[Material Architecture, John Fernandez](#) , 2012, 113514432X, 9781135144326. Composed of a series of essays, this book deals with the broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials. It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them. The book is organized into three sections; Time looks at how the materials used in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design. Materials covers all five material families; metals, polymers, ceramics, composites and natural materials giving in depth information on their properties, behavior, origins and uses in design. It also introduces a review of the cutting edge research for each family. Systems outlines the technical design-orientated research that uncovers how new architectural assemblies can be designed and engineered. All of this practical advice is given along with many real case examples illustrating how this knowledge and information has been, and can be, used in architectural design.

Diagnostic Molecular Pathology: A Practical Approach, Volumes I and II bring together a broad spectrum of protocols relevant to the routine molecular analysis of pathological samples. Volume II demonstrates applications of molecular techniques to clinical samples, including the use of PCR, DNA sequencing, and nucleic acid hybridization for such diverse purposes as pathogen identification and forensic studies. For all the protocols there is expert guidance and detailed instruction on how to ensure accuracy and reliability, which will appeal to people working at all levels in pathology.

application comes from the trinity of technologies understood by the web browser: HTML, JavaScript, and CSS. These technologies have been undergoing rapid evolution in the last five years with the ascension of HTML5 and CSS3. These technologies have not only allowed for more compelling experiences for users using desktop browsers, they have also made it possible to build rich experiences for users using tablets and smartphones. Of course web applications are more than just the code that runs in a browser. They also need server-side technologies to enable different users of the same site to interact with each other. The list of server-side technologies seems to always be getting bigger. Whether you prefer high performance, statically typed languages like Java and C#, or dynamic languages like PHP, Python, and Ruby, there are numerous frameworks and tools available to help you rapidly build sophisticated web applications, and this bibliography will help you master them.

[Criminal Violence: Patterns, Causes, and Prevention, Marc Riedel, Wayne N. Welsh](#) , 2008, 0195332482, 9780195332483. Now in a new edition, *Criminal Violence: Patterns, Causes, and Prevention* provides a comprehensive and compelling review of this explosive field. Noted criminologists Marc Riedel and Wayne Welsh make the "big picture" of criminal violence accessible to undergraduates--without oversimplifying the topic, they offer broad yet detailed coverage of issues, theories, and controversies. Two new chapters focus on domestic and international terrorism. *Criminal Violence* begins by (1) examining meanings and measures of violence; (2) considering theories used to explain violence; (3) exploring violence in other countries; and (4) providing a historical account of violence in the United States. The next section covers types of criminal violence, including homicide and assault, robbery, rape and sexual assault, and hate crimes. The book then shifts its focus to violence in specific settings and contexts, discussing family violence, workplace violence, school violence, gang violence, guns and violence, drugs and violence, homicide and aggravated assault, robbery, hate crimes, and rape and sexual assault. The final chapter brings together the major themes of criminal violence--its patterns, causes, and prevention. A unique and engaging three-part framework (Patterns, Explanations, and Interventions) discusses each type of violence. This helps students understand the important relationships between research, theory, and application: * Patterns: Describe the characteristics of victims, offenders, and offenses; places where violence occurs frequently; and trends over time * Explanations: Examine the major theories that are used to understand each type of violence * Interventions: Propose solutions for each type of violence, including

diverse legal and social strategies-both proactive (e.g., prevention) and reactive (e.g., punishment)

[Naturalism Without Mirrors, Huw Price](#) , 2011, 0195084330, 9780195084337. This volume brings together fourteen major essays on truth, naturalism, expressivism and representationalism, by one of contemporary philosophy's most challenging thinkers. Huw Price weaves together Quinean minimalism about truth, Carnapian deflationism about metaphysics, Wittgensteinian pluralism about the functions of declarative language, and Rortyan skepticism about representation to craft a powerful and sustained critique of contemporary naturalistic metaphysics. In its place, he offers us not nonnaturalistic metaphysics, or philosophical quietism, but a new positive program for philosophy, cast from a pragmatist mold. This collection will be essential reading for anyone interested naturalism, pragmatism, truth, expressivism, pluralism and representationalism, or in deep questions about the direction and foundations of contemporary philosophy. It will be especially important to practitioners of analytic metaphysics, if they wish to confront the presuppositions of their own discipline. Price recommends a modest explanatory naturalism, in the sense of Hume: naturalism about own linguistic behavior, regarded as a behavior of natural creatures in a natural environment. He shows how this viewpoint privileges use and function over truth and reference, and expression over representation, as useful theoretical categories for the core philosophical project; and thereby undermines the semantic presuppositions of contemporary analytic metaphysics. At the same time, it offers an attractive resolution of the so-called "placement problems", that so preoccupy metaphysical naturalists--a global expressivism, with affinities both to the more local expressivism of writers such as Blackburn and Gibbard, and to Brandom's global inferentialism.

9780123746283. While everyone knows fruits and vegetables are beneficial to good health, it's increasingly seen as important to know which ones can be effective in treating specific illnesses. For example, which are good for cardiac care? Which can help combat and treat asthma? What are the safety concerns to be aware of when using herbs in combination with traditional medicines?Diet and nutrition are vital keys to controlling or promoting morbidity and mortality from chronic diseases, and the multitude of biomolecules in dietary fruits and vegetables play a crucial role in health maintenance. They may, therefore, be more effective and certainly could have different actions beyond nutrients however this science is still evolving. This book brings together experts working on the different aspects of supplementation, foods, and plant extracts, in health promotion and disease prevention. Their expertise and experience provide the most current knowledge to promote future research. Dietary habits need to be altered, for most people and the conclusions and recommendations from the various chapters in this book will provide a basis for that change.The overall goal of this book is to provide the most current, concise, scientific appraisal of the efficacy of key foods and constituents medicines in dietary plants in preventing disease and improving the quality of life. While vegetables have traditionally been seen to be good sources of vitamins, the roles of other constituents have only recently become more widely recognized. This book reviews and often presents new hypotheses and conclusions on the effects of different

bioactive components of the diet, derived particularly from vegetables, to prevent disease and improve the health of various populations. * Identify bioactive fruit and vegetable options for prevention or treatment of illness* Moves from general overview to disease specific applications providing a framework for further research and deeper understanding* Includes discussion of issues and challenges, permitting critical analysis and evaluation

[Encapsulation Technologies for Electronic Applications, Haleh Ardebili, Michael Pecht](#) , 2009, 0815519702, 9780815519706. Electronics are used in a wide range of applications including computing, communication, biomedical, automotive, military and aerospace. They must operate in varying temperature and humidity environments including indoor controlled conditions and outdoor climate changes. Moisture, ionic contamination, heat, radiation and mechanical stresses are all highly detrimental to electronic devices and can lead to device failures. Therefore, it is essential that the electronic devices be packaged for protection from their intended environments, as well as to provide handling, assembly, electrical and thermal considerations. Currently, more than 99% of microelectronic devices are plastic encapsulated. Improvements in encapsulant materials, and cost incentives have stretched the application boundaries for plastic electronic packages. Many electronic applications that traditionally used hermetic packages such as military are now using commercial-off-the-shelf (COTS) plastic packages. Plastic encapsulation has the advantages of low cost, smaller form factors, and improved manufacturability. With recent trends in environmental awareness, new environmentally friendly or 'green' encapsulant materials (i.e. without brominated additives) have emerged. Plastic packages are also being considered for use in extreme high and low temperature electronics. 3-D packaging and wafer-level-packaging (WLP) require unique encapsulation techniques. Encapsulant materials are also being developed for micro-electro-mechanical systems (MEMS), bio-MEMS, bio-electronics, and organic light-emitting diodes (O-LEDs). This book offers a comprehensive discussion of encapsulants in electronic applications. The main emphasis is on the encapsulation of microelectronic devices; however, the encapsulation of connectors and transformers is also addressed. This book discusses 2-D and 3-D packaging and encapsulation, encapsulation materials including environmentally friendly 'green' encapsulants, and the properties and characterization of encapsulants. Furthermore, this book provides an extensive discussion on defects and failures related to encapsulation, how to analyze such defects and failures, and how to apply quality assurance and

qualification process for encapsulated packages. This book also provides information on the trends and challenges of encapsulation and microelectronic packages including application of nanotechnology. Guidance on the selection and use of encapsulants in the electronics industry, with a particular focus on microelectronics Coverage of environmentally friendly 'green encapsulants' Practical coverage of faults and defects: how to analyze them and how to avoid them

[Drifters Free a Journey of Love, Freedom and Hope, William G Kelly, Sabryna M Kelly](#) , 2008, 0982235909, 9780982235904. What if we played by all the rules throughout our life only to wake one morning to find all that security we worked so hard to create fell apart, disappeared without a trace. Would we then find ourselves in a position of being free but unable to act on it or even recognize that freedom? Or would we be so consumed with trying to get back what we once had we would be unable to see any new opportunities in our life? This is our story, a story of growing up and taking command of our lives. This is our story of experiencing the lessons of letting go of what we believed was keeping us safe and opening ourselves to what life has to offer us. This is also a story of stepping outside of the safety of the known, the sense of security derived from being within the consistency of what is considered a normal life, the norm, the day-to-day grind most of us identify as what life is all about.

[Cardiovascular Disease in End-stage Renal Failure, Joseph Loscalzo, Grard M. London](#) , 2000, 0192629875, 9780192629876. A better understanding of the pathophysiology of renal failure coupled with technological advances in dialysis techniques and renal transplantation have greatly improved the prognosis and survival for patients with end-stage renal disease (ESRD). Unfortunately, the advances and success of treatment are limited by a number of extrarenal complications that can cause significant morbidity and mortality. Of these, cardiovascular abnormalities are the most common, with cardiac complications alone accounting for more than 40% of deaths in international registries. The importance of cardiovascular complications has become more apparent in recent years with the increased prevalence of diabetes mellitus and vascular nephropathy and with the general ageing of patients with ESRD. The past decade has witnessed enormous advances in understanding the causes and pathophysiology of cardiovascular disease, and their diagnosis, treatment, and prevention. It is, therefore, of importance for physicians caring for patients with end-stage renal failure to understand the pathogenesis of cardiovascular complications, to become familiar with modern diagnostic tools and techniques, and to recognise and treat these complications. The goal of this text is to provide a comprehensive review of the pathophysiology and clinical manifestations of the principal cardiovascular complications in patients with chronic renal failure. The text is intended to assist nephrologists, cardiologists, and internists who care for these patients. The book includes nineteen chapters and is organised in three parts. The first includes three chapters dealing with the epidemiology of cardiovascular disease in patients with end-stage renal failure. The second comprises eight chapters on the basic pathophysiology and pathobiology of cardiovascular diseases in the setting of end-stage renal failure. The third includes eight chapters focussing on clinical manifestations and diagnosis of cardiovascular disease in patients with end-stage renal failure and their management.

[Effective Surveillance for Homeland Security: Balancing Technology and Social Issues, Francesco Flammini, Roberto Setola, Giorgio Franceschetti](#) , 2013, 1439883246, 9781439883242. Effective Surveillance for Homeland Security:

Balancing Technology and Social Issues provides a comprehensive survey of state-of-the-art methods and tools for the surveillance and protection of citizens and critical infrastructures against natural and deliberate threats. Focusing on current technological challenges involving multi-disciplinary problem analysis and systems engineering approaches, it provides an overview of the most relevant aspects of surveillance systems in the framework of homeland security. Addressing both advanced surveillance technologies and the related socio-ethical issues, the book consists of 21 chapters written by international experts from the various sectors of homeland security. Part I, *Surveillance and Society*, focuses on the societal dimension of surveillance stressing the importance of societal acceptability as a precondition to any surveillance system. Part II, *Physical and Cyber Surveillance*, presents advanced technologies for surveillance. It considers developing technologies that are part of a framework whose aim is to move from a simple collection and storage of information toward proactive systems that are able to fuse several information sources to detect relevant events in their early incipient phase. Part III, *Technologies for Homeland Security*, considers relevant applications of surveillance systems in the framework of homeland security. It presents real-world case studies of how innovative technologies can be used to effectively improve the security of sensitive areas without violating the rights of the people involved. Examining cutting-edge research topics, the book provides you with a comprehensive understanding of the technological, legislative, organizational, and management issues related to surveillance. With a specific focus on privacy, it presents innovative solutions to many of the issues that remain in the quest to balance security with the preservation of privacy that society demands.

[Terrorism and the UN: Before and After September 11, Jane Boulden, Thomas G. Weiss](#) , 2004, 025311098X, 9780253110985. How has the United Nations dealt with the question of terrorism before and after September 11? What does it mean that the UN itself has become a target of terrorism? *Terrorism and the UN* analyzes how the UN's role in dealing with terrorism has been shaped over the years by the international system, and how events such as September 11 and the American intervention in Iraq have reoriented its approach to terrorism. The first half of the book addresses the international context. Chapters in this part consider the impact of September 11 on the UN's concern for the rights and security of states relative to those of individuals, as well as the changing attitudes of various Western powers toward multilateral vs. unilateral approaches to international problems. The second half of the book focuses more closely on the UN, its values, mechanisms, and history and its future role in preventing and reacting to terrorism. The Security Council's position on and reactions to terrorist activities are contrasted with the General Assembly's approach to these issues. What role the UN might play in suppressing the political economy of terrorism is considered. A concluding chapter looks at broader, more proactive strategies for addressing the root causes of terrorism, with an emphasis on social justice as a

key to conflict prevention, a primary concern of the UN, particularly the General Assembly, before September

[Globalization, Growth, and Governance: Creating an Innovative Economy, Jonathan Michie, John Grieve Smith](#) , 1998, 0198293445, 9780198293446. This book is about the processes of innovation at the global, national, and corporate levels. It explores the contexts, complexities, and contradictions of innovation from a range of disciplinary perspectives and is divided into three main sections. In the first on Globalization and Technology, international contributors explore the links between changing systems of production and competitiveness; the impact of new technology and innovation on international labour markets; and the innovation practices of global firms. In the section on Innovation and Growth, a close look is taken at the innovation decisions and activities of individual firms. The evidence in these chapters challenges many assumptions about the nature of competitive behaviour and the co-operative links between firms. In the section on Governance, Business Performance, and Public Policy, the contributors examine the relationship between governance systems and firms' innovation strategies and decisions, assessing the capabilities and characteristics of different models of capitalism. The book concludes with a discussion of the most effective approach to industrial policy in the 'innovative economy'. Interdisciplinary and international in its scope this book provides important evidence and arguments on the processes of innovation and in so doing addresses real challenges for policy-makers, managers, and academics alike.

The aim of the book is to analyse the factors that have influenced wind power outcomes in a range of countries which have featured significant wind power deployment programmes. A central theme is the relationship between patterns of ownership and the outcomes. These flow from different social environments, but they are associated with different types of planning outcome and deployment rates. Grass roots ownership is more widespread than is commonly thought, although it is not a panacea for effective wind power programmes. Financial policies used to promote wind power also have important influences of the rates of deployment. However, what seems to be most important for wind power deployment is a double coincidence of widespread social support for wind power deployment and effective financial support systems for wind power.

[Inventing Japan: 1853-1964, Ian Buruma](#) , 2003, 1588362825, 9781588362827. In a single short book as elegant as it is wise, Ian Buruma makes sense of the most fateful span of Japan's history, the period that saw as dramatic a

transformation as any country has ever known. In the course of little more than a hundred years from the day Commodore Matthew Perry arrived in his black ships, this insular, preindustrial realm mutated into an expansive military dictatorship that essentially supplanted the British, French, Dutch, and American empires in Asia before plunging to utter ruin, eventually emerging under American tutelage as a pseudo-Western-style democracy and economic dynamo. What explains the seismic changes that thrust this small island nation so violently onto the world stage? In part, Ian Buruma argues, the story is one of a newly united nation that felt it must play catch-up to the established Western powers, just as Germany and Italy did, a process that involved, in addition to outward colonial expansion, internal cultural consolidation and the manufacturing of a shared heritage. But Japan has always been both particularly open to the importation of good ideas and particularly prickly about keeping their influence quarantined, a bipolar disorder that would have dramatic consequences and that continues to this day. If one book is to be read in order to understand why the Japanese seem so impossibly strange to many Americans, *Inventing Japan* is surely it. From the Hardcover edition.

[Individual Criminal Responsibility in International Law, Elies van Sliedrecht](#) , 2012, 0191627755, 9780191627750. This book examines the concept of individual criminal responsibility for serious violations of international law, i.e. aggression, genocide, crimes against humanity and war crimes. Such crimes are rarely committed by single individuals. Rather, international crimes generally connote a plurality of offenders, particularly in the execution of the crimes, which are often orchestrated and masterminded by individuals behind the scene of the crimes who can be termed 'intellectual perpetrators'. For a determination of individual guilt and responsibility, a fair assessment of the mutual relationships between those persons is indispensable. By setting out how to understand and apply concepts such as joint criminal enterprise, superior responsibility, duress, and the defence of superior orders, this work provides a framework for that assessment. It does so by bringing to light the roots of these concepts, which lie not merely in earlier phases of development of international criminal law but also in domestic law and legal doctrine. The book also critically reflects on how criminal responsibility has been developed in the case law of international criminal tribunals and courts. It thus illuminates and analyses the rules on individual responsibility in international law.

[Gotham: a history of New York City to 1898, , Edwin G. Burrows, Mike Wallace, Mike L. Wallace](#) , 1999, 0195116348, 9780195116342. To European explorers, it was Eden, a paradise of waist-high grasses, towering stands of walnut, maple, chestnut, and oak, and forests that teemed with bears, wolves, raccoons, beavers, otters, and foxes. Today, it is the site of Broadway and Wall Street, the Empire State Building and the Statue of Liberty, and the home of millions of

people, who have come from every corner of the nation and the globe. In Gotham, Edwin G. Burrows and Mike Wallace have produced a monumental work of history, one that ranges from the Indian tribes that settled in and around the island of Manna-hata, to the consolidation of the five boroughs into Greater New York in 1898. It is an epic narrative, a story as vast and as varied as the city it chronicles, and it underscores that the history of New York is the story of our nation. Readers will relive the tumultuous early years of New Amsterdam under the Dutch West India Company, Peter Stuyvesant's despotic regime, Indian wars, slave resistance and revolt, the Revolutionary War and the defeat of Washington's army on Brooklyn Heights, the destructive seven years of British occupation, New York as the nation's first capital, the duel between Aaron Burr and Alexander Hamilton, the Erie Canal and the coming of the railroads, the growth of the city as a port and financial center, the infamous draft riots of the Civil War, the great flood of immigrants, the rise of mass entertainment such as vaudeville and Coney Island, the building of the Brooklyn Bridge and the birth of the skyscraper. Here too is a cast of thousands--the rebel Jacob Leisler and the reformer Joanna Bethune; Clement Moore, who saved Greenwich Village from the city's street-grid plan; Herman Melville, who painted disillusioned portraits of city life; and Walt Whitman, who happily celebrated that same life. We meet the rebel Jacob Leisler and the reformer Joanna Bethune; Boss Tweed and his nemesis, cartoonist Thomas Nast; Emma Goldman and Nellie Bly; Jacob Riis and Horace Greeley; police commissioner Theodore Roosevelt. The events and people who crowd these pages guarantee that this is no mere local history. It is in fact a portrait of the heart and soul of America, and a book that will mesmerize everyone interested in the peaks and valleys of American life as found in the greatest city on earth. Gotham is a dazzling read, a fast-paced, brilliant narrative that carries the reader along as it threads hundreds of stories into one great blockbuster of a book.

Jesus' birth in a cave, his childhood escapades, his secret sayings, and his descent to the underworld; the torments in Hell; Saint Paul baptizing a lion; the death of Pontius Pilate and Saint Peter being crucified upside down. These are among the fascinating stories found in this present selection. They all come from early Christian legends which are not found in the Bible, but yet have had a profound influence on art, literature, and theology from the second century through the Middle Ages and even to modern times. Some of the stories included here, especially those involving the Virgin Mary, have affected matters of doctrine; others have influenced the church's teaching on the afterlife - whilst from the apocryphal Acts are some of the best examples of accounts of the lives of Christianity's earliest saints. [Military Identities: The Regimental System, the British Army, and the British People, C. 1870-2000, David French](#) , 2008,

0199541051, 9780199541058. The regimental system has been the foundation of the British army for three hundred years. This iconoclastic study shows how it was refashioned in the late nineteenth century, and how it was subsequently and repeatedly reinvented to suit the changing roles that were forced upon the army. Based upon a combination of official papers, private papers and personal reminiscences, and upon research in the National Archives, regimental museums and collections, and other depositories, this book challenges the assumptions of both the exponents and detractors of the system. The author, David French, shows that there was not one, but several, regimental systems and he demonstrates that localized recruiting was usually a failure. Many regiments were never able to draw more than a small proportion of their recruits from their own districts. He shows that regimental loyalties were not a primordial force; regimental authorities had to create them and in the late nineteenth century they manufactured new traditions with gusto, whilst in both world wars regimental postings quickly broke down and regiments had to take recruits from wherever they could find them. French also argues that the notion that the British army was bad at fighting big battles because the regimental system created a parochial military culture is facile. This is the first book to strip away the myths that have been deliberately manufactured to justify or to condemn the regimental system and to uncover the reality beneath them. It thus illuminates our understanding of the past while simultaneously throwing glaring new light on the still continuing debate over the place of the regimental system in the modern army today.

[The Corruption Chronicles: Obama's Big Secrecy, Big Corruption, and Big Government, Tom Fitton](#) , 2012, 1451677871, 9781451677874. WASHINGTONS MOST CORRUPT: PRESIDENT BARACK OBAMA FLOUTING OF FEDERAL LAW * CORRUPTION * VIOLATING CAMPAIGN FINANCE REGULATIONS * TERRORIST TIES * VOTER REGISTRATION FRAUD * GOVERNMENT CON GAMES * EXTORTION BECAUSE NO ONE IS ABOVE THE LAW! In 2008, Barack Obama made a promise to have the most transparent administration of any U.S. president; it was the very cornerstone of his campaign. No secrets. No masks. No smoke and mirrors. No excuses. But over the next four years, President Obamas administration would prove to be one of the most guarded and duplicitous of our time. Tom Fitton of Judicial Watch, Americas largest

nonpartisan government watchdog (challenging George W. Bush as well as Bill Clinton), has been investigating Obama ever since he splashed onto the national scene in 2006. Now Fitton exposes devastating secrets the Obama administration has desperately fought even in court to keep from the American public. For a while, the Obama stonewall seemed to be holding. Until now. And the revelations are astonishing. Judicial Watch has unearthed the truth behind such high-profile issues as the bailouts, Obamacare, Guantanamo, Obamas true ties to Bill Ayers and to the Black Panthers voting intimidation scandal, and the Constitution-defying government czars. He reveals Obamas personal war against FOX News, his real link to ACORN, and his radical Chicago connections. Through scores of smoking-gun government files, some replicated here and many unearthed after lengthy court battles, Fitton also discloses the facts of the Obama-backed \$535-million loan guarantee to Solyndra, promoted by the president as a model for economic recovery only months before its disastrous bankruptcy filing. Here too is the truth behind the gunrunning scandal, code-named Fast and Furious, which was a program generated in secrecy by the U.S. government that supplied thousands of firearms to murderous criminals in Mexico an unconscionable act, and only one in a series of historical lows for an administration that few, if any, major media in this country dare to expose. This book details how the Obama machine is aggressively employing Chicago-style tactics to steal, if necessary, the 2012 elections. And how Judicial Watch is prepared to go to court with historic lawsuits to make sure the elections are fair and honest. Why do Obama supporters turn a blind eye to his astoundingly unethical and abusive approach to governing this country? The Corruption Chronicles boldly, honestly, and factually makes the case that the federal government is now off the rails and out of control, and has literally built its foundation on broken promises, fatal miscalculations, and a cynical manipulation of its trusting public. But its not over. Tom Fitton and Judicial Watch are proof that the Tea Party approach to government corruption can make a difference. A grassroots group can take on the president, the Congress, and the judiciary, and finally force the government to be held accountable. The uncontestable facts are here, in The Corruption Chronicles. To see what is true, you only have to look.

[Mystic Witness: Healing Ourselves and the Earth Through Active Mysticism, Larry Alboher, Larry Alboher D C](#) , 2012, 0984014853, 9780984014859. Mystic Witness is a journey into the miraculous world of active mysticism, witnessed by a student of a unique spiritual mentor called don Pablo. Active mysticism contains remarkable capacities to help heal the Earth and her inhabitants from traumas, such as wars and natural disasters. Don Pablos teachings blend sacred

knowledge from a vanished mystical lineage, once deeply rooted in Central Europe, with shamanic traditions found in the Peruvian Andes and Southern Mexico. This knowledge has been systematically suppressed or destroyed by Western civilization over several centuries and may be in danger of extinction. Historically protected by secrecy, this wisdom is now being revealed in a universal manner, free of ethnic, cultural, and religious tethers. Our planet is ailing from neglect and abuse, and global ecological disaster remains imminent. Humanity is suffering from social trauma, spiritual malaise, environmental toxicity, and alienation from the natural world. Are these dire conditions of the Earth and humankind related? Mystic Witness strips away the shroud of mystery to reveal an ancient and profound relationship with nature and spirit that demonstrates how humankind may begin to reverse our serious mistreatment of the planet. Active mystical practice extends beyond personal development and the worthy goals of social and environmental activism; it allows us to live more consciously toward the fullest potential of our humanity in reciprocal relationship with the Sacred, including the natural world as its manifestation.

[Vein Fire, Lucia Adams](#) , 2012, 0988453606, 9780988453609. One ordinary day, in one ordinary summer, Matt disfigured a childhood playmate with a cinder block. Five years later, he is released from a psychiatric facility and his circle of friends overlap with those of Hannah, the girl he maimed. He finds himself drawn to her, sadistically at first, but after Jared, an acquaintance from the hospital, covets her for his own disturbing uses, Matt struggles to protect her. Hannah's an outcast, not only because of the scars Matt gave her, but because of the ones she's given herself, too. Matt's heroin addiction and the way he exploits her body harm her in places sharp objects can't touch. Fearful that a dark secret will be disclosed, and with his addiction to heroin worsening, Matt chooses to abandon Hannah, allowing her to fall prey to Jared. Jared is a sociopath obsessed with a fantasy that Hannah can fly...a theory he plans on forcing her to test, even if the cost is her life. Vein Fire gives a startling portrait of Hannah, a young woman with Borderline Personality Disorder. This dark, voyeuristic story exposes the dysfunction she surrounds herself with as a method of self-harm. Its beautifully written passages will haunt the reader, compelling them to learn the fate of the girl who couldn't say no. Vein Fire is a stunning debut novel by Lucia Adams which editors have proclaimed, 'redefine the transgressive fiction genre'. "One of the great things about 'Vein Fire' is its bravery and directness. It's a dramatic and enlightening story of drugs, abuse, and the grey-areas of society; it shines a brave light on facets of humanity that the media tends to either glamorise, satirise or completely ignore. It is also a compulsive and pacey read. Ultimately, this is a manuscript that demonstrates a significant level of craft and originality." -- Harper Collins UK

[The Land of Darkness, Daniel Arsand](#) , 2001, 1873982992, 9781873982990. It is 1289, and Kubilai Khan rules the largest empire the world has ever known. A man of driving ambition, the Venetian merchant Vincente Montefoschi prepares to lead a caravan on the perilous journey from Lesser Armenia to Peking, capital of the great Khan's empire. Spurred by hopes of Kubilai's conversion to Christianity, the Armenian King Hethum II lends his patronage to Montefoschi's mission, sending with him to China a supremely gifted illuminator to win the Mongol emperor to the True Faith. Here the journey east is one of extremes: extremes of climate, of terrain and of passion. Individual quests for glory, pleasure, love and domination give rise to suspicion and hostility among the travelers. As the caravan crosses land rumored to be governed by spirits, reality yields to myth and illusion and the main characters are forced to confront their own demons or be consumed.

When a dying King Hussein shocked the world by picking his son rather than his brother, the longtime Crown Prince, to be the next King of Jordan, no one was more surprised than the young head of Special Forces who discovered his life was in for a major upheaval. In this exceptionally candid memoir, King Abdullah tackles the single toughest issue he faces head on - how to solve the Israeli-Palestinian standoff - and reveals himself to be an invaluable intermediary between America and the Arab world. He writes about the impact of the Iraq war on his neighborhood and how to confront the threat from Iran. This is the inspirational story of a man who went to boarding school in America and military academy in Britain, and grew up believing he would be a soldier. Back home, he hunted down terrorists and

modernized Jordan's Special Forces. Then, suddenly, he found himself king. Together with his wife, Queen Rania, King Abdullah transformed what it meant to be a monarch, going undercover to escape the bubble of the court while she became the Muslim world's most passionate advocate of women's rights. Why would a sitting head of state choose to write about the most explosive issues he faces? King Abdullah does so now because he believes we face a moment of truth: a last chance for peace in the Middle East. The prize is enormous, the cost of failure unimaginable

[The Finish: The Killing of Osama bin Laden, Mark Bowden](#) , 2012, 1611859840, 9781611859843. "There wasn't a meeting when someone didn't mention Black Hawk Down ." - A senior Obama administration official, as quoted in The New York Times, 02/05/2011 From Mark Bowden, internationally bestselling and acclaimed author of Black Hawk Down and the preeminent chronicler of the actions of the US military and special forces writing today, comes an intensely gripping account of the hunt for and elimination of Osama bin Laden. With unprecedented access to key sources and his great gift for storytelling, Bowden takes us inside the rooms where decisions were made and where the action unfolded. The story focuses on bin Laden, who maintained a steady stream of despairing correspondence in hiding in the year before his death, and on President Obama, perceived by many as an anti-war candidate because of his opposition to the Iraq War, whose evolving views and enormous responsibilities have turned him into one of the most determined warriors to ever inhabit the White House. It details the rapid evolution of war-fighting methods over the last decade, as American special forces and intelligence agencies have adapted to fight non-state enemies like Al-Qaeda, and how they came together seamlessly in May 2011 to kill the world's most notorious terrorist. Tracing the operation in blow-by-blow detail, Bowden's book is an unrivaled account of the most high-profile special forces operation ever to have been undertaken, and a page-turning narrative of how the man behind 9/11 was finally brought to justice.

Loving Life in Retirement: Making Your New Freedom Work presents retirement as a transition into a new and exciting life. Through reflections on his own life quest and his work as a psychiatrist over many years, Dr. Berenson examines the world of retirement with its multidimensional possibilities for self-discovery, growth and adventure. Enriched with 52 specific mental imagery exercises, the book focuses on overcoming negative mindsets that create obstacles to opening this new world. Dr. Berenson provides insight into common symptoms, such as depression, loneliness and anxiety. He also fully explores the challenges of facing death, the loss of family and friends and maintaining health in an aging body. Stressing that mental and physical exercises are the true elixir of life, he describes a diet and exercise program that is self-directed, effective, easy-to-use and a true departure from those currently being offered. Dr. Berenson

wholeheartedly emphasizes the delightful value of romance for singles and couples and describes very effective techniques to enhance one's sex life. For those who want to become more creative he devotes an entire chapter to the methods for developing an exciting, creative lifestyle. These exercises have proven to be successful for numerous people. To encourage retirees to use the techniques in his book Dr. Berenson has added a twelve week program that describes a tried and true method to change retirees' lives. In addition, he has included an Introduction to Mental Imagery that gives them the basis for developing their own mental imagery programs in any area they desire. *Loving Life in Retirement* is a practical, inspirational guide for experiencing the new freedom of retirement.

The Technology Integration Planning Model (TIP Model) shows teachers how to create an environment in which technology can effectively enhance learning. This sixth edition shows how to incorporate the Technological Pedagogical Content Knowledge (Tech-PACK) framework into the TIP Model. Carefully-selected examples and exercises in each chapter encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to integrate technology into content area curricula. Using hundreds of lesson examples and recommended resources, the text balances the theory-based why and the practical how of using technology to support and shape the future of technology in education. The goal of this edition is for teachers to see more clearly their role in shaping the future of technology in education. This book illustrates that great education means employing technologies to fulfill the vision they make possible: a worldwide social network and a global community that learns and grows together

[Saving the Heart: The Battle to Conquer Coronary Disease, Stephen Klaidman](#) , 2000, 0195112792, 9780195112795.

Though still the leading cause of death, coronary heart disease is now killing half as many people in the U.S. as in the 1960s, partly because of innovative treatments like bypass surgery, balloon angioplasty, and thrombolytic drugs. This book tells the stories of the bold researchers who developed such treatments and explores the tough ethical questions raised by the big money being made in modern cardiology. Klaidman shows how clinicians, engineers, and entrepreneurs have devised radically new ways to treat a diseased heart. He examines the startling extent to which financial ambition has shaped the dynamics of cardiology--now a multi-billion dollar medical/academic/industrial/governmental hybrid--and the inevitable conflicts of interest such ambition creates. Can a patient's needs come first when market share and profits skew the focus away from medical prudence? Can clinical trials be both free of bias and fast enough to keep up with the flood of new drugs and high-tech devices? Klaidman tackles these questions using real cases, often in the context of wrenching bedside decisions. Immensely readable and packed with vivid detail, *Saving the Heart* explores the past, present and swiftly developing future of a high-stakes medical specialty. And it weaves into the fast moving narrative advice on how to make the right treatment choices and identify the best cardiologists and surgeons. If you are one of the 14 million Americans who suffers from coronary disease, *Saving the Heart* could save your life.

On February 2, 1864, a 900 man Union garrison near the small eastern North Carolina town of Newport found itself under attack by over 2,500 Confederates. Despite being outnumbered and facing almost three to one odds, the Union forces fought three separate engagements over an almost ten mile front in western Carteret County. After a day of combat lasting over ten hours, Union troops were compelled to retreat in the face of an overwhelming Confederate onslaught. Ultimately three members of the 9th Vermont infantry were awarded the Medal of Honor for their actions which saved their comrades from certain capture. The Battle of Newport Barracks was the culmination of a brilliant operation commanded by Brigadier General James G. Martin and marked a rare Confederate victory in a theater of the Civil War where fortunes rarely favored Southern forces. Often viewed as a mere footnote to the larger Confederate attempt to recapture New Bern, this is the story of the men and the town caught in the middle of the largest and bloodiest battle to take place in Carteret County during the Civil War.

[The Last Tiger: Struggling for Survival, Valmik Thapar](#) , 2012, 019807882X, 9780198078821. The Last Tiger is the story of the crisis of the tiger in India, hunted from times immemorial. The author journeys through 7000 years of history about the killing of the tiger and brings the reader to the present context of what is, in the author's words, a 'terminal tiger crisis'. Where do we go from here? Will there be a miracle that saves the tiger? Can the government act in time? Will the enormous illegal trade in tiger skins that is rampant in Tibet be stopped? The book contains annexures with correspondence between the author and the Prime Minister's Office, and includes a Note of Dissent to the report submitted by the Task Force. The Note outlines Thapar's plan of action to ensure the long-term survival of tigers, with detailed policy prescriptions. The new Preface 'We Cannot Save the Indian Tiger' by the author critically reviews the current tiger population and the conservation measures undertaken.

But Emily doesn't even really like poetry, and she has a secret career ambition that she suspects her English-professor mother will frown on. Then, just after discovering that it contains an important family secret, she loses the special volume of Emily Dickinson's poetry that was given to her at birth. As Emily and her friends search for the lost book in used bookstores and thrift shops all across town, Emily's understanding of destiny begins to unravel and then rewrite itself in a marvelous new way. In her third novel, Kathryn Fitzmaurice again weaves a richly textured story about unexpected connections, about the stories that shape our lives, and about the most perfect kinds of happy endings: those that happen just on time.

[The Fields of David Smith, Candida N. Smith](#) , 1999, 0500019088, 9780500019085. David Smith strove to create works of art that could be viewed "without reverence or awe" because they were, in his words, "natural . . . statements of peaceful pursuit." Intrinsic to this hope was his conviction that sculpture belongs in the elements, with sky and earth as its visible reference points. The Fields of David Smith celebrates a three-year exhibition in the expansive landscape of the Storm King Art Center in Mountainville, New York. The aim of the curators has been to recapture the experience of viewing Smith's work during his lifetime, when it was deployed with care and exuberance in ever-changing arrangements in his fields at Bolton Landing in the Adirondacks. The book first re-creates the scene at Bolton Landing. A moving essay by Smith's daughter Candida captures in the most personal and direct terms the man himself, his struggles and delights, and the intensity of his working life. This is followed by a memoir by Irving Sandler and reminiscences by friends of the artist. The text is accompanied by photographs by fellow artists and by Smith himself. The balance of the book is a sumptuous album of the evolving Storm King exhibition, featuring major works by Smith sent from collections all over the country. Jerry L. Thompson, one of the foremost photographers of sculpture, has captured Smith's work in summer and snow, at sunrise and dusk, glistening in the rain and presiding over the mists. The interplay between the works and their surroundings, and the effects of light on their surfaces, provides a new lens through which to view the sculpture of David Smith. With contributions by Mark di Suvero, Helen Frankenthaler, Anthony Caro, Kenneth Noland, and others. Historical photography by David Smith, Dan Budnik, Alexander Liberman, and others.

[Hippolytos, Euripides, William Spencer Barrett](#) , 1992, 019814749X, 9780198147497. Euripides' Hippolytos tells of an honourable youth's tragic death, contrived by his father in the false belief that his son had seduced his new wife. This edition of the play is intended for students and scholars alike. The detailed commentary deals with textual problems in full, but wherever possible the editor has sought to explain the text adopted before discussing the reasons for its adoption. It also includes a close analysis of the lyric metres, and discussion of the play's subject-matter and dramatic context. The text is based on new collations of the medieval manuscripts (two of them hitherto uncollated) and on all known papyri. The Introduction contains a reappraisal, in the light of the evidence of the papyri, of the history of the text in antiquity, and advances a new account of the relationship between the medieval manuscripts. There is also a full discussion of the early history of the legend and of the two lost tragedies on the same theme.

[The Future of Iraq: Dictatorship, Democracy, Or Division?, Liam Anderson](#) , 2005, 1403971447, 9781403971449.

Reordering Iraq is the lynchpin of America's successful involvement in the Middle East. The challenge may be impossible. The Future of Iraq provides a primer on the history and political dynamics of this pivotal state divided by ethnic, religious, and political antagonisms, and provocatively argues that the least discussed future of Iraq might be the best: Managed partition. Anderson and Stansfield incisively analyze the dilemmas of American policy. They suggest that even a significant American presence will not stabilize Iraq because it is an artificial state and its people have never shared a common identity. In addition the legacy of tyrannical rule and the primacy of political violence is eroded social bonds and entrenched tribal allegiances, fallow ground for democracy. They provide the basic information and the provocative analysis crucial to informed debate and decision.

[Dala'il Al-Khayrat \(Original Arabic, Transliteration and Translation to English\), Imam Muhammad Ibn Sulayman Al-Jazuli](#) ,

2011, 1930409966, 9781930409965. Original Arabic, transliteration and translation. It is said that the author of Dala'il ul-Khayrat, Imam Muhammad al-Jazuli, went on a journey. He found himself in great need of water for making ablutions required before prayers. He came upon a well but could not reach the water far below, as there was no bucket and rope. He became very worried . A young girl saw this and came to his assistance. She spat into the well whereupon the water rose to the top of its own accord. Seeing this miracle, he asked the girl, "And how is that possible?" She replied "I was able to do this due to my invoking excessive blessings upon Prophet Muhammad, upon whom be Allah's blessings and peace." Having thus seen the benefit of invoking blessings upon the Prophet, Imam Jazuli decided to write Dala'il ul-Khayrat. In it, he compiled litanies invoking peace and blessings upon the Prophet. It is by far the most popular and universally-acclaimed collection of prayers upon the Prophet, used throughout the Muslim world and recited individually and in groups, in homes and in mosques, silently and aloud.

This book is designed to assist parents and teachers to sincerely and positively support the healthy development of diverse, biracial and biethnic children. The book's purpose is also to extend the concept of diversity and multicultural education to include the unique needs, histories, and experiences of interracial and interethnic families and their children. Chapter 1, "The Development of Healthy Biracial Children," discusses two of the most difficult issues facing interracial families: the identity of their children, and how to handle the problem of a lack of a category for their children on census and OMB forms and documents. Chapter 2 presents specific ideas for parents with children of mixed heritage--biological, adopted, and blended. The ideas were

specifically developed to help support these families and children. The ideas suggest ways for parents to help in their child's racial identity development and to work with teachers and other professionals. Chapter 3 gives specific information to families who adopt multiracial and multiethnic children, and to child care programs and schools who serve adopted biracial and biethnic children, both domestic and foreign. Chapter 4 addresses some general ideas to help programs working with multiracial and multiethnic families and their children to become responsive to the needs of these families. Chapter 5 covers interracial and interethnic families and biracial and multiethnic children whose combined heritages are not Black/White. The book's final chapter explores many of the myths that exist about interracial and interethnic relationships, interracial families, and children of mixed heritage. Contains a list of 86 sources for further reading. (EV)
