Don't Rent Buy! is the definitive guide to first-time homebuyers shopping for a home in the most difficult, confusing and complex residential market in United States history. What is a good mortgage rate? Do I apply for a 15- or 30-year mortgage? What's an ARM? How big a down payment do I need? Can I buy a foreclosure? What is REO? Do I need a professional real estate agent? How do I find a reliable lender? All those questions - and many more - are answered in easy to understand language. The complete home-buying process, from getting pre-approved for a mortgage to shopping for neighborhoods to negotiating a price to closing without surprises is described, step-by-explanatory-step. Helpful checklists help the first time homebuyer keep track of all the absolutely necessary details about different properties, mortgage opportunities and more. Another helpful feature: Don't Rent Buy! lists scores of resources, including contact information for state housing finance authorities, listings for federal programs designed for the first time homebuyer -- and an extensive glossary of terms common to the residential real estate market. Eddie Fadel, author of Don't Rent Buy!, believes that today's first-time homebuyers have an unprecedented opportunity to achieve the American dream of home ownership. The first step in realizing that dream, he says, is acquiring the comprehensive knowledge, understanding and awareness of today's residential real estate market presented in Don't Rent Buy!.

[Connecting with the Arcturians, David Miller](#) , 2012, 162233518X, 9781622335183. "Only on rare occasions does a book come along that contains the potential to change the consciousness of our entire planetary culture. Many have talked about the ascension process, but very few really understand what it means. Who is really out there? Where are we going? What are our choices? What has to be done to prepare for this event? Is everyone ascending to the same place?"

What happened to the fourth dimension? How can we understand the fifth dimension? What are fifth-dimensional beings like? This book explains all of these questions in a way that we can easily understand. It explains what our relationships are to known extraterrestrial groups and what they are doing to help the Earth and her people in this crucial galactic moment in time. It helps us to understand how we can raise our vibration now and begin the process of integrating higher-dimensional energies into our third-dimensional world. The Arcturians have given us a crucial focus for the acceleration of world consciousness. They have presented the concept of group ascension through the creation of groups of forty, and their concept of the Sacred Triangle reveals a powerful method for the integration and unification of spiritual and religious thought on the planet Earth. As you read this book, you will feel the presence of fifth-dimensional energy within your being, allowing you to be able to truly experience a view of fifth-dimensional awareness. This will profoundly affect your ability to expand your own perception of reality and help you to actively participate in the personal and planetary ascension that has already begun."

"This book presents the full range of coastal processes and environments, providing a comprehensive yet detailed insight into how coasts work, including the impact of climate change. Written by leaders in the field, it is a must for all students of the coast."--Professor Andrew Short, University of Sydney The world's coastlines represent a vast range of dynamic environments, processes and landforms. Heavily settled and intensely used, coasts are

of enormous importance to humans. Understanding how they are shaped and why they change is crucial to our future. Introduction to Coastal Processes and Geomorphology examines coastal systems through the processes and landforms that are found in major coastal environments worldwide. The major factors controlling coastal morphodynamic behaviour are considered, including sea level, tides, waves and sediment properties and the book explores the impact of these factors on the behaviour of deltas, estuaries, beaches and barriers, sand dunes, and rocky and coral coastlines. [Foreclosed: High-risk Lending, Deregulation, and the Undermining of America's Mortgage Market, Daniel Immergluck](#) , 2009, 0801447720, 9780801447723. In 2007 and 2008, the United States has observed, with some horror, the explosion and collapse of entire segments of the housing market, especially those driven by subprime and alternative or "exotic" home mortgage lending. *Foreclosed* explains the rise of high-risk lending and why these newer types of loans and their associated regulatory infrastructure failed in substantial ways. Dan Immergluck narrates the boom in subprime and exotic loans, recounting how financial innovations and deregulation facilitated excessive risk-taking, and how these loans have harmed different populations and communities. Immergluck, who has been working, researching, and writing on issues tied to housing finance and neighborhood change for almost twenty years, has an intimate knowledge of the promotion of homeownership and the history of mortgages in the United States. The changes to the mortgage market over the past fifteen years including the securitization of mortgages and the failure of regulators to maintain control over a much riskier array of mortgage products led, he finds, inexorably to the current crisis. After describing the development of generally stable and risk-limiting mortgage markets throughout much of the twentieth century, *Foreclosed* details how federal policy-makers failed to regulate the new high-risk lending markets that arose in the late 1990s and early 2000s. The book also examines federal, state, and local efforts to deal with the mortgage and foreclosure crisis of 2007 and 2008. Immergluck draws upon his wealth of experience to provide an overarching set of principles and a detailed set of policy recommendations for "righting the ship" of U.S. housing finance in ways that will promote affordable yet sustainable homeownership as an option for a broad set of households and communities. The 2011 paperback edition features a new preface by the author addressing the ongoing global economic crisis and the impact of U.S. financial reform efforts on the

mortgage system.

[The Christian's ABC: Catechisms and Catechizing in England C.1530-1740, I. M. Green](#) , 1996, 0198206178, 9780198206170. This is really three books in one: a study in church history; an essay in theology; and a bibliographical source for scholars working in various disciplines, and librarians with catechisms of unsure provenance. Ian Green has written the first major study of the catechisms and techniques of catechizing used in early modern England, from the Reformation to the Evangelical Revival. He begins by demonstrating the existence of several hundred different catechisms, with literally millions of copies circulating throughout the country, in parish churches, homes, schools and colleges. He then describes the techniques by which children, adolescents, and less well-educated adults were encouraged to master a specially simplified version of the core doctrines of the new church presented in question-and-answer form. Through a detailed analysis of the doctrines contained in the best-selling catechisms of the day, Ian Green goes on to indicate the high level of consensus and continuity in catechetical teaching, and suggests that such differences as there were consisted in either the disparity between the simpler message of many elementary works and the more demanding content of more sophisticated catechisms, or the less predictable contrast between, on the one hand, the teaching of non-Calvinists and first generation Calvinists, and on the other, that of later Calvinists from Perkins to the Westminster theologians. Catechetical teaching, especially on the Ten Commandments, covered all aspects of contemporary life and the book ends with an annotated list of catechisms which enables those with an interest in educational, literary, or linguistic history, or in political and social as well as religious history, to track down quickly, works that could be of particular value to them.

Jasper Lane is a well-off neighborhood, not much different in appearance than most, with a tree-lined drive, manicured lawns, and crystal clear ponds. But underneath the pleasantries, a completely different world lurks. Cassie Bloom, the grand dame of Jasper Lane, has a missing son and husband and throws gay porn parties that are the social events of the year. Her best friend, a transsexual named Vera, owns a nightclub. Melinda Gold is the resident religious fanatic whose views clash with that of her son Patrick. Sandy and Steve Jones are the stereotypical all-American couple (except Steve acts in gay-for-pay porn unbeknownst to his pregnant wife). Rick Cooper just moved in, and despite his qualms about another relationship (having literally lost an eye in the previous one), he falls for ex-soldier, James. And David and Cliff are the most "normal" couple on the block... never mind that David helped Cassie with some past nefarious deed and that Cliff is the biggest gay porn star in the biz. Throw a dog named Gayhound and a dead body into the mix, and Jasper Lane may just be the gayest neighborhood in town! \*2nd Edition - Previously released by iUniverse\*

She can't help it. Autism is really challenging," explains Christian, who tells about life with his sister, Mary Gwen, a beautiful girl who loves to swim. In these moving essays, Christian and many other kids tell what it's like to live with siblings who have autism. Sometimes they can't talk much. Sometimes they have tantrums. It can be tough for a family, but there are happy surprises, too. "Autism has helped us to

become a better family," adds Christian. "It teaches us patience and understanding." Ouisie Shapiro's inspiring book shows how children - and all of us - can grow in wisdom, acceptance, and love. Steven Vote's warm photos capture the rich emotional life of these amazing families.

[Our war: the grim digs : New Zealand soldiers in North Africa, 1940-1943, Martyn Thompson](#) , 2005, 0143019511, 9780143019510. This is the story of war as told by the men who fought it. Based on over eighty interviews with New Zealand veterans of the 1940-1943 North African and Middle East campaigns, these personal memoirs build to a vivid, sometimes visceral, portrait of men at war - the fear, the boredom, the adventure, the humour, the pain, the comradeship, the bravery, the everyday realities of the ordinary soldier. The book is divided into two parts, the first of which gives a chronological view of the campaigns; the second of which is titled Reflections and allows the voices of these ordinary heroes to describe the realities of life in the desert, combat, being wounded, and making and losing friends. The result is a lasting reminder to those who follow of just what sacrifice really meant.

[On My Mind: A New Vision of Consciousness, Steve Perrin](#) , 2013, 0965105822, 9780965105828. 163 reflections on a new vision of consciousness, On My Mind by Steve Perrin is based on 30 years of personal introspection. Perrin develops a model of his conscious and unconscious mind emphasizing the role of the self in moderating between perception and action. The mind, he says, answers three questions: 1) What's happening?, 2) What does it mean to me?, and 3) What should I do? He develops the idea that consciousness consists of looping engagements between perception, action, and the world on the far side of our senses, forming a continuous loop moderated by consciousness. Disparities between expectations and resulting perceptions are what arouses consciousness to intercede between perception and action. If we are not aroused, we settle for unconscious bouts of mimicry, ritual, routines, habits, and fixed beliefs to govern our

behavior. On My Mind ends with a chapter putting forth suggestions toward a theory of mind.

[The Oxford Companion to the Mind, Richard Langton Gregory](#) , 1987, 019866124X, 9780198661245. With over 900 entries, ranging from brief definitions to substantial essays on major topics, The Oxford Companion to the Mind takes the reader on a dazzling tour of this endlessly fascinating subject, spanning many disciplines within the broad compass of philosophy, psychology and the physiology of the brain. An important feature of the book is the large number of articles on "topics of mental life", in which well-known writers discuss subjects in which they have a particular expertise. Noam Chomsky writes on his own theory of language, Idries Shah on Sufism, John Bowlby on attachment theory, B.F. Skinner on behaviorism, Oliver Sacks on nothingness, A.J. Ayer on philosophical views of the relation between mind and body, and R.D. Laing on interpersonal experience. The editor, Richard Gregory, contributes entries on aesthetics, phrenology, physiognomy, and illusions of perception. The Companion includes entries on such everyday events as sleep, humor, forgetting, and hearing, as well as specialized topics such as bilingualism, jet-lag, military incompetence, computer chess, and animal magnetism. What can, and all too often does, go wrong with the mind is also covered--many forms of mental illness are explored, as well as mental handicap, brain damage, and neurological disorders. Perception and the ways in which our senses are often deceived are treated in full, as are elements of personal development and learning, and the puzzling world of parapsychology with its altered states of consciousness, out-of-body experiences, and extra-sensory perception. The workings of the nervous system are explained in a special tutorial article. The text is supplemented by brief definitions of specialist terms and by biographies of major figures who have contributed to our understanding of the mind--individuals as varied as Plato, Johannes Kepler, William James, Sigmund Freud, and Alan Turing. The entries are arranged alphabetically and, following the style of other recent Companions, are linked by a network of helpful cross-references. The 160 illustrations have been carefully chosen to amplify the text, while specialist bibliographies provide suggestions for further reading.

Sarris's The American Cinema, the bible of auteur studies, is a history of American film in the form of a lively guide to the work of two hundred film directors, from Griffith, Chaplin, and von Sternberg to Mike Nichols, Stanley Kubrick, and Jerry Lewis. In addition, the book includes a chronology of the most important American films, an alphabetical list of over 6000 films with their directors and years of release, and the seminal essays "Toward a Theory of Film History" and "The Auteur Theory Revisited." Over twenty-five years after its initial publication, The American Cinema remains perhaps the most influential book ever written on the subject.

Adapted from the hugely popular board game, this interactive and completely engaging book serves up hundreds of bizarre, embarrassing, sometimes ethical and sometimes stomach-churning dilemmas that kids will love to pose to their friends and siblings, whether in the backseat, on a sleepover, at a party, on a rainy day, or during a lull in the lunchroom (if you dare). Ponder the icky: Would you rather eat 10 pounds of cheese-OR-a bucket of peanut butter with nothing to drink? The exponentially icky: Would you rather drink liquid found leaking from a garbage can-OR-chew on a hairy clump found between the cushions of an old couch? The fantastic:

Would you rather be able to talk with all animals-OR-be able to understand all languages? The priority-testing: As a soccer player, would you rather mess up and score a goal for the other team but still have your team win-OR-play your best game ever even though your team loses? And the hair-raising: Would you rather swim across a river that is filled with crocodiles-OR-spend the night on an island where man-eating tigers live? Fascinating sidebars throughout are filled with interesting ancillary informationthe nature of drool, left-handedness vs. righthandedness, whats dangerously filthy and whats just gross, why we blush when were embarrassedthat will help kids make their choice.

Greenland, Captain Frederick Ziege of the Royal Danish Navy is enjoying chaperoning his mother, sister and two marriageable nieces for a season on the Riviera. There he meets Emmeline Leslie, a young Australian widower and veteran of the bush. The differences between their complex histories enrich their ensuing romance, but frustrate their search for a home. The Bequest takes the reader from Italy to France, North Africa, Greece, Siberia, Greenland, Australia, and finally England. It is a novel about identity and belonging; about the place of history and memory in uprooted lives. Objects - many of which are pictured, such as an ivory China trade puzzle, a jewelled pencil, a clock - have an almost talismanic role in the interlocking stories of this rich and moving tale.

Here, mender Haru Isuzu helps his fellow fallouts, refugees from other worlds, find their way in a new life. Goaded by his adoptive father with news of a secret scientific expedition, Haru must cross the continent in pursuit, tangling with dangerous fallouts and deadlier knowledge-and some very lovely ladies. Meanwhile, young Tenma lies dying of a mysterious disease. All hope seems lost until an anonymous letter sends Tenma's desperate fiancée on a search for a cure with an angry Valkyrie and a slippery mage for company, plus a talking coyote with a magic stomach. While Haru chases his father and Tenma's errant companions struggle to keep her alive, a brutal power raises its head-a band of highly undesirables (and the occasional monkey) promising to instate fallouts as the rightful heirs of Midgard-and tearing the world apart will be its pleasure.

[The Globalisation of Love, Wendy Williams](#) , 2012, 0987968203, 9780987968203. One of the most profound influences of globalisation is that people from everywhere are falling in love with people from everywhere else. The Globalisation of Love is about the whirls and twirls, the quirks and perks, the frustrations and the fun of a multicultural relationship.

Multicultural couples have all the issues that exist in monocultural relationships, plus whatever colourful combination of culture, language, religion and ethnicity the couple bring into their marriage. Based on interviews with multicultural couples from around the world, *The Globalisation of Love* shows how they meet and fall in love, how they choose a country to live in, what happens in bilingual and trilingual families, how they deal with multicultural kids and careers, the consequences of having a family that looks like a mini-United Nations, how to laugh about cultural clashes that make you cry, how to share in prayer around the world, what is done for the holidays, what is cooking in the multicultural kitchen and even who is cooking it. There is a world of multicultural romance happening out there and it is all captured in *The Globalisation of Love*.

[The First Moderns: Profiles in the Origins of Twentieth-Century Thought, William R. Everdell](#) , 1997, 0226224805, 9780226224800. A lively and accessible history of Modernism, *The First Moderns* is filled with portraits of genius, and intellectual breakthroughs, that richly evoke the fin-de-sicle atmosphere of Paris, Vienna, St. Louis, and St. Petersburg. William Everdell offers readers an invigorating look at the unfolding of an age. "This exceptionally wide-ranging history is chock-a-block with anecdotes, factoids, odd juxtapositions, and useful insights. Most impressive. . . . For anyone interested in learning about late 19th- and early 20th- century imaginative thought, this engagingly written book is a good place to start." *Washington Post Book World* "The First Moderns brilliantly maps the beginning of a path at whose end loom as many diasporas as there are men." *Frederic Morton, The Los Angeles Times Book Review* "In this truly exciting study of the origins of modernist thought, poet and teacher Everdell roams freely across disciplinary lines. . . . A brilliant book that will prove useful to scholars and generalists for years to come; enthusiastically recommended." *Library Journal, starred review* "Everdell has performed a rare service for his readers. Dispelling much of the current nonsense about 'postmodernism,' this book belongs on the very short list of profound works of cultural analysis." *Booklist* "Innovative and impressive . . . [Everdell] has written a marvelous, erudite, and readable study." -Mark Bevir, *Spectator* "A richly eclectic history of the dawn of a new era in painting, music, literature, mathematics, physics, genetics, neuroscience, psychiatry and philosophy." *Margaret Wertheim, New Scientist* "[Everdell] has himself recombined the parts of our era's intellectual history in new and startling ways, shedding light for which the reader of *The First Moderns* will be eternally grateful." *Hugh Kenner, The New York Times Book Review* "Everdell shows how the idea of 'modernity' arose before the First World War by telling the stories of heroes such as T. S. Eliot, Max Planck, and Georges Serault with such a lively eye for detail, irony, and ambiance that you feel as if you're reliving those miraculous years." *Jon Spayde, Utne Reader*

[Holocaust: The Nazi Persecution and Murder of the Jews, Peter Longerich](#) , 2010, 0191613479, 9780191613470. A comprehensive history of the Nazi persecution and murder of European Jews, paying detailed attention to an unrivalled range sources. Focusing clearly on the perpetrators and exploring closely the process of decision making, Longerich

argues that anti-Semitism was not a mere by-product of the Nazis' political mobilization or an attempt to deflect the attention of the masses, but that anti-Jewish policy was a central tenet of the Nazi movement's attempts to implement, disseminate, and secure National Socialist rule - and one which crucially shaped Nazi policy decisions, from their earliest days in power through to the invasion of the Soviet Union and the Final Solution. As Longerich shows, the 'disappearance' of Jews was designed as a first step towards a racially homogeneous society - first within the 'Reich', later in the whole of a German-dominated Europe.

[Riders of the Mapinguari, , Gaddy Bergmann](#) , 2009, 0979588952, 9780979588952. Riders of the Mapinguari by Gaddy Bergmann is the final novel in The Feral World trilogy, a post-apocalyptic odyssey set 3,000 years in the future. Humanity has barely survived a near-extinction-level event - the collision of a major asteroid with Earth in the middle of the Twenty-First Century. Riders of the Mapinguari takes The Feral World in a radically new direction. Blake and his friends have traveled through the Great Plains and are living peacefully in the Warmland, when they are attacked by an enemy quite unlike any they have ever faced before: the Terran army. Poised to conquer the Warmland, the Terrans not only greatly outnumber the natives, but they also have hundreds of mapinguari - giant beasts that can overpower anyone who would oppose them. Blake and his people must face them, though, if they hope to save not only themselves, but the entire Warmland. The Feral World trilogy is unique in offering an optimistic view of post-apocalyptic society, which has come to consist of local tribes that depend on hunting and gathering. Gaddy Bergmann (Denver) is an ecologist and zoologist, and he carefully crafts a world where the biosphere develops naturally in the absence of humanity's misguided management of the planet

[MPs' Expenses: A Consultation, Independent Parliamentary Standards Authority](#) , 2010, 0108508803, 9780108508806.

This consultation paper seeks views on the content and administration of a new MPs' expenses scheme. It is IPSA's responsibility to determine the new rules, in the light of responses to this consultation. IPSA's decisions do not need to be approved by Parliament or anyone else. The next Parliament should start with a completely new system, independently designed and independently administered, and thus untarnished by association with what has gone before. An urgent solution is needed, so that there can be a clean break from the now discredited system of self-regulation. IPSA aims to design a system that will last the test of time. Its proposals are based on those produced by the Committee on Standards in Public Life in its 12th report "MPs' expenses and allowances: supporting Parliament, safeguarding the taxpayer" (Cm. 7724, ISBN 9780101772426) but differ in some respects. Chapters cover: scope of the consultation; principles of the new scheme; working as an MP; expenses and allowances; administering the expenses scheme; working from two locations - accommodation for MPs; travel and subsistence; staff for MPs; working from a constituency; running offices; payments on leaving Parliament; additional resources and contingency arrangements.

You are fluent in its terminology of email, WiFi, social networking, and encryption. You use its results when you make a telephone call, access the Internet, use any factory-produced product, or travel in any modern car. The discipline is so new that some prefer to call it a branch of engineering or mathematics. But it is so powerful and world-changing that you would be hard-pressed to find a single human being on the planet unaffected by its achievements. The science of computers enables the supply and creation of power, food, water, medicine, transport, money, communication, entertainment, and most goods in shops. It has transformed societies with the Internet, the digitization of information, mobile phone networks and GPS technologies. Here, Peter J. Bentley explores how this young discipline grew from its theoretical conception by pioneers such as Turing, through its growth spurts in the Internet, its difficult adolescent stage where the promises of AI were never achieved and dot-com bubble burst, to its current stage as a (semi)mature field, now capable of remarkable achievements. Charting the successes and failures of computer science through the years, Bentley discusses what innovations may change our world in the future.

Many features of work and employment relations have undergone significant changes over the past two decades. These changes have taken place in the context of lowered trade barriers, intense global competition and deregulation of financial markets. The scholarly essays in this book deal with many of the employment relations issues arising from these developments and consider the policy implications arising from them. The essays cover: The provision of legislated standards in

determining the safety net in Australia Characteristics of the modern awards The role of unions in the new collective bargaining regime New roles for employers in industrial relations The advent of paid parental leave and employer responses The demand and supply sides of skill formation in Australian workplaces The prospects of high performance work systems in Australia Equal remuneration and undervaluation of womens work Paradoxes in productivity issues Questioning the exceptionalist view of Australian industrial relations Worker voice Making minimum wages effective the UK experience Lessons of work and employment policy in the US Flexicurity lessons for the EU and Australia

[Digital Democracy: Policy and Politics in the Wired World, Cynthia Jacqueline Alexander, Leslie Alexander Pal](#) , 1998, 0195413598, 9780195413595. The Information Age has ushered in significant change, not only to the work people do and how they communicate with each other, but also to the broad political landscape. In the new wired world, collections of widely scattered individuals with a common interest or a shared concern about a specific social issue quickly form and make their collective voice heard--a 'collective'voice that could not have existed only a few years ago. Politicians and political parties are using new information and communications technologies to an unprecedented degree, but so are citizens, with potentially profound impacts on our democracy and representative institutions. National security issues have been compromised by computer hackers and foreign governments. Life-determining decisions on patients' health care are often made by computer programs rather than by doctors and nurses. And freedom of expression, privacy, and social norms and mores are under constant barrage from various directions over the flood of Internet pornography and the extent to which corporations and governments gather and disseminate information that is private to the individual. In *Digital Democracy: Policy and Politics in the Wired World*, editors Cynthia J. Alexander and Leslie A. Pal present 12 important essays by Canadian and American scholars on the impact of cyberspace on politics and the implications this impact has for our future as private citizens. Also included is an important Preface by Edwin R. Black, who 15 years ago, in his presidential address to the Canadian Political Science Association, voiced a firm warning about the influence of new communications technologies on the body politic. As Black writes: 'It's happening right under our noses, it's important, and not enough people are paying attention.'

[Boarding School Seasons: American Indian Families, 1900-1940, Brenda J. Child](#) , 1998, 0803212305, 9780803212305. Boarding School Seasons offers a revealing look at the strong emotional history of Indian boarding school experiences in the first half of the twentieth century. At the heart of this book are the hundreds of letters written by parents, children, and school officials at Haskell Institute in Kansas and the Flandreau School in South Dakota. These revealing letters show how profoundly entire families were affected by their experiences. Children, who often attended schools at great distances from their communities, suffered from homesickness, and their parents from loneliness. Parents worried continually about the emotional and physical health and the academic progress of their children. Families clashed repeatedly with school officials over rampant illnesses and deplorable living conditions and devised strategies to circumvent severely limiting visitation rules. Family intimacy was threatened by the school's suppression of traditional languages and Native cultural practices. Although boarding schools were a threat to family life, profound changes occurred in the boarding school experiences as families turned to these institutions for relief during the Depression, when poverty and the loss of traditional seasonal economics proved a greater threat. Boarding School Seasons provides a multifaceted look at the aspirations and struggles of real people.

[New Orleans Besieged, D. K. Midkiff](#) , 2011, 0982455135, 9780982455135. It's January 1815 and the treasure-city of New Orleans lies vulnerable and exposed to greedy, blood thirsty pirates. Protection comes not by force of arms but from the crafty mind of an old Spanish monk. Britain, already exhausted from a generation-long war, has planned a final military campaign aimed at the seizure of the city. This is a novel of alternate history in which the unthinkable happens: the Battle of New Orleans is won by the British. Midkiff, through scrupulous research, posits what the repercussions of such a victory might have been for the time at hand as well as the long term. The work is inspired by many of the actual people and events surrounding the Battle. Several maps true to the period are included. The reader is pulled into the political, cultural and racial tensions of early 19th century Louisiana as seen through the eyes of Andrew Jackson, Jean Lafitte, Edward Livingston, Padre Antonio Sedella and many more.

[America's Naval Heritage: A Catalog of Early Imprints From the Navy Department Library: A Catalog of Early Imprints From the Navy Department Library.](#) , 2001, 0945274440, 9780945274445. In celebrating its 200th anniversary in the year 2000, the Navy Department Library embarked on a project to highlight its unique role in preserving the nations naval heritage. Selecting, compiling, reviewing, and editing catalog entries required the commitment, dedication, and hard work of experts in early naval literature, a small library staff, and a conscientious editor. The publishing of Americas Naval Heritage was made possible by the Department of Defense Legacy Program that identifies special military, natural, and cultural resources. For its part, the librarys project sought to broaden access to historical materials, to encourage naval research and scholarship, and to identify, evaluate, and preserve important military heritage assets. Publishing this catalog not only celebrates the Navy Department Librarys 200th year of continuous service but also gives all Americans and the international community of scholars a look into the rare and valuable literature that records the earliest traditions and history of the U.S. Navy. Described in this beautifully illustrated work is a little-known collection of rare 18th and 19th-century titles held by one of our nation's oldest federal libraries, the Navy Department Library. The more than 300 entries record the U.S. Navy's achievements in combat, international diplomacy, technology, customs and traditions, exploration, medicine, education, and social reform. For all those with an interest in the Navy and the sea, this exquisite catalog promises a delightful encounter with America's naval past.

[Macroeconomics, Olivier J. Blanchard](#) , 2006, 0131860267, 9780131860261. For courses in intermediate macroeconomics. "Blanchard" is the book that helps students to see the big macroeconomic picture by integrating one unifying model throughout the text, without glossing over the core concepts that matter. "Blanchard" doesn't take shortcuts in his explanation, because students will use these tools again and again, throughout their academic and professional careers. The organization allows for the greatest degree of flexibility, so professors can direct their class as they see fit. Students build a strong base of concepts and tools that will make them better economists. Students can understand how the pieces of the economy fit with the whole, providing an integrated view of macroeconomics. Students will be able to make sense not only of past macroeconomic events, but also of those that unfold in the future. The organizational structure of this text allows for the greatest flexibility - it is organized around two central parts: a core, and a set of three major extensions. This adaptable outline allows instructors the choice of emphasizing growth or not. It also offers flexibility to modify the course emphasis from semester to semester.

[The Pritchett Century, V. S. Pritchett](#) , 1999, 0099755416, 9780099755418. "If, as they say, I am a Man of Letters, I come, like my fellows, at the tail-end of a long and once esteemed tradition in English and American writing. We have no captive audience. We do not teach. We write to be readable and to engage the interest of what Virginia Woolf called 'the common reader.'" In a life that spanned almost the entire course of the twentieth century--he was born in 1900 and died in 1997--Sir Victor Pritchett mastered nearly every form of literature: the novel, short fiction, travel writing, biography, criticism, and memoir. Now, Sir Victor's son Oliver has selected representative samples to illustrate the tremendous scope of his father's brilliance. Included in this volume are sections of Pritchett's memoirs, *A Cab at the Door* and *Midnight Oil*; his reflections on turning eighty; and an account of a visit to the Appalachians written in 1925. There are also portraits of Dublin, New York, the Amazon, and Spain; selections from the novels *Dead Man Leading* and *Mr. Beluncle*; thirteen complete short stories; excerpts from biographies of Turgenev and Chekhov; and critical pieces on Twain, Scott, Dickens, Eliot, Henry James, Tolstoy, Saul Bellow, Salman Rushdie, and others. "Pritchett has lived as a man of letters must, by his pen, and he has done it with a freshness of interest and an infectious curiosity that have never waned," observed novelist Margaret Drabble. Taken together with Oliver Pritchett's appreciation of his father, and John Bayley's "In Memoriam," *The Pritchett Century* stands as the most comprehensive collection of Sir Victor's work available in one volume. The Modern Library has played a significant role in American cultural life for the better part of a century. The series was founded in 1917 by the publishers Boni and Liveright and eight years later acquired by Bennett Cerf and Donald Klopfer. It provided the foundation for their next publishing venture, Random House. The Modern Library has been a staple of the American book trade, providing readers with affordable hard-bound editions of important works of literature and thought. For the Modern Library's seventy-fifth anniversary, Random House redesigned the series, restoring as its emblem the running torchbearer created by Lucian Bernhard in 1925 and refurbishing jackets, bindings, and type, as well as inaugurating a new program of selecting titles. The Modern Library continues to provide the world's best books, at the best prices. From the Hardcover edition.

[God's Call: Moral Realism, God's Commands, and Human Autonomy, John E. Hare](#) , 2001, 0802849970, 9780802849977.

There has been a debate between modern ethicists who see moral judgments as objectively corresponding to a moral reality independent of human opinion and those who insist that moral judgments are essentially expressions of our will. In this excellent philosophical work John Hare outlines a theory that combines the merits of both views, arguing that what makes something right is that God calls us to it. In the first chapter Hare gives a selective history of the sustained debate within Anglo-American philosophy over the last century between moral realists and moral expressivists. Best understood as a disagreement about how objectivity and subjectivity are related in value judgment, this debate is of particular interest to Christians, who necessarily feel pulled in both directions. Christians want to say that value is created by God and exists whether we recognize it or not, but they also want to say that when we value something, our hearts' fundamental commitments are also involved. Hare suggests prescriptive realism as a way to bring both perspectives together. The second chapter examines the divine command theory of John Duns Scotus, looking particularly at the relationship that Scotus established between God's commands, human nature, and human will. Hare shows that a Calvinist version of the divine command theory of obligation can be defended via Scotus against natural law theory as well as against contemporary challenges. A significant theme treated here is the view that the Fall disordered our natural inclinations, rendering them useless as an authoritative source of guidance for right living. In the last chapter Hare moves to the key philosophical juncture between the medieval period and our own time -- the moral theory of Immanuel Kant in the late eighteenth century. Modern moral philosophy has largely taken Kant's work as a refutation of divine command theory and a refocusing of the discussion on human autonomy. Hare shows that Kant was in fact not arguing against the kind of divine command theory that Hare supports. He discusses what Kant meant by saying that we should recognize our duties as God's commands, and he defends a notion of human autonomy as appropriation. Featuring original moral theory and fresh interpretations of the thought of Duns Scotus and Kant, *God's Call* is valuable both for its overview of the history of moral debate and for its construction of a sound Christian ethic for today.

[Was Jesus God?, Richard Swinburne](#) , 2010, 0199580448, 9780199580446. One of the world's leading philosophers and a staunch defender of religious faith, Richard Swinburne argues compellingly that if there is a God, then the main doctrines which the Christian Church teaches about God are very probably true. In particular, he shows that there is strong philosophical support for the belief that Jesus, while remaining God, acquired a human nature and lived on earth for thirty years as a human being. In virtue of his omnipotence and perfect goodness, the author shows, God must be a

Trinity, live a human life in order to share our suffering, and found a church which would enable him to tell all humans about this. It is also quite probable that he would provide his human life as atonement for our wrongdoing, teach us how we should live, and tell us his plans for our future after death. Among founders of religions, Jesus uniquely satisfies the requirement of living the sort of human life which God would need to have lived.

It also describes the design of the Solaris MT API, with references to distinctions in POSIX, contains a set of example programs which illustrate the usage of the Solaris and POSIX APIs, and explains the use of programming tools: Thread Analyzer, LockLint, LoopTool and Debugger.

[Growing Artificial Societies: Social Science from the Bottom Up, Joshua M. Epstein](#) , 1996, 0262050536, 9780262050531.

"Growing Artificial Societies" is a milestone in social science research. It vividly demonstrates the potential of agent-based computer simulation to break disciplinary boundaries. It does this by analyzing in a unified framework the dynamic interactions of such diverse activities as trade, combat, mating, culture, and disease. It is an impressive achievement." -- Robert Axelrod, University of Michigan How do social structures and group behaviors arise from the interaction of individuals? "Growing Artificial Societies" approaches this question with cutting-edge computer simulation techniques. Fundamental collective behaviors such as group formation, cultural transmission, combat, and trade are seen to "emerge" from the interaction of individual agents following a few simple rules. In their program, named Sugarscape, Epstein and Axtell begin the development of a "bottom up" social science that is capturing the attention of researchers and commentators alike. The study is part of the 2050 Project, a joint venture of the Santa Fe Institute, the World Resources Institute, and the Brookings Institution. The project is an international effort to identify conditions for a sustainable global system in the next century and to design policies to help achieve such a system. "Growing Artificial Societies" is also available on CD-ROM, which includes about 50 animations that develop the scenarios described in the text. "Copublished with the Brookings Institution"

[Everything You Can Do in the Garden Without Actually Gardening, Philippa Lewis](#) , 2009, 0711230374, 9780711230378.

The planning, planting, growing, and tending of a garden may be intimidating to the average person, but the pleasures of a garden need not be. Illustrated throughout, this delightful book demonstrates that we can create our own kingdom and do precisely what we want within the garden it's not about gardening but about what we do when that is done (or not done). In Everything You Can Do in the Garden Without Actually Gardening, Philippa Lewis looks at how people have spent time in the garden. We can all be tempted by the idea of reading or dozing (or maybe even smoking) in a deckchair, or taking a gentle walk, or perhaps even playing tennis or croquet. But some people are considerably more imaginative. the poet Blake and his wife liked to lie naked in their summerhouse, reading aloud to each other from Paradise Lost. Lawrence of Arabia rode a camel in his Northumberland garden. Menageries, parties, shooting, follies, grottoes, drawing the notion of what a garden can be used for is endlessly various.

This time they are joined by Meredith, the McLeods four-year-old daughter. While Marcie is tracking a vicious killer who is wreaking havoc in and around the picturesque town of Love Valley, a lookalike stranger compounds the detectives' challenges. The killer is no mastermind, but he possesses enough animal cunning and cold-blooded ruthlessness to make catching him a difficult and dangerous proposition. Marci, good cop, wife, mother in equal measure, struggles to keep work and personal life balanced. Ketchie uses North Carolina's Love Valley -- where Old West ambiance allows only horses and horse drawn vehicles on the streets -- and some of its real life residents to create a true to life backdrop for the action.

Jesus for President is a radical manifesto to awaken the Christian political imagination, reminding us that our ultimate hope lies not in partisan political options but in Jesus and the incarnation of the peculiar politics of the church as a people "set apart" from this world. Drawing upon the work of biblical theologians, the lessons of church history, and the examples of modern-day saints and ordinary radicals, this Jesus for President Gift Pack stirs the imagination of what the Church could look like if it placed its faith in Jesus instead of Caesar. This fresh look at Christianity and culture will help you answer questions like "Should I vote or not?" and "Which candidate?" by thinking creatively about the fundamental issues of faith and allegiance. It's written for those who seek to follow Jesus, rediscover the spirit of the early church, and incarnate the kingdom of God. The Jesus for President Gift Pack contains one of each of the following:

[Mergers, Acquisitions, and Other Restructuring Activities: An Integrated Approach to Process, Tools, Cases, and Solutions, Donald M. DePamphilis](#) , 2001, 0122107357, 9780122107351. Most books on mergers and acquisitions focus on process management, human resource management, or the financial aspects of the deal. This book brings together the essential elements of each domain, including subjects that are often overlooked or treated only superficially by other texts. These subjects include post-merger integration, business alliances, deal structuring and strategies, financial modeling and simulation, assumptions-driven planning, and valuing intellectual property. This book is unique in that M&A activity is discussed as a series of interdependent activities and in the context in which each activity actually occurs. While intended for students in mergers and acquisitions, corporate restructuring, business strategy, industrial organization, and entrepreneurship courses at both the MBA and undergraduate level, this text has broad market appeal. The material has worked quite effectively in both executive development and training programs. The book also has substantial appeal for those who are hoping to become or who are actively pursuing careers as financial analysts, chief financial officers, corporate treasurers, operating managers, investment bankers, business brokers, portfolio managers, investors, as well as corporate development and strategic planning managers. Others likely to have an interest include bank lending officers, venture capitalists, business appraisers, actuaries, government regulators and policy makers, and entrepreneurs. The generous use of practical, timely, and diverse examples and contemporary (including e-commerce) business cases with solutions makes the text suitable for distance learning, self-study, as well as for large lecture focused courses. The book presumes only a basic knowledge of accounting and finance. Key Features \* Integrates the subject

matter in terms of a process and in the context in which M&A activities actually occur \* Addresses activities often ignored in other texts such as post-merger integration, business alliances, financial modeling and simulation, deal structuring, assumptions-driven planning, and valuing intellectual property \* Discusses deal structuring as a interactive process consisting of choice of acquisition vehicle, post-closing organization, form of payment, form of accounting, form of acquisition, and tax structure \* Provides numerous practical, timely, and diverse contemporary (including e-commerce) examples and business cases with solutions taken from 15 different industries \* Each chapter concludes with an integrative business case with discussion questions and solutions \* All aspects of the M&A process are integrated into a highly realistic business case as the book's concluding chapter \* Discussion reflects author's own experience in managing more than thirty transactions of various types in nine different industries and teaching MBA and undergraduate students as well as M&A practitioners

[Spartacus: The Gladiator, Ben Kane](#) , 2012, 1250001161, 9781250001160. Gritty, passionate and violent, this thrilling book is a real page-turner and a damn good read. It brings Spartacus and ancient Rome to vivid, colorful life. Steven Pressfield, author of Gates of Fire. Long the stuff of legends, Spartacus is known to most modern readers through the classic Kubrick film version of Howard Fast's novel. Now bestselling historical novelist Ben Kane returns to the source material and presents a lively and compelling new vision of the man who was Spartacus: Roman army auxiliary, slave, gladiator and ultimately the leader of an army of slaves who nearly brought Rome to its knees. Ben Kane's brilliant novel begins in the Thracian village to which Spartacus has returned after escaping from life as an auxiliary in the Roman army. Jealous of his attachment to Ariadne, a Dionysian priestess, the Thracian king betrays Spartacus to the Romans who take him, along with Ariadne, into captivity and to the school of gladiators at Capua. Against the background of the unbelievable brutality of gladiatorial life, Spartacus and Crixus the Gaul plan the audacious overthrow of their Roman masters. They escape and flee to Vesuvius, where they recruit and train an army of escaped slaves that will have to face the conquerors of the known world, the most successful deadly army in all of history in a battle that will set in motion the legend that is Spartacus.

[Game, Set and Math: Enigmas and Conundrums, Ian Stewart](#) , 2007, 0486458849, 9780486458847. Twelve essays take a playful approach to the subject, exploring how to play poker over the telephone without the possibility of cheating, how to distinguish plausible fallacies from unbelievable facts, and how to cope mathematically with contorted worms, drunken tennis players, and snakes that eat their own tails. Former columnist for Scientific American's "Mathematical Games" section, Ian Stewart is a professor at the University of Warwick and the author of Another Fine Math You've Got Me Into... and a score of other books of mathematical recreations, popular science, and science fiction. In this collection of pun-studded fables, he once again exercises his immense talent for transforming complicated concepts of modern mathematics into stimulating, accessible fun. Stewart introduces the different kinds of infinity, explains how to build your own virus, explores the brighter ideas of Pascal and Fermat, and even offers a dozen different puzzles for the twelve days of Christmas.
