[Sounds and Perception: New Philosophical Essays, Matthew Nudds, Casey O'Callaghan](#) , 2009, 019928296X, 9780199282968. Sounds and Perception is a collection of original essays on auditory perception and the nature of sounds - an emerging area of interest in the philosophy of mind and perception, and in the metaphysics of sensible qualities. The individual essays discuss a wide range of issues, including the nature of sound, the spatial aspects of auditory experience, hearing silence, musical experience, and the perception of speech; a substantial introduction by the editors serves to contextualise the essays and make connections between them. This collection will serve both as an introduction to the nature of auditory perception and as the definitive resource for coverage of the main questions that constitute the philosophy of sounds and audition. The views are original, and there is substantive engagement among contributors. This collection will stimulate future research in this area.

But it often seems like conflict and disagreement are unavoidable. Serious, divisive conflict is everywhere-within families, in the church, and out in the world. And it can seem impossible to overcome its negative force in our lives. In *The Peacemaker*, Ken Sande presents a comprehensive and practical theology for conflict resolution designed to bring about not only a cease-fire but also unity and harmony. Sande takes readers beyond resolving conflicts to true, life-changing reconciliation with family members, coworkers, and fellow believers. Biblically based, *The Peacemaker* is full of godly wisdom and useful suggestions that are easily applied to any relationship needing reconciliation. Sande's years of experience as an attorney and as president of Peacemaker Ministries will strengthen readers' confidence as they stand in the gap as peacemakers.

But as bestselling author Michael Brooks explains, the truth is very different: many of our most successful scientists have more in common with libertines than librarians. This thrilling

exploration of some of the greatest breakthroughs in science reveals the extreme lengths some scientists go to in order to make their theories public. Fraud, suppressing evidence and unethical or reckless PR games are sometimes necessary to bring the best and most brilliant discoveries to the world's attention. Inspiration can come from the most unorthodox of places, and Brooks introduces us to Nobel laureates who get their ideas through drugs, dreams and hallucinations. Science is a highly competitive and ruthless discipline, and only its most determined and passionate practitioners make headlines - and history. To succeed, knowledge must be pursued by any means: in science, anything goes. 'Brooks is an exemplary science writer' William Leith, Daily Telegraph

But when it comes through your spiritual leader, it is often not survivable. After all, when it is a brother or sister you can go to your pastor for advice and comfort. But when it is your pastor, you are left alone, helpless and often spiritually homeless. In my book, I share how I not only suffered betrayal, but endured and even survived. I give you 30 practical steps to do each day along with scripture

meditations. This is what I did to get through one of the worst experiences of my life. Not only did I get through it, but I have been able to forgive, move on, and have a friendship with my former pastor restored. You will find I am real, but respectful, hurt but hopeful. And in the end, you will find a heart that is not only healed but restored and a friend that is forgiven.

The existing books on design patterns take a catalog approach, where they show the individual design patterns in isolation. This approach is fundamentally flawed, because you can't see how the design patterns actually function in the real world. Most programmers learn by looking at computer programs. Holub on Patterns: Learning Design Patterns by Looking at Code teaches you design patterns in exactly this way: by looking at computer programs and analyzing them in terms of the patterns that they use. Consequently, you learn how the patterns actually occur in the real world and how to apply the patterns to solve real problems. This book also looks at the broader context of object-oriented (OO) design and how patterns solve commonplace OO design problems. It covers many of the principles of OO design principles not covered by most books on Java and shows you how to apply these principles to make your code easier to maintain and debug.

[Introduction to Psycholinguistics, 2/e, An, Danny D Steinberg, Natalia V. Sciarini](#) , 2006, 0582505755, 9780582505759.

Learning About Language is an exciting and ambitious series of introductions to fundamental topics in language, linguistics and related areas. The books are designed for students of linguistics and those who are studying language as part of a wider course. An Introduction to Psycholinguistics examines the psychology of language as it relates to learning, mind and brain as well as to aspects of society and culture. How do we learn to speak and to understand speech? Is language unique to humans? Does language influence culture? Using non-technical language, and providing concrete examples, the authors explore: How children learn to speak and read their native language Deaf language education Case studies of wild children and animals and what we can learn from these Second language acquisition, second language teaching methods, and the problems associated with bilingualism Language and the brain The relationship between thought and language In this new edition the authors propose a radical new theory of grammar - natural grammar - which unlike other theories can account for both speech comprehension and speech production. Also taking into account the extensive growth in theory, research and practice, this new edition is an accessible and focused introduction to the key issues and the latest research in the field of psycholinguistics.

[Supernatural America: A Cultural History: A Cultural History, Lawrence R Samuel](#) , 2011, 031339900X, 9780313399008.

The supernatural/psychic phenomena (telepathy, clairvoyance, or ESP), communicating with the dead, and the sighting and tracking of ghosts has played an integral role in American culture across the last century. In fact, attention and interest in the supernatural has increased, despite our society's reliance upon and enthusiasm for science and technology. Even some top scholars, officials from the military and police, and public figures in places as high as the Oval Office have believed in at least some aspects of the supernatural. *Supernatural America: A Cultural History* is the first book to examine the cultural history of the supernatural in the United States, documenting how the expansion of science and technology coincided with a rise in supernatural/paranormal beliefs. From the flourishing of "spiritism" in the 1920s to the early 21st century, when the paranormal is bigger than ever, this entertaining and educational book explains the irresistible allure of the supernatural in America.

[Data Clustering in C++: An Object-Oriented Approach, Guojun Gan](#) , 2011, 1439862249, 9781439862247. Data clustering is a highly interdisciplinary field, the goal of which is to divide a set of objects into homogeneous groups such that objects in the same group are similar and objects in different groups are quite distinct. Thousands of theoretical papers and a number of books on data clustering have been published over the past 50 years. However, few books exist

to teach people how to implement data clustering algorithms. This book was written for anyone who wants to implement or improve their data clustering algorithms. Using object-oriented design and programming techniques, *Data Clustering in C++* exploits the commonalities of all data clustering algorithms to create a flexible set of reusable classes that simplifies the implementation of any data clustering algorithm. Readers can follow the development of the base data clustering classes and several popular data clustering algorithms. Additional topics such as data pre-processing, data visualization, cluster visualization, and cluster interpretation are briefly covered. This book is divided into three parts-- Data Clustering and C++ Preliminaries: A review of basic concepts of data clustering, the unified modeling language, object-oriented programming in C++, and design patterns A C++ Data Clustering Framework: The development of data clustering base classes Data Clustering Algorithms: The implementation of several popular data clustering algorithms A key to learning a clustering algorithm is to implement and experiment the clustering algorithm. Complete listings of classes, examples, unit test cases, and GNU configuration files are included in the appendices of this book as well as in the CD-ROM of the book. The only requirements to compile the code are a modern C++ compiler and the Boost C++ libraries.

[Apocalypse Alive, Danny J. Hubbard](#) , 2008, 0979700515, 9780979700514. Many people state they do not understand Biblical Prophecy and the Book of Revelation. Therefore, they never try to study or comprehend end-time events. *Apocalypse Alive* is a thorough biblical study of end time events. It will take the Book of Revelation as the outline for the book and place all the events in chronological order as they occur in the future. It will supply the reader with an enormous amount of biblical scripture references to support the views of the author. Lay people and preachers who have read *Apocalypse Alive* have stated they now have a much clearer understanding of prophecy and the Book of Revelation as a result of this book and are excited to learn more about prophecy. Very few biblical commentaries take the route of describing end-time events using the chronological method and this is the reason the author wrote *Apocalypse Alive*. *Apocalypse Alive* is a book that will excite the soul and muster emotions and expectations that a person may have never

experienced. This book is for anyone who wishes to understand what the Bible has to say about what the future holds.

[Teaching Children Dance, Theresa Purcell Cone, Stephen Leonard Cone](#) , 2012, 1450402534, 9781450402538. "Teaching Children Dance, Third Edition," assists both student learners and practitioners in understanding the components and benefits of children's dance and in developing the skills required for enhancing or initiating dance as part of a physical education or arts education curriculum. A comprehensive text for both students and practitioners in elementary methods courses, "Teaching Children Dance, Third Edition," offers a framework for presenting creative dance lessons to elementary-aged children in a variety of settings. In this updated third edition, respected authors Purcell Cone and Cone identify how dance experiences assist children in cultivating 21st-century skills of creative thinking, collaboration, communication, global awareness, and self-direction. The authors present dance as a mode of learning that involves the whole child, using the body and the senses to gather information, communicate, and demonstrate conceptual understandings. "Teaching Children Dance" presents the fundamentals of program construction and delivery, guidelines on tailoring a dance program to fit various teaching situations, and advocacy strategies for maintaining and developing a program. Sample unit plans as well as ideas for planning yearlong unit plans and lesson outlines are included. Readers will find protocols for maintaining a safe and productive learning environment as well as strategies for encouraging students' feedback, demonstrations, and observations. "Teaching Children Dance" presents 31 challenging and enjoyable

dance experiences. These ready-to-use learning experiences are divided into 12 activities for children in kindergarten through second grade and 11 activities appropriate for students in third through fifth grade. Eight dance experiences designed for inclusive or self-contained dance classes are also detailed along with strategies to ensure successful experiences for children with disabilities. New chapters on inclusive dance for children and classes for children with disabilities and interdisciplinary connections provide strategies and tools for successful implementation. The third edition of "Teaching Children Dance" also includes 13 new learning experiences, additional assessment examples, and a menu of instruments for teacher assessment, peer assessment, and student self-assessment. In addition, "Teaching Children Dance" features a bonus CD-ROM with PDFs of the learning experiences included in the text, plus additional learning experiences from previous editions. Using the learning experience index, instructors can easily select an age-appropriate learning experience and print it for use in the class. The CD-ROM offers instructional support materials used in elementary methods courses, including worksheets, assignments, end-of-chapter questions, and assessment tools. Each learning experience includes a listing of the learning outcomes, organization of the activity (individual, partner, or small-group participation), and required equipment. A four-part learning experience details the introduction, development, culminating dance, and closure sections of the dance experience. Key points to observe; ideas for extending or varying the lesson; specific interdisciplinary connections; and suggestions for student self-assessment, teacher assessment of student learning, and peer assessment are also included. Using the lessons, strategies, and tools in "Teaching Children Dance, Third Edition," teachers can offer exciting opportunities for children to express themselves through dance and experience the joy of dancing with others. Whether in a physical education, dance, or elementary classroom, "Teaching Children Dance" will assist teachers in developing learning experiences that cultivate creativity, positive social interactions, and motor skill development for elementary children of all ability levels.

Nearly 400 instruments are reviewed in this third edition of Occupational Therapy Assessment Tools, including many

developed by occupational therapists. An international team of academicians, clinicians, researchers, and advanced-degree candidates working in various practice arenas collaborated on this update. The assessment profiles--which include title, authors, format, purpose, population, time required to administer, setting or position, materials or tools, brief description, interpretation, reliability and validity, source, additional references, cost, and ample-- will be useful to clinicians and students, who must choose appropriate tools for clinical practice; to educators, who select assessment procedures for the classroom; and to researchers, who will find instruments that are designed for research purposes or will benefit from further investigation. Another major change in this new edition is the incorporation of the language, terminology, and organization of the Occupational Therapy Practice Framework. Other improvements include a matrix of all assessments, showing content areas and age ranges of each instrument. Most exciting is the accompanying searchable CD-ROM, which offers readers quick, easy access to the entire text. -- Publisher's website

Eccles, the leading Anglo-Canadian social historian of New France, has here collected twelve important essays written over twenty-five years-a period in which he greatly enlarged the significance of his subject by relating New France to the rest of North America, to European imperialism, and to the indigenous peoples. Preceded by an interesting memoir of his career as a scholar, 'Forty Years Back', these essays discuss Francis Parkman's view of New France, which dominated history studies until Eccles began to publish in the 1950s; the roles of the church, the military, and the fur trade; social welfare; and the western frontier. There is also a reappraisal of the Battle of Quebec. Each essay has an introductory note describing the circumstances of writing and giving pertinent background information.

HIST This book and audio CD set by Bernstein (Grand Eccentrics) and Lubertozi (Complete War of the Worlds) covers the efforts of the famous 'Murrow Boys,' the group of reporters hired by CBS's Edward R. Murrow to cover the events of World War II. At that time, reporters such as Eric Sevareid, Howard K. Smith, Charles Collingwood, and Richard C. Hottelet got their first major career exposure. Coverage begins in 1938 with the German annexation of Austria and carries through the surrender of France, the 1944 D-day invasion, and V-E day in 1945. Each reporter's story is chronicled in the text, with a cross reference pointing to a track on the accompanying CD that contains his actual radio broadcasts. The book itself is a fascinating read that, paired with the historic recordings, gives a thrilling sense of what it was like for Americans at home following the war in their living rooms. Listening to Edward R. Murrow powerfully describe the London blitz bombing as it is happening is a real historical privilege. Recommended for both public and academic libraries. [Return of a King: The Battle for Afghanistan, William Dalrymple](#) , 2013, 1408822873, 9781408822876. In the spring of

1839, the British invaded Afghanistan for the first time. Led by lancers in scarlet cloaks and plumed shakos, nearly 20,000 British and East India Company troops poured through the high mountain passes and re-established on the throne Shah Shuja ul-Mulk. On the way in, the British faced little resistance. But after two years of occupation, the Afghan people rose in answer to the call for jihad and the country exploded into violent rebellion. The First Anglo-Afghan War ended in Britain's greatest military humiliation of the nineteenth century: an entire army of the then most powerful nation in the world ambushed in retreat and utterly routed by poorly equipped tribesmen. *Return of a King* is the definitive analysis of the First Afghan War, told through the lives of unforgettable characters on all sides and using for the first time contemporary Afghan accounts of the conflict. Prize-winning and bestselling historian William Dalrymple's masterful retelling of Britain's greatest imperial disaster is a powerful and important parable of colonial ambition and cultural collision, folly and hubris, for our times.

[Social Order and the Fear of Crime in Contemporary Times, Stephen D. Farrall, Jonathan Jackson, Emily Gray](#) , 2009, 0199540810, 9780199540815. The fear of crime has been recognized as an important social problem in its own right, with a significant number of citizens in many countries concerned about crime. In this book, the authors critically review

the main findings from over 35 years of research into attitudes to crime, highlighting groups who are most fearful of crime and exploring the theories used to account for that fear. Using this research, the authors move on to propose a new model for the fear of crime, arguing that such methods, which involve intensity questions (such as 'how worried are you about x ...'), may actually conflate an 'expressive' or 'attitudinal' component of the fear of crime with an experiential component and therefore fail to provide a comprehensive insight into how crime is perceived. Taking an entirely new approach to their subject, the authors use existing quantitative data from the British Crime Survey to pose theoretically informed questions to help identify those who only 'expressively' fear crime, separating them from those who have the actual experience of worrying about crime. By exploring the extent to which each group has different social attitudes and backgrounds, and whether there is more than one social/cultural form of the fear of crime, this innovative and exciting title promises to reposition this aspect of criminology to a more prominent place.

[The Annotated Arch: A Crash Course in the History of Architecture, Carol Strickland, Amy Handy](#) , 2001, 0740710249, 9780740710247. The Annotated Arch takes architectural history out of the realm of dreary textbooks into a world of dynamic design, succinct page-length essays and instructive sidebars. These graphic devices heighten the reader's ability to retain an impressive amount of information, even through a cursory reading. A brief run-through of the book's captions and sidebars provides a mini crash course in the history of architecture. Incorporating more than 250 illustrations, The Annotated Arch draws on the very elements of architecture to craft a visual and textual approach to the subject that no ordinary textbook could match. From Stonehenge to the Eiffel Tower, from Filippo Brunelleschi to Frank Lloyd Wright, the language of architecture is clarified in five sections. Everything you always wanted to know about architecture is all right here in The Annotated Arch, which covers architectural wonders from the Stone Age to the Space Age. Presented in a reader-friendly format, this new book enlightens, entertains, and informs with its lively look at architecture. What's the difference between Doric, Corinthian, and Ionic? Within the 192 illustrated pages of The Annotated Arch, readers will learn all about these distinctive styles--and more. From engineering breakthroughs to cultural history, from biographical anecdotes to analyses of corresponding and clashing styles The Annotated Arch covers all the architectural bases. The book breaks new ground with excerpts from interviews conducted by the author with leading contemporary architects. This new Annotated book follows Carol Strickland's first volume on art history, The Annotated Mona Lisa. Peppered with sidebars, The Annotated Arch will appeal to anyone who loves architecture or who

simply wants to learn more about it in a painless, enjoyable way. It's a great, educational read.

Import external objects, create unique artwork to exact specifications, and incorporate text into an Illustrator design by creating a large-format kitchen-planning guide. 3. Master use of the Pen tool -- the most critical tool in the application -- by developing a complete corporate identity package including stationery, envelopes, and business cards. 4. Explore Illustrator's many brush libraries, symbols, and patterns to develop a custom map. 5. Use advanced typography tools such as character styles, paragraph styles, and glyphs, and learn proper methods for combining imagery and complex text elements into a three-panel brochure. 6. Create original artwork using filters, effects, and transparency for retail packaging, an extremely lucrative segment of the graphic design profession. 7. Develop functional web components using Illustrator's ability to generate hot links, industry-standard XHTML, slices, and other elements required for site development. In addition, the project employs highly effective coloring functions through the use of Illustrator's Mesh tool. 8. In the final project, the student will simulate three-dimensionality both manually, through the use of guides and two-point perspective, as well as with Adobe's built-in Transformation functions.

[Crimes Against Nature: Standing Up to Bush and the Kyoto Killers who are Cashing in on Our World, Robert Francis Kennedy](#) , 2005, 0141024089, 9780141024080. An impassioned, excoriating account of how Bush and big business are plundering the environment - and raking in the profits. Robert F. Kennedy, one of the world's most prominent environmental lawyers, charges the White House with the crime of pursuing private profit and personal power at the expense of clean air, clean water and live wildlife, enriching the President's pals while lowering the quality of life for the rest of us. Kennedy lifts the lid on an administration whose policies have looted American money, helped its most notorious polluters and deceived its public. He shows how, in a cabinet that boasts more CEOs than any in history, industry lobbyists wield an unprecedented influence on policy; how the government has rolled back key environmental laws and suppressed reports on issues like global warming while covering up its true agenda with clever PR; how Bush preaches individualism yet doles out lavish subsidies to the energy barons; and how everyone's health and security worldwide are being sacrificed at the altar of profit. Written in the belief that there's another way, Crimes Against Nature powerfully makes the case for democracy against the corrosive effects of corporate corruption.

[Awakening Love: A Spiritual Quest Into Judaism, Myra Estelle](#) , 2007, 0965177114, 9780965177115. Several years ago the author found herself drawn into an introspective quest to learn more about the inner process of life. She looked into

a number of faiths and different cultures in both the East and the West, and found that they all have a similar core to their basic religious belief, which is that there is an invisible power in the world a conscious force beyond our human capabilities. When she focused on the kabbalah of Judaism, the religion of her ancestry, she discovered that its guidelines for life can empower each of us to eventually transform our experience into one of love. The first section, Harmony, explores the interwoven layers beneath the surface of life. Then Practices analyzes the support given by the ancestral teachings. Finally, Release From Fear reassures that every one of us can stay strong throughout this enlightening process.

[JavaScript on the Server Using Node.js and Express, Jenny Chapman](#) , 2013, 0956737080, 9780956737083. Node.js is a JavaScript interpreter and runtime system which has made the use of JavaScript a feasible and attractive option for server-side programming. Its combination of an efficient interpreter with an event-driven library makes Node.js especially suitable for Web applications that deal with many requests. Express is a Web application framework built on top of Node.js that relieves developers of the burden of some of the repetitive tasks of Web development. Written for professional and student Web developers, this book provides a clear and concise introduction to the kind of JavaScript programming that will allow readers to take advantage of Node.js and Express to create Web applications. Drawing on a deep understanding of programming languages and many years of practical experience in Web application development, the authors explain functions and objects, Node.js's system of modules, and the use of callbacks in asynchronous programming. A small complete application, using Express and a relational database, is built and described in detail. The two final chapters are devoted to the important topic of testing. Clear key points summarize each section, links to relevant Web sites are included, and technical terms are defined in an 8-page glossary. Topics covered include: Functions and closures Objects and prototypes Modules Asynchronous callbacks and events Building a simple application using Express Unit testing and integration testing This is not a general introduction to JavaScript. It is assumed that readers

already have some experience using JavaScript for client-side scripting and are familiar with the basic syntax, built-in data types and control structures. A short book in the "Web Development Topics" series, by the well-known authors Nigel and Jenny Chapman.

This book is the companion book to The Unofficial Guide to Passing OSCEs, which has sold 8000 copies in 2 years. OSCE examinations are used worldwide as a critical part of medical student assessment, yet there is often little preparation for them provided by medical schools. The Unofficial Guide to Passing OSCEs is intended to fill this gap. It includes 92 scenarios, covering medical history taking, clinical examination, practical skills, communication skills, plus specialties, meaning that everything for medical students is covered in one place. The book is designed to allow students to role play a real life OSCE, with each station containing a) a briefing for an actor playing the patient b) a briefing for the student and c) a mark scheme and questions to ask for the examiner. This book has relevance beyond examinations, with the mark scheme checklists acting as a day-to-day reference for professionals."

[Half Life: Extending the Effective Lifespan of the Corporation through Strategic Management of Industry Diversification, Globalization, Mergers, and Acquisitions, APAC Press, Geoffrey P Forster](#) , 2010, 0982586809, 9780982586808. What is the lifetime of a corporation? This is a critical question for it impacts not only how we make longer term investments in established corporations, it also impacts how often we need to restructure an investment portfolio. Large, established, and once successful corporations and their associated brands continually emerge and disappear in any healthy, competitive business environment. However an important trend is emerging in that the mean life time for large established corporations has more than halved in the last 50 years. This observation is of critical importance to business analysts, investors, executives and corporate directors, for it is a core parameter in determining the long term valuation of a business. In Half Life Forster documents a detailed study of corporate survival trends, and examines and extends the existing landscapes, tools, models and indexes used to monitor the corporate life cycle. Forster goes on to describe the creation of a new business fitness landscape model, introduces two new business risk parameters, creates a new business diversity fitness index, and completes a macro analysis of the extinction rates associated with the 100 largest corporations in the United States. With these new tools Forster establishes a new model for viewing the mean life and half life of large corporations and for studying the impact that related and unrelated diversification in industry participation has on a corporation's effective lifespan. Forster suggests that established corporations don't survive just by being the fittest, but that they survive rapid discontinuous change by finding a new optimum position in a new business fitness landscape.

In News Junkie, the cutthroat worlds of journalism, politics, and high finance are laid bare by Jason Leopold, whose addictive tendencies led him from a life of drug abuse and petty crime to become an award-winning investigative journalist who exposed some of the biggest corporate and political scandals in recent American history. Leopold broke key stories about the California energy crisis and Enron Corporation's infamous phony trading floor as a reporter for the Dow Jones Newswires. While he exposed high-rolling

hucksters and double-dealing politicians, Leopold hid the secrets of his own felonious past, terrified that he would be discovered. When the news junkie closed in on his biggest story--one that implicated a Bush administration member--he found himself pilloried by angry colleagues and the president's press secretary, all attempting to destroy his career. Jason Leopold introduces us to an unforgettable array of characters, from weepy editors and love-starved politicians to steroid-pumped mobsters who intimidate the author into selling drugs and stolen goods. In the end, News Junkie shows how a man once fueled by raging fear and self-hatred transforms his life, regenerated by love, sobriety and a new, harmonious career with the independent media. Jason Leopold is a former Los Angeles bureau chief of Dow Jones Newswires. He has worked for the Los Angeles Times and has been a frequent guest on CNBC; his articles have appeared in The Nation, The Wall Street Journal, and The Financial Times. In this book the authors have compiled 191 cases to help the reader with the practical aspects of image recognition and differential diagnosis. The selection of cases is broad enough to provide an introduction for some readers, with more testing cases for those in the later stages of training. Each self-test case is presented with an image, or set of images, together with the pertinent clinical details. The solution and explanation is presented over the page along with differential diagnoses that logically derive from the images and history. The correct diagnosis is followed by discussion of the underlying problem, strategy points and main imaging findings. The book contains 500 images including X-rays, ultrasound, CT, MRI, interventional techniques and nuclear medicine. It is of value to radiologists in training and other health professionals wishing to improve their radiological skills, and is the first book for the FRCR Part 2B exam.

[Gallipoli Sniper: The Life of Billy Sing, John Hamilton](#) , 2009, 0330425099, 9780330425094. The Anzac battlefield on Gallipoli was made for snipers. Scrub, cliffs, spurs and hills meant that both Anzac and Turkish positions often overlooked one another. The unwary or unlucky were prey to snipers on both sides, and the sudden crack of a gunshot and instant death were an ever-present menace. The most successful and most feared sniper of the Gallipoli campaign was Billy Sing, a Light Horseman from Queensland who was almost unique among the Australian troops in having a Chinese-born father. A combination of patience, stealth and an incredible eye made him utterly deadly, with the incredible - and horrifying - figure of over 200 credited 'kills'. John Hamilton, author of the bestselling GOODBYE COBBER, GOD BLESS YOU, has written an extraordinary account of a hidden side of the campaign - the snipers war. Following Sing from his

recruitment onwards, Hamilton takes us on a journey into the squalor, dust, blood and heroism of Gallipoli, seen from the unique viewpoint of the sniper. GALLIPOLI SNIPER is a powerful and very different account of war and its effect on those who fight.

Chemotherapy-induced nausea and vomiting (CINV) is a distressing and common adverse event associated with cancer treatment. Seventy to eighty percent of patients undergoing chemotherapy experience emesis,

with 10-44% experiencing anticipatory emesis. CINV results in significant morbidity and negatively impacts patient quality of life. CINV may also cause non-adherence to chemotherapy or dose reductions due to nausea and vomiting. Supportive care and management of CINV are essential elements of effective cancer treatment. Failure to adequately control CINV can lead to a number of complications, including weakness, weight loss, electrolyte imbalance, dehydration, or anorexia, and is associated with a variety of complications, including fractures, esophageal tears, decline in behavioral and mental status, and wound dehiscence. Good control and management of CINV can greatly improve patients' overall quality of life and requires dedicated team work from oncologists and oncology nurses. Part of the new Oxford American Pocket Notes series, this very concise guide presents a brief overview of the classification, prevention, and management of chemotherapy-induced nausea and vomiting. A valuable resource in the hospital setting for oncologists and oncology nurses alike, this practical, up-to-date volume includes sections on the pathophysiology and clinical features of CINV, as well as treatment therapies including new and emerging antiemetic agents. Uniquely compact and affordable, this book contains current guidelines from ASCO, NCCN, and ONS for managing CINV in the outpatient setting. In addition, it includes discussions of future research trends and information on additional online resources for clinicians and nurses.

[Building Strong Brands, David A. Aaker](#) , 2011, 1451674759, 9781451674750. As industries turn increasingly hostile, it is clear that strong brand-building skills are needed to survive and prosper. In David Aaker's pathbreaking book, *Managing Brand Equity*, managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage. Now, in this compelling new work, Aaker uses real brand-building cases from Saturn, General Electric, Kodak, Healthy Choice, McDonald's, and others to demonstrate how strong brands have been created and managed. A common pitfall of brand strategists is to focus on brand attributes. Aaker shows how to break out of the box by considering emotional and self-expressive benefits and by introducing the brand-as-person, brand-as-organization, and brand-as-symbol perspectives. The twin concepts of brand identity (the brand image that brand strategists aspire to create or maintain) and brand position (that part of the brand identity that is to be actively communicated) play a key role in managing the "out-of-the-box" brand. A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands. Aaker shows how to manage the "brand system" to achieve clarity and synergy, to adapt to a changing environment, and to leverage brand assets into new markets and products. Aaker also addresses practical management issues, introducing a set of brand equity measures, termed the brand equity ten, to help those who measure and track brand equity across products and markets. He presents and analyzes brand-nurturing organizational forms that are responsive to the challenges of coordinated brands across markets, products, roles, and contexts. Potentially destructive organizational pressures to change a brand's identity and position are also discussed. As executives in a wide range of industries seek to prevent their products and services from becoming commodities, they are recommitting themselves to brands as a foundation of business strategy. This new work will be essential reading for the battle-ready.

[Using Stories to Make Art: Creative Activities Using Children's Literature, Wendy M. L. Libby , 2003, 1401834671, 9781401834678.](#) Perfect for new and seasoned early childhood educators and caregivers! Art is vital to learning

experiences, and this book promotes the integration of art and children's literature. It helps improve student performance in other subject areas as well. It plays an important role in the curriculum. Often times talking with children about their ideas help to get them started on their own creative thought process. The activities in this book are directed which means that the activity is initiated by an adult, the materials are supplied and the topic is proposed. Each art lesson is combined with a children's book. The activities in this book guide children to a disciplined and discriminating approach to their art. Being exposed to art vocabulary will make it easier to find expression. The wide range of stimuli, materials and techniques presented will permit overall flexibility in a child's expressiveness. The primary goal is to focus on the process of creating. This book will aid in simplifying instruction and reducing the amount of preparation needed. Not only will it be extremely helpful to a new teacher, but it will also assist experienced teachers that are looking for novel approaches to integrate art with other subjects.

[Spirits of Just Men: Mountaineers, Liquor Bosses, and Lawmen in the Moonshine Capital of the World, Charles Dillard Thompson](#) , 2011, 025207808X, 9780252078088. "Following the end of Prohibition in 1933, demand for moonshine remained high due to taxes imposed on large liquor producers. Seeking to answer this demand were the distillers of Appalachia who, having established illegal networks of moonshine distribution under Prohibition, continued their activities and effectively skirted the federal liquor tax scheme. *Spirits of Just Men* chronicles the Great Moonshine Conspiracy Trial of 1935, held in Franklin County, Virginia, a place that many still refer to as the "Moonshine Capital of the World." While the trial itself made national news, Thompson uses the event as a stepping-off point to explore Blue Ridge Mountain culture, economy, and political engagement in the 1930s illustrating how participation in the moonshine trade was a rational and savvy choice for farmers and community members struggling to maintain their way of life amidst the pressures of the Great Depression and pull of the timber and coal-mining industries in Virginia. Through Thompson's prose, local characters come alive as he pays particular attention to the stories of a key witness for the defense, Miss Ora Harrison, an Episcopalian missionary to the region, and Elder Goode Hash, itinerant Primitive Baptist preacher and juror in a related murder trial. Thompson explores how local religious belief both clashed with and condoned the moonshine trade and how stills and the trade enabled a distinctive cultural formation in the region that goes far beyond the hillbilly stereotype alive today. Not only is his work based on extensive oral histories and local archival material, but Thompson himself is from the area and his grandparents were involved in not only the moonshine trade but the trial as well"--Provided by publisher.

No matter the risk, the Bishops can always be counted on, but in Hale's family, all bets are off when money is on the line. When Hale unexpectedly inherits his grandmother's billion dollar corporation, he quickly learns that there's no place for Kat and their old heists in his new role. But Kat won't let him go that easily, especially after she gets tipped off that his grandmother's will might have been altered in an elaborate con to steal the company's fortune. [Bridget Riley: Flashback,](#) , 2009, 1853322806, 9781853322808. Bridget Riley is that rare instance of an artist whose work breaks free of art history and merges with the broader cultural imagination, yet preserves for itself a rigorous, focused dialogue with painting's most basic properties: the interaction of form and color. Produced in close collaboration with the artist, "Flashback" tracks Bridget Riley's career from its sensational beginnings in the early 1960s, at the helm of Op art, to the ambitious and powerful paintings and works on paper of recent years. Alongside a wealth of reproductions of works from 1961 to 2007, it also features an illustrated chronology and list of works in U.K. public collections, an essay

by Michael Bracewell and a wonderful meditation by Riley, titled "Work," in which she looks back on the curve of her art across the decades. "You cannot deal with thought directly outside practice as a painter," she writes: "'doing' is essential in order to find out what form your thought takes." "Flashback "reveals Riley's achievement in all its energetic glory, surveyable in one concise volume.

[A Killing in the Hills, Julia Keller](#) , 2012, 1250018064, 9781250018069. In A Killing in the Hills, a powerful, intricate debut from Pulitzer Prize-winning journalist Julia Keller, a mother and a daughter try to do right by a town and each other before it's too late. What's happening in Acker's Gap, West Virginia? Three elderly men are gunned down over their coffee at a local diner, and seemingly half the town is there to witness the act. Still, it happened so fast, and no one seems to have gotten a good look at the shooter. Was it random? Was it connected to the spate of drug violence plaguing poor areas of the country just like Acker's Gap? Or were Dean Streeter, Shorty McClurg, and Lee Rader targeted somehow? One of the witnesses to the brutal incident was Carla Elkins, teenaged daughter of Bell Elkins, the prosecuting attorney for Raythune County, WV. Carla was shocked and horrified by what she saw, but after a few days, she begins to recover enough to believe that she might be uniquely placed to help her mother do her job. After all, what better way to repair their fragile, damaged relationship? But could Carla also end up doing more harm than good in fact, putting her own life in danger?
