[Black Feminist Thought: Knowledge, Consciousness, and the Politics of Empowerment, Patricia Hill Collins](#) , 2000, 0415924847, 9780415924849. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She not only provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, Alice Walker, and Audre Lorde, but she shows the importance of self-defined knowledge for group empowerment. In the tenth anniversary edition of this award-winning work, Patricia Hill Collins expands the basic arguments of the first edition by adding several important new themes. A new discussion of heterosexism as a system of power, an expanded treatment of images of Black womanhood, U.S. Black feminism's connections to Black Diasporic feminisms, and more attention to the importance of social class and nationalism all appear in the new edition. In addition, the new edition includes recent developments in black cultural studies, especially black popular culture, as well as recent events and trends such as the Anita Hill hearings and the backlash against affirmative action.

[Citizenship Rights and Social Movements: A Comparative and Statistical Analysis, Joe Foweraker](#) , 1997, 0198292252, 9780198292258. This is the first comparative study of the relationship between social movements and citizenship rights. It identifies the main connections made between collective action and individual rights, in theory and history, and tests them in the context of modern authoritarian regimes. It does so by measuring both social mobilization and the presence of rights over time, and by analysing their mutual impact statistically - both within and across national cases. The results create a new perspective on democratic struggles in authoritarian conditions, and on processes of democratic transitions. The selected cases of Brazil, Chile, Mexico and Spain are similar enough to make comparisons possible, and different enough to make them interesting. Measuring mobilization and rights provides a comparative description of their forms and fluctuations, just as the statistical results promote a comparative analysis of their influence and interactions. The study uses statistical techniques, but employs them to illuminate historical processes. In sum, its quantitative methods

work to enhance the qualitative inquiry, and together they come to constitute a robust defense of democracy as the direct result of collective struggles for individual rights.

[My Name Is Iran: A Memoir, Davar Ardalan](#) , 2010, 1429923733, 9781429923736. A century of family tales from two beloved but divided homelands, Iran and America Drawing on her remarkable personal history, NPR producer Davar Ardalan brings us the lives of three generations of women and their ordeals with love, rejection, and revolution. Her American grandmother's love affair with an Iranian physician took her from New York to Iran in 1931. Ardalan herself moved from San Francisco to rural Iran in 1964 with her Iranian American parents who barely spoke Farsi. After her parents' divorce, Ardalan joined her father in Brookline, Massachusetts, where he had gone to make a new life; however improbably, after high school, Ardalan decided to move back to an Islamic Iran. When she arrived, she discovered a world she hardly recognized, and one which demands a near-complete renunciation of the freedoms she experienced in the West. In time, she and her young family make the opposite migration and discover the difficulties, however paradoxical, inherent in living a free life in America.

[The Tokyo war crimes trial: the pursuit of justice in the wake of World War II, Yuma Totani](#) , 2009, 0674033396, 9780674033399. This book assesses the historical significance of the International Military Tribunal for the Far East (IMTFE) commonly called the Tokyo trial established as the eastern counterpart of the Nuremberg trial in the immediate aftermath of World War II. Through extensive research in Japanese, American, Australian, and Indian archives, Yuma

Totani taps into a large body of previously underexamined sources to explore some of the central misunderstandings and historiographical distortions that have persisted to the present day. Foregrounding these voluminous records, Totani disputes the notion that the trial was an exercise in victors justice in which the legal process was egregiously compromised for political and ideological reasons; rather, the author details the achievements of the Allied prosecution teams in documenting war crimes and establishing the responsibility of the accused parties to show how the IMTFE represented a sound application of the legal principles established at Nuremberg. This study deepens our knowledge of the historical intricacies surrounding the Tokyo trial and advances our understanding of the Japanese conduct of war and occupation during World War II, the range of postwar debates on war guilt, and the relevance of the IMTFE to the continuing development of international humanitarian law.

[Disposable People: New Slavery in the Global Economy, Kevin Bales](#) , 1999, 0520217977, 9780520217973. Slavery is illegal throughout the world, yet more than twenty-seven million people are still trapped in one of history's oldest social institutions. Kevin Bales's disturbing story of slavery today reaches from brick kilns in Pakistan and brothels in Thailand to the offices of multinational corporations. His investigation of conditions in Mauritania, Brazil, Thailand, Pakistan, and India reveals the tragic emergence of a "new slavery," one intricately linked to the global economy. The new slaves are not a long-term investment as was true with older forms of slavery, explains Bales. Instead, they are cheap, require little care, and are disposable. Three interrelated factors have helped create the new slavery. The enormous population explosion over the past three decades has flooded the world's labor markets with millions of impoverished, desperate people. The revolution of economic globalization and modernized agriculture has dispossessed poor farmers, making them and their families ready targets for enslavement. And rapid economic change in developing countries has bred corruption and violence, destroying social rules that might once have protected the most vulnerable individuals. Bales's vivid case studies present actual slaves, slaveholders, and public officials in well-drawn historical, geographical, and cultural contexts. He observes the complex economic relationships of modern slavery and is aware that liberation is a bitter victory for a child prostitute or a bonded miner if the result is starvation. Bales offers suggestions for combating the new slavery and provides examples of very positive results from organizations such as Anti-Slavery International, the Pastoral Land Commission in Brazil, and the Human Rights Commission in Pakistan. He also calls for researchers to follow the flow of raw materials and products from slave to marketplace in order to effectively target campaigns of "naming and shaming" corporations linked to slavery. Disposable People is the first book to point the way to abolishing slavery in today's global economy. All of the author's royalties from this book go to fund anti-slavery projects around the world. This critical edition of Thomas Hardy's 1891 British Victorian novel reprints the authoritative second impression of the 1920 Wessex edition together with five critical essays - newly commissioned or revised - that read *Tess of the d'Urbervilles* from five contemporary critical perspectives. Each critical essay is accompanied by a succinct introduction to the history, principles, and practice of the critical perspective and by a bibliography that promotes further exploration of that approach. In addition, the text and essays are complemented by an introduction providing biographical and historical contexts for Hardy and *Tess of the d'Urbervilles*, a survey of critical responses to the work since its initial publication, and a glossary of critical and theoretical terms.

[Transformations: Works on Paper by Artist Eugene J. Martin, Part 1, Suzanne Fredericq](#) , 2010, 0982570465, 9780982570463. In the late 1980s-early 1990s Eugene Martin created large acrylic paintings on rag paper that he would photograph upon their completion. Months or years later he might revisit these same works and transform them by painting over some of the areas, by slicing out parts, or by incorporating segments from other works. This publication documents aspects of this transformation that was enabled by the digitization of photographic slides taken at the time the original compositions were completed. Selected jpegs showing one or more versions of the original painting(s) were then juxtaposed next to an image of the final version of 48 works. In some instances, the transformation is minimal, in others it is substantial, giving rise to complex mixed media collages. These artworks can also be viewed at

[Unfitness to plead: a consultation paper,](#) , 2010, 0118405047, 9780118405041. This paper discusses the law on unfitness to plead or to be tried in criminal proceedings. The law on unfitness to plead is concerned with whether or not an accused is able to stand trial and, if not, the procedure that should be used to deal with that accused. Where there is an issue of unfitness to plead it is not the accused's guilt that is considered but whether they are 'under a disability' and if so the jury must determine whether or not the accused did the act or made the omission charged. In this paper the analysis of the modern law on unfitness to plead is set within the broader context of the law relating to vulnerable defendants, the Mental Health Act 1983 as amended by the Mental Health Act 2007, and the Mental Capacity Act 2005. A number of proposals are put forward, primarily that there should be a new revised single legal test which assesses whether the accused has decision-making capacity for trial. The test should not require that any decision the accused makes must be rational or wise

[The Essential Galileo, Galileo Galilei, Maurice A. Finocchiaro](#) , , 1603843582, 9781603843584. "Edited and translated by Maurice A. Finocchiaro, an international authority on Galileo, this collection makes available to scholars and students an excellent and extensive selection of Galileo's key works from his early career to the end of his life--some in toto and some represented by key selections. It presents not only Galileo's most famous works but also a range of less-known texts as well as an excellent selection of the documents from the trial of 1633 and from the 1616 condemnation of Copernicus. In addition to the breadth and quality of the selections, this volume is particularly attractive to students and instructors thanks to Finocchiaro's expert and up-to-date introductions, biographical sketch, chronology, annotated bibliography, and glossary. This is a must for anyone teaching or studying Galileo, the scientific revolution, and the relationship between science and religion." --Mario Biagioli, Professor of the History of Science, Harvard University

[The Gods' Machines: From Stonehenge to Crop Circles, Wun Chok Bong](#) , 2008, 1583942076, 9781583942079. Based on the authors decipherment of prehistoric carvings and the application of mathematical measurements, The Gods Machines shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy. The book traces the development of that civilization on Earth over 5,000 years, revealing how all these structures are aligned according to a universal formula: an angle of 135 degrees at which Earths energy has been tapped by the alien creators of these monuments. These fascinating theories not only explain our distant past, but also open the door to a future of power technology and space travel. Megalithic sites such as Newgrange and Stonehenge are constructed with quartz- and iron-rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles. These stones, according to the author, served as dry cell batteries when heated and stressed, and supplied energy to the builders traveling vehicles. Most interestingly, the author has tested his theory on todays crop circles. The Gods Machines is certain to stimulate debate among readers interested in alternative history, ancient civilization, and extraterrestrial intelligence.

[Ohgaki, O. D. Wiestler](#) , 2007, 9283224302, 9789283224303. WHO Classification of Tumours of the Central Nervous

System is the first volume of the 4th Edition of the World Health Organization series on histological and genetic typing of human tumors. This authoritative, concise reference book provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies monitoring response to therapy and clinical outcome. Diagnostic criteria pathological features and associated genetic alterations are described in a strictly disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, incidence age and sex distribution, location, clinical signs and symptoms, pathology, genetics, and predictive factors. This book is in the series commonly referred to as the "Blue Book" series. The book prepared by 73 authors from 19 countries contains more than 400 color photographs, numerous X-rays, computed tomography (CT), magnetic resonance (MR) images, charts and more than 2,500 references. ...The title of this book is typically modest. It is not only a classification of tumours of the central nervous system but an authoritative and explicit account of this group of tumours...This the fourth edition contains a number of distinct improvements on previous editions both in layout and content... One new feature is the clear account of the WHO's grading system its rationale and its application... New tumour entities are included...Newly recognized histological variants include pilomyxoid astrocytoma. Both anaplastic medulloblastoma and medulloblastoma with extensive nodularity have gained recognition in the classification... There are some differences in classification from the third edition most notably relating to anaplastic oligoastrocytoma. The change in emphasis follows cited differences in prognosis between mixed tumours with and without necrosis. Other changes are also apparent e.g. within the atypical teratoid/rhabdoid section mention of the INI-1 locus in the genetics section in the third edition has been expanded to include immunohistochemistry in the fourth edition. The fourth edition is unique in its clear-targeted and succinct style of presentation of tumors of the CNS... it will be of universal appeal in neuro-oncology and will most certainly form the main basis for diagnosis by multidisciplinary teams managing patients with tumors of the CNS." -- Nicki Cohen\* and Roy O. Weller\*\* \*Specialist Registrar in Neuropathology Southampton University Hospital NHS Trust UK. \*\* Emeritus Professor of Neuropathology Southampton University UK in Neuropathology and Applied Neurobiology.

...Representing the first volume in the fourth edition series of the World Health Organization (WHO) Classification of Tumours this book provides a welcome mix of old and new. ... Perhaps the most noticeable improvement comes by way of a voluminous expansion in the genetics sections of the majority of tumor categories. This update parallels the recent explosion of research utilizing high-resolution genome screening and other molecular techniques. The authors have done an outstanding job in distilling the information housed in over 2,500 cited references into a reader friendly authoritative reference of CNS neoplasia. In summation, the current edition of the WHO Classification of Tumours of the Central

Nervous System will serve as an indispensable textbook for all of those involved in the diagnosis and management of patients with tumors of the CNS and will make a valuable addition to libraries in pathology, radiology, oncology and neurosurgery departments. --Journal of Neuropathology & Exp. Guardian angels, demonic spirits, extraterrestrial visitors are these entities figments of the imagination, or is there evidence for their existence? Famed psychic detective Joe Nickell answers these questions in his lively book. From the "Newberry Demon" of 1679 and the strange phenomena produced by 19th-century spiritualist mediums to such modern enigmas as alien abductions, bigfoot sightings, and the bizarre mystery of Atlanta's "House of Blood," Entities examines eyewitness accounts and other evidence for strange beings worldwide. Without dismissing or advocating any particular view, Nickell takes a detective's approach to controversial claims, shedding light on dozens of otherwise perplexing mysteries. An afterword by acclaimed psychologist Robert A. Baker adds an authoritative voice to the discussion and explains the impact that beings of whatever variety can have on our lives. Entities will challenge, anger, amuse, and fascinate but, most importantly, it will enlighten. Believers and skeptics alike will benefit from the careful analysis that appears on every page.

On his forty-fourth birthday Eric Newby, a self-confessed river lover, sets out on a 1200-mile journey down the Ganges River from Hardwar to the Bay of Bengal, accompanied by his wife Wanda. Things do not start smoothly as they run aground 63 times in the first six days, but gradually India's holiest river, The Pure, The Eternal, The Creator of Happiness, lives up to its many names and captures them in its spell. Traveling in a variety of boats, most of them unsuitable, as well as by bus and bullock cart, the Newbys become intimately acquainted with the river's shifting moods and colorful history. "Slowly Down the Ganges" brims over with engaging characters and entertaining anecdotes, recounted in Newby's inimitable style. Best of all, he brilliantly captures the sights and sounds, the frustrations and rewards, the sheer enchantment of travel in India.

The new edition of this popular book continues to provide comprehensive coverage of cancer management aimed at palliative care professionals. To aid understanding in the specialty, the format of the book has been thoroughly revised to include numerous tables, figures, algorithms, case histories and key points to ensure that it will prove an invaluable, practical guide to oncology for all health care professionals involved in the care of patients with malignant disease. The book provides a comprehensive overview of the management of malignant disease from the perspective of palliative medicine. The pathology, diagnosis and management of individual tumour sites are described with an emphasis on the symptoms produced in advanced disease and the place of oncological treatment in their management. Introductory chapters present the principles of oncological management and later chapters address specific symptoms from the viewpoint of their pathophysiology and management. Each chapter is enhanced by typical case histories and patient journeys.

[How Constitutions Change: A Comparative Study, Dawn Oliver, Carlo Fusaro](#) , 2011, 1849460949, 9781849460941. The constitutional arrangements in many countries are changing, for a range of reasons, including internal and external pressures, and this set of essays explores how those changes happen. Changes may be formal, involving amendments to the texts of Constitutions or the passage of legislation of a clearly constitutional kind; or informal and organic, as where court decisions affect the operation of the system of government, or where new administrative and other arrangements (eg agencification) affect or articulate or alter the operation of the constitution of the country, without the need to resort to formal change. The volume includes studies of a range of common and civil law systems, presidential, parliamentary and federal systems, a former Communist state and developing countries. In the last two chapters the editors conduct a detailed comparative analysis of the jurisdiction-based chapters and explore the question whether any overarching theory or theories about constitutional change in liberal democracies emerge from the study. "a valuable compendium, making information on a number of less known constitutional systems available in English... comparative public lawyers will no doubt value the information on how constitutions change in the various legal systems assembled and represented in the volume." Michal Bobek, Cambridge Law Journal "a lively picture is drawn of the different constitutional cultures including historic, political, legal or social aspects... exciting and surprising details about constitutions all over the world... a first approach to a theory of constitutional change. Sebastian Schmid, International Journal of Constitutional Law "authoritative academic commentary and reflections on the evolution of contemporary democratic principles... rich in insights which should encourage researchers to pursue comparative research... a uniquely effective approach to the task." Pier Luigi Petrillo, Percorsi Costituzionali "The Authors note that a constitution totally unsuited for change sooner or later is doomed to become an instrument incapable of serving its purpose, bound therefore to be superseded. In the end, they believe that constitutional patriotism is best served by ensuring that a given set of constitutional arrangements can be adapted and incrementally changed rather than making out of it a petrified object of devotion. And I would agree with them." Prof. Stefano Ceccanti, former Italian MP, [www.federalismi.it](http://www.federalismi.it)

[Retail Truths: The Unconventional Wisdom of Retailing, Chip Averwater](#) , 2013, 0983979073, 9780983979074. (Book).

Retail Truths: The Unconventional Wisdom of Retailing is a collection of more than 400 street-smart lessons on retailing that Chip Averwater has gathered from his own experience in business, as well as from his mentors and retailer friends.

Chip Averwater is chairman of Amro Music Stores in Memphis, TN, one of the largest musical instrument retailers in the

U.S. He is a third-generation retailer and has spent nearly four decades building his own stores and working with other

retailers on theirs. Chip has an MBA, has written for national retailing magazines, and has been a featured speaker on

retailing at meetings and conventions in the U.S., Europe, Australia, and Asia. He served for 14 years as a board member and officer of NAMM, and served as its chairman from 2007-2009. Chip currently serves on the boards of several retailers

and charities, is often called on as a retail advisor, and enjoys talking with fellow retailers about common problems and

solutions. " Retail Truths should become a dog-eared companion to anyone who hopes to succeed in retail. It's packed

with honest, straight-up assessments of successful retailing from selling to profits, from hiring and training to operating

multiple stores. This is a book you'll be reading and adapting to your business for years." Music Inc Magazine "Based on

long personal experience, Averwater concludes that a good salesperson can easily be five times as productive as a

laggard, and says high-priced salespeople 'are an expense we want.' In a lengthy segment devoted to personnel, he

offers a blueprint for hiring and retaining those top performers from how to screen out undesirables in the hiring process

('Less than one in 20 job applicants is a suitable candidate') to maintaining high morale ('A manager's words resonate for

a while then fade. Incentives speak with every paycheck.')" Music Trades

cultural influence of Surf/Skate/Snow board art and design. International design luminaries Art Chantry, Katrin Olina and

James Victore are placed along side industry super stars Terry Fitzgerald, Martin Worthington, Yoshihiko Kushimoto and

Rich Harbour (who has been shaping and designing surfboards since 1959). The book includes dozens of interviews and

profiles from the people currently creating board art and design: Aaron Draplin, Emil Kozak, Morning Breath, Anthony

Yankovic, Haroshi and Hannah Stouffer to name a few. There are many books about the art of board design, but there

has never been a book like this that takes a rare look behind the scenes of the creative process. Countries represented: Iceland, Spain, Japan, Brazil, Australia, Canada, Russia, Poland, UK, Mexico, Venezuela, Romania, South Africa, Finland, Sweden, Germany, Croatia and the USA, among others.

From her very first day as a nervous student nurse in Blackburn to the dedicated completion of her nursing qualifications and her training as a midwife in Burnley, Sheena Byrom has never once looked back, enjoying a thirty-five-year career with the NHS. Catching Babies is a moving account of an extraordinary career. It reveals the unique experiences that filled Sheena's days as she looked after overwhelmed mums and dads and helped to bring their precious babies into the world. At the forefront of evolving medical practices, she was the first midwife to oversee a home water birth in her area, but also found herself at the centre of a traumatic delivery that resulted in a nine-year litigation case and tested her to her limits. Yet, whatever has come Sheena's way, ultimately, there are the strong mothers who taught her so much and the little miracles who have made every single moment as a midwife truly magical.

'Death by self-inflicted gunshot wound to the head' is the on-scene assessment, but the victim's relatives are adamant in their rejection of suicide as an explanation. Discovered in a closet, a full week after death, the body is barely recognisable. Extreme heat has accelerated decomposition, and Dr Temperance Brennan's forensic expertise is required. Advanced putrefaction has made it virtually impossible to determine the trajectory of the bullet. But just as Tempe is attempting to make sense of the fracture patterning, an unknown man slips her a photograph of a skeleton, telling her it holds the answer to the victim's death- Detective Andrew Ryan is also on the case and, as his relationship with Tempe heats up, together they follow the trail of clues all the way to Israel. In the Holy Land, with the help of Jacob Drum, a biblical archaeologist and old friend, Tempe becomes involved in an international mystery as old as Jesus, a mystery that could rewrite 2000 years of religious

history. Could one of the tombs really be Christ's last resting place? And are the bones in the ancient ossuary the last remnants of James, the brother of Jesus, as its inscription claims? But the further Tempe probes into the identity of the ancient skeleton, the more she seems to be putting herself in danger-

[Trust and Conflict: Representation, Culture and Dialogue, Ivana Markov, Alex Gillespie](#) , 2012, 0415593468, 9780415593465. Trust, distrust and conflict between social groups have existed throughout the history of humankind, although their forms have changed. Using three main concepts: culture, representation and dialogue, this book explores and re-thinks some of these changes in relation to concrete historical and contemporary events. Part I offers a symbolic and historical analysis of trust and distrust while Parts II and III examine trust, distrust and conflict in specific events including the Cyprus conflict, Estonian collective memories, coping with HIV/AIDS in China, Swedish asylum seekers, the Cuban missile crisis and Stalinist confessions. With an impressive array of international contributors the chapters draw on a number of key concepts such as self and other, ingroup and outgroup, contact between groups, categorization, brinkmanship, knowledge, beliefs and myth. Trust and Conflict offers a fresh perspective on the problems that arise from treating trust, distrust and conflict as simplified indicators. Instead, it proposes that human and social sciences can view these phenomena within the complex matrix of interacting perspectives and meta-perspectives that characterise the social world. As such it will be of interest to undergraduates, postgraduates and lecturers of human and social sciences especially social psychology, sociology, political science and communication studies.

is a constructive effort. It is a building process. You are rearing a structure. You rise, from the foundation, through successive stories to the culminating peak. The most pleasing, notable structures men build from granite and steel and wood, tower like a Woolworth Building or a Rheims Cathedral-higher and higher, until they finally reach a gold-tipped crown or spire, high in the sunlit sky. And so, in rearing your invisible shrine of personal Success-Magnetism, we now come to the topmost peak of the structure. This book gives you the crowning inspirations, tipped and topped with the final "Golden Laws of Magnetism in all Applied Life." Master these lessons in the magnetism of success, and you will go forth upon the highways and by-ways of life, endowed with a kingly confidence in your ability to win a measure of success achieved by few. But remember-(should discouragement seek to dog your steps)- every great structure requires the process of time. "The giant trees of California were once puny saplings. The slow lapse of time has drawn nature into their mighty hearts." Just as surely as the absorption of natural forces built the giant redwoods, just as surely can you draw upon nature for GIANT POWERS.

capitalizes on students' natural interest in nutrition by demonstrating how it relates directly to their health and daily lives.

This book is unique among introductory texts in its presentation of nutrients based on function, rather than chemical classification. Within the vitamins and minerals chapters, micronutrients are organized by their various functions within the body (such as tissue guardians, antioxidants, energy generators, essential electrolytes, mineral power plants, blood fortifiers, bone builders), enabling students to think about them conceptually while also understanding their basic roles in the body. This discourages rote memorization and promotes fuller and more accessible understanding of each

micronutrients' importance. For those instructors who still want their students to understand the traditional chemical organization, the micronutrient chapters include detailed tables and overviews of water-soluble and fat-soluble vitamins, and the trace and major minerals. Beyond the functional approach, Nutrition for Life includes applied features such as Eating Right All Day, Foods You Don't Know You Love Yet, and new Cooking videos. The Third Edition also includes additional content with engaging new features, fewer Nutri-Cases, and the new MyPlate food patterns and recommendations. The art and photos have also been updated, along with a fresh interior design. 2005, 3540267611, 9783540267614. The healing of wounds is the very basic art of medicine which every physician should be able to master. Physicians and medical personnel seem often overwhelmed by the plethora of innovative topical preparations, dressing materials and advanced debridement techniques. Even specialists such as dermatologists and plastic surgeons may encounter difficulties in choosing the most appropriate treatment in the field of wound healing. Wound Healing and Ulcers of the Skin is a clinical guidebook which instructs the reader how to diagnose and treat wounds and cutaneous ulcers. This excellent and well-structured book introduces an algorithmic approach for the identification of ulcer etiology, together with step-by-step flow charts for therapy. It is especially valuable since it is not

only written by experts, but the content of each of the chapters has also been peer-reviewed. This extraordinary work offers helpful support to all physicians who treat acute and chronic cutaneous wounds such as dermatologists, general practitioners and family physicians, plastic and general surgeons, as well as orthopedic and vascular surgeons. Further, it will also be of assistance for physicians from other branches, such as diabetologists, internists, and geriatricians, who often encounter the need to treat chronic wounds.

Metzger discusses the external pressures that led to the fixing of the limits of the canon as well as Patristic evidence that bears on the development of the canon, not only in the West, but also among the Eastern churches. He also considers differences as to the sequence of the books in the New Testament.

A thought-provoking look at statistical learning theory and its role in understanding human learning and inductive reasoningA joint endeavor from leading researchers in the fields of philosophy and electrical engineering, An Elementary Introduction to Statistical Learning Theory is a comprehensive and accessible primer on the rapidly evolving fields of statistical pattern recognition and statistical learning theory. Explaining these areas at a level and in a way that is not often found in other books on the topic, the authors present the basic theory behind contemporary machine learning and uniquely utilize its foundations as a framework for philosophical thinking about inductive inference.Promoting the

fundamental goal of statistical learning, knowing what is achievable and what is not, this book demonstrates the value of a systematic methodology when used along with the needed techniques for evaluating the performance of a learning system. First, an introduction to machine learning is presented that includes brief discussions of applications such as image recognition, speech recognition, medical diagnostics, and statistical arbitrage. To enhance accessibility, two chapters on relevant aspects of probability theory are provided. Subsequent chapters feature coverage of topics such as the pattern recognition problem, optimal Bayes decision rule, the nearest neighbor rule, kernel rules, neural networks, support vector machines, and boosting. Appendices throughout the book explore the relationship between the discussed material and related topics from mathematics, philosophy, psychology, and statistics, drawing insightful connections between problems in these areas and statistical learning theory. All chapters conclude with a summary section, a set of practice questions, and a reference sections that supplies historical notes and additional resources for further study. An Elementary Introduction to Statistical Learning Theory is an excellent book for courses on statistical learning theory, pattern recognition, and machine learning at the upper-undergraduate and graduate levels. It also serves as an introductory reference for researchers and practitioners in the fields of engineering, computer science, philosophy, and cognitive science that would like to further their knowledge of the topic.

This summary report provides information on two surveys of views of the local black communities and Further Education (FE) teachers regarding FE provision. Part I offers background. Part II highlights these common themes: (1) the context is one of a black population exposed to acute economic and social disadvantage; (2) a serious information gap exists between colleges and communities, and this constitutes for many black people the major barrier to FE; (3) evidence of discrimination is apparent in mainstream vocational FE provision; (4) a strong interest is evident in education, not for leisure, but for improvement of work opportunities and life chances; and (5) the way forward may be to create a better understanding of the nature of FE with intensive and relevant marketing. Part III summarizes the project in South London, Part IV, the project in Bradford. Each part describes the project base, sample, and methods. Findings from the South London project are that (1) respondents wanted academic qualifications from post-school education and (2)

barriers were lack of information and lack of required qualifications. Findings from the Bradford project are: an ambivalent relationship between the college and the Asian communities, an FE system that is not well understood, and disproportionate distribution of Asian students by subject. (YLB)

[Strike the Original Match, Charles R. Swindoll](#) , 1993, 0310413516, 9780310413516. Most couples start married life with high expectations, filled with glowing hopes for living happily ever after. But as time goes on, the excitement cools, and little by little, the problems and responsibilities of life take their toll. If you sense that something is missing in your marriage, Strike the Original Match can help you rediscover the warmth and joy you thought were gone forever. This best-selling book has helped thousands of couples strengthen and rebuild their marriages. Strike the Original Match is not a cut and dried theory of marriage. Instead, this warm personal book helps you confront the difficult tasks all married couples face and learn biblical principles that can free you to make the best choices for your marriage. Chuck Swindoll offers down-to-earth wisdom as he looks at God's original blueprint for marriage and the home. You'll learn about the building blocks of a great marriage, how to keep the honeymoon from ending, ways to handle conflicts, and even some tips on wise money management. But more than that, he shows you how to bring out the best in each other, and how to create a home where love can grow deep and strong. No matter how lukewarm your relationship has become, Strike the Original Match helps you rekindle the flame that brought you together -- and enjoy the warmth as it spreads through your home.

[Moving Questions: A History of Membrane Transport and Bioenergetics, Joseph D. Robinson](#) , 1997, 0195105648, 9780195105643. This book describes half a century of progress in two mainstream areas of biological research: membrane transport, initially a focus of physiologists, and oxidative phosphorylation, initially a focus of biochemists. Robinson shows how the development of new explanatory models had unexpectedly merged these inquiries into a new field, bioenergetics. In the late 1930s, explanations for the asymmetric distribution of ions between cells and their environments invoked absolute impermeabilities of the cell's surrounding membranes. But new experiments contradicted that idea and demonstrated that forming the transmembrane distributions required metabolic energy, implying the participation of active transport "pumps." Subsequent studies identified, isolated, and characterized these pumps as enzymes coupling ionic transport to the consumption of adenosine triphosphate (ATP), an "energy-rich" molecule serving as a cellular energy store. In the late 1930s oxidative phosphorylation, the process of coupling ATP synthesis to oxidative

metabolism, was identified. The explanatory model emerging in the next decades, however, did not follow the enzymatic precedents of known metabolic phosphorylations but rather embodied the principle that metabolic oxidations drive active transport pumps to create transmembrane distribution of ions, with these ionic asymmetries then driving ATP synthesis. It was discovered that ATP consumption can form ionic asymmetries; ionic asymmetries can drive ATP formation; and ionic asymmetries-like ATP-can also power other cellular functions.

[The Kreutzer Sonata and Other Stories, Leo Tolstoy](#) , 2008, 0140449604, 9780140449600. "Each phase of life has its own love" In these four stories, Leo Tolstoy (1828 - 1910) depicts desire in its different manifestations - from idealistic romance to sexual jealousy, from desperate lust to relentless longing. Family Happiness, an early work, portrays the struggles of a couple as they move from courtship and passion through disillusionment to the quieter stage of married love. A passenger tells a bitter tale of sex, suspicion and murder when strangers on a train discuss the nature of love in the Kruetzer Sonata, a novella banned for its scandalous content in 1890. In the Devil, a young man finds it impossible to resist a beautiful peasant woman with whom he had an affair before his marriage, while Father Sergius shows a man going to increasingly desperate ends - from a soldier to monk, to hermit to beggar - in order to avoid the temptations of the flesh. The translations by David McDuff and Paul Foote faithfully convey Tolstoy's candid, vigorous prose. This edition also includes a new introduction by Donna Orwin discussing Tolstoy's depiction of love and sex in these works, as well as a chronology, further reading and notes.

You'll explore the exciting aspects of hunting for the right firearm with the goal of making a targeted profit over the short term. Learn how to apply the TEK system (Turns, Effort, and Knowledge) for each different gun search. Excellent advice on how to turn this into a business including information on sales tax, insurance, security, keeping records, and appraisals. Also included are helpful charts, diagrams, and photos that explain concepts in detail. Chapters include: How to Establish Your TEK Profile, How to Evaluate Your Product, The Finer Art of Successful Buying, Adding Value to Your Firearms Through Cleaning and Repairing, and Determining the Market Price. George E. Knight has been an active gun trader, gunsmith, and firearms investment advisor, both full- and part-time, since 1962. Holding a BA in economics and an MBA in marketing, his business background extends from large multi-national corporations to small sporting goods retailers. Born and raised in the Midwest, George and his wife Mary Ann moved east in 1969 and settled in Warwick, New York, where they continue chasing and finding firearms ranging from modern pieces to Colonial antiques. George also finds time, in season, to chase ducks and geese in the local wet spots. He is now assisted in the finding, though, by his lab Briar.

[Accountability for Killing: Moral Responsibility for Collateral Damage in America's Post-9/11 Wars, Neta C. Crawford](#) , 2013, 0199981744, 9780199981748. The unintended deaths of civilians in war are too often dismissed as unavoidable, inevitable, and accidental. And despite the best efforts of the U.S. to avoid them, civilian casualties in Afghanistan, Iraq, and Pakistan have been a regular feature of the United States' wars after 9/11. In *Accountability for Killing*, Neta C. Crawford focuses on the causes of these many episodes of foreseeable collateral damage and the moral responsibility for them. The dominant paradigm of legal and moral responsibility in war today stresses both intention and individual accountability. Deliberate killing of civilians is outlawed and international law blames individual soldiers and commanders for such killing. An individual soldier may be sentenced life in prison or death for deliberately killing even a small number

of civilians, but the large scale killing of dozens or even hundreds of civilians may be forgiven if it was unintentional--"incidental"--to a military operation. The very law that protects noncombatants from deliberate killing may allow many episodes of unintended killing. Under international law, civilian killing may be forgiven if it was unintended and incidental to a militarily necessary operation. Given the nature of contemporary war, where military organizations-training, and the choice of weapons, doctrine, and tactics-create the conditions for systemic collateral damage, Crawford contends that placing moral responsibility for systemic collateral damage on individuals is misplaced. She develops a new theory of organizational moral agency and responsibility, and shows how the US military exercised moral agency and moral responsibility to reduce the incidence of collateral damage in America's most recent wars. Indeed, when the U.S. military and its allies saw that the perception of collateral damage killing was causing it to lose support in the war zones, it moved to a "population centric" doctrine, putting civilian protection at the heart of its strategy. Trenchant, original, and ranging across security studies, international law, ethics, and international relations, *Accountability for Killing* will reshape our understanding of the ethics of contemporary war.

[A Tour of the Calculus, David Berlinski](#) , 1995, 009943508X, 9780099435082. The calculus represents humanity's great and profound meditation on the theme of continuity. Time and space are given voice, and speed and area are subordinated to the harsh concept of a limit. The introduction of the real numbers allows the landscape of mathematical analysis to be suffused with thrilling light. In that lit-up landscape, the infinite is for the first time charmed into compliance, men and women gaining the eerie power to ask of certain processes, Suppose it goes on forever, what then? and finding within the calculus a comprehensive answer. In clear and instructive language David Berlinski explains the concept of limits, how a function describes a relationship between numbers, and the meaning of the real numbers and their role in the re-creation of the world. Hidden for centuries from human insight, an array of mathematical operations and processes become visible.

Free Radicals in Biology and Medicine has become a classic text in the field of free radical and antioxidant research since its first publication in 1985. This latest edition has been comprehensively rewritten and updated (over 80% of the text is new), while maintaining the clarity of its predecessor. There is expanded coverage of isoprostanes and related compounds, mechanisms of oxidative damage to DNA and proteins (and the repair of such damage), the free radical theory of aging and the roles played by reactive species in signal transduction, cell death, human reproduction, and other important biological events. Greater emphasis has also been placed on the methods available to measure reactive species and oxidative damage (and their potential pitfalls), as well as the importance of antioxidants in the human diet. This book is recommended as a comprehensive introduction to the field for students, clinicians and researchers, and an invaluable companion to all those interested in the role of free radicals in the life and biomedical sciences.

Pensive Inquiries is a workbook to guide you through exercises that help you help your student demonstrate practical information, find out why they hold certain opinions, and encourage students (and you) to explore new ways to think about both common, and unique ideas.

[Homage to Caledonia: Scotland and the Spanish Civil War, Daniel Gray](#) , 2009, 1906817162, 9781906817169. The Spanish civil war was a call to arms for 2,300 British volunteers, of which over 500 were from Scotland. The first book of its kind, 'Homage to Caledonia' examines Scotland's role in the conflict, detailing exactly why Scottish involvement was so profound. The book moves chronologically through events and places, firstly surveying the landscape in contemporary Scotland before describing volunteers' journeys to Spain, and then tracing their every involvement from arrival to homecoming (or not). There is also an account of the non-combative role, from fundraising for Spain and medical aid, to political manoeuvrings within the volatile Scottish left. Using a wealth of previously-unpublished letters sent back from the front as well as other archival items, Daniel Gray is able to tell little known stories of courage in conflict, and to call into question accepted versions of events such as the 'murder' of Bob Smillie, or the heroism of 'The Scots Scarlet Pimpernel'. Homage to Caledonia offers a very human take on events in Spain: for every tale of abject distress in a time of war, there is a tale of a Scottish volunteer urinating in his general's boots, knocking back a dram with Errol Flynn or appalling Spanish comrades with his pipe playing. For the first time, read the fascinating story of Caledonia's role in this seminal conflict.

[The Short Stories of Ernest Hemingway, Ernest Hemingway](#) , 2002, 0743237315, 9780743237314. Before he gained wide fame as a novelist, Ernest Hemingway established his literary reputation with his short stories. This collection, The

Short Stories, originally published in 1938, is definitive. Among these forty-nine short stories are Hemingway's earliest efforts, written when he was a young foreign correspondent in Paris, and such masterpieces as "Hills Like White Elephants," "The Killers," "The Short, Happy Life of Francis Macomber," and "The Snows of Kilimanjaro." Set in the varied landscapes of Spain, Africa, and the American Midwest, this collection traces the development and maturation of Hemingway's distinct and revolutionary storytelling style -- from the plain, bald language of his first story, "Up in Michigan," to the seamless prose and spare, eloquent pathos of "A Clean, Well-Lighted Place" to the expansive solitude of the Big Two-Hearted River stories. These stories showcase the singular talent of a master, the most important American writer of the twentieth century.

[Ending Life: Ethics and the Way We Die, M. Pabst Battin](#) , 2005, 0195140273, 9780195140279. Margaret Pabst Battin has established a reputation as one of the top philosophers working in bioethics today. This work is a sequel to Battin's 1994 volume *The Least Worst Death*. The last ten years have seen fast-moving developments in end-of-life issues, from the legalization of physician-assisted suicide in Oregon and the Netherlands, to a furor over proposed restrictions of scheduled drugs used for causing death, and the development of "NuTech" methods of assistance in dying. Battin's new collection covers a remarkably wide range of end-of-life topics, including suicide prevention, AIDS, suicide bombing, serpent-handling and other religious practices that pose a risk of death, genetic prognostication, suicide in old age, global justice and the "duty to die." It also examines suicide, physician-assisted suicide, and euthanasia in both American and international contexts. As with the earlier volume, these new essays are theoretically adroit but draw richly from historical sources, fictional techniques, and ample factual material.

[Supply Chain Engineering: Useful Methods and Techniques, Alexandre Dolgui, Jean-Marie Proth](#) , 2010, 1849960178, 9781849960175. Supply Chain Engineering considers how modern production and operations management techniques can respond to the pressures of the competitive global marketplace. It presents a comprehensive analysis of concepts and models related to outsourcing, dynamic pricing, inventory management, RFID, and flexible and re-configurable manufacturing systems, as well as real-time assignment and scheduling processes. A significant part is also devoted to lean manufacturing, line balancing, facility layout and warehousing techniques. Explanations are based on examples and detailed algorithms while discarding complex and unnecessary theoretical minutiae. All examples have been carefully selected from an industrial application angle. This book is written for students and professors in industrial and systems engineering, management science, operations management and business. It is also an informative reference for managers looking to improve the efficiency and effectiveness of their production systems.

[The Leading Lady: Dinah's Story, Betty White, Tom Sullivan](#) , 2013, 0425259242, 9780425259245. The story of a dog, and the extraordinary difference she made in every life she touched. After sixty years in show business, Betty White has earned her reputation as an American icon. She may be a bona fide television pioneer, but throughout Betty's life, her heart has always been with the animals. But one of the most enriching episodes in her career as an animal-rights advocate arrived with actor Tom Sullivan. Blind since birth, Tom was one of Betty's closest friends and professional partners. Their dearest collaboration was a mutual devotion to a golden retriever named Dinah. This first-class guide dog was more than Tom's best friend, she was a source of unqualified loyalty and love. Most important, she enabled Tom to be truly independent for the first time in his life. However as Dinah got older, as her faculties weakened and her

confidence faltered, Tom had little choice but to get a new dog. The effect of losing her purpose was devastating to the once-gallant Dinah. Then Betty gladly stepped in to give this great Lady a new lease on life. What would transpire is a heartening and inspiring story of a dog who made a difference and who, in Betty White's words, "helped Tom grow up as she has helped me grow older." It is for all animal lovers, for all Betty White lovers, and everyone who can relate to the unconditional devotion of dogs and the people who love them. INCLUDES PHOTOS

First there's a bitter feud between peppery Colonel Wyvern and the Squire of Rudge Hall, rich but miserly Lester Carmody. Second, that arch-villain Chimp Twist has opened a health farm - and he and Soapy and Dolly Molloy are planning a fake burglary so Lester can diddle his insurance company. After the knockout drops are served, things get a little complicated. But will Lester's nephew John win over his true love, Colonel Wyvern's daughter Pat, and restore tranquillity to the idyll? It's a close-run thing...

The book describes the life of U.S. diplomats against a backdrop of serious political or military events, such as the bombing of offshore islands between mainland China and Taiwan; the civil war and landing of U.S. Marines in Beirut, Lebanon; the overthrow of First Secretary Khrushchev; the alleged coup in Guinea resulting in the house arrest of U.S. diplomats. I give my vision of the role of a U.S. diplomat, with his battles and his accomplishments, and describe the transformation of the role of the spouses. I studied the history, the specific cultural traits, the language, and the major art forms of each country. Nicole Logan gives us insights into the political situation in many of the countries in which she lived. She is particularly effective in describing the social crosscurrents underlying political developments, something we see all too rarely in analyses of world events. [The Quest for Comfort: The Story of the Heidelberg Catechism, William Boekestein](#) , 2011, 1601781520, 9781601781529. The Heidelberg Catechism has been taught to children for hundreds of years, encouraging them to seek Christ as their true source of comfort. But how did this catechism get written? In *The Quest for Comfort*, William Boekestein and Evan Hughes combine history and art to retell the events that led to making the catechism. By sharing the stories of Caspar Olevianus, Zacharias Ursinus, and Frederick III and how they came to Heidelberg, children will gain a greater appreciation of the Christian faith as it is expressed in the Heidelberg Catechism. Endorsement The Heidelberg Catechism was an important part of my childhood. Every week I had to memorize a question and answer, and every week I was taught to understand and apply what I had learned. This provided a theological foundation that continues to serve me many years later. I am grateful for this little book, through which William Boekestein introduces the Catechism to another generation of children. May they come to treasure it as I have. [Blood Feud: The Saga of Pandora Zwieback, Book 1, Steven A. Roman](#) , 2011, 0984174109, 9780984174102. From Steven A. Roman, bestselling author of *X-Men: The Chaos Engine Trilogy*, comes the debut of a thrilling dark urban-fantasy novel series! Sixteen-year-old Goth girl Pandora Zwieback has a major problem: she's just discovered that her New York City hometown is the stalking ground for every monster and ghoulish out to raise a little hell (literally!) . . . BUT she's apparently the only one who can see them. That means she can't tell her friends or family about the dangers

around them--not unless she wants to spend the rest of her life locked up in a psychiatric ward. But before Pan has a chance to make sense of her increasingly weird life, she finds herself in the middle of a war among rival vampire clans. Elegant Gothic Lolitas from Japan on one side, silk-suited London vamps on the other, leather-clad hunters from Eastern Europe in the middle, and all after the same prize: a mysterious crate recently delivered to the horror-themed museum owned by Pan's father. What is the terrifying secret of Item #179? How do its contents tie into an incident from the blood-drenched past of Pan's new friend, a 400-year-old, shape-shifting monster hunter named Annie? And, more important, will Pan survive long enough to get any answers?

[The Complete Odes and Epodes, Horace](#) , 1983, 014044422X, 9780140444223. Horace (65-8 bc) was one of the greatest poets of the Golden or Augustan age of Latin literature, a master of precision and irony who brilliantly transformed early Greek iambic and lyric poetry into sophisticated Latin verse of outstanding beauty. Offering allusive and exquisitely crafted insights into the brief joys of the present and the uncertain nature of the future, his Odes and Epodes explore such diverse themes as the virtues of pastoral life, the joys of wine, friendship and love, and the poet's personal anguish following Brutus' defeat at the battle of Phillipi. Ranging from subtle and tender hymns to the gods to bawdy celebrations of human passions, they remain among the most influential of all poems, inspiring poets from the Roman era to the European Renaissance, the Enlightenment and beyond.

people a day at U.S. airports and managing transportation operations around the world. But how effective is this beleaguered agency, and is it really keeping us safe from terrorism? In this riveting expose, former TSA administrator Kip Hawley reveals the secrets behind the agency's ongoing battle to outthink and outmaneuver terrorists, illuminating the flawed, broken system that struggles to stay one step ahead of catastrophe. Citing numerous thwarted plots and government actions that have never before been revealed publicly, Hawley suggests that the fundamental mistake in America's approach to national security is requiring a protocol for every contingency. Instead, he claims, we must learn to live with reasonable risk so that we can focus our efforts on long-term, big-picture strategy, rather than expensive and ineffective regulations that only slow us down.

[Approaches to social research, Royce Singleton, Bruce C. Straits, Margaret Miller Straits](#) , 1993, 0195073967, 9780195073966. Thoroughly revised and updated to incorporate new research, the second edition of this remarkably popular work instills readers with the sense and skills they need to become intelligent consumers of research evidence, providing a lucid, accessible introduction to the various methods employed in a variety of fields, as well as an appreciation of social research as part of the larger context of social science. Offering over two dozen new research examples and over 100 new references, "user-friendly" diagrams of essential concepts and processes, and expanded coverage of current key topics and recent developments, it strikes a balance between specific techniques and the underlying logic of social inquiry--the how-to and wherefore of research. Opening chapters draw readers into the subject by illustrating the practicality of the study of research methods and the vital relationship between theory and research. The ensuing sequence of topics follows that of an ideal-typical research project--beginning with research design, measurement, and sampling, proceeding to data collection, and then to data processing and analysis. The authors focus on four major approaches to research--experimentation, survey research, field research, and the use of available data--and bring the material to life with numerous examples drawn from classic and current research. Advocating a

multiple-methods strategy that treats these approaches as complementary, rather than mutually exclusive, the authors provide a full account of the benefits and drawbacks of using each, and describe the actual processes involved in research with each.

[Delivery and Controlled Release of Bioactives in Foods and Nutraceuticals, Nissim Garti](#) , 2008, 1845691458, 9781845691455. Active ingredients in foods must remain fully functional for as long as necessary and be transported and discharged appropriately to have the desired nutritional effect. Delivery and controlled release systems are an essential way to achieve these aims. This important book reviews how to optimise these systems to maximise the health-promoting properties of food products. Opening chapters review factors affecting nutrient bioavailability and methods to test delivery system efficacy. Part two addresses materials used and specific techniques for delivery and release. The benefits and drawbacks of structured lipids, micro- and nano-emulsions, food-protein-derived materials, complexes and conjugates of biopolymers, and starch as an encapsulation material for delivery of functional food ingredients, are all considered. Part three discusses the delivery and controlled release of particular nutraceuticals such as antioxidants and vitamins, folic acid, probiotics, fish oils and proteins. Part four covers regulatory issues and future trends in bioactives and nutraceuticals. Edited by a leading expert in the field, *Delivery and controlled release of bioactives in foods and nutraceuticals* is a valuable reference for those working in the food industry and particularly those developing nutraceuticals. Reviews techniques to optimise the delivery and release of bioactives in food. Discusses the factors that affect nutrient bioavailability and methods to test delivery system efficacy. Addresses materials used and specific techniques for delivery and release.
