[Training Courses for Further Education College Lecturers: Report to the Review Committee on the Training of Further Education College Lecturers in Scotland, John Hall, Sue Mingard](#) , 1993, 0947833862, 9780947833862. This report presents an overview of training courses for further education lecturers in the United Kingdom and offers observations on developments in the field of further education lecturer training. Recommendations of previous reports concerning the training of further education lecturers are analyzed, and the current situation is examined. Standards set by the Training and Development Lead Body, which are intended to ensure that trainers, assessors, and internal verifiers achieve a level of competence that will underpin the implementation of National Vocational Qualifications, are discussed. The report then provides a comparison of the four full-time Certificate in Education courses available, at the Bolton Institute of Higher Education, Polytechnic/University of Huddersfield, Thames Polytechnic/University of Greenwich, and Polytechnic/University of Wolverhampton. Part-time programs available at Crewe and Alsager College of Higher Education, Croydon College, Centers validated by the CNAA, and the Scottish School of Further Education are described. An outline of the requirements of the City and Guilds Further and Adult Education Teacher's Certificate is provided. (JDD)

[Struggle for Power the Longest School Strike: In New York State History, Leon Bock, Thomas Kavunedus](#) , 2011,

1462846475, 9781462846474. Two people participating in the same events, yet on opposite sides, give an engrossing view of a struggle which engulfed a large community in northern Westchester County in New York State. It became the longest teachers strike in New York State's history. Even though they are personal memoirs, both authors try to give as full a picture of the personalities, institutions, and issues driving the struggle as each experienced it. The narrative is in two parts, side by side, and event by event. Both are impressionistic accounts that do not claim to be objective. Dr. Leon Bock's account is the viewpoint of a leader of a major institution, the Lakeland School District. In representing the district he had the heavy responsibility to merge the interests of students and parents, faculty, the taxpaying community, and the Board of Education. Mr. Thomas Kavunedus, a faculty member, served as a negotiator for the Lakeland Federation of Teachers. He saw his responsibilities as extending to the promotion of learning and teaching environment which would foster excellence. The contract with the school district, which Mr. Kavunedus had participated in promulgating years earlier, was a major step in raising teachers out of the dark ages of coffee in the boiler room, and hopefully greater professionalism. Both authors disagree with one another on many of the issues. Most of these issues bedevil our schools today. Yet, there is enough civility to recognize that partisanship need not be so all engulfing that it demonizes the other side and its objectives. No narrative of such a complex event can be totally accurate and objective. The authors try to focus on the interpersonal relationships, rather than serve as a textbook history of this series of complex events. There is no intention to discredit, or malign any of the personalities in the narrative; rather they are presented as the writers experienced them under conditions of stress.

[A Life Stripped Bare: Tiptoeing Through the Ethical Minefield, Leo Hickman](#) , 2005, 1903919606, 9781903919606. It is hardly news that a growing number of people want to step back from the brink of western consumerism and find a way to live an all-round cleaner existence - one that is not only easier on the physical body but one that is lighter on the conscience too. So how do we go about it? Most people fight shy of giving up their cars, or their toxic household products, their cheap washing machines, or dodgy, unethical bank accounts in order to make the world a better place. So Leo Hickman, resident consumer expert of the Guardian, decides that he will give up all these things instead and report back on whether it is possible to live a life that is western but aware. Leo is your average male consumer - with a young family and a job he commutes to. He is no green warrior and an innocent abroad when it comes to 'ethical' living. He is not going to preach, and he may have a few problems persuading even his wife and baby to give it a try. But he comes to this experiment with vigour.

Vincent Nagle introduces his readers to his work in the hospital where he has served for years as chaplain. Trite phrases just don't cut it when families are confronted by the mystery of suffering. "When I go into a hospital room, I go in with a broken heart, willing to share this adventure with these patients whose very selves are broken apart by illness. I don't want to give them false comfort, but real hope." Brief and intense fragments of hospital life are alternated with the fascinating story of Fr. Vincent's own journey to faith and the priesthood. "When I understood that in order to be truly alive I needed to return to the faith, my condition was that God not let me be separated from the difficulties of life." And God took him seriously.

[Pearl Harbor: FDR Leads the Nation Into War, Steven M. Gillon](#) , 2012, 046503179X, 9780465031795. Franklin D. Roosevelt famously called December 7, 1941, a date which will live in infamy. History would prove him correct; the events of that day when the Japanese bombed Pearl Harbor ended the Great Depression, changed the course of FDR's presidency, and swept America into World War II. In Pearl Harbor, acclaimed historian Steven M. Gillon provides a vivid, minute-by-minute account of Roosevelt's skillful leadership in the wake of the most devastating military assault in American history. FDR proved both decisive and deceptive, inspiring the nation while keeping the real facts of the attack a secret from congressional leaders and the public. Pearl Harbor explores the anxious and emotional events surrounding the attack on Pearl Harbor, showing how the president and the American public responded in the pivotal twenty-four hours that followed, a period in which America burst from precarious peace into total war.

For simplicity and acknowledging the most practical use as employed by non-native speakers, the examples used in this manual focus on the contents of documents having a commercial impact, particularly those establishing a contractual relationship. Even so, practical guidelines presented in this pocket guide, should result in all legal writing, being brief, clear and precise. New in the 2nd edition: Working steps in Legal Drafting Enlarged collection of specimen contracts An extremely useful tool for everyone who has to avoid dangerous legal or "painful" consequences that result from wrong wording! The author practised law in Canada and is qualified as a solicitor in England and Wales. He has worked for international organisations and lectured extensively throughout Europe and Asia. He currently practises law in Vienna, Austria as a solicitor and established European lawyer, and teaches at the law faculty of the University of Vienna.

[South Africa in World History, Iris Berger](#) , 2009, 019533793X, 9780195337938. This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa.. Stone Age foragers, farmers with iron technology, and pastoralists all interacted to create a complex society before Europeans arrived. In the seventeenth century, Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa. British conquest in the early nineteenth century brought an end to slavery, as well as new forms of colonial domination, tension between the British and the original Dutch settlers, armed struggle between expanding European communities and Africans (including the highly militarized Zulu kingdom), and intensive missionary activity that transformed many African societies. The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor, new clashes between British and Afrikaners, the final conquest of African societies, and new European migrants. During the twentieth-century, despite further economic development, African communities were increasingly impoverished. New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African and Afrikaner nationalists. The intensification of resistance in the 1970s and '80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid's economic and political legacy by building a new nonracial society. The book emphasizes social and cultural history, focusing on people's interactions and identities according to race, class, gender, religion and ethnicity. It also addresses changes in literature (both oral and written), music, and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes. While this emphasis reflects dominant trends in historical scholarship for the past two decades, it also includes recent material on environmental history and relationships between African Americans and South Africans. Where relevant, it highlights comparisons between South African and U.S. history.

[The Human Condition, John Kekes](#) , 2010, 0191615374, 9780191615375. The Human Condition is a response to the growing disenchantment in the Western world with contemporary life. John Kekes provides rationally justified answers to questions about the meaning of life, the basis of morality, the contingencies of human lives, the prevalence of evil, the nature and extent of human responsibility, and the sources of values we prize. He offers a realistic view of the human condition that rejects both facile optimism and gloomy pessimism; acknowledges that we are vulnerable to contingencies we cannot fully control; defends a humanistic understanding of our condition; recognizes that the values worth pursuing are plural, often conflicting, and that there are many reasonable conceptions of well-being. Kekes emphasizes the importance of facing the fact that man's inhumanity to man is widespread. He rejects as simple-minded both the view that human nature is basically good and that it is basically bad, and argues that our well-being depends on coping with the complex truth that human nature is basically complicated. Finally, Kekes argues that the scheme of things is indifferent to our fortunes and that we can rely only on our own resources to make what we can of our lives.

[Star Wars on Trial: Science Fiction And Fantasy Writers Debate the Most Popular Science Fiction Films of All Time, ,](#) , 2013, 1935251538, 9781935251538. Debates on the authenticity of the Star Wars franchise and the hero-or-villain status of George Lucas are at the heart of these essays by bestselling science-fiction authors. The incredible popularity of the

movies has led to the formation of strong emotions within the science fiction community on the strengths and flaws of the films, exemplified here by David Brin's attacks and Matthew Woodring Stover's defense of the movies. This intense examination of the epic works addresses a broad range of issues from politics, religion, and the saga's overall logic to the impact of the series on bookshelf space as well as science-fiction film. The question Is George Lucas a hero for bringing science fiction to a mass audience or a villain who doesn't understand the genre he's working for? is discussed before a final "Judge's Verdict" on the greatness or weakness of the franchise is reached.

This is the only reading inventory on the market to support the treatment of reading as a thinking process through questions and assessments that measure not only readers' ability to recall facts, but also whether they can draw logical conclusions about those facts and respond critically to those conclusions. This book includes both narrative and expository readers' passages for use with pre-K readers through readers in grade 9; and is written in an accessible, inviting style. Through the use of longer passages, multi-level assessments, and case studies, the authors provide a truly effective means to secure a differential analysis of a child's reading comprehension performance. Three distinct levels of comprehension questions: text-based, inferential, and critical-assist in grouping readers by ability levels, from simple recall to critical engagement with text. Case studies of three levels of diagnostic analysis helps teachers understand the difference between readers who are having genuine difficulty and readers who are simply reluctant. Rubrics for retelling and for fluency stress that word recognition must be assessed within the context of comprehension. Inclusion of the simplified miscue analysis technique highlights both the reader's strategies and his/her orientation. For pre-K -grade 9 teachers.

"In a remarkable tour de force of research, Shelley Pearen reveals the innermost thoughts of the people who assembled 150 years ago to negotiate the future of Manitoulin Island, the world's largest freshwater island. Working with long forgotten letters, reports and accounts written in English, French and Ojibwe. Pearen brings to life the people and events of

1861-63 through the actual words spoken and written by four key participants: William McDougall, head of the government's Indian Affairs department; Sasso Itawashkash, chief of the Sheshegwaning Anishinaabeg; Jean-Pierre Chon, Jesuit priest at the Holy Cross Roman Catholic Mission in Wikwemikong; and Peter Jacobs, Church of England missionary in Manitowaning, and himself Anishinaabe. For the first time, each of these players is given the stage to explain his own understanding of what actually happened before, during and after the signing of the still-contentious Great Manitoulin Island treaty of 1862. These four voices reveal fascinating personal stories of strengths and frailties."-- from back cover.

[Studying Peace: The Educational Rationale. Occasional Paper No. 4. Revised Edition, David W. Hicks](#) , 1986, 0946357064, 9780946357062. This paper seeks to clarify the current debate about studying peace in schools and classroom by exploring: (1) the breadth of concern encompassed by peace education; (2) the educational legitimation for studying peace and conflict in the classroom, and (3) curriculum implications of peace education. The problems of peace

encompass violence and war, inequality, injustice, environmental damage, and alienation. At its 18th session held in Paris (1974), the United Nations Educational, Scientific, and Cultural Organization General Conference issued its "Recommendations Concerning Education for International Understanding, Co-operation and Peace." These recommendations listed the following major problems of humankind that students should study: (1) the equality of rights; (2) the maintenance of peace; (3) the insurance of human rights; (4) economic growth and social development; (5) the conservation of natural resources; (6) the preservation of human cultural heritage; and (7) the United Nations' role in solving such problems. The curriculum for peace education should sharpen awareness about the existence of conflict between people and nations, investigate the cause of conflict and violence, and encourage the search for alternatives. The curriculum should develop skills of critical thinking, conflict resolution, and political literacy. Attitudes to be developed include self-respect, respect for others, ecological concern, and commitment to justice. (SM)

[The Knight: Book One of The Wizard Knight, Gene Wolfe](#) , 2005, 142991551X, 9781429915519. A young man in his teens is transported from our world to a magical realm that contains seven levels of reality. Very quickly transformed by magic into a grown man of heroic proportions, he takes the name Able and sets out on a quest to find the sword that has been promised to him, a sword he will get from a dragon, the one very special blade that will help him fulfill his life ambition to become a knight and a true hero. Inside, however, Able remains a boy, and he must grow in every sense to survive the dangers and delights that lie ahead in encounters with giants, elves, wizards, and dragons. His adventure will conclude next year in the second volume of The Wizard Knight, The Wizard. Gene Wolfe is one of the most widely praised masters of SF and fantasy. He is the winner of the World Fantasy Award for Life Achievement, the Nebula Award, twice, the World Fantasy Award, twice, the John W. Campbell Memorial Award, the British Fantasy Award, and France's Prix Apollo. His popular successes include the four-volume classic The Book of the New Sun. With this new series, Wolfe not only surpasses all the most popular genre writers of the last three decades, he takes on the legends of the past century, in a work that will be favorably compared with the best of J. R. R. Tolkien, E. R. Eddison, Mervyn Peake, and T. H. White. This is a book---and a series---for the ages, from perhaps the greatest living writer in (or outside) the fantasy genre. [Goya'S Dog, Damian Tarnopolsky](#) , 2009, 0143177540, 9780143177548. Edward Dacres is an unforgettable anti-hero, a dissolute abstract painter whose fortunes in London have dwindled to nothing. When a misdirected letter invites him to take part in a delegation to bring art to the "Colonies," Dacres seizes the opportunity. Once in North America, however, a series of mishaps forces Dacres to abandon the troupe and try his luck in the puritan climate of 1939 Toronto, most of whose citizens have their thoughts on the war and don't care a whit for his painted triangles. Most, that is, with the notable exception of a beautiful heiress with an eye for art and a wilful determination to save Dacres from himself. Goya's Dog is a love story laced with satire and a historical novel bearing on contemporary truths. A picaresque tale of gin, cowardice, and artistic paralysis, it toys with our notions of the artist's role in times of war and considers the selfishness inherent in our passions and the self-sacrifice fundamental to love.

Combining the familial loyalties and betrayals of Norman Maclean's A River Runs Through It with the dead-on perfect ear for western dialect and local ritual of Thomas McGuane's Northing but Blue Skies, he presents a story that is both fresh and powerful. Laced with the solace of the great outdoors and the spirituality of the Indians on the local reservation, The Sky Fisherman is set in a small town in the Northwest, where the interwoven

currents of love, death, and a boy's coming of age flow swiftly below a surface life of hard work and confrontation with the forces of nature. The boy, Culver, his twice-married mother, and his charismatic uncle Jake are shadowed by the death of Culver's father in a fishing accident. When a suspicious fire destroys the town mill and three murders occur, Culver's world is engulfed by the dangers swirling around him. [The Afghan Way of War: How and Why They Fight, Robert Johnson](#) , 2011, 0199798567, 9780199798568. Focusing on key episodes in Afghanistan's long history of conflict with foreign forces from the early nineteenth century to the present, this book sheds new light on the Afghan "Way of War." Robert Johnson shows that, contrary to the stereotypes of primitive warriors enflamed with religious fanaticism, Afghan warfare has been marked by constant change as Afghani methods evolved to face new threats. From the dynastic struggles and popular resistance movements of the nineteenth century to the ideological confrontations of recent decades, Afghans have long resisted political coercion, military intervention, and foreign influence. To do so, they have developed sophisticated strategic approaches to deal with both internal unrest and foreign intrusion, while at the tactical level outthinking and outfighting their opponents at every step. The final part of the book, which deals with how the Taliban has contested Western intervention by borrowing from traditions in Afghan history and culture, will be of considerable topical interest in light of the ongoing conflict in Afghanistan.

[The Nations of Britain, Christopher G. A. Bryant](#) , 2006, 0198742878, 9780198742876. Is Britain one nation, or many? Is

it a nation with more than a thousand years of history, or 'an invented nation', only as old as the 1707 union of England and Scotland? Is devolution in Scotland and Wales a step towards the eventual break-up of Britain? And today, what does it mean to be British? The Nations of Britain offers an up-to-date analysis of these questions, drawing on sociology, politics, history and cultural studies to give a thorough account of the national relationships that constitute modern Britain. The book is divided into sections focusing on Scotland, Wales and England, and also on the legacy of Empire, the British relationship with Ireland, Europe and the Commonwealth, and the future of the British union. In each of these sections, recurrent themes such as cultural identity, multiculturalism, economy, politics and civil society are explored. The book examines different conceptions of England, Wales, Scotland and Britain, and argues that Britain will continue to accommodate national and cultural differences while itself remaining a nation. Constitutionally, today's asymmetrical devolution could lead to the break-up of Britain, but it is more likely to evolve into an asymmetrical federalism. This book will be a valuable resource for students and teachers of British politics, sociology and contemporary history, and for other readers interested in the future of Britain.

[Mythologies, Roland Barthes](#) , 1993, 0099972204, 9780099972204. "[Mythologies] illustrates the beautiful generosity of Barthes's progressive interest in the meaning (his word is signification) of practically everything around him, not only the books and paintings of high art, but also the slogans, trivia, toys, food, and popular rituals (cruises, striptease, eating, wrestling matches) of contemporary life . . . For Barthes, words and objects have in common the organized capacity to say something; at the same time, since they are signs, words and objects have the bad faith always to appear natural to

their consumer, as if what they say is eternal, true, necessary, instead of arbitrary, made, contingent. Mythologies finds Barthes revealing the fashioned systems of ideas that make it possible, for example, for 'Einstein's brain' to stand for, be the myth of, 'a genius so lacking in magic that one speaks about his thought as a functional labor analogous to the mechanical making of sausages.' Each of the little essays in this book wrenches a definition out of a common but constructed object, making the object speak its hidden, but ever-so-present, reservoir of manufactured sense."-Edward W. Said

[Men in Black, John Harvey](#) , 1997, 0948462744, 9780948462740. Mr. Pink: "Why can't we pick out our own color?" Joe: "I tried that once, it don't work. You get four guys fighting over who's gonna be Mr. Black." Quentin Tarantino, *Reservoir Dogs* Men's clothes went black in the nineteenth century. Dickens, Ruskin and Baudelaire all asked why it was, in an age of supreme wealth and power, that men wanted to dress as if going to a funeral. The answer is in this history of the color black. Over the last 1000 years there have been successive expansions in the wearing of black from the Church to the Court, from the Court to the merchant class. Though black as fashion was often smart and elegant, its growth as a cultural marker was fed by several currents in Europe's history in politics, asceticism, religious warfare. Only in the nineteenth century, however, did black fully come into its own as fashion, the most telling witnesses constantly saw connections between the taste for black and the forms of constraint with which European society regimented itself. Concentrating on the general shift away from color that began around 1800, Harvey traces the transition to black from the court of Burgundy in the 15th century, through 16th-century Venice, 17th-century Spain and the Netherlands. He uses paintings from Van Eyck and Degas to Francis Bacon, religious art, period lithographs, wood engravings, costume books, newsphotos, movie stills and related sources in his compelling study of the meaning of color and clothes. Although in the twentieth century tastes have moved toward new colors, black has retained its authority as well

as its associations with strength and cruelty. At the same time black is still smart, and fashion keeps returning to black. It is, perhaps, the color that has come to acquire the greatest, most significant range of meaning in history.

There's no scoreboard in the sanctuary, and the only plate is probably for the offering. But every church leader needs to know how to win, and every congregation needs to know when to cheer. This insightful book speaks to every church leader who yearns for a simpler, more effective approach to ministry. An engaging parable about one overwhelmed pastor is followed by an overview of seven successful team practices, each one developed and applied in a ministry setting. Reinforced by relevant discussion questions, these clear, easy, and strategic practices can turn any ministry into a winning team. Your ministry is perfectly designed to produce the results you are currently experiencing. If you are satisfied with those results, you don't need this book. If not, it's time for a change. Like your own personal trainer, *7 Practices of Effective Ministry* is an insightful guide for any leader who yearns for a simpler, more effective approach to ministry. Here are seven strategic principles that when put into play will bring focus and clarity to everything you do and turn your ministry into a winning team. *Story Behind the Book* Looking for ways to help pastors faced with hectic lives and depleted resources, Andy Stanley, Reggie Joiner, and Lane Jones decided to write a parable about the complicated life of a local pastor. Rather than come straight at those in ministry with formulas and lists, they engage readers in an effort to have them identify with the character. For many years, I practiced and taught church growth. What I have witnessed as a member at North Point takes church growth to a whole new level. Andy and his team communicate principles that will

[The Justice Cascade: How Human Rights Prosecutions Are Changing World Politics, Kathryn Sikkink](#) , 2012, 0393919366, 9780393919363. Over the past three decades, hundreds of government officials have gone from being immune to any accountability for their human rights violations to being the subjects of highly publicized trials in Latin America, Europe, and Africa, resulting in enormous media attention and severe consequences. Here, renowned scholar Kathryn Sikkink brings to light the groundbreaking emergence of these human rights trials as a modern political tool, one that is changing the face of global politics as we know it. Drawing on personal experience and extensive research, Sikkink explores the building of this movement toward justice, from its roots in Nuremberg to the watershed trials in Greece and Argentina. She shows how the foundations for the stunning, public indictments of Slobodan Milosevic and Augusto Pinochet were laid by the long, tireless activism of civilians, many of whose own families had been destroyed, and whose fight for justice sometimes came at the risk of their own lives and careers. She also illustrates what effect the justice cascade has had on democracy, conflict, and repression, and what it means for leaders and citizens everywhere, including the policymakers behind our own "war on terror."--Publisher description.

Following after NIKOLA TESLA ON HIS WORK WITH ALTERNATING CURRENTS & THEIR APPLICATION TO WIRELESS TELEGRAPHY, TELEPHONY & TRANSMISSION OF POWER, this is the second in a three part series presenting what has been, up until now, unavailable material on the pioneering work of Nikola Tesla in field of radio frequency electrical engineering. While first delivered under the title "On the Streams of Lenard & Roentgen with Novel Apparatus for Their Use" the information carried within the text of the lecture goes far beyond this topic. In addition to his opening remarks on X-ray discovery, a major portion of Tesla's commentary deals with high frequency resonators used in conjunction with his work, plus clear descriptions of stroboscopic instruments he designed for measurement of frequency & phase. Other topics addressed include wireless receiving methods & the genesis of Tesla's particle beam projector of 1937. During the talk Tesla had displayed approximately 120 drawings of specially constructed vacuum tubes, many being of the Lenard type & also the single-electrode type of his own design. Among the drawings were also tubes used in his wireless communications experiments. Computer enhanced photographs of these images are among the 30 illustrations which fill out this fine volume. [Ancient Umbria: State, Culture, and Identity in Central Italy from the Iron Age to the Augustan Era, Guy Jolyon Bradley](#) , 2000, 0199245142, 9780199245147. How should we understand the ways in which the regions of Italy were affected by

Roman imperialism? This book, which is the first full-scale treatment of ancient Umbria in any language, takes a balanced view of the region's history in the first millennium BC, focusing on local actions and motivations as much as the effect of outside influences and Roman policies. Through a careful reading of all the types of evidence it provides an important challenge to traditional treatments emphasising the 'Romanization' of the region, arguing that this is a poor explanation for the complexity of local societies in the late Republican period. Instead it proposes that other trends, particularly the organization of states, help to explain the fascinating plurality of identities that are evident in the imperial period and allow us to appreciate the diversity of local societies that emerged in both mountain and lowland areas of Umbria.

The subject of two articles recently published in the New York Times and endorsed by many leading economists, the authors have developed a completely new process for accurately assessing the value of your home or a potential home. For generations, buying a home has been the best investment Americans could make. But what about now? In the wake of the "housing bubble," some talking heads claim that it's become foolish to own a home with a mortgage. They're wrong. In Houseonomics, two leading economists demonstrate why owning a home is still an excellent

investment for most people in most places and help you make smarter decisions wherever you are. This book isn't for aspiring slumlords or flippers: it's for anyone who simply wants to move towards financial security, with a roof over their heads, and a home to call their own. You won't find "too good to be true" schemes here: you'll find a sensible, rational, and totally up-to-date explanation of the economics of home ownership. You'll discover how to calculate the intrinsic fundamental value of a house based on a completely new valuation strategy developed by the authors; develop a vision for financial prosperity via home ownership; and treat housing decisions as the investment decisions they really are. Learn how to negotiate more effectively when purchasing, selling, financing, refinancing, or remodeling; decide when you should prepay your mortgage; and intelligently evaluate rental/vacation properties.

[Fundamentals of ActionScript 3.0: Develop and Design, Doug Winnie](#) , 2011, 0132789043, 9780132789042. Adobe Flash Professional is the most popular software available for creating animations for the Web. Most people start using Flash to create vector-based animations that output small file sizes perfect for the Web. Later they want to branch out into creating rich interactive experiences for websites and mobile devices, and for that they need to learn ActionScript. Doug Winnie draws on the experience he's gained from his years as an educator to teach not only what ActionScript can do, but also to show how the code works. This gives the reader a deeper understanding of how ActionScript functions, and gives them the power to come up with original solutions when creating their own projects. Doug's book dives right into the concepts of manipulating Flash objects and the fundamentals of functions and mathematical operators. After presenting events and using scripts to control the Flash timeline, classes and conditionals are covered in depth. The final part of the book covers creating desktop applications with Adobe AIR, developing mobile applications, and working with external code libraries. Real-world projects are sprinkled generously throughout the book and Appendices include information on debugging, deciphering documentation, and using Adobe Flash Builder as an ActionScript development environment.

[Pest Management and Phytosanitary Trade Barriers, Neil W. Heather, Guy J. Hallman](#) , 2008, 1845933443,

9781845933449. A significant amount of the world's economy is based upon the international trade of agricultural produce. For the producing countries, a growing concern is the potential economic and ecological damage that invasive species could cause. While threats can be decreased through the regulation of items potentially carrying invasive species, the effect of such restrictions on international trade also needs to be considered. A balance must therefore be met that permits the transfer of produce while filtering out unwanted pests. Drawing on the author's extensive experience, the social and financial implications of phytosanitary trade barriers are reviewed. This book offers valuable and comprehensive coverage of pest related barriers and strategies for their implementation.

[The MoveOn Effect: The Unexpected Transformation of American Political Advocacy, David Karpf](#) , 2012, 0199898367, 9780199898367. The Internet is facilitating a generational transition within America's advocacy group system. New "netroots" political associations have arisen in the past decade and play an increasingly prominent role in citizen political mobilization. At the same time, the organizations that mediate citizen political engagement and sustained collective action are changing. They rely upon modified staff structures and work routines. They employ novel strategies and tactical repertoires. Rather than "organizing without organizations," the new media environment has given rise to "organizing through different organizations." The MoveOn Effect provides a richly detailed analysis of this disruptive transformation. It highlights changes in membership and fundraising regimes - established industrial patterns of supporter interaction and revenue streams - that were pioneered by MoveOn.org and have spread broadly within the advocacy system. Through interviews, content analysis, and direct observation of the leading netroots organizations, the book offers fresh insights into 21st century political organizing. The book highlights important variations among the new organizations - including internet-mediated issue generalists like MoveOn, community blogs like DailyKos.com, and neo-federated groups like DemocracyforAmerica.com. It also explores a wider set of netroots infrastructure organizations that provide supporting services to membership-based advocacy associations. The rise of the political netroots has had a distinctly partisan character: conservatives have repeatedly tried and failed to build equivalents to the organizations and infrastructure of the progressive netroots. The MoveOn Effect investigates these efforts, as well as the late-forming Tea Party movement, and introduces the theory of Outparty Innovation Incentives as an explanation for the partisan adoption of political technology. Written by a political scientist who is also a longtime political organizer, The MoveOn Effect offers a widely-accessible account of the Internet's impact on American politics. Operating at the intersection of practitioner and academic knowledge-traditions, Karpf provides a reassessment of many longstanding claims about new media and citizen political engagement.

[The Revelation of God, Peter Jensen](#) , 2002, 0830815384, 9780830815388. In modern times the Christian faith's claim to possess a unique revelation of God has faced numerous challenges. A central issue has been the role of the Bible. While some have continued to defend the view that the Bible, inspired by God, is God's self-revelation in a direct way, others, have argued that God's self-revelation is to be found primarily in divine action or in the person of Jesus Christ, rather than in the Scriptures as such. In a fresh approach, Peter Jensen argues that it is better to follow the biblical categories of the knowledge of God and the gospel than to start from "revelation" as an abstract concept. First, Jensen focuses on revelation, whether special or general, from the viewpoint of the knowledge of God through the gospel. Next, he examines the nature and authority of Scripture and our approach to reading it. Finally, he turns to the revelatory work of the Holy Spirit through illumination. The result is a creative and compelling exposition of the evangelical understanding of revelation for the contemporary scene.

[Automating with SIMATIC, Hans Berger](#) , 2006, 3895782769, 9783895782763. Totally Integrated Automation is the

concept by means of which SIMATIC controls machines, manufacturing systems and technical processes. Taking the example of the S7-300/400 programmable controller, this book provides a comprehensive introduction to the architecture and operation of a state-of-the-art automation system. It also gives an insight into configuration and parameter setting for the controller and the distributed I/O. Communication via network connections is explained, along with a description of the available scope for operator control and monitoring of a plant. As the central automation tool, STEP 7 manages all relevant tasks and offers a choice of various text and graphics-oriented PLC programming languages. The available languages and their respective different features are explained to the reader. For this third edition, the contents of all sections of the book have been revised, updated and the new data communications with PROFINET IO have been added. The STEP 7 basic software is explained in its latest version. The book is ideal for those who have no extensive prior knowledge of programmable controllers and wish for an uncomplicated introduction to this subject.

[The Air Spora: A manual for catching and identifying airborne biological particles](#), Maureen E. Lacey, Jonathan S. West , 2007, 0387302530, 9780387302539. The Air Spora is an illustrated guide to trapping, identifying and quantifying airborne biological particles such as fungus and plant spores and pollen. This book will be of use to anyone interested in aerobiology or studying applied aspects such as dispersal and effect of allergens, or human, animal and plant pathogens. Including a comprehensive review of what is in the air and detailing the historical development of theories leading to modern aerobiology, the book explains the fundamental processes behind airborne dispersal and techniques used to sample, identify and quantify biological particles. Methods are explained in a step-by-step guide for the use of standard air sampling devices. Although formats applicable to modern molecular and immunological techniques are described, the emphasis of the book is on simple visual identification of particles in air samples using traditional microscopy. Consequently a chapter on setting-up and using a light microscope is included, although experienced researchers can skip to chapters showing photographs of examples of the Air Spora and nine colour plates of paintings of airborne particles at a magnification of x1000. 'I recommend this book to those actively running or thinking of running a pollen and spore trapping program. It will also be of value to doctors, allergists, and those teaching the basics of palynology, wishing to include a lecture or two on air spora.' David M. Jarzen, Florida Museum of Natural History In: The Newsletter of the American Association Of Stratigraphic Palynologists, 2007(40:2)
