This book examines the impact of the information revolution in India at the cultural, political and technical level. The authors show to what extent India is becoming an information society, how communication technologies are bringing about notable change in Indian society and even in government operations. The picture presented is balanced, with some of the social problems which will accompany these changes given due attention. The volume is important reading for academics and researchers in communication, mass communication, politics and sociology.

[Reading the Grateful Dead: A Critical Survey, Nicholas G. Meriwether](#) , 2012, 0810883716, 9780810883710. Since the 1960s, the Grateful Dead have welcomed and participated in academic work on the band, encouraging scrutiny from a wide variety of disciplinary and theoretical perspectives, from anthropology to sociology. Interest in Dead studies is growing across the country and around the world, and UCSanta Cruzs Grateful Dead Archive continues to attract a high level of attention. In Reading the Grateful Dead: A Critical Survey, Nicholas G. Meriwether has assembled essays that examine the development of Grateful Dead studies. This volume features work from three generations of scholars, including a wide variety of perspectives on the band and its cultural significance. From insiders like lyricist John Perry Barlow and longtime band publicist and historian Dennis McNally to well-known Deadhead scholars such as Barry Barnes and Rebecca Adams, the contributors to this volume offer valuable insights into the Grateful Dead phenomenon. No other Dead book focuses on the growth and development of the discourse, contains such a range of critical approaches, nor features work by luminaries Stan Krippner and Barnes, among others. The four sections of the book describe aspects and approaches to Dead studies, along with overviews of how the discipline evolved and what it comprises today. This collection will appeal to scholars, students, and teachers interested in Dead studies and fans of the band.

[Somewhere Towards the End, Diana Athill](#) , 2008, 039306770X, 9780393067705. Diana Athill is one of the great editors in British publishing. For more than five decades she edited the likes of V. S. Naipaul and Jean Rhys, for whom she was a confidante and caretaker. As a writer, Diana Athill has made her reputation for the frankness and precisely expressed

wisdom of her memoirs. Now in her ninety-first year, "entirely untamed about both old and new conventions" (Literary Review) and freed from any of the inhibitions that even she may have once had, Athill reflects candidly, and sometimes with great humor, on the condition of being old—the losses and occasionally the gains that age brings, the wisdom and fortitude required to face death. Distinguished by "remarkable intelligence...[and the] easy elegance of her prose" (Daily Telegraph), this short, well-crafted book, hailed as "a virtuoso exercise" (Sunday Telegraph) presents an inspiring work for those hoping to flourish in their later years.

[The Forty Rules of Love: A Novel of Rumi, Elif Shafak](#) , 2010, 1101189940, 9781101189948. A mesmerizing tale of love—from the author of *The Bastard of Istanbul* Elif Shafak, the most widely read female writer in Turkey, has earned a growing fan base all over the world with her bestselling *The Bastard of Istanbul*. In *The Forty Rules of Love*, her lyrical, imaginative new novel about the famous Sufi mystic Rumi, Shafak effortlessly blends East and West, past and present, to create a dramatic, compelling, and exuberant tale about how love works in the world. Shafak unfolds two parallel narratives—one set in the thirteenth century, when Rumi encountered his spiritual mentor, the wandering dervish known as Shams of Tabriz, and one contemporary, as an unhappy American housewife, inspired by Rumi's message of love, finds the courage to transform her life.

[Undead and Unwed, MaryJanice Davidson](#) , 2010, 0748119868, 9780748119868. It's been a hell of a week for Betsy Taylor. First she loses her job. Then she's killed in a freak accident only to wake up in a morgue to discover she's a vampire. On the plus side, being undead sure beats the alternative. She now has superhuman strength and an unnatural effect on the opposite sex. But what Betsy can't handle is her new liquid diet... And whilst her mother and best-friend are just relieved to find out that being dead doesn't mean Betsy's can't visit, her new 'night-time' friends have the ridiculous

idea that Betsy is the prophesied vampire queen. The scrumptious Sinclair and his cohorts want her help in overthrowing the most obnoxious power-hungry vampire in five centuries. (A Bella Lugosi wannabe who's seen one to many B-movies.) Frankly Betsy couldn't care less about vamp politics. But Sinclair and his followers have a powerful weapon in their arsenal - unlimited access to Manolo Blahnik's Spring collection. Well, just because a girl's dead - er undead - doesn't mean she can't have great shoes...

[More Deadly Than the Male, James Hadley Chase](#) , 2000, 1842321145, 9781842321140. George Fraser is a lonely man, and a bored man. But he has exciting dreams. In his dreams, he lives in a thrilling world of gangsters, guns, fast cars and beautiful women. And of course, in his dreams, he is the toughest gangster of them all. George Fraser prefers his dream world to his real, ordinary life so he begins to boast about it, pretending that he is, in fact, a hardened and ruthless gangster. But George Fraser boasts to the wrong people and suddenly his dream world becomes all too real.

After graduating from college, Sam Altman finds himself subject to an urge he doesn't understand, an urge drawing him away from civilization. Altman's unleashed - and increasingly unhinged - imagination takes him first to Seattle and then farther north, to the remote Alaskan wilderness. Sam has fallen deeply in love with the mysterious and powerful Lindy, a young woman who will do anything to help him realize his quest, no matter how dangerous. Alone with a driving need to uncover his innermost self, Sam gradually transforms himself into a ram - prey to a pack of strangely familiar wolves. The mad pursuit leads from the wilds to civilization and back again. And when Sam and Lindy return to the perilous mountain together, the truth behind his imagined transformation emerges.

Special enforcement squads, torture, disappearances... The world of Adam Spence has become a nightmare... and he is being pursued by a band of men, the new protectors of "national security," maybe working for the government, maybe not, who regard him as a grave threat, part of a conspiracy he knows nothing about. In his own mind, he is only a war veteran trying to live out of the back of a stolen pickup truck. He made one serious mistake that has brought down the wrath of forces with seeming unlimited power. And then disease strikes, a robust, lethal form of flu that wipes out whole populations. America reduced to a siege mentality, killers for hire, a population desperate for food, millions falling prey to disease, and all that remains are personal survival skills. Adam Spence races across the United States with a woman he barely knows, trying to keep ahead of his mysterious pursuers, and find forgiveness within himself for the crimes he has committed.

[Transubstantiate, Richard Thomas](#) , 2010, 0982607245, 9780982607244. "They say Jimmy made it out. But the postcards we get, well, they don't seem...real." When an experiment with population control works too well, and the planet is decimated, seven broken people are united by a supernatural bond in a modern day Eden. Most on the island are fully aware of this prison disguised as an oasis. Unfortunately, Jimmy is on the mainland, desperate to get back, in a post-apocalyptic stand-off, fighting for his survival and that of his unborn child. Back on the island, Jacob stares at the ocean through his telescope and plots his escape, reluctant to aid the cause. Marcy tries to hide from her past sexual escapades that may be her saving grace. X sits in his compound, a quiet, massive presence, trapped in his body by ancient whispers and yet free in spirit to visit other places and times. Roland, the angry, bitter son of Marcy is determined to leave, and sets out on his own. Watching over it all is Assigned, the ghost in the machine. And coming for them, to exact revenge, and finish the job that the virus started, is Gordon. He just landed on the island and he has help. Transubstantiate is a neo-noir thriller, filled with uncertainty at every portal, and jungles infiltrated with The Darkness. Vivid settings, lyrical language, and a slow reveal of plot, motivation, past crimes and future hope collide in a showdown that keeps you guessing until the final haunting words. Transubstantiate: to change from one substance into another.

[Blue Ribbons, Bitter Bread: Australia's Most Heroic Woman, Susanna De Vries](#) , 2012, 0980621607, 9780980621600.

Joice Loch was an extraordinary Australian. She had the inspired courage that saved many hundreds of Jews and Poles in World War II, the compassion that made her a self-trained doctor to tens of thousands of refugees, the incredible grit that took her close to death in several theatres of war, and the dedication to truth and justice that shone forth in her own books and a lifetime of astonishing heroism. Born in a cyclone in 1887 on a Queensland sugar plantation she grew up in

grinding poverty in Gippsland and emerged from years of unpaid drudgery by writing a children's book and freelance journalism. In 1918 she married Sydney Loch, author of a banned book on Gallipoli. After a dangerous time in Dublin during the Troubles, they escaped from possible IRA vengeance to work with the Quakers in Poland. There they rescued countless dispossessed people from disease and starvation and risked death themselves. In 1922 Joice and Sydney went to Greece to aid the 1,500,000 refugees fleeing Turkish persecution. Greece was to become their home. They lived in an ancient tower by the sea in the shadows of Athos, the Holy Mountain, and worked selflessly for decades to save victims of war, famine and disease. During World War II, Joice Loch was an agent for the Allies in Eastern Europe and pulled off a spectacular escape to snatch over a thousand Jews and Poles from death just before the Nazis invaded Bucharest, escorting them via Constantinople to Palestine. By the time she died in 1982 she had written ten books, saved many thousands of lives and was one of the world's most decorated women. At her funeral the Greek Orthodox Bishop of Oxford named her 'one of the most significant women of the twentieth century.' This classic Australian biography is a tribute to one of Australia's most heroic women, who always spoke with great fondness of Queensland as her birthplace. In 2006, a Loch Memorial Museum was opened in the tower by the sea in Ouranoupolis, a tribute to the Lochs and their humanitarian work.

[Words that Wound: Critical Race Theory, Assaultive Speech, and the First Amendment](#) , 1993, 0813384281,

9780813384283. Words, like sticks and stones, can assault; they can injure; they can exclude. In this important book, four prominent legal scholars from the tradition of critical race theory draw on the experience of injury from racist hate speech to develop a first amendment interpretation that recognizes such injuries. In their critique of first amendment orthodoxy, the authors argue that only a history of racism can explain why defamation, invasion of privacy, and fraud are exempt from free-speech guarantees while racist and sexist verbal assaults are not. The rising tide of verbal violence on college campuses has increased the intensity of the hate speech debate. This book demonstrates how critical race theory can be brought to bear against both conservative and liberal ideology to motivate a responsible regulation of hate speech. The impact of feminist theory is also evident throughout. The authors have provided a rare and powerful example of the application of critical theory to a real-life problem. This timely and necessary book will be essential reading for those experiencing the conflicts of free-speech issues on campus students, faculty, administrators, and legislators as well as for scholars of jurisprudence. It will also be a valuable classroom tool for teachers in political science, sociology,

law, education, ethnic studies, and womens studies.

[The U.S. Presidency in Crisis: A Comparative Perspective, Colin Campbell](#) , 1998, 0195091434, 9780195091434. The founding fathers intended the separation of powers between the executive and legislative branches to protect citizens from the capricious actions of both the president and Congress. In the latter third of this century, the dynamics between

the president and Congress have become increasingly gridlocked, leading to a distemper in public discourse. Americas leaders find it virtually impossible to discuss, much less tackle, burning issues, a situation which poses a very clear threat to the legitimacy and viability of our system of government. The U.S. Presidency in Crisis sheds light on the U.S. presidency through a comparative study of executive leadership in the United States, Great Britain, Canada, and Australia. It focuses on the common challenges faced by chief executives of other Anglo-American democracies, offering a unique and rich context for examining the U.S. presidency. Campbell stresses that while individual chief executives function in different ways, it is important for all leaders to invest more time and care in discerning the strengths and weaknesses of each management style. The author believes that it is only when these different management styles are thoroughly dissected and reformed that executive problems can be effectively addressed. The U.S. Presidency in Crisis covers the Clinton administration in detail, placing the administration in a context which has seen a gradual erosion of presidential power over the past 30 years. It pinpoints what went wrong with Clintons first term and interprets the consequences of the 1994 and 1996 elections. The text also deals extensively with "the governability gap, the seeming incapacity of presidents and Congress to cope constructively with the core issues faced by the country. Essential for advanced undergraduate courses which compare executive leaderships and bureaucracy, The U.S. Presidency in Crisis derives and amplifies lessons that, if applied, can improve presidential performance.

They are hood stars who are living the good life splurging their money on women, fast cars, jewels, nice homes, trips, and drugs. Chance was from Brooklyn. His mother moved him and his siblings to New Jersey for a better life. They moved to the suburbs where the dangers and crime of city life were not supposed to exist. Very early on his family learns that the haves are surrounded by those who are successful; as opposed to the projects where everyone is struggling. Chance chooses a life of robbery to support his mother and siblings. The "crew" started out robbing houses in their town and the surrounding working class and middle class towns. What started out as a petty crime with teenagers who would cut school and break and enter into houses, on foot, turned into a multi-million dollar empire when the crew took their craft to a higher level. They graduated from boys to men, who made millions of dollars when they began venturing into exclusive upper class neighborhoods. The story is about the unattainable "American Dream," when the only dream hopeless and uneducated men have is to steal someone else's "Dream Come True ."The Robbin Hoods is about what happens when you take from others, instead of building your own.

[Art Brut: The Origins of Outsider Art, Lucienne Peiry](#) , 2006, 2080305433, 9782080305435. In the first half of the twentieth century, avantgarde artists in Europe began looking beyond the accepted canons of Western art in a search for new sources of inspiration. Primitive art, drawings by children, the art of the insane, automatism, and graffiti all opened up new avenues of experimentation. At the end of World War II, leading French artist Jean Dubuffet became interested in the works being produced by patients in psychiatric hospitals and by other social outcasts. In 1948, he founded the Compagnie de l'Art Brut in order to extend and document the collections he had recently begun, and in 1976, after various adventures, the Collection de l'Art Brut moved to its permanent home in Lausanne. This critically-acclaimed book traces the history of the concept of Art Brut, which is inseparable from the work and personality of the man who did the most for the appreciation and preservation of these remarkable works. The account is completed by biographical notes on the artists featured and an extensive bibliography. This revised edition contains up-to-date information about modern

exponents of Art Brut and about the collection itself, including new images. All the works reproduced, most from the collection created by Dubuffet, have retained their subversive freedom, which continues to fascinate and inspire artists and collectors today.

The call for science curriculum reform has been made over and over again for much of the twentieth century. Arguments have been made that the content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world; that the curriculum has become overstuffed with topics and does not serve students especially well; and above all, that the curriculum does not generate the student learning it is expected to produce. The latest volume in a continuing series of publications from the AAAS designed to reform science education, Designs for Science Literacy presupposes that curriculum reform must be considerably more extensive

and fundamental than the tinkering with individual courses and subjects that has been going on for decades. Designs deals with the critical issues involved in assembling sound instructional materials into a new, coherent K-12 whole. The book pays special attention to the need to link science-oriented studies to the arts and humanities, and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself. If fundamental curriculum reform is ever to occur, a new process for creating alternatives will have to be developed. Designs for Science Literacy provides the groundwork for such a process.

[A Dead Man's Memoir: A Theatrical Novel, Mikhail Bulgakov](#) , 2007, 0140455140, 9780140455144. A new translation of one of the most popular satires on the Russian Revolution and Soviet society Best known for The Master and Margarita, Mikhail Bulgakov is one of twentieth-century Russia's most prominent novelists. A Dead Man's Memoir is a semi-autobiographical story about a writer who fails to sell his novel, then fails to commit suicide. When the writer's play is taken up for production in a theater, literary success beckons, but he is not prepared to reckon with the grotesquely inflated egos of the actors, directors, and theater managers.

"Global Trends 2025: A Transformed World" is the fourth unclassified report prepared by the National Intelligence Council (NIC) in recent years that takes a long-term view of the future. It offers a fresh look at how key global trends might develop over the next 15 years to influence world events. Our report is not meant to be an exercise in prediction or crystal ball-gazing. Mindful that there are many possible "futures," we offer a range of possibilities and potential discontinuities, as a way of opening our minds to developments we might otherwise miss. The Comprehensive Introduction to Standard and Advanced Separation for Every Chemical Engineer Separation Process Engineering, Second Edition helps readers thoroughly master both standard equilibrium staged separations and the latest new processes. The author explains key separation process with exceptional clarity, realistic examples, and end-of-chapter simulation exercises using Aspen Plus. The book starts by reviewing core concepts, such as equilibrium and unit operations; then introduces a step-by-step process for solving separation problems. Next, it introduces each leading processes, including advanced processes such as membrane separation, adsorption, and chromatography. For each process, the author presents essential principles, techniques, and equations, as well as detailed examples. Separation Process Engineering is the new, thoroughly updated edition of the author's previous book, Equilibrium Staged Separations. Enhancements include improved organization, extensive new coverage, and more than 75% new homework problems, all tested in the author's Purdue University classes. Coverage includes Detailed problems with real data, organized in a common format for easier understanding Modular simulation exercises that support courses taught with simulators without creating confusion in courses that do not use them Extensive new coverage of membrane separations, including gas permeation, reverse osmosis, ultrafiltration, pervaporation, and key applications A detailed introduction to adsorption, chromatography and ion exchange: everything students need to understand advanced work in these areas Discussions of standard equilibrium stage processes, including flash distillation, continuous column distillation, batch distillation,

[Blues Poems, Kevin Young](#) , 2003, 0375414584, 9780375414589. Born in African American work songs, field hollers, and the powerful legacy of the spirituals, the blues traveled the country from the Mississippi delta to Sweet Home Chicago, forming the backbone of American music. In this anthology the first devoted exclusively to blues poems a wide array of poets pay tribute to the form and offer testimony to its lasting power. The blues have left an indelible mark on the work of a diverse range of poets: from The Weary Blues by Langston Hughes and Funeral Blues by W. H. Auden, to Blues on Yellow by Marilyn Chin and Reservation Blues by Sherman Alexie. Here are blues-influenced and blues-inflected poems from, among others, Gwendolyn Brooks, Allen Ginsberg, June Jordan, Richard Wright, Nikki Giovanni, Charles Wright, Yusef Komunyakaa, and Cornelius Eady. And here, too, are classic song lyrics poems in their own right from Bessie Smith, Robert Johnson, Ma Rainey, and Muddy Waters. The rich emotional palette of the blues is fully represented here in verse that pays tribute to the heart and humor of the music, and in poems that swing with its history and hard-bitten hope.

"The Words and Music of Paul McCartney: The Solo Years" examines the large and varied oeuvre of this deeply personal artist, showing how McCartney's stint as a Beatle continues to inform his solo music, as well as how he has transcended his days as a member of the Fab Four. After a biographical introduction, chronologically arranged chapters explore McCartney's music in the immediate aftermath of the breakup of the Beatles, his work with Wings during the 1970s, his collaborations with other artists during the 1980s, and his compositions of the 1990s, including his first forays into classical music. The examination also covers McCartney's critically acclaimed work in the first decade of the 21st century, including "Memory Almost Full" and "Ecce Cor Meum," a composition written in the style of sacred English choral music. Throughout, the book supplies analytical insights and historical background to a repertoire that, surprisingly, has not previously been covered in detail.

[The work of the British Council 2008-09: second report of session 2009-10, report, together with formal minutes, oral and written evidence, Great Britain: Parliament: House of Commons: Foreign Affairs Committee](#) , 2010, 0215543815, 9780215543813. The British Council is the UK's international organisation for educational opportunities and cultural relations. Its purpose is to "build engagement and trust for the UK through the exchange of knowledge and ideas between people worldwide." As well as education, it runs programmes in the arts, science, sport, governance and English language in 110 countries and territories worldwide. 2009 marked the 75th anniversary of the establishment of the Council. It receives Grant-in-Aid from the FCO for its public diplomacy activity: 209 million 2008-09, a 6% increase from 2007-08. The Committee concludes that the change in extent of data provided and the presentation of that data in the British Council's 2008-09 annual report makes it more difficult to track and evaluate the Council's performance over a period of years. In future the annual report should include fuller performance data, including corporate performance scores and reach, to facilitate year-on-year analysis. The recent decline in some of the scores achieved in relation to

quality of service, particularly in that relating to engagement with decision makers and senior influencers, gives cause for concern. The Committee welcomes the Council's efforts to re-establish itself in Iran and Zimbabwe, its increased focus on China, and its progress in implementing NAO suggested administrative reforms (HC 625, session 2007-08, ISBN 9780102954173). 2009-10 will be a difficult year for the British Council and further cuts in staff and services may be unavoidable. In these circumstances it is important that the Council concentrates its activities on its core business and key objectives.

[Introduction to Scientific Computing: A Matrix-vector Approach Using MATLAB, Charles F. Van Loan](#) , 2000, 0139491570, 9780139491573. Unique in content and approach, this book covers all the topics that are usually covered in an introduction to scientific computing--but folds in graphics and matrix-vector manipulation in a way that gets readers to appreciate the connection between continuous mathematics and computing. MATLAB 5 is used throughout to encourage experimentation, and each chapter focuses on a different important theorem--allowing readers to appreciate the rigorous side of scientific computing. In addition to standard topical coverage, each chapter includes 1) a sketch of a hard problem that involves ill-conditioning, high dimension, etc.; 2) at least one theorem with both a rigorous proof and a proof by MATLAB experiment to bolster intuition; 3) at least one recursive algorithm; and 4) at least one connection to a real-world application. The book revolves around examples that are packaged in 200+ M-files, which, collectively, communicate all the key mathematical ideas and an appreciation for the subtleties of numerical computing. Power Tools of the Trade. Polynomial Interpolation. Piecewise Polynomial Interpolation. Numerical Integration. Matrix Computations. Linear Systems. The QR and Cholesky Factorizations. [The Book of Melusine of Lusignan in History, Legend and Romance, Gareth Knight](#) , 2013, 190801167X, 9781908011671. Considerable interest in faery tradition has grown up in recent years and not least in the story of Melusine of Lusignan, the subject of a prose romance by Jean d'Arras at the end of the 14th century, swiftly followed by one in verse by Couldrette. This book provides a collection of material from various sources to give an all round picture of the remarkable faery, her town, her church, her immediate family, and the great Lusignan dynasty she founded. An established authority on Melusine, Gareth Knight collects together all the best source material, which he translates from the French, and presents his own researches into the Lusignan family of the 12th century, whose dynasty included kings of Cyprus and

Jerusalem, examining the possibility of a familiar spirit guiding the family in its destiny.

[Sparta: A Novel, Roxana Robinson](#) , 2013, 0374709572, 9780374709570. Going from peace to war can make a young man into a warrior. Going from war to peace can destroy him. Conrad Farrell has no family military heritage, but as a classics major at Williams College, he has encountered the powerful appeal of the Marine Corps ethic. Semper Fidelis comes straight from the ancient world, from Sparta, where every citizen doubled as a full-time soldier. When Conrad graduates, he joins the Marines to continue a long tradition of honor, courage, and commitment. As Roxana Robinson's new novel, Sparta, begins, Conrad has just returned home to Katonah, New York, after four years in Iraq, and hes

beginning to learn that something has changed in his landscape. Something has gone wrong, though things should be fine: he hasn't been shot or wounded; he's never had psychological troubles--he shouldn't have PTSD. But as he attempts to reconnect with his family and his girlfriend and to find his footing in the civilian world, he learns how hard it is to return to the people and places he used to love. His life becomes increasingly difficult to negotiate: he can't imagine his future, can't recover his past, and can't bring himself to occupy his present. As weeks turn into months, Conrad feels himself trapped in a life that's constrictive and incomprehensible, and he fears that his growing rage will have irreparable consequences. Suspenseful, compassionate, and perceptive, *Sparta* captures the nuances of the unique estrangement that modern soldiers face as they attempt to rejoin the society they've fought for. Billy Collins writes that Roxana Robinson is a master at . . . the work of excavating the truths about ourselves; *The Washington Post's* Jonathan Yardley calls her one of our best writers. In *Sparta*, with the powerful insight and acuity that marked her earlier books (*Cost*, *Sweetwater*, and *A Perfect Stranger*, among others), Robinson explores the life of a veteran and delivers her best book yet. *A Washington Post Notable Fiction Book of 2013*

9780979224065. Have you ever wondered why, if a facelift is designed to create and restore beauty, so many of the rich and famous look so "done" and unattractive? And what about those telltale signs of cosmetic facial surgery, including frozen expressions, windswept looks, hollow eyes, and bizarre results? In this book, Dr. Sam Hamra, an internationally renowned plastic surgeon, explains how to correct the 5 most common problems that can occur with a facelift, and most importantly, how you can interview your surgeon, determine the best procedure for your situation, and avoid costly facelift mistakes. This beautifully illustrated text contains case studies and photographic histories and explains surgical techniques in a clear and concise fashion."Dr. Hamra has gone the distance to inform consumers how to avoid the disappointment of facial plastic surgery gone wrong; in this book, he provides essential information needed to make an informed decision. An excellent resource for potential patients and a "must read" for any woman, or man, considering a primary or secondary facelift!"---T. Roderick Hester, Jr., M.D. Chief of the Division of Plastic Surgery Emory University School of Medicine Atlanta, Georgia"About one year after my first facelift, my face was "drooping" again. After thorough research, I found Dr. Hamra, who performed The Composite Facelift. I love the result, which still looks good ten years later. And my husband, who is a physician, was so pleased he had the same procedure!"---Sheryl B. Atlanta, Georgia"Dr. Sam Hamra is a true pioneer in the art of facial rejuvenation, spending a lifetime career developing state of the art concepts and accurate analysis of facial plastic surgery. Utilizing his wealth of knowledge and experience, this text brings light to the latest and best procedures with remarkable clarity and insight."---Rod J. Rohrich, M.D., F.A.C.S. [Stuart's Tarheels: James B. Gordon and His North Carolina Cavalry in the Civil War, 2d ed., Chris J. Hartley](#) , 2011,

0786486902, 9780786486908. When Confederate Major General J.E.B. Stuart said "North Carolina has done nobly in this army," he had one of his own men to thank: Brigadier General James Byron Gordon. A protege of Stuart, Gordon was the consummate nineteenth-century landowner, politician, and businessman. Despite a lack of military training, he rose rapidly through the ranks and, as the commander of all North Carolina cavalymen in the Army of Northern Virginia, he helped bring unparalleled success to Stuart's famed Confederate cavalry. This updated biography, originally published in 1996, chronicles Gordon's early life and military career and, through his men, takes a fresh look at the vaunted Army of Northern Virginia--its battles, controversies, and troops. This second edition includes additional source material that has come to light and a roster of Gordon's 1st North Carolina Cavalry.

[The Oxford Handbook of the Sociology of Religion, Peter Clarke](#) , 2011, 0199588961, 9780199588961. The Oxford Handbook of the Sociology of Religion draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in-depth survey into its changing forms and content in the contemporary world. The role and impact of religion and spirituality on the politics, culture, education and health in the modern world is rigorously discussed and debated. The study of the sociology of religion forges interdisciplinary links to explore aspects of continuity and change in the contemporary interface between society and religion. Using a combination of theoretical, methodological and content-led approaches, the fifty-seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law, ecology to art, music to cognitive science, crime to institutional health care and more. The developing character of religion, irreligion and atheism and the impact of religious diversity on social cohesion are explored. An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship. The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline.

[How to Draw Step-By-Step Using the Alphabet, . . .](#) , 2013, 098830094X, 9780988300941. Looking for a way to make learning the alphabet fun? Step by step, learners can gain confidence and practice following multiple step directions while improving drawing skills and learning letters of the alphabet. For example, drawing the letter "A" and turning the letter into an airplane provides tools to solidify letter identification, letter formation, and beginning sounds combined with step-by-step drawing instructions. Instruction begins with one line or shape and continues adding one line and shape at a time. Each new addition is printed in a different color to help the student visually locate the new line. With such precise instruction, learners quickly learn how to self guide their way through the other lessons. Classroom teachers use this artist's work for centers, literacy workstations to build phonemic awareness, individually for differentiation, or for whole group instruction. Art teachers have also used this as a back up plan for substitutes.

[Blood and Guts in High School, Kathy Acker](#) , 1989, 080213193X, 9780802131935. Kathy Acker was a high-wire writer. She took risks. She experimented for the sake of it. She made mistakes. She fell. She never wanted a modest success, and so her books, all of them, swing from passages of topflight bravura, where you think, "How did she do that?" to a sawdust-in-your-mouth kind of feeling that you just want to spit out. She is an exhilarating, exasperating writer who wants you in the ring with her, through the highs and the lows. There was always something touching and trusting about Acker's belief that her audience would not want a smooth finished product of the kind they could buy at any dime store, but would prefer to be in on the process -- flying when she did, falling when she did, nothing leveled out or homogenized. She was ahead of her time. There is no doubt about that. Acker really was interactive art. It's why she fronted bands -- most famously The Mekons on the CD of Pussy, King of the Pirates -- if you haven't heard it, buy it now. It's why her readings were more like stage shows than those creepy literary events where some dude mumbles in a monotone for half an hour. To see Kathy in her leopard-skin leotard, slash of red lipstick, gym-honed muscles, maybe a dildo, usually a backing track, seduce a packed crowd with that gorgeous voice and knowing childlike look was to discover how exciting art could be. Not rarefied, not back-dated, not dull, just something you suddenly wanted -- the way you suddenly want to be kissed by someone you hadn't even looked at before. Okay, so Acker was art as performance and language as desire, but was she an important writer? Yes. Important work always has risk in it. That doesn't mean that all risky work is important, but it does mean that safety gets us nowhere. In science this is self-evident. In the arts, and particularly literature, we still moan and groan at experiment. Just gimme a good story, we say, with a beginning, middle, and end. Well, Acker won't do that for you, but she will help you get high.

[College Student Retention: Formula for Student Success, Alan Seidman](#) , 2012, 1442212527, 9781442212527. Although access to higher education is virtually universally available, college student retention stills remains a vexing and puzzling problem for educators and legislators. In *College Student Retention: Formula for Student Success*, second edition, Alan Seidman deals with this problematic issue by examining a number of areas critical to the retention of students, including the history, the theories and concepts, models, and a standardized definition of the term. Seidman and his contributors also lay out the financial implications and trends of retention in one of their updated chapters. Completely new to this edition are three chapters that examine several recent issues: the current theories of retention, retention of online students, and retention in community colleges. Tying all of these components together, Seidman then presents his formula and highly successful model for student success that colleges can implement to effect change in retaining students and helping them to complete their academic and personal goals.

[Social Problems, William Kornblum](#) , 1995, . With historical and multicultural sensitivity, this best-selling book probes the nature and causes of the major social changes confronting today's citizens. Using the latest research, current statistics, examples, charts, and tables, it delves into the social control and action issues inherent to each problem in a clear, easy-to-read format. Balancing viewpoints and supporting material with research and policy, the book covers topics in a micro-to-macro format, pointing out the interrelationships among today's social problems and approaching them from several perspectives. The first few chapters focus on individual behaviors such as drug use and crime. The middle chapters deal with inequality and discrimination, discussing such topics as poverty, prejudice, sexism, ageism, family life, and work. The final chapters discuss the problems of cities, environmental pollution, and war and terrorism: matters of global significance. Because the nature of the United States is changing, with health and health care crises, military invasions, economic downturn, shrinking public budgets and rising fiscal deficits, and environmental issues, this book becomes a necessary read for members of the medical profession that confront the tragedy of AIDS, law enforcement professionals who cope with crime and violence, elected officials and other political leaders who are expected to formulate sound social policies to address social problems, and citizens who wish to learn more about the social problems that are pervasive in our lives.

[From Destinations Set, Christopher Nosnibor](#) , 2011, 0955693969, 9780955693960. Tim and Anthony are very different people, leading very different lives, following different careers in different cities. Tim is a conformist: office job, moderately successful, and teetering on the brink of a premature midlife crisis. Anthony is a rebellious non-conformist: a writer who sneers at the humdrum and derides 'corporate sell-outs.' But are they really so very different? The two narratives of From Destinations Set trace these characters' activities as they occur in parallel - not only in terms of time, but also literally, with the page divided into two columns with one story in the left, the other in the right. As events and personalities unravel in each of the two separate stories, the similarities, rather than the differences, become apparent. But more than this, as the two plots develop, questions are raised as to precisely who's writing the script: is Tim's dislocation symptomatic of his breakdown, or is there some connection between him and Anthony?

[The Policing Web, Jean-Paul Brodeur](#) , 2010, 0199740593, 9780199740598. Nearly all research devoted to policing focuses on public uniformed police and their legal use of force. An overwhelming amount of this work draws on evidence from Anglo-American police forces. These twin emphases have led to a limited view. Agencies such as criminal investigation units, intelligence services, private security companies, and military policing organizations have almost

entirely escaped scholarly attention. In *The Policing Web*, Jean-Paul Brodeur looks at policing as a whole. He illuminates its full diversity, showing how it extends far beyond the confines of public police working in uniform and visible to all. Brodeur considers military policing, both when it complements the values of democracy and when it does not. He also discusses criminal individuals acting as police informants, and criminal organizations enforcing their own rules in urban zones deserted by the police. Brodeur argues that the diverse strands of the policing web are united by a common definition that emphasizes the license granted to policing agencies—legally or with impunity—to use means otherwise forbidden to the rest of the population. Employing an international and comparative approach, Brodeur establishes a comprehensive model that links all the components of policing. The policing web, however, is not a neat and well-integrated structure. There is not just one policing web. There are several, depending on the country, police history and culture, and the various public images of policing. These often overlooked factors are essential components of the context of policing. Wide-ranging and authoritative, *The Policing Web* expands the very idea of what policing is and how it works, and presents a novel yet fundamental understanding of law enforcement.

[A Pocket Can Have a Treasure in It, Kathy Stinson](#) , 2012, 1453256709, 9781453256701. What's-in-it fun for the very young. Celebrated children's writer Kathy Stinson explores what's-in-what concepts for young children. With a chorus of questions that encourage interaction, children will delight in playing with the language of spatial relationships, from a pocket holding treasure to a spoon with a face reflected in it. For one little girl, a day on the farm is full of familiar sights that lead to the unexpected. The barn has a horse in it just like a house can have a me in it. A sock can't have a head in it, but it can have a toe in it. A pond can even have a splash in it. Best of all, when Mommy comes home, she has a blanket that has a wiggle in it a brand new baby. Joining charming pictures and a satisfying story with language-learning ideas, *A Pocket Can Have a Treasure in It* will hold the attention of parents and children alike. This is a fixed-format ebook, which preserves the design and layout of the original print book.

[Making Stories: Law, Literature, Life, Jerome Seymour Bruner](#) , 2003, 067401099X, 9780674010994. Stories pervade our daily lives, from human interest news items, to a business strategy described to a colleague, to daydreams between chores. Stories are what we use to make sense of the world. But how does this work? In *Making Stories*, the eminent psychologist Jerome Bruner examines this pervasive human habit and suggests new and deeper ways to think about how we use stories to make sense of lives and the great moral and psychological problems that animate them. Looking at legal cases and autobiography as well as literature, Bruner warns us not to be seduced by overly tidy stories and shows how doubt and double meaning can lie beneath the most seemingly simple case.

An educator and a mother of an adult son with Down syndrome presents a math program for teaching math to students--preschoolers through adults--who have cognitive or learning problems. The focus is to teach math skills that will lead to and support independent living. An educator with 30 years of experience and the parent of a young man with Down syndrome, the author uses hands-on activities to teach critical math skills necessary to

live independently. The author, an experienced educator, was inspired to write 'Teaching Math' to meet the needs of hands-on learners after observing the difficulty her adult son with Down Syndrome and his peers had in applying math skills to everyday life. 'Teaching Math' gives parents and teachers high-interest, hands-on strategies and ideas for teaching math to learners of all ages.

[Phylogeography of Southern European Refugia: Evolutionary perspectives on the origins and conservation of European biodiversity, Steven Weiss, Nuno Ferrand](#) , 2010, 9048172225, 9789048172221. Phylogeography of Southern European Refugia provides the first synthesis of the remarkable diversity, evolutionary complexity, and conservation importance of the flora and fauna in the Mediterranean region, with emphasis on the three major peninsular refugia. The book frames a number of case studies within several introductory and closing chapters that review the development and importance of phylogeographic approaches in evolutionary biology. The book opens with a chapter by the field's founding father, John Avice, reviewing the 25 evolutionary insights that have arisen from the phylogeographic revolution. Key to this perspective is the notion that the multidisciplinary field of phylogeography is serving as an epistemological bridge between the formerly distinct fields of population genetics and phylogenetics. Next, the foremost leaders of plant phylogeography in Europe, Remy Petit and Giovanni Vendramin provide an extraordinarily comprehensive and studious review of the history of plant organelle genetics and their application in phylogeography. A closing chapter provides an up-to-date review of the caveats, challenges, and future prospects in phylogeography as a discipline. The volume contains both broad scale and regional phylogeographic studies with original data from a range of organisms including trees, mammals, insects, fish, reptiles, and amphibians. Throughout the volume it is clear that phylogeographic studies, especially in the major peninsulas of southern Europe (Iberia, Italy, the Balkans) have provided enlightening insights into the evolutionary complexity and conservation importance of biota occupying Europe's most prominent glacial refugia.

[Speaking for the People: Party, Language and Popular Politics in England, 1867-1914, Jon Lawrence](#) , 2002, 0521893666, 9780521893664. Speaking for the People, first published in 1998, draws our attention to the problematic

nature of politicians' claims to represent others, and in doing so it challenges conventional ideas about both the rise of class politics, and the triumph of party between 1867 and 1914. The book emphasises the strongly gendered nature of party politics before the First World War, and suggests that historians have greatly underestimated the continuing importance of the 'politics of place'. Most importantly, however, *Speaking for the People* argues that we must break away from teleological notions such as the 'modernisation' of politics, the taming of the 'popular', or the rise of class. Only then will we understand the shifting currents of popular politics. *Speaking for the People* represents a major challenge to the ways in which historians and political scientists have studied the interaction between party politics and popular political cultures.

[Because of Romek: A Holocaust Survivor's Memoir, David Faber, James D. Kitchen](#) , 2005, 0976876329, 9780976876328.

Because of Romek is a nonfiction, autobiographical narrative about the experiences of a teenager during the Holocaust of World War II. This is the riveting, true story of a young boy's survival in the face of Nazi atrocities. In the mid-1960s, the German government contacted David Faber to testify against Nazi war criminals. Until then, he did not know that his older brother, Romek, whom the Nazis had tortured to death many years earlier, had been involved in a Polish Underground plot to avert Nazi Germany's ability to create an atomic bomb. When David finally agreed to testify, he began to relive all the horrors of his experiences during the war: concentration camps, murders, tortures, starvation, and disease. When David Faber was 13 years old, he had witnessed the Nazi murders of his parents, brother Romek, and five of his six sisters. He survived eight concentration camps between the ages of 13-18, from 1939 to 1945, including Auschwitz and Buchenwald. When he was liberated in 1945 from the concentration camp Bergen-Belsen, he weighed a mere 72 pounds. *Because of Romek* fulfills David's promise to his dead mother that he would survive and tell the world about the horrors committed against him and his family. This moving narrative is also a useful tool for educators. To today's students, the Holocaust too often seems to be an abstract event in the dim past. *Because of Romek* pulls the reader into the story, thereby illuminating the past and putting a face on history.

The new work has been extensively revised in terms of the titles and content of the first edition, and includes comprehensive coverage of techniques used for the determination of specific elements, compounds and groups of compounds, in physical or biological matrices. It addresses applications of chemical analysis in all areas, ranging from such topics as medicine to environmental science, and geology to food science. Important characterisation techniques, such as microscopy and surface analysis are also included. The complete work consists of around 610 articles, each consisting of about 4000 words, figures and summary tables. These articles are combined to form larger entries providing comprehensive coverage of important topics and assisting the reader in locating material of interest. The entries are arranged in an A to Z format providing a final publication of about two and a half million words in ten volumes. The articles are structured to allow easy access to information on specific analytes, instrumental techniques and sample matrices. There is extensive cross-referencing throughout the Encyclopedia and a detailed index. Also available online via ScienceDirect featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. [This is Not Art: Activism and Other 'Not-Art', Alana Jelinek](#) , 2013, 1848858574, 9781848858572. Art is not political action. Art is not education. Art does not exist to make the world a better place. Art disrupts and resists the status quo and if it fails in this prime objective it only serves to deaden a disenfranchised society further. So argues This Is Not Art, a radical and vigorous critique that debunks myths about art in order to celebrate it. With the postmodern deconstruction of now-outdated shibboleths, new and neo liberal myths about art have arisen to take their place: that art's value is primarily monetary, or that art is important because it ameliorates social problems. Highlighting the social mechanisms of legitimization and dissemination that exclude the genuinely disruptive or defiant, This Is Not Art draws on Foucault and Marx to uncover an art world obsessed with profit and from which diversity, individuality and freedom have been erased. Alana Jelinek returns to the question 'what is art?', retelling the history of art practice and exposing the ways in which neo liberal norms and values have seeped into every aspect of our lives. From the author's unique perspective as a

practicing artist and theoretician, *This Is Not Art* offers a new way of understanding and practicing art - as the embodiment of power and agency within us, the possibility of thinking and acting differently, of finding new stories to tell.

[Disturbance Analysis for Power Systems, Mohamed A. Ibrahim](#) , 2011, 1118172108, 9781118172100. More than ninety case studies shed new light on power system phenomena and power system disturbancesBased on the author's four decades of experience, this book enables readers to implement systems in order to monitor and perform comprehensive analyses of power system disturbances. Most importantly, readers will discover the latest strategies and techniques needed to detect and resolve problems that could lead to blackouts to ensure the smooth operation and reliability of any power system.Logically organized, Disturbance Analysis for Power Systems begins with an introduction to the power system disturbance analysis function and its implementation. The book then guides readers through the causes and

modes of clearing of phase and ground faults occurring within power systems as well as power system phenomena and their impact on relay system performance. The next series of chapters presents more than ninety actual case studies that demonstrate how protection systems have performed in detecting and isolating power system disturbances in:

Generators Transformers Overhead transmission lines Cable transmission line feeders Circuit breaker failures Throughout these case studies, actual digital fault recording (DFR) records, oscillograms, and numerical relay fault records are presented and analyzed to demonstrate why power system disturbances happen and how the sequence of events are deduced. The final chapter of the book is dedicated to practice problems, encouraging readers to apply what they've learned to perform their own system disturbance analyses. This book makes it possible for engineers, technicians, and power system operators to perform expert power system disturbance analyses using the latest tested and proven methods. Moreover, the book's many cases studies and practice problems make it ideal for students studying power systems.

[The Human Shore: Seacoasts in History, John R. Gillis](#) , 2012, 0226922235, 9780226922232. Since before recorded history, people have congregated near water. But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels, our relationship to the sea has begun to take on new and potentially catastrophic dimensions. The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them, the natural environment, and the need to live sustainably on the world's shores. Humanity has forgotten how to live with the oceans. In *The Human Shore*, a magisterial account of 100,000 years of seaside civilization, John R. Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts. He takes readers from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches, bays, and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire. An account of the mass movement of whole populations to the coasts in the last half-century brings the story of coastal life into the present. Along the way, Gillis addresses humankind's changing relationship to the sea from an environmental perspective, laying out the history of the making and remaking of coastal landscapes—the creation of ports, the draining of wetlands, the introduction and extinction of marine animals, and the invention of the beach—while giving us a global understanding of our relationship to the water. Learned and deeply personal, *The Human Shore* is more than a history: it is the story of a space that has been central to the attitudes, plans, and existence of those who live and dream at land's end.

Oncogenes and tumour suppressor genes have been the focus of much research because of their role not only in cancer but also in normal cell growth and differentiation. Oncogenes and Tumour Suppressors is a unique volume that brings together a team of leading researchers to present and critically assess our current knowledge. The book covers two major areas of interest: oncogenes and signal transduction, and tumour suppressors and cell cycle control. Topics covered include the mechanisms of oncogene perturbation; growth factors and their receptors in cell transformation; oncogenic cytoplasmic protein tyrosine kinases; the RAS/RAP/ERK signal transduction pathway; oncogenic transcription factors; mammalian cell cycle control; the retinoblastoma gene product and its relatives; the tumour suppressor gene p53; tumour suppressors and the inheritance of cancer; the clinical relevance of oncogenes. Oncogenes and Tumour Suppressors is a major review work that provides an unparalleled summary of our current understanding of this field as viewed by some of its leading researchers. It is of interest to all those involved in research on the cell cycle, signal transduction, and cancer biology. The book is also an excellent reference source with over 1800 selected citations to the primary literature.

[Titus Tidewater, Suzy Verrier](#) , 2005, 0976323117, 9780976323112. The adventurous blue lobster, Titus Tidewater, welcomes the summer season in Maine. Summer means exciting happenings close to the shoreline, but also lurking dangers in the shallow warm water. Titus cautiously explores his new surroundings but soon finds himself ensnared in a lobster trap. Unable to free himself, he is taken to a strange new world on land, before he is ultimately rescued by two children and the ocean itself. A recipient of the Society of Illustrators award, Suzy Verrier's lavish watercolours bring Titus's tale to life. This classic children's book narrates the life of one Maine lobster and displays a captivating world under the sea. Islandport has updated Titus with a new look and added fun facts about Maine lobsters throughout.

In addition to providing a chronicle of the key events in this revolutionary century, it takes a global approach to examining the underlying issues that have shaped the times. At the same time, it does justice to the distinctive character of individual civilizations and regions. Political, economic, social, and cultural history are integrated into a chronologically ordered synthesis that is presented through a consistent, engaging single-author narrative.

[The Innovation Acid Test: Growth Through Design and Differentiation, Andrew M. Jones](#) , 2008, 0955008158, 9780955008153. What links the world's most dynamic, successful companies - the companies that are transforming the

way we live our lives? Rootling around in the Googlemould, Dr Andrew Jones has unearthed some remarkable connections and consistencies. In *The Innovation Acid Test*, he lays out for us the defining practices and procedures of a select few of these companies - Southwest Airlines, Whole Foods, Starbucks, Google, Innocent Drinks, Shanghai Tang and others. He pieces them together to reveal a pattern of distinctive ways in which they differentiate themselves from traditionalist firms: from managing their businesses and running their workplaces to talking to their customers and recruiting, motivating and rewarding their employees. From this pattern, he constructs an intriguing model, built on the principles of architecture, design and anthropology. Finally, he sets out the ground rules for implementing that model and creating organizations that are equipped not merely to 'manage the known' but also to 'build the unknown'. The result is a book that will catch the imagination of any reader interested in work and organizations. Today, Generation Y employees and ever-more-demanding customers are setting the agenda for business. *The Innovation Acid Test* offers a clear guide for any company seeking to transform itself into the kind of human-centred enterprise that is equipped to meet these challenges.

[Air Power as a Coercive Instrument, Daniel Byman, John G. McGinn, Keith Crane, Seth G. Jones, Rollie Lal, Ian O. Lesser](#) , 1999, 0833048287, 9780833048288. Coercion--the use of threatened force to induce an adversary to change its behavior--is a critical function of the U.S. military. U.S. forces have recently fought in the Balkans, the Persian Gulf, and the Horn of Africa to compel recalcitrant regimes and warlords to stop repression, abandon weapons programs, permit humanitarian relief, and otherwise modify their actions. Yet despite its overwhelming military might, the United States often fails to coerce successfully. This report examines the phenomenon of coercion and how air power can contribute to its success. Three factors increase the likelihood of successful coercion: (1) the coercer's ability to raise the costs it imposes while denying the adversary the chance to respond (escalation dominance); (2) an ability to block an adversary's military strategy for victory; and (3) an ability to magnify third-party threats, such as internal instability or the danger posed by another enemy. Domestic political concerns (such as casualty sensitivity) and coalition dynamics often constrain coercive operations and impair the achievement of these conditions. Air power can deliver potent and credible threats that foster the above factors while neutralizing adversary countercoercive moves. When the favorable factors are absent, however, air power--or any other military instrument--will probably fail to coerce. Policymakers' use of coercive air power under inauspicious conditions diminishes the chances of using it elsewhere when the prospects of success would be greater.

[Goodbye Mousie, Robie H. Harris](#) , 2001, 0689832176, 9780689832178. When I woke up this morning, I tickled Mousie's tummy. But Mousie didn't wake up. When a child learns that his pet mouse has died, at first he can't believe it. "Mousie is NOT dead!" he insists. "He's just...very...very sleepy this morning." But it takes time for the young narrator to understand that Mousie IS dead and he's not coming back. With the help of his family, the child finds out that it's perfectly okay to feel angry and sad when his pet mouse -- whom he loves -- dies. By voicing his feelings and asking questions, he finally begins to accept Mousie's death. Beautifully told by award-winning author Robie H. Harris and gently illustrated by world-renowned artist Jan Ormerod, "Goodbye Mousie" is a perfect book with which to help children cope with loss.

[Being and Becoming Kachin: Histories Beyond the State in the Borderworlds of Burma, Mandy Sadan](#) , 2013, 0197265553, 9780197265550. Since independence in 1948, Burma has suffered from many internal conflicts. One of the longest of these has been in the Kachin State, in the far north of the country where Burma has borders with India to the west and China to the east. In Being and Becoming Kachin Mandy Sadan explores the origins of the armed movement that started in 1961 and considers why it has continued for so long. Being and Becoming Kachin places the problems that have led to hostilities between the political heartland of Burma and one of its most important peripheries in a longer perspective than is usually the case. It explains how the experience of globalisation and the geopolitics of competing

imperial systems from the late eighteenth century onwards produced and then entrenched the politics of exclusion and resistance. However, it also uses detailed ethnographic research to explore the social and cultural dynamics of Kachin ethno-nationalism as it emerged during this period, providing a rich analysis that goes beyond the purely political. The research draws upon an extensive range of sources, including archival materials in Jinghpaw and an extensive study of ritual and ritual language. Making a wide variety of cross-disciplinary observations, it explains in depth and breadth how a region such as the Kachin State came into being. When combined with detailed local insights into how these experiences contributed to the historical development of modern Kachin ethno-nationalism, *Being and Becoming Kachin* encourages new ways of thinking about the Kachin region and its history of armed resistance, which has implications for how we understand many similar, troubled borderworlds in Burma and beyond.
