[Influence Warfare: How Terrorists and Governments Fight to Shape Perceptions in a War of Ideas, James J. F. Forest](#) , 2009, 031334731X, 9780313347313. In an era where anyone can have access to the Internet or other media forms that make widespread communication easy, terrorists and insurgents can spread their messages with complete freedom, creating challenges for national security. "Influence Warfare: How Terrorists and Governments Fight to Shape Perceptions in a War of Ideas" focuses on the core of the ongoing struggle for strategic influence and, particularly, how states can counter the role media and the Internet play in radicalizing new agents of terrorism. As the book makes clear, governments need to find ways to effectively confront non-state adversaries at all levels of the information domain and create an understanding of strategic communications within a broad range of technologies. The essays from the international group of authors who contributed to this work offer a deeper understanding of the ongoing struggle. Influence Warfare also provides a set of case studies that illustrate how the means and methods of strategic influence can impact a nation's security.

[Saving Children from a Life of Crime : Early Risk Factors and Effective Interventions: Early Risk Factors and Effective Interventions, Institute of Criminology Cambridge University David P. Farrington Professor of Psychological Criminology,](#)

[Department of Criminal Justice University of Massachusetts Brandon C. Welsh Assistant Professor, Lowell](#) , 2006, 0199719624, 9780199719624. After decades of rigorous study in the United States and across the Western world, a great deal is known about the early risk factors for offending. High impulsiveness, low attainment, criminal parents, parental conflict, and growing up in a deprived, high-crime neighborhood are among the most important factors. There is also a growing body of high quality scientific evidence on the effectiveness of early prevention programs designed to prevent children from embarking on a life of crime. Drawing on the latest evidence, Saving Children from a Life of Crime is the first book to assess the early causes of offending and what works best to prevent it. Preschool intellectual enrichment, child skills training, parent management training, and home visiting programs are among the most effective early prevention programs. Criminologists David Farrington and Brandon Welsh also outline a policy strategy--early prevention--that uses this current research knowledge and brings into sharper focus what America's national crime fighting priority ought to be. At a time when unacceptable crime levels in America, rising criminal justice costs, and a punitive crime policy have spurred a growing interest in the early prevention of delinquency, Farrington and Welsh here lay the groundwork for change with a comprehensive national prevention strategy to save children from a life of crime.

[Reasons of Identity: A Normative Guide to the Political and Legal Assessment of Identity Claims, Avigail Eisenberg](#) , 2009, 0199291306, 9780199291304. The current legal and political context is perhaps more congenial than ever before to considering claims made by minorities for the protection of some aspect of their identity. This book argues that diverse societies depend for their success on having courts and legislatures which are capable of assessing these identity claims in a fair and transparent manner. Despite the ubiquity of these claims today, how public decision makers assess minority identity claims in the course of decision making is only vaguely understood and mostly ignored in normative political theory and public policy analysis. This book examines several key approaches used by national and international institutions to assess the identity claims of religious, cultural, and Indigenous minorities today. It takes up the central challenges to the public assessment of identity claims which raise concerns about the incommensurability and questionable authenticity of such claims, and about the risks of essentializing and domesticating the identities of the people who advance identity claims. It develops a guide to aid in the fair assessment of identity claims which is grounded on the requirements that public institutions must respect what people claim is deeply important to their self understandings and ways of life without merely accepting such claims at face value or deferring to claimants in every case, and public institutions must have the capacity to reflect on their own unfair biases. The guide developed in this book aims at interrogating the strength of any identity claim on bases that are respectful of differences without being blinded by them.

Hand of a Craftsman features the heretofore unpublished notes and progressives the artist compiled in the making of his extraordinary woodcut Grand Caon and includes many prints never before reproduced and rarely exhibited. Baumann's work is awash in brilliant, hand-ground pigments and reveals a style that is wholly self-reliant and free. [A Perfect Madness, Frank H. Marsh](#) , 2012, 0983826439, 9780983826439. It is the autumn of 1938 when Julia Kaufmann meets Erich Schmidt while studying medicine at the German University in Prague. With Hitler's army soon to invade the city and the terror of World War II looming, it is the worst of times for a Jew and a German to fall in love. As the excitement of the eugenics movement gives way to outright genocide, and the fear sweeping across Europe grows into madness, Julia and Erich find themselves forced to travel two very different paths ones which will determine the fate of their love and, ultimately, the fate of their souls. A Perfect Madness takes us on a journey back to a dark time when the fight for survival often eclipsed the fight for the truth. Beautifully and provocatively written, it examines the crippling effects of fear on the human mind, asking painful questions of moral choice we cannot afford to leave unanswered. About the Author: Frank Marsh was a trial attorney for twenty-five years and then a university professor of philosophy, law, and bioethics. He has published six books on bioethics, numerous articles, and scripted documentaries dealing with medicine, genetics, and law. He also is the author of the novel Rebekka's Children.

[The Lost Legend of the First Christmas.](#) , 1999, 0966130510, 9780966130515. Book Two of The Lost Legend Trilogy takes up where Book One left off . . . Not far into his journey with the Magi, Michael is visited again by the angel of his previous dreams. "You must go to Jerusalem as quickly as you can", the angel tells him. The wicked King Herod has learned of the Magi's duplicity. So fearful is he that this Son of God will one day depose him, that Herod has ordered all of the boy children under the age of two years to be put to death. Michael must find Mary and Joseph and the Child and provide them with safe passage into Egypt where he will remain as their protector until it is safe for them to return to their homeland. Michael obeys and successfully escorts the Holy Family out of harm's way. In Egypt, an extraordinary colt is born to the mare who has carried Michael since he left the horsemen. The colt is named Zabbai, which, in Hebrew, means A Gift from God. As the years unfold, we come to know Jesus as He might have been in childhood, seeing Him as both human and Divine. A tremendous bond is forged between Michael and the Family he has been called to protect. A remarkable alliance also develops between Jesus and Zabbai. After ten years in Egypt, the Family learns that Herod is dead and that it is relatively safe for them to return to their homeland. Sadly, for their safety, it will be necessary for Michael to part with this Family he has come to love as his own. With mingled sorrow and longing, he heads off in search of the horsemen, hoping against hope that through his mother's people he will at last be led to a reunion with his father.

[New Perspectives on Deviance : the Construction of Deviance in Everyday Life, Lori G. Beaman](#) , 1999, 0130831611, 9780130831613. Designed for courses in Deviant Behaviour, and Introductory Deviance. This edited collection focuses on the construction of notions of deviance in everyday life. Discussions of traditional theories are included to provide students with a well-rounded overview of theoretical approaches to deviance. However, the guiding theoretical framework of the book is a focus on the social construction of deviance, both at the macro and micro levels. While the first section considers topics that are traditionally found in deviance textbooks-prostitution, drug abuse, alcoholism, and mental illness-the second section highlights assumptions about what constitutes normal families, bodies, and cultural practices. Most deviance readers and texts focus on very narrow conceptualizations of what constitutes deviant behaviour, with little attention paid to everyday constructions of deviance related to poverty, body image, and family values.

[Terrorist Asset-Freezing \(Temporary Provisions\) Act 2010: Chapter 2; Explanatory Notes, Great Britain](#) , 2010, 0105602108, 9780105602101. The Treasury had implemented Resolution 1373 (2001) adopted by the Security Council of the United Nations on 28 September 2001 relating to terrorism and resolution 1452 (2002) adopted on 20 December 2002 relating to humanitarian exemptions, by means of a number of Orders in Council (the UN Terrorism Orders). Resolution 1373 includes a requirement that member states must (a) prevent the financing of terrorist acts, including the freezing of funds and economic resources of persons who commit or attempt to commit, terrorist acts or participate in or facilitate such acts, and (b) prohibit their nationals and those within their territories from making funds, financial services or economic resources available to such persons. Resolution 1452 introduces exemptions to permit payments necessary to meet basic humanitarian needs (such as payments for foodstuffs, rent or mortgage, medicines and medical treatment, taxes, insurance premiums, public utility charges and legal fees and expenses). In January 2010 the Supreme Court judged one of the Orders in Council to be invalid. The purpose of this Act is to provide for the temporary validity of the UN Terrorism Orders in order to maintain asset-freezing restrictions whilst the Government takes steps to put in place by means of primary legislation an asset-freezing regime to comply with the obligations in resolution 1373. The Government's draft Bill was published as Command paper Cm. 7806 (9780101780629).

"Indestructible Truth" is one of the most thorough introductions to the Tibetan Buddhist world view ever published--at the same time it is also one of the most accessible. The author presents complex and sophisticated teachings and practices in nontechnical language, using engaging stories and personal anecdotes to illustrate his points. "Indestructible Truth" presents Tibetan Buddhism in its traditional form but also shows how the Tibetan traditions are applicable to the problems and challenges of modern life in the West. In "Indestructible Truth," Tibetan Buddhism is introduced not as an exotic religion, but rather as an expression of human spirituality that is having a profound impact on the modern world. In addition, it presents the point of view of meditation and the practice of the spiritual life, paying special attention to contemplative practice and meditation as taught in the Kagyu and Nyingma schools.

[Algonkian: Lifestyle of the New England Indians, Bob Eaton](#) , 1998, 0962803146, 9780962803147. Algonkian is a comic-style book with hand-lettered text that graphically depicts life in New England before the English invasion. Author Bob Eaton created several dozen 40-page "comic" books focused on the New England Indians. In Algonkian we learn about the several New England tribes that shared a language and a culture. We meet Squam and Shomet as small children and watch them grow up to be parents themselves. Along the way we learn about Native American childrearing, hunting, agriculture, warfare, and spirituality. Bob Eaton's artwork opens up a whole new vista on a way of life that was ruthlessly destroyed by self-righteous invaders in only a few generations.

Even so, its hard to apologizeespecially when Alex kind of deserved it! Like any seven-year-old, Zach tries to ignore the problem, but finally, with his moms help, he learns the four steps to apologizing: 1) say what you did; 2) say how it made the other person feel; 3) say what you could have done instead; 4) make it up to the person. The apology strategy is presented as the four-square apology, which is illustrated as a square divided into four quarters with a prompt in each. Easy to understand and easy to remember.Zach Rules SeriesZach, his brothers Alex and Scott, and his parents are a typical family. The boys struggle with getting along, frustrations, social issues, and other everyday problems typical with kids ages 5 to 8. Each book in the Zach Rules series presents a single, simple storyline involving one such problem. The stories are humorous and realistic (these boys are not angels), and Darren McKees illustrations add a lighthearted, commercial appeal that kids will find familiar and fun. As each story develops, Zach and readers learn straightforward tools for coping with their struggles and growing up healthierhealthier because children who know these skills have the potential for building stronger relationships now and in the future. The tools are presented graphically to make them easier to understand and remember. Kids will enjoy the familiar, funny stories and easily grasp the important life skills. Each book concludes with a short note to adults to help parents, teachers, counselors, and other grown-ups reinforce the books messages and practice the skills with their kids.

[National Blood Service, Committee of Public Accounts](#) , 2001, 0102402019, 9780102402018. In April 2000 the National Blood Service completed its reorganisation from a regional to a national service, a process that had earlier caused concern among users and employees, and led to a major review of the management in 1997, and the dismissal of the then chairman and chief executive. This report examines donor care, safety of blood used in transfusions, the use of blood, and overall management and efficiency. The basic conclusions are that the Service has greatly improved its management, meeting hospital demands, improving the safety of blood products, improving efficiency. Much still needs to be done in the recruitment and retention of donors and in the care given to donors at every stage. Delays experienced by donors in giving blood are rising, and the lack of effective information technology systems regarding appointments are a major cause, with little improvement likely for another three years.

[Rainbow's End: The Crash of 1929, Maury Klein](#) , 2001, 0195135164, 9780195135169. The first major history of the Crash in over a decade, Rainbow's End tells the story of the stock market collapse in a colorful, swift-moving narrative that blends a vivid portrait of the 1920s with an intensely gripping account of Wall Street's greatest catastrophe. The book offers a vibrant picture of a world full of plungers, powerful bankers, corporate titans, millionaire brokers, and buoyantly optimistic stock market bulls. We meet Sunshine Charley Mitchell, head of the National City Bank, powerful financiers Jack Morgan and Jacob Schiff, Wall Street manipulators such as the legendary Jesse Livermore, and the lavish-living Billy Durant, founder of General Motors. As Klein follows the careers of these men, he shows us how the financial house of cards gradually grew taller, as the irrational exuberance of an earlier age gripped America and convinced us that the market would continue to rise forever. Then, in October 1929, came a "perfect storm"-like convergence of factors

that shook Wall Street to its foundations. We relive Black Thursday, when police lined Wall Street, brokers grew hysterical, customers "bellowed like lunatics," and the ticker tape fell hours behind. This is followed by the even worse Bloody Tuesday, when an irrational desire to sell at any price gripped the market and even blue chip stocks plummeted precariously. This compelling history of the Crash--the first to follow the market closely for the two years leading up to the disaster--illuminates a major turning point in our history.

[The Hound and the Hawk: The Art of Medieval Hunting, John Cummins](#) , 2001, 1842120972, 9781842120972. Hunting was a training for war and a rite of manhood, a powerful and ritualistic pastime, the sport of kings. In vivid and engrossing detail John Cummins shows us the appropriate methods for hunting all kinds of deer, boar, wolves, foxes, bear, otter, birds hare - even unicorn. Hunting and hawking run throughout medieval art and literature, providing not only narrative motifs for tapestries, romances and sagas but also metaphors for war and combat, for Christianity wrestling with the dark forces of paganism, and for sexual pursuit and conquest. Dr Cummins' book ranges over a dazzling diversity of sources - poems, ballads, letters, court directives, royal accounts, gamekeepers' handbooks, psalters - to recreate and

interpret the cosmos of medieval hunting and falconry, the skills and techniques, superstitions and beliefs. Richly illustrated from a variety of sources, *The Hound and the Hawk* shows us a pageant of medieval and Renaissance life lived in its grandest, most flamboyant, most allusive manner.

[Cell and Molecular Biology of Plastids, Ralph Bock](#) , 2010, 3642094600, 9783642094606. Ralph Bock Standard textbooks of genetics and molecular biology pay scant attention to plastids, although the chloroplast is arguably the best-studied genetic compartment in eukaryotic cells. The past two decades have witnessed an enormous progress in our understanding of plastid biogenesis, genome structure and function, gene expression and its regulation as well as plastid-nuclear interaction and communication pathways. In addition, research on plastids has benefited enormously from the development and continuous refinement of transgenic technologies. The possibility to directly alter the genetic information of the plastid has facilitated the study of virtually all aspects of plastid biology in vivo and, moreover, has paved the way to diverse applications of transgenic plastids in biotechnology. It was with this in mind that we approached the writing of the present volume of Topics in Current Genetics entitled *Cell and Molecular Biology of Plastids*. The book begins with a chapter on plastid biogenesis, differentiation and division written by Kevin Pyke. The following chapter (contributed by Ralph Bock) covers plastid genome structure and function as well as the inheritance of plastids and their genetic material. Anil Day and Panagiotis Madesis portray the processes and mechanisms involved in both maintenance and structural dynamics of plastid genomes: recombination, DNA replication, and repair.

[Meaning Reconstruction & the Experience of Loss, Robert A. Neimeyer](#) , 2001, 1557987424, 9781557987426. A prominent theme in the volume is that symptoms in the bereaved have meaning-making significance, and that meaning reconstruction in response to loss is the central process in grieving. More scientifically oriented readers will find comprehensive discussions of research programs supporting these tenets, particularly those linking grief with responses to loss involved in trauma. Practitioners will find clinically informed models and ample case descriptions to bridge concepts with the lived world of real people suffering real losses. All will find new paradigms for approaching loss and reconstruction of meaning in a respectful, revealing way that has significance both personally and professionally.

[An Outer Banks reader, David Stick](#) , 1998, 0807824208, 9780807824207. For half a century, David Stick has been writing books about the fragile chain of barrier islands off the North Carolina coast known as the Outer Banks. Two of his earliest, Graveyard of the Atlantic and The Outer Banks of North Carolina, were published by the UNC Press in the 1950s, and continue to be best-sellers. More recently, Stick embarked on another project, searching for the most captivating and best-written examples of what others have said about his beloved Outer Banks. In the process, more than 1,000 books, pamphlets, periodicals, historical documents, and other writings were reviewed. The result is a rich and fascinating anthology. The selections in An Outer Banks Reader span the course of more than four and a half centuries, from the first known record of a meeting between Europeans and Native Americans in the region in 1524 to modern-day accounts of life on the Outer Banks. Together, Stick hopes, the sixty-four entries may provide both "outlanders" and natives with an understanding of why the Outer Banks are home to a rapidly growing number of people who would rather spend the rest of their lives there than any place else on earth.

[Pulsed I\(V\) Measurement of Semiconductor Devices with Applications, Peter H. Ladbrooke](#) , 2004, 0976206102, 9780976206101. At RF and microwave frequencies, the large-signal characteristics of a semiconductor device are different from those measured at dc, and similarly are different from the RF and microwave properties deduced from small-signal measurements. Pulsed I(V) measurements yield exactly the large-signal characteristics a device will exhibit, or follow, in non-linear RF, microwave and fast-switching circuit applications, and is a powerful technique that is complementary to the other, longer established, measurement methods. It is extremely quick, requiring no calibration, and may be used with RF probes for assessing devices on-wafer. The technique applies to MESFETs, PHEMTs, MOSFETs, HBTs and BJTs in the Si, SiGe, SiC, GaAs, GaN and other material systems. Its uses are many, including process technology development, process control, device design, package design, reliability assessment, Safe Operating Area (SOA) determination, and circuit design.

This is the first full scholarly history of the French Foreign Ministry--the Quai d'Orsay--in the years between the Fashoda Crisis and the First World War. In an intensively researched study, M. B. He explores the ideas and influence of leading diplomats and administrators, their prejudices, and their aims; and traces the often complex relationships between successive Foreign Ministers and the functionaries of the Quai d'Orsay. His analysis throws much new light on French policy and actions during the July Crisis, and makes a significant contribution to the debate over the origins of the First World War.

[The Origins of the Republican Party, 1852-1856, William E. Gienapp Professor of History Harvard University](#) , 1987,

0198021143, 9780198021148. The 1850s saw in America the breakdown of the Jacksonian party system in the North and the emergence of a new sectional party--the Republicans--that succeeded the Whigs in the nation's two-party system.

This monumental work uses demographic, voting, and other statistical analysis as well as the more traditional methods and sources of political history to trace the realignment of American politics in the 1850s and the birth of the Republican party. Gienapp powerfully demonstrates that the organization of the Republican party was a difficult, complex, and lengthy process and explains why, even after an inauspicious beginning, it ultimately became a potent political force. The

study also reveals the crucial role of ethnocultural factors in the collapse of the second party system and thoroughly analyzes the struggle between nativism and antislavery for political dominance in the North. The volume concludes with the decisive triumph of the Republican party over the rival American party in the 1856 presidential election. Far-reaching in scope yet detailed in analysis, this is the definitive work on the formation of the Republican party in antebellum America.

[The Song Dog, James McClure](#) , 2013, 1616952482, 9781616952488. The year is 1962. Young Lieutenant Tromp Kramer of the Trekkersburg Murder and Robbery Squad has been ordered up to Jafini, a small, dusty town in northern Zululand, to investigate the "hero's death" of the town's chief detective, Maaties Kritzinger, another Afrikaner maverick, and one with many secrets. Kramer finds himself increasingly identifying with the victim as the investigation proceeds. And then his path crosses that of Bantu Detective Sergeant Mickey Zondi, who is trying to locate a multiple killer whose summary execution will quiet the spirits of his ancestors. Despite the racial differences, the two men sense a kinship ... one that might prove dangerous in rural South Africa in the year of Nelson Mandela's imprisonment.

[Mandatory Reporting and Child Abuse, Jan Carter](#) , 1988, 0947081216, 9780947081218. "Mandatory Reporting and Child Abuse" surveys the international literature to examine the relationship between mandatory reporting and: the rate of notification of child abuse, poor families, protective services, family support services, and substitute care, rates of re-injury and recidivism, and professional and public attitudes. The thrust of its conclusions is that: mandatory reporting

creates the illusion of a "simple" solution to a complex problem, and fragments limited resources on checking reported cases instead of focusing on treatment and rehabilitation."--BOOK COVER.

[Thoughts Are Things, Ernest Holmes, Willis Kinnear](#) , 1999, 1558747214, 9781558747210. The authors of this Science of Mind classic sum up its content as "the things in your life and the thoughts that are behind them". Readers will discover that the key to living a life of inner peace, contentment and fulfillment is to think in creative, positive, self-affirming ways. For, in the words of the authors, "Every thought has a consequence. And every experience has a causative thought behind it. Thoughts are things, and all the things in one's life have a thought that precedes them." Readers will learn that

if they change the content and tone of the thoughts behind the things in their lives, they will permanently transform themselves and their lives-- for the better. The book is divided into four parts: "The World Around You", "The Life You Live", "Your Mental and Spiritual Health" and "The Future Is Yours". Each of these parts is further broken down into comment and commentary. The comment pages, written by Willis Kinnear, illustrate the various problems, challenges and difficulties which everyone faces at one time or another. The commentary pages, gleaned from the writings of Ernest Holmes, present the solutions to those problems, challenges and difficulties. Some of Holmes's inspiring wisdom includes: "With a penetrating vision you can dissipate the obstruction, remove the obstacle, dissolve the wrong condition." "Instead of dwelling on negative thoughts, cause your mind to dwell on peace and joy." "You are to have implicit confidence in your own ability, knowing that it is the nature of thought to externalize itself in your health and affairs, knowing that you are the thinker." "Have the will to be well, to be happy, and to live in joy... As you discover your daily good, and believe in it, and think about it, expect it to continue." The beauty and value in these wise remarks lie in their simplicity and accessibility-- all readers will be able to follow Holmes's timeless advice and use it in their daily lives. All readers are sure to treasure "Thoughts Are Things", turning to it for counsel and comfort in times of trouble and sorrow, and for reaffirmation and faith in times of triumph and joy.

[Simone de Beauvoir: A Critical Introduction, Edward Fullbrook, Kate Fullbrook](#) , 1998, 0745612032, 9780745612034. This book provides the first comprehensive introduction to Simone de Beauvoir's philosophical thought. Beauvoir has long been recognized as the twentieth century's leading feminist writer, but the full extent of her significance as a philosopher is just coming into focus. This study examines the history of Beauvoir's development into one of the most original and influential thinkers of her era. The Fullbrooks begin with an account of Beauvoir's formation as a philosopher. They then explore her early writing on philosophical method and the ways this shaped her fiction. The book traces the development of Beauvoir's central theories of embodied consciousness and intersubjectivity, and examines her concepts of the "individual" and the "social other". An analysis of Beauvoir's ethics of liberation leads to philosophical readings of her great works of applied ethics, *The Second Sex* and *Old Age*. Finally, Beauvoir's contribution to continuing debates about consciousness, the body, the self and the other is reassessed. The publication of this introduction to Beauvoir's philosophy is an important contribution to the current renaissance of Beauvoir studies. Clear, accessible and lively, this book is essential reading not only for students of Beauvoir but for anyone interested in the submerged record of women's impact on philosophy.

Stevie "the Rifleman" Flemmi was, for forty years, one of the most feared gangsters in Boston, and for much of that time, he was the partner of Whitey Bulger, the sixteen-year fugitive with a \$2 million reward on his head who was captured in 2011. Flemmi has been convicted of ten murders and took the Fifth Amendment when asked about ten others. His cohort, Bulger, is charged with nineteen more. Rifleman is the story of Flemmi's life of crime, as told to federal and state law enforcement after he pleaded guilty in 2003. The original document on which the book is based is called a DEA 6, and it ran 146 single-spaced pages, covering dozens of extortions, assaults, and murders, including two of his girlfriends, one of whom was also his common law stepdaughter. Supplementing the text are close to 300 photographs from Carr's own collection. This is truly a must-have for any true crime fan.

To the classical civilizations of Greece and Rome, the Celtic warrior of the late Iron Age was the archetypal barbarian: savage, undisciplined, and bloodthirsty. In a clash of cultures that lasted almost 500 years, the rich and vibrant society in which he lived, fought, and died was virtually destroyed, becoming the stuff of myth and legend. Covering the period from the first mention of the Celts by ancient Greek writers to the Roman conquest of Britain, this book examines the Celtic warrior, his society and his place within it, and the conflicts that would eventually destroy his world. Beautifully illustrated with many examples of Celtic art and craftsmanship, this book provides a fascinating insight into a culture whose legacy has endured to the present day.

She has carried the club's coveted flag on four expeditions and has been present on several sponsored by other members. Her writings transport readers to underwater New Guinea, Micronesia, Australia, and Indonesia, to an ages-old camel fair in India, and to the ruined cities of earlier millennia. Schrafft also takes them on a search for the elusive coelacanth, a fossil fish found to still exist, and into the clear waters of the Gulf Stream close to her Florida home base. The author's enthusiasm and comprehensive reporting style take you to her favorite remote, inaccessible places, where the excitement of discovery far outweighs the discomfort. [The Demographic Transition: Stages, Patterns, and Economic Implications : a Longitudinal Study of Sixty-seven Countries Covering the Period 1720-1984, Jean-Claude Chesnais](#) , 1992, 0198286597, 9780198286592. This book examines the basic mechanisms behind the modernization of demographic behaviour. The author has marshalled an impressive amount of statistical material relating to 67 countries, half of them less developed, and covering the period 1720-1984. The whole sweep of western demographic experience is dealt with comprehensively and impartially, and though technically sophisticated, the book also covers issues of interpretation and analysis. The author shows how mortality decreases necessarily precedes fertility decline and how so-called exceptions are simply false exceptions; how the decline

of fertility is dependent on important and manifold social transformations; and reveals the strong connections between international migration and the course of demographic transition. Chesnais demonstrates that less developed countries are following the same general patterns as MDCs and argues that the theory of demographic transition must include the effect of population changes on the economic progress of society.

[Barbarossa: The Air Battle July-December 1941, Christer Bergstrm](#) , 2007, . Although Operation Barbarossa, the German invasion of Russia in June 1941, is widely perceived as a great land offensive, equally important was the aerial supremacy that the Luftwaffe achieved over the front during its early phases. Without the elimination of the threat posed by the Soviet air force, it would have been impossible for the army to have made the rapid advances of the summer and autumn of 1941. This book provides a detailed account of the massive aerial campaign fought in the skies over the Soviet Union following the launch of Operation Barbarossa. Drawing on both Russian and German sources, the strength of Christer Bergstrm's writing lies in its detail, his ability to tell the story from the viewpoints of both sides and to put events in both their strategic and tactical contexts. A large number of rare and previously unpublished photographs, biographical studies of major players, data tables, technical assessments and appendices accompany the text. Compiled by one of the world's leading experts on the air war over the Eastern Front, this is the first in a series of books to cover the major phases of World War Two in this theatre of operations.

[My New Town: A Flying Naptime Adventure,](#) , 2003, 0972325204, 9780972325202. "A playful story that teaches young folks that naptime and dreams can be fun. An original, cleverly executed, and highly recommended picture book story." - The Midwest Book Review. After moving away to a strange, new town, young Sally-Ann simply refused to lie down. No kids are out playing and it's different here. It's rainy and cold and her voice shook with fear. I miss all my toys, I don't like this day. Her mom tried to comfort her: It will all be okay. As they drifted to sleep, Sally felt a small prickle. Something soft on her back made her tingle and tickle. It fluffed and it puffed into separate things. They were covered with feathers. She had sprouted two wings! Then she and her mom go for a wonderful and enlightening journey as their

adventure takes them soaring over the city, and countryside. And then... she awoke with no wings; it had just been a dream. Of course it was, even though real it did seem. But Sally-Ann did feel better. She was ready to play. Her mommy was right! IT WOULD ALL BE OKAY!" A delightful rhyming story about FLYING and finding the bright side to relocating. MY NEW TOWN features scenes from the Portland, Oregon area! She's received accolades for her writing and artwork since childhood, and has been telling original stories to her daughters for years. Now D. R. "Diana" Thompson has put the two crafts together in "The Naptime Adventure Series!" Co-illustrated with her husband, Dave, who scans her pen and ink drawings into the computer, and turns them into the beautiful pages you see in each of these delightful volumes! When it was first published, Lyrical Ballads enraged the critics of the day: Wordsworth and Coleridge had given poetry a voice, one decidedly different to that which had been voiced before. This acclaimed Routledge Classics edition offers the reader the opportunity to study the poems in their original contexts as they appeared to Coleridges and Wordsworths contemporaries, and includes some of their most famous poems, including Coleridges Rime of the Ancyent Marinere.

Building on the strengths of its predecessors, the new fourth edition has been thoroughly revised and updated to include new data, a research-oriented appendix, and two new chapters: Sex and Gender, and Men and Masculinities.

[Historia Novella: The Contemporary History, William \(of Malmesbury\)](#) , 1998, 0198201923, 9780198201922. The Historia Novella is a key source for the succession dispute between King Stephen and the Empress Matilda which brought England to civil war in the twelfth century. William of Malmesbury was the doyen of the historians of his day. His account of the main events of the years 1126 to 1142, to some of which he was an eyewitness, is sympathetic to the empress's cause,

but not uncritical of her. Edmund King offers a complete revision of K. R. Potter's edition of 1955, retaining only the translation, which has been amended in places. Not only is this a new edition but it offers a new text, arguing that what have earlier been seen as William of Malmesbury's final revisions are not from his hand. Rather they seem to come from somewhere in the circle of Robert of Gloucester, the empress's half-brother, to whom the work is dedicated. In this way the work raises important questions concerning the transmission of medieval texts.

[Courage and Conviction: An Alaska State Trooper's Journey Through a Life of Principled Law Enforcement, L. Gary Gunkel](#) , 2012, 146854568X, 9781468545685. Gary Gunkel tells about his real-life experiences as a US Marine, an Anchorage City Policeman, an Alaska State Trooper, Chief of Police in small town Alaska and Sheriff of Asotin County, Washington. His stories are guaranteed to keep you turning the pages on call after call, and his sometimes hair-raising law enforcement experiences will keep you on the edge of your seat. And just when you think you have heard it all there will be another call that you can't imagine. You will discover how Gary handles a dangerous situation surrounded by 24 members of a motorcycle gang with the nearest backup over 200 miles away. Another time you will feel the experience of stopping 17 gang members on a main highway because they were displaying a sawed off shotgun. The amazing thing is all these calls are real life...there is no fiction involved. Gary has, on occasion, changed a name to protect someone's privacy, or sometimes a name is left out because he cannot recall it or has no way of getting the name. You will experience commercial fishing with his whole family for salmon in Bristol Bay and flying loads of fish off the beach in his plane. You will read about several live action and near-death aircraft incidents that you cannot believe happened to Gary and his family. He writes about bush flying experiences that will make you laugh, and some truly whacko ones that will make you shake your head as you go fishing, trapping and hunting with him. And through it all, you will come away with the understanding that everything Gary Gunkel did in law enforcement was professional, that he has a huge capacity for living life completely, and great love for his family.
