing God at work all around us. With these simple guidelines, exercises and action steps for crafted prayer, you will learn to seek God's heart with confidence, even with passion and power, because you will know how to pray. God's anointing on your joyful intercession will help shower the earth with His glory-and your prayers will be answered. Book

Advocating effective heart maintenance, this book puts readers in charge of their own heart health by encouraging lifestyle changes among those who are plagued by family histories of heart trouble, live sedentary lifestyles, and practice bad eating habits. The myths of overnight success in weight loss through fad diets are debunked, and a program for overall health and well-being through the individual's commitment is presented. An optimistic tone pervades this text with the persuasive suggestion that under most circumstances, those who follow commonsense guidelines can live long and productive lives.

[Invasion Biology](#), Mark A. Davis , 2009, 0199218757, 9780199218752. With the exception of climate change, biological invasions have probably received more attention during the past ten years than any other ecological topic. Yet this is the first synthetic, single-authored overview of the field since Williamson's 1996 book. Written fifty years after the publication of Elton's pioneering monograph on the subject, *Invasion Biology* provides a comprehensive and up-to-date review of the science of biological invasions while also offering new insights and perspectives relating to the processes of introduction, establishment, and spread. The book connects science with application by describing the health, economic, and ecological impacts of invasive species as well as the variety of management strategies developed to mitigate harmful impacts. The author critically evaluates the approaches, findings, and controversies that have characterized invasion biology in recent years, and suggests a variety of future research directions. Carefully balanced to avoid distinct taxonomic, ecosystem, and geographic (both investigator and species) biases, the book addresses a wide range of invasive species (including protists, invertebrates, vertebrates, fungi, and plants) which have been studied in marine, freshwater, and terrestrial environments throughout the world by investigators equally diverse in their origins. This accessible and thought-provoking text will be of particular interest to graduate level students and established researchers in the fields of invasion biology, community ecology, conservation biology, and restoration ecology. It will also be of value and use to land managers, policy makers, and other professionals charged with controlling the negative impacts associated with recently arrived species.

The book reads like a close cousin of Philip K. Dick, the acknowledged master of doubting what's real." - Olivier Delcroix "A devilishly well-oiled plot, which grabs the reader with both hands, drags him along, and twists him around." - Le Spectacle du Monde Martin Harris returns home after a short absence to find that his wife doesn't know him, another man is living in his house under his name, and the neighbors think he's a raving lunatic. Worse, not a single person family, colleague, or doctor can vouch for him. Worse still, the impostor shares all of Martin's memories, experiences, and knowledge, down to the last detail. He is, in fact, a more convincing Martin than Martin himself. Is it a conspiracy? Amnesia? Is Martin the victim of an elaborate hoax, or of his own paranoid delusion? In his high-powered new novel, *Out of My Head*, the award-winning author of *One-Way*, explores the illusory nature of identity and the instability of the things we take for granted. Dispossessed of his job, his family, his name, and his very past, Martin Harris

is an Everyman caught in an absurd and yet disturbingly convincing nightmare, one that seems to have no exit and that resists every explanation. Part moral fable, part Robert Ludlum-style thriller, *Out of My Head* is a fast-paced tale of one man's desperate attempt to reclaim his existence even at the cost of his own life.

This anthology is a superb collection of 36 articles covering all of the major theories, past and present, that inform criminology today. What truly sets this volume apart is the inclusion of many articles discussing novel and often overlooked perspectives in criminological theory. In fact, many of these articles have never before been included in a reader. Each article is framed by an introductory overview (discussing the articles importance, the context for its development, and the author) and concludes with discussion questions. These articles include a thorough examination of topics such as white collar crime and developmental criminology, as well a discussions of integrated theories that consider genetics, psychology, and environmental approaches. As most journal articles are typically written for a professional audience, the original articles have been substantially edited and abridged to make them more accessible to students. The resulting reader will prove to be an invaluable resource for any undergraduate or graduate course where criminological theory plays a central role.

[Dexterity and Its Development, Nicholai A. Bernstein](#) , 1996, 1410603350, 9781410603357. This is a very unusual book. It brings to the English speaking reader a masterpiece written some 50 years ago by one of the greatest minds of the

20th century--Nicolai Aleksandrovich Bernstein--considered the founder of many contemporary fields of science such as biomechanics, motor control, and physiology of activity. Divided into two parts, this volume's first section is a translation of the Russian book *On Dexterity and Its Development*. It presents, in a very reader-friendly style, Bernstein's major ideas related to the development and control of voluntary movements in general, and to the notion of dexterity, in particular. Although very few scientific works remain interesting to the reader 50 years after they were written, this volume--now available for the first time in English--is a rare exception to this rule. His ideas are certainly not obsolete. Actually, we are just starting to grasp the depth and breadth of his thinking, especially his analysis of the complex notion of dexterity. The second section provides both a historical and a contemporary perspective on Bernstein's ideas. The original work was directed at a wide audience ranging from specialists in biomechanics and motor behavior, to coaches, neurologists, physical therapists, athletes, and even inquisitive college and high school students. The chapters contributed by contemporary scientists mirror Bernstein's style and present new findings in the areas of biomechanics, motor control, and motor development in a way that would be both understandable to non-specialists in these areas, and informative for professionals working in different areas related to human movement. All those interested in the origins and mechanisms of the production of voluntary movements, irrespective of their educational and professional background, will find this book valuable. In addition, the unique history and composition of this text will make it helpful and attractive to historians and philosophers of science.

[The Balanced Horse: The Aids by Feel, Not Force, Sylvia Loch](#) , 2013, 1570766223, 9781570766220. This book is about developing that "perfect understanding" which is so important in our riding relationships. Whether you practice dressage,

hack, event, show, enjoy long distance riding, natural horsemanship or Western, the improvement of your horse through an understanding of "his" language, should allow him greater ability, confidence and enjoyment in all your work together. The Language of the Aids is not as well understood today as it should be and it seems that it is frequently forgotten or fragmented, and it will be the horse that suffers most when this happens. Incorrect aiding can have a very adverse effect. The aim of The Balanced Horse is to confirm in people's minds what they should be doing for each and every request, and what they must avoid. Every instruction is based on what the horse needs to feel--at that moment in time. Each aid is based on the psychological and physiological effect placed on that sensitive animal underneath us. Over time, applying each aid correctly can elicit a response in a horse's body as instant and involuntary as the knee jerk reaction in our own.

[The Little Red Book For Women, Karen Casey](#) , 2013, 1592859135, 9781592859139. Published in 1957, The Little Red Book is known as the foremost study guide to the Big Book, Alcoholics Anonymous. However, the original volume, filled with practical advice for sober living, was written by two anonymous men who, presumably, considered their audience to be comprised predominantly, if not entirely, of men. That's why Hazelden's new edition is written expressly for women. It features the original text of The Little Red Book along with annotated passages addressing issues related to how women experience addiction and recovery. The annotations, written by best-selling author Karen Casey, introduce women to the extraordinary camaraderie of Alcoholics Anonymous and the restorative powers of Twelve Step recovery.

Acclaimed historian David Oshinsky's chronicling of the life of Senator Joe McCarthy has been called both "nuanced" and "masterful." In this new paperback edition Oshinsky presents us with a work heralded as the finest account available of Joe McCarthy's colorful career. With a storyteller's eye for the dramatic and presentation of fact, and insightful interpretation of human complexity, Oshinsky uncovers the layers of myth to show the true McCarthy. His book reveals the senator from his humble beginnings as a hardworking Irish farmer's son in Wisconsin to his glory days as the architect of America's Cold War crusade against domestic subversion; a man whose advice if heeded, some believe, might have halted the spread of Communism in Southeast Asia and beyond. *A Conspiracy So Immense* reveals the internal and external forces that launched McCarthy on this political career, carried him to national prominence, and finally triggered his decline and fall. More than the life of an intensely- even pathologically- ambitious man however, this book is a fascinating portrait of America in the grip of Cold War fear, anger, suspicion, and betrayal. Complete with a new Foreword, *A Conspiracy So Immense* will continue to keep in the spotlight this historical figure-a man who worked so hard to prosecute "criminals" whose ideals work against that of his- for America.

[Winning Design!: LEGO MINDSTORMS NXT Design Patterns for Fun and Competition, James Jeffrey Trobaugh](#) , 2010, 1430229640, 9781430229643. Winning Design! LEGO Mindstorms NXT Design Patterns for Fun and Competition is about

design that works. Its about building with LEGO MINDSTORMS NXT for fun, for education, but especially for competition. Author James Trobaugh is an experienced coach and leader in the FIRST LEGO League. In this book, he shares his hard-won knowledge about design principles and techniques that contribute to success in robotics competitions. Winning Design! unlocks the secrets of reliable design using LEGO MINDSTORMS NXT. Youll learn proven design patterns that you can employ for common tasks such as turning, pushing, and pulling. Youll reduce and compensate for variation in performance from battery charge levels and motor calibration differences. Youll produce designs that wont frustrate you by not working, but that will delight you with their reliable performance in the heat of competition. Good design is about more than just the hardware. Software counts for a lot, and Winning Design! has you covered. Youll find chapters on program design and organization with tips on effective coding and documentation practices. Youll learn about master programs and the needed flexibility they provide. Theres even a section on presenting your robot and software designs to the judges. Winning Design! is the book you need if your involved in competitions such as FIRST LEGO League events. Whether coach, parent, or student, youll find much in this book to make your design and competition experience fun and memorable, and educational. Please note: the print version of this title is black & white; the eBook is full color. What youll learn Build winning robots on a foundation of good chassis design Reduce variability in robot mechanical movements Design modular attachments for quick change during competition Solve navigation problems such as steering, squaring up, and collision detection Manage software using master programs and other techniques Power your robot attachments via motors and pneumatics Who this book is for Winning Design! LEGO Mindstorms NXT Design Patterns for Fun and Competition is aimed at students, parents, teachers, and coaches involved in LEGO MINDSTORMS NXT robot design and programming. Teachers and coaches will find the book to be a valuable teaching resource. Students and parents will find insight into good design practices. And all readers will enjoy the increased satisfaction that comes from building designs that actually work, and that can be relied upon to continue to work every time. [Rome's Italian Wars: Books 6-10, J. C. Yardley](#) , 2013, 0191640832, 9780191640834. 'People have it in their minds that he would have been a match for Alexander, had Alexander turned his arms on Europe.' So Livy characterizes Papirius Cursor, one of Rome's famous generals in the fourth century BC. In Books 6 to 10 of his monumental history of Rome, Livy deals with the period in which Rome recovered from its Gallic disaster to impose mastery over almost the entire Italian peninsula in a series of ever greater wars. Along with Papirius, Livy paints vivid portraits of other notable figures,

such as Camillus, who rescued the city from its Gallic captors in 390, young Manlius Torquatus, victor in a David-versus-Goliath duel with a Gallic chieftain, and Appius Claudius who built Rome's first major highway, the Appian Way. Livy's blend of factual narrative and imaginative recreation brings to life a critical era for the rise of Rome, and Books 6 to 10 of his work are the one complete account we have, as the city passes from myth and legend into the increasing light of reliable history. John Yardley's fluent translation is accompanied by an introduction and notes that set Livy in the context of Roman historiography. The complete Livy in English, available in five volumes from Oxford World's Classics. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

In *Teacher Leadership*, Lieberman and Miller discuss current changes in the teacher's role, and make sense of the research on teacher leadership. They offer case studies of innovative programs - such as the National Writing Project - that provide teachers with opportunities to lead within a professional community. In addition, they tell stories of individual teachers - from Maine to California - who are able to lead in a variety of contexts. *Teacher Leadership* offers a new standard of teaching and community that recognizes all teachers as leaders. It shows how to develop learning communities that include rather than exclude, create knowledge rather than merely apply it, and that offer challenge and support to both new and experienced teachers. This book is a volume in the Jossey-Bass Leadership Library in Education - a series designed to meet the demand for new ideas and insights about leadership in schools.

[Transition Metal Oxides: An Introduction to Their Electronic Structure and Properties, P.A. Cox](#) , 2010, 0199588945, 9780199588947. Transition metal oxides form a series of compounds with a uniquely wide range of electronic properties. They have important applications as dielectrics, semiconductors and metals, and as materials for magnetic and optical uses. The discovery of high temperature superconductors has brought the attention of a wide scientific community to this area and has highlighted the problems involved in trying to understand transition metal oxides. The present book is not primarily about Tc superconductors, although their main properties are discussed in the final sections. The main aim is to describe the varied electronic behaviour shown by transition metal oxides, and to discuss the different types of theoretical models that have been proposed to interpret this behaviour.

With expert contributors from around the world sharing their knowledge on 57 new cutting-edge areas of interest, *Zoo and Wild Animal Medicine, Volume 6* continues to provide outstanding coverage of today's most relevant topics. This book is an essential resource in zoo and wild animal medicine, addressing the special challenges posed by individual and herd medical management, newly emerging diseases in diverse wild animal populations, the effect of habitat loss and destruction on wildlife species, and the utilization of zoo animals in the surveillance and detection of potential zoonoses. The user-friendly current therapy approach continues to serve a vital function in the field by fostering a conservation biology ethic, bridging the gap between captive and free-ranging wild animal medicine, from a diverse group of experts. Includes practical guidance on such topics as behavioral training for medical procedures and the use of infrared thermography. Divided into four sections -- Conditions Affecting Multiple Species, Poikilotherms, Avian Medicine, and Mammals -- to help you find the information you need quickly. Extensive contributor list includes multinational contributors offering expert information on species from around the world. Presents timely topics in zoo and wild animal medicine with 57 new chapters to provide the best and most current information available. The most up-to-date information on hot topics such as avian influenza, West Nile virus, and other pathogens threatening wildlife and human populations on a global scale. Cutting-edge insights on environmental and public health concerns, such as occupational exposure to zoonotic simian retroviruses and use of wildlife rehabilitation centers as monitors for ecosystem health. [Powerful Problem Solving: Activities for Sense Making with the Mathematical Practices, Max Ray](#) , 2013, 0325050902, 9780325050904. How can we break the cycle of frustrated students who "drop out of math" because the procedures just don't make sense to them? Or who memorize the procedures for the test but don't really understand the mathematics? Max Ray and his colleagues at the Math Forum @ Drexel University say "problem solved," by offering their collective wisdom about how students become proficient problem solvers, through the lens of the CCSS for Mathematical Practices. They unpack the process of problem solving in fresh new ways and turn the Practices into activities that teachers can use to foster habits of mind required by the Common Core: communicating ideas and listening to the reflections of others estimating and reasoning to see the "big picture" of a problem organizing information to promote problem solving using modeling and representations to visualize abstract concepts reflecting on, revising, justifying, and extending the work. Powerful Problem Solving shows what's possible when students become active doers rather than passive consumers of

mathematics. Max argues that the process of sense-making truly begins when we create questioning, curious classrooms full of students' own thoughts and ideas. By asking "What do you notice? What do you wonder?" we give students opportunities to see problems in big-picture ways, and discover multiple strategies for tackling a problem. Self-confidence, reflective skills, and engagement soar, and students discover that the goal is not to be "over and done," but to realize the many different ways to approach problems. [Hill William, Scott McClanahan](#) , 2013, 0985023554, 9780985023553. "You can tell McClanahan feels something when he writes and when he lives. He wants you to feel something too." The Huffington Post I walked up to the side of the mountain like I used to do when I was a little boy. I looked out over Rainelle and watched it shine. The coal trucks and the logging trucks were still gunning it through town. They were still clear cutting the mountains and cutting the coal from the ground. Then I heard my mother calling and it was like I was a child again. Beginning to read Hill William is like tuning into a blues station at 4:00 a.m. while driving down the highway. Scott McClanahan's work soars with a brisk and lively plainsong, offering a boisterous peek into a place often passed over in fiction: West Virginia, where coal and heartbreak reign supreme. Hill William testifies to the way place creates and sometimes stifles one's ability to hope. It reads like a Homeric hymn to adventure, to the human comedy's upsets and small downfalls, and revels in its whispers of victory. So grab coffee, beer whatever gets you through the night and join Scott around the hearth. Lend him your ear, but be warned: you might not want it back. Scott McClanahan's work has appeared in New York Tyrant, Bomb, Vice, and Harper Perennial's Fifty-Two Stories. His books include Stories II and Stories V! In 2013 Two Dollar Radio will release his book Crapalachia.

[Rabbi, Have I Got a Girl for You!, Herb Freed](#) , 2005, 097604370X, 9780976043706. Alternately hilarious and heart-rending, the book follows the earnest, if occasionally misguided, exploits of young Rabbi Ben Zelig as he valiantly tries to balance the sometimes tragic and often bewildering demands of his calling. Real, surreal and super real, each of the six stories takes a unique stylistic twist. One of the most riveting episodes centres on the Rabbi's desperate search to recapture his lost faith. His Walpurgisnacht quest leads him into phantasmagorical situations where he encounters outrageous Fellini-esque characters who lead him on a bizarre adventure that starts in the ivory tower of The Rabbinical Academy, winds its way through Harlem strip clubs and ends in the Garden of Eden. Whether the events in these stories

actually happened or not, they are undeniably true.

[Corporate Responsibility: Governance, Compliance and Ethics in a Sustainable Environment, Tom Cannon](#) , 2012, 0273738739, 9780273738732. This new edition of Corporate Responsibility starts with a fundamental shift in perspective from the previous edition by highlighting the shift from corporate responsibility being a vital business issue, to being the vital issue facing business. In the process the author brings together a comprehensive guide to the subject to addressing contemporary developments in both theory and practice. A distinct intellectual framework is developed which highlights the ways the issues at the heart of Corporate Responsibility hang together. This links the ethics which underpin the values of corporations and their leadership to the way they exercise their responsibilities as stewards not just of their business but of the natural, human and built environment which they affect. Up-to-the minute research is integrated with case studies that allow the teacher, student and researcher to access the body of contemporary knowledge while responding to a rapidly changing landscape.

Inspired by Hemingway's adventures as a newspaper correspondent in Spain in the 1930s, *The Fifth Column and Four Stories of the Spanish Civil War* magnificently evokes life in a besieged city over a tumultuous decade. Featuring the author's only full-length play, the works recount decadent parties and doomed love affairs amid the rubble, and effortlessly capture the devastating effects of the war on the inhabitants of the city.

[The Media and the War on Terrorism, Stephen Hess, Marvin L. Kalb](#) , 2003, 081579603X, 9780815796039. These candid conversations capture the difficulties of reporting during crisis and war, particularly the tension between government and the press. The participants include distinguished journalists American and foreign, print and broadcast and prominent public officials, past and present. They illuminate the struggle to balance free speech and the right to know with the need to protect sensitive information in the national interest. As the Information Age collides with the War on Terrorism, that challenge becomes even more critical and daunting. "We are very careful in what we talk about publicly. We do not want to paint a picture for the bad guys. So we don't talk very much at all about what we're going to do going forward." Victoria Clarke, Department of Defense "This was a war that was very different. It was conducted primarily by about 200 to 250 special forces soldiers on the ground. There were no reporters with those soldiers until after the fall of Kandahar, until the war was essentially over. There were no eyes and ears, and that's the way the Pentagon wants it." John McWethy, ABC News "I covered Capitol Hill for a very long time and was always astounded by the nonpolitical motivation of a lot of people that are up there who really do want to make the world better, want to make the U.S. better. So don't come away believing that because there are political implications that there are always political motivations." Candy Crowley, CNN "There is a feeling among the community, Muslim Americans, and also overseas that we might become the new enemy. But so far nobody knows whether it is just because of the war or if it's going to last." Hafez Al-Mirazi, Al-Jazeera Cosponsored with the Shorenstein Center on the Press, Politics and Public Policy at the Kennedy School, Harvard University.

[Talk Stories, Jamaica Kincaid, Ian Frazier](#) , 2002, 0374527911, 9780374527914. From "The Talk of the Town," Jamaica Kincaid's first impressions of snobbish, mobbish New YorkTalk Pieces is a collection of Jamaica Kincaid's original writing for the New Yorker's "Talk of the Town," composed during the time when she first came to the United States from Antigua, from 1978 to 1983. Kincaid found a unique voice, at once in sync with William Shawn's tone for the quintessential elite insider's magazine, and (though unsigned) all her own--wonderingly alive to the ironies and screwball details that characterized her adopted city. New York is a town that, in return, fast adopts those who embrace it, and in these early pieces Kincaid discovers many of its hilarious secrets and urban mannerisms. She meets Miss Jamaica, visiting from Kingston, and escorts the reader to the West Indian-American Day parade in Brooklyn; she sees Ed Koch don his "Cheshire-cat smile" and watches Tammy Wynette autograph a copy of Lattimore's Odyssey; she learns the worlds of publishing and partying, of fashion and popular music, and how to call a cauliflower a crudite. The book also records Kincaid's development as a young writer--the newcomer who sensitively records her impressions here takes root to become one of our most respected authors.

[Beyond the Mountain, Steve House, Reinhold Messner](#) , 2012, 1906148651, 9781906148652. "An exceptional book." - Winner - Boardman Tasker Prize 2009 Winner - Mountain Literature Award, Banff Mountain Book Festival 2009 Reinhold Messner calls Steve House the best high-altitude climber in the world today, an honour he declines. Being called the best, says Steve, makes me very uncomfortable. My intention is to be as good as I can be. Mountaineering is too complex to be squeezed into a competition. It is simply not something that lends itself to comparison. Climbing is about process, not achievement. The moment your mind wanders away from the task of the climbing at hand will be the moment you fail. Beyond the Mountain is the award-winning title from Steve House arguably the worlds leading high-altitude climber. Winner of the prestigious Boardman Tasker Prize for Mountain Literature in 2009, Beyond the Mountain is now available in the UK and Ireland thanks to Vertebrate Publishing. Steve House built his reputation on ascents throughout the Alps, Canada, Alaska, the Karakoram and the Himalaya that have expanded the possibilities of style, speed and difficulty. In 2005, Steve and fellow alpinist Vince Anderson pioneered a direct new route on the Rupal Face of 26,660-foot Nanga Parbat, which had never before been climbed in alpine style. It was the third ascent of the face and the achievement earned Steve and Vince the first Piolet d'Or (Golden Ice Axe) awarded to North Americans. Steve is an accomplished and spellbinding storyteller in the tradition of Maurice Herzog and Lionel Terray. Beyond the Mountain is a gripping read already a mountain classic. It addresses many issues common to non-climbing life mentorship, trust, failure, success, goal setting, heroes, partnership as well as the mountaineers heightened experience of risk and the deaths of friends. Beyond the Mountain is a window into the process of a man working to be the best he can be through an endeavour very few can begin to imagine.

A roll-call of influential personalities in the fields of politics, trade unionism and media - many still operating at the highest levels of Irish public life - passed through the ranks of this secretive movement, which never achieved its objectives but had a lasting influence on the landscape of Irish politics. [The Unfinished Revolution: Coming of Age in a New Era of Gender, Work, and Family, Kathleen Gerson](#) , 2009, 0199745846, 9780199745845. In the controversial public debate over modern American families, the vast changes in family life--the rise of single, two-paycheck, and same-sex parents--have often been blamed for declining morality and unhappy children. Drawing upon pioneering research with the children of the gender revolution, Kathleen Gerson reveals that it is not a lack of "family values," but rigid social and economic forces that make it difficult to have a vibrant and committed family and work life. Despite the entrance of women into the workforce and the blurring of once clearly defined gender boundaries, men and women live in a world where the demands of balancing parenting and work, autonomy and commitment, time and money are left largely unresolved. Gerson finds that while an overwhelming majority of young men and women see an egalitarian balance within committed relationships as the ideal, today's social and economic realities remain based on conventional--and now obsolete--distinctions between breadwinning and caretaking. In this equity vacuum, men and women develop conflicting strategies, with women stressing self-reliance and men seeking a new traditionalism. With compassion for all perspectives, Gerson argues that whether one decides to give in to traditionally imbalanced relationships or to avoid marriage altogether, these approaches are second-best responses, not personal preferences or inherent attributes, and they will shift if new options can be created to help people achieve their egalitarian aspirations. The Unfinished Revolution offers clear recommendations for the kinds of workplace and community changes that would best bring about a more egalitarian family life--a new flexibility at work and at home that benefits families, encourages a thriving economy, and helps women and men integrate love and work. Praise for the Hardcover: "Over the past three decades, social change has blown apart the old-fashioned ideal of the nuclear family--and Gerson has set out to map where the pieces have landed." --New York Post "Valuable for the abundance and candor of the testimony from this unmoored generation pioneering through radically altered conceptions of personal and

professional life." --Publishers Weekly "This is not a battle that can be won with legal challenges or legislation. Yes, it would undoubtedly be greatly aided by the passage of major social policies such as universal child care. But at its core, this is a fight that plays out within homes and between partners. And as Gerson's research makes clear, the fight has not changed all that dramatically in the past 30 years." --The American Prospect

When the gentlemen of the Royal Society in London sat down to their turtle dinner in 1793 they were participating in an historical event: an act simultaneously of fine dining and colonialism. Feasting and drinking, the communities in which they occurred, and larger themes of historical significance are explored here in case studies from the banquets in Ancient Rome through to dinners at the Olympic Games in twentieth-century Melbourne. These histories illuminate food and drink's value in offering new insights into the past.

[In Their Own Words: British Women Writers and India, 1740-1857, Rosemary Raza](#) , 2006, 0195677080, 9780195677089. The book analyses the growth in British women's published works about India before 1857 and uses it as the basis for an examination of various aspects of their role in India. The corpus of the work comprises of some 80 authors many of the texts were previously unknown and very few had been subjected to academic study. They extend far beyond travel writing and the work of memsahibs, which have so far been the main focus of interest, to include other groups, notably missionaries, and other genres such as fiction, poetry, drama, advice manuals, educational material, history and translations. The material and treatment are new in a number of ways. The role of British women in India has been widely criticized. However, many judgements are in need of revision, since they have been distorted by focusing on evidence from the high noon of the empire in the later 19th century and 20th centuries. An examination of the early colonial period often suggests very different conclusions. While postcolonial and feminist historians have tended to see

them as mere appendages in a patriarchal colonial society, this book argues that they played a substantial role in creating the British domestic and social life, the development of relations with Indians, particularly Indian women to whom they had privileged access, and the communication of knowledge to a British readership at home. Far from being peripheral, this book argues, women were an integral part of colonial life though their voice was often independent and critical.

[The Founding Fathers Reconsidered, R. B. Bernstein](#) , 2011, 0199832579, 9780199832576. Here is a vividly written and compact overview of the brilliant, flawed, and quarrelsome group of lawyers, politicians, merchants, military men, and clergy known as the "Founding Fathers"--who got as close to the ideal of the Platonic "philosopher-kings" as American or world history has ever seen. In *The Founding Fathers Reconsidered*, R. B. Bernstein reveals Washington, Franklin, Jefferson, Adams, Hamilton, and the other founders not as shining demigods but as imperfect human beings--people much like us--who nevertheless achieved political greatness. They emerge here as men who sought to transcend their intellectual world even as they were bound by its limits, men who strove to lead the new nation even as they had to defer to the great body of the people and learn with them the possibilities and limitations of politics. Bernstein deftly traces the dynamic forces that molded these men and their contemporaries as British colonists in North America and as intellectual citizens of the Atlantic civilization's Age of Enlightenment. He analyzes the American Revolution, the framing and adoption of state and federal constitutions, and the key concepts and problems--among them independence, federalism, equality, slavery, and the separation of church and state--that both shaped and circumscribed the founders' achievements as the United States sought its place in the world.
