[Appraisal and Prediction of School Violence: Methods, Issues, and Contents, Michael J. Furlong](#) , 2004, 1594540411, 9781594540417. Violence and the threat of violence in schools are legitimate concerns for researchers and educators wishing to create safe and productive learning environments for all students. 'Appraisal and Prediction of School Violence: Methods, Issues, and Contexts', edited by Michael Furlong, Michael Bates, Douglas Smith, and Paul Kingery, provides up-

to-date information about best practices for understanding, predicting, and preventing violence on school campuses. In addition to providing in-depth coverage of approaches to assessing threats of violence in schools, the book covers important related topics such as bullying in schools, anger and hostility among students, discipline strategies, weapon possession, crisis preparation and response, and diversity and disability issues related to school safety. The book is essential reading for researchers, school administrators, counselors, psychologists, and other school personnel who are working to reduce the incidence of school violence in a manner that supports positive student development.

This emphasis is accomplished by including MANY extended examples that cover such topics as the analysis of demand, cost, and market efficiency; the design of pricing strategies; investment and production decisions; and public policy analysis. Economists and strategists looking to stay current with economic information.

[The Winter's Tale: Third Series, , , William Shakespeare](#) , 2010, 1903436354, 9781903436356. One of Shakespeares later plays, best described as a tragic-comedy, the play falls into two distinct parts. In the first Leontes is thrown into a jealous rage by his suspicions of his wife Hermione and his best-friend, and imprisons her and orders that her new born daughter be left to perish. The second half is a pastoral comedy with the lost daughter Perdita having been rescued by shepherds and now in love with a young prince. The play ends with former lovers and friends reunited after the apparently miraculous resurrection of Hermione. John Pitchers lively introduction and commentary explores the extraordinary merging of theatrical forms in the play and its success in performance. As the recent Sam Mendes production at the Old Vic shows, this is a play that can work a kind of magic in the theatre. For more than a century educators, students and general readers have relied on The Arden Shakespeare to provide the very best scholarship and most authoritative texts available. The Third Series editions added emphasis on all aspects of Shakespeare performance extended the Arden editions readership to also become the preferred text for theatre professionals.

[Children of the Prison Boom: Mass Incarceration and the Future of American Inequality, Sara Wakefield, Christopher Wildeman, Christopher James Wildeman](#) , 2014, 0199989222, 9780199989225. An unrelenting prison boom, marked by racial disparities, characterized the latter third of the twentieth century. Drawing upon broadly representative survey data and qualitative interviews, Children of the Prison Boom describes the devastating effects of America's experiment in mass incarceration for a generation of vulnerable children. Parental imprisonment has transformed from an event affecting only the unluckiest of children-children of parents whose involvement in crime would have been quite serious-to one that is remarkably common, especially for black children. Even for high-risk youth, Children of the Prison Boom shows that

paternal incarceration makes a bad situation worse, increasing mental health and behavioral problems, infant mortality, and child homelessness. These findings have broad implications for social inequality. Contrary to a great deal of research on the consequences of mass incarceration for inequality among adult men, these harms to children translate into large-scale increases in racial inequalities at the aggregate level. Parental imprisonment has become a distinctively American force for promoting intergenerational social inequality that should be placed alongside a decaying urban public school system and highly concentrated disadvantaged populations in urban centers as factors that distinctively touch-and-disadvantage-poor black children. More troubling, even if incarceration rates were reduced dramatically in the near future, the long-term harms of incarcerating marginalized men have yet to be fully revealed. Optimism about current reductions in the imprisonment rate and the resilience of children must therefore be set against the backdrop of the children of the prison boom—a lost generation now coming of age.

[Buildings in Contemporary Art, Ursula Cranmer, Helen Pearson](#) , 2008, 0958289700, 9780958289702. BUILDINGS IN CONTEMPORARY ART introduces the works of five Australasian, exciting, contemporary artists on a single theme presented in an easy to read style. Includes a conversation with each artist, themes, inspiration and influences, developing ideas and biographical details and has creative lesson plans and ideas for ways students can respond to the artworks Shona Wilson's (Australia) delightful, small-scale sculptures incorporating found materials fascinate us with their detail and remind us that what goes on inside buildings is most significant. The superb pastel drawings and prints of vast cityscapes and construction sites by Marco Luccio, (Australia) remind us of the civilisations they represent. Poppy van Oorde-Grainger's (Australia) award-winning, community art activities, draw us into the sense of community endangered by local urban structures. The contemplative glass artworks of architectural structures by Emma Camden (New Zealand), reflect intense colours and light draw our attention to the beauty and symbolism of building designs. And finally it is fitting to include the work of the late artist, Friedensreich Hundertwasser (Austria and New Zealand). His international reputation as a painter and eco-architect, and the influence of his iconic building designs, demonstrate that the type of structures we inhabit play an important role in our daily lives.

Ending with a Flourish is a Festschrift - a collection of essays - honoring William A. Jenks, a member of the Washington & Lee Department of History from 1946 until his retirement in 1983. Jenks was the chairman of the department from 1970 to 1983. Dr. Jenks's reputation in history graduate departments in colleges and universities across the United States is legendary, as some of the most respected and noted scholars of the last 40 years in European history have come out of his classes. These essays offer observations on his style of teaching, his impact on the lives of his students, and on Bill Jenks himself.

[About Criminals: A View of the Offenders World, Mark Pogrebin](#) , 2011, 1412999448, 9781412999441. This text presents students with recent and important research on criminal behavior. The field studies conducted by the contributing authors for all the articles in this anthology will provide the reader with a realistic portrayal of just what actual offenders say about crime and their participation in it. Having offenders voices heard along with the researchers analyses offers students a real-life view of what, how, and why various criminals behave the way they do. The readings explore a wide array of specific types of criminal behavior, covering the majority of types found in almost every standard criminology text. Each article has been selected for its ability to artfully portray the perspective of those offenders being studied and its readability for students.

Entrepreneurs often struggle with many aspects of business: planning and financing company growth, creating a company vision, recruiting, leading, and

managing people, as well as personal costs. In *Lessons from the Edge*, more than 50 business owners and entrepreneurs offer a wealth of real-life stories--in their own words--that provide rare insights about keeping a company healthy and growing. Here is a unique collection of first-person accounts by entrepreneurs who describe their mistakes in business and the lessons they have learned as a result. The stories cover a wide range of experiences from the trials and tribulations of partnerships, to the loss of key customers, theft, finding and retaining employees, and the personal cost of living on the edge. The authors have drawn on interviews with more than 50 entrepreneurs, all of whom are under 45 years of age and are founders or presidents of companies with revenues over \$1 million and growing rapidly. They volunteered to share their stories, describing why they lost or almost lost their companies, what they did wrong, and the lessons they have learned. Their narratives are full of mistakes, failure, courage, moments of realization, and timely moves that saved the day. Every company owner will find these accounts insightful, compelling, and occasionally gut wrenching, especially because most face similar challenges and live with the reality that they too could fall off the edge. This instructive and inspiring book brims with lessons for all business owners about courage, persistence, and survival. *Lessons from the Edge* is an essential read for both established and prospective entrepreneurs.

[Castle Hotels in Austria, Paul V. Jameson, Hannah Jameson](#) , 1995, 0964905205, 9780964905207. This book is more than a guide to castle hotels in Austria, as it also contains a wealth of general information useful to travelers to this country. It begins with a review of the geography, the history & the culture of Austria, then focuses in on the practical aspects of the trip including travel arrangements, car rental, lodging, food, financial matters, & health concerns. Forty castle hotels are described. They range in quality from three to five stars, & in price from easily affordable to expensive. There are forty-two color photographs of castle hotels & of scenery in their vicinity. Included are also suggestions for walks, hikes & sightseeing trips from these hotels. The book is the most comprehensive travel guide on this subject that has come to our attention, yet it is small enough to be easily taken along. [Digital Design and Computer Architecture, David Harris, Sarah Harris](#) , 2012, 0123978165, 9780123978165. Digital Design and Computer Architecture takes a unique and modern approach to digital design. Beginning with digital logic gates and progressing to the design of combinational and sequential circuits, Harris and Harris use these fundamental building blocks as the basis for what follows: the design of an actual MIPS processor. SystemVerilog and VHDL are integrated throughout the text in examples illustrating the methods and techniques for CAD-based circuit design. By the end of this book, readers will be able to build their own microprocessor and will have a top-to-bottom understanding of how it works. Harris and Harris have combined an engaging and humorous writing style with an updated and hands-on approach to digital design. This second edition has been updated with new content on I/O systems in the context of general purpose processors found in a PC as well as microcontrollers found almost everywhere. The new edition provides practical examples of how to interface with peripherals using RS232, SPI, motor control, interrupts, wireless, and analog-to-digital conversion. High-level descriptions of I/O interfaces found in PCs include USB, SDRAM, WiFi, PCI Express, and others. In addition to expanded and updated material throughout, SystemVerilog is now featured in the programming and code examples (replacing Verilog), alongside VHDL. This new edition also provides additional exercises and a new appendix on C programming to strengthen the connection between programming and processor architecture. SECOND Edition Features Covers the fundamentals of digital logic design and reinforces logic concepts through the design of a MIPS microprocessor. Features side-by-side examples of the two most prominent Hardware Description Languages (HDLs) SystemVerilog and VHDL which illustrate and compare the ways each can be used in the design of digital systems. Includes examples throughout the text that enhance the readers understanding and retention of key concepts and techniques. Companion Web site includes links to CAD tools for FPGA design from Altera and Mentor Graphics, lecture slides, laboratory projects, and solutions to exercises. Updated based on instructor feedback with more exercises and new examples of parallel and advanced architectures, practical I/O applications, embedded systems, and heterogeneous computing Presents digital system design examples in both VHDL and SystemVerilog (updated for the second edition from Verilog), shown side-by-side to compare and contrast their strengths Includes a new chapter on C programming to provide necessary prerequisites and strengthen the connection between programming and processor architecture Companion Web site includes links to Xilinx CAD tools for FPGA design, lecture slides, laboratory projects, and solutions to exercises. [Presimetrics: What the Facts Tell Us About How the Presidents Measure Up On the Issues We Care About, Michael E Kanell, Michael E. Kanell, Mike Kimel](#) , 2010, 1603762175, 9781603762175. The authors cut through party bias to present the quantifiable facts about how modern presidents have performed on critical national issues Politicians and the media spend a lot of time telling Americans how the presidents and their administrations are performing, but this analysis always skews along party lines. In Presimetrics, Kimel and Kanell take a fresh look at modern politics by gathering data from numerous government sources in order to compare and rank presidential performance on critical issues, from

employment and health care to taxes and family values. The results frequently defy expectations: Reagan, godfather of neoconservatives, increased the federal workforce more than any president since LBJ Clinton, a hero to Democrats, cut funding for the NEA by a larger percentage than any other president Nixon/Ford outperformed all administrations on Democratic issues like Federal spending on social programs The lively text clearly explains how various policies of each administration affect the data, and fascinating information graphics lend even greater depth to the discussion, showing at a glance how multiple administrations stack up.

[The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice: A Critique of Madness, Citizenship, and Social Justice, Bruce A. Arrigo, Heather Y. Bersot, Brian G. Sellers](#) , 2011, 0195372212, 9780195372212. In three parts, this volume in the AP-LS series explores the phenomena of captivity and risk management, guided and informed by the theory, method, and policy of psychological jurisprudence. The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent "conditions of control." These conditions impose barriers to justice and set limits on citizenship for one and all. Situated at the nexus of political/social theory, mental health law and jurisprudential ethics, the book examines and critiques constructs such as offenders and victims; self and society; therapeutic and restorative; health; harm; and community. So, too, are three "total confinement" case law data sets on which this analysis is based. The volume stands alone in its efforts to systematically "diagnose" the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting: (1) the rights of juveniles found competent to stand criminal trial, the mentally ill placed in long-term disciplinary isolation, and sex offenders subjected to civil detention and community re-entry monitoring; (2) the often unmet needs of victims; and (3) the demands of an ordered society. Carefully balancing sophisticated insights with concrete and cutting-edge applications, the book concludes with a series of provocative, yet practical, recommendations for future research and meaningful reform within institutional practice, programming, and policy. The Ethics of Total Confinement is a thought-provoking and timely must-read for anyone interested in the ethical and legal issues regarding madness, citizenship, and social justice. "It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us. Instead, the path forward must run through a return to the ethical and psychological roots of security and justice. The Ethics of Total Confinement is a quantum step forward in defining and advancing that path."--Jonathan Simon , Adrian A. Kragen Professor of Law, Jurisprudence and Social Policy Program, UC Berkeley School of Law "This book boldly calls for a

total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness. It focuses on three outcast groups--juveniles tried as adults, people with mental illness subjected to hospitalization, and sex offenders committed as dangerous--and, based on an innovative analysis of the relevant caselaw and empirics, shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest, most uninformed fears. Relying on Aristotelian philosophy, therapeutic and restorative principles, and commonsense justice, the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing."--Christopher Slobogin, Milton Underwood Professor of Law, Vanderbilt University Law School"

The Ethics of Total Confinement: A Critique of Madness, Citizenship, and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines. By bridging gaps among relevant disciplines, the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological, ethical, or justice-based standards. The book's provocative conclusions and recommendations offer much food for thought and suggest potential directions for action."--Dennis Fox, Emeritus Associate Professor of Legal Studies and Psychology, University of Illinois at Springfield"

The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept. It is a book that synthesises in creative new ways reformist visions of justice, virtue and the cultivation of habits of character. This is profound work that opens new paths to dignity, healing and social justice."--John Braithwaite, Australian Research Council Federation Fellow, Australian National University"

The Ethics of Total Confinement offers a useful and wide-ranging perspective grounded in psychological jurisprudence. With its emphasis on the harm done to those most vulnerable to extremes of risk-management, this volume makes a welcome addition to the literature on confinement."--Lorna Rhodes, Professor, Department of Anthropology, University of Washington"

The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices, aspiring to greater justice and human flourishing for all. A timely intervention of this kind is most welcome."--George Pavlich, Associate Vice-President (Research), Professor of Law and Sociology, University of Alberta

Dan Clowes meets Walker Evans in this collection of subway and street portraits by Adrian Tomine, whose work readers will recognize from Time, Rolling Stone, Dave Eggers's Best American Nonrequired Reading and the cover of The New Yorker. New York Sketches features 15 full-color reproductions of the beautiful ink-and-watercolor drawings that Tomine began after moving from California to the city. Each shows his unparalleled eye for detail: a police officer scrutinizes a stylish young mother; a girl remains content but completely motionless through four subway stops; a disgruntled worker kicks a chair while he sweeps. This remarkable portfolio is printed on finely textured 130-lb. Cougar paper, accordion folded so that images can be detached for framing or displayed upright together. It is the only full-color project featuring new art from Adrian Tomine, one of the most respected and perhaps the most widely visible alternative cartoonists of our time.

[The Physical and Chemical Basis of Molecular Biology: Fundamentals, Thomas E. Creighton](#) , 2011, 0956478131, 9780956478139. The author of this book, Marguerite Jalving, is a person with both feet on the ground. With her elegant feminine and worldly grace and strong temperament she abides by her opinions, be it in spontaneous anger or happy enthusiasm and, now and then, with kind of disrespectful thoughts towards Sri Sathya hai Baba when she thinks things is coming too far. At the same time she has a very deep devotion and humble surrender to the Divine and that is the paradox of this book. Therefore you will find it both funny and deeply devotional, the very picture of a mortal human being's dialogue with God and with its dreams and visions of heavenly fantasy. - Lise Jersing.*I have had and still have marvellously beautiful visions and dreams about Sai Baba. The reader may find it difficult to distinguish between a vision and a dream as both takes place during sleep. Yet, there is a considerable difference which is almost impossible to describe. But I shall try anyway. In a dream Baba comes and gives me a message or shows me something from which I should learn. To put it simple: a lesson. A vision is something quite different. Here I am with Baba (or alone) at beautiful celestial places full of light and with a wonderful atmosphere. As a rule, it is not so much a lesson as an adventure which Baba gives me. For a short moment I am allowed to experience this wonderful atmosphere at different planes. It will be clear from the context of the book. Then I would like to say: It is all but words, words, words by which we try hard to express our experiences. Ultimately they cannot be described as they are divine experiences. We human beings must have faith in higher reality outside our little narrow world, our trivial daily life, if we want to understand what the meaning of our life is. - Marguerite Jalving.

It argues that British institutions were conducive to economic development in a 19th-century world economy characterized by competitive capitalism, but that they posed a formidable obstacle to economic development in the 20th-century context of corporate capitalism. Specific issues covered include the pre- and post-World War I steel industries, the shipbuilding and automotive industries, education, research and development, finance and industry, regional development, and the role of the state.

[For a working-class culture in Canada: a selection of Colin McKay's writings on sociology and political economy, 1897-1939, Colin McKay, Ian McKay, Lewis Jackson, Canadian Committee on Labour History](#) , 1996, 0969583567, 9780969583561. Seafarer, poet, labour activist, short story writer, Christian, philosopher, journalist, political economist, cultural critic and socialist -- Colin McKay (1876-1939) was all of these, a true working-class intellectual. Restless and inquiring, McKay left the South Shore of Nova Scotia as a boy; when he was not at sea, he lived at various times in Montreal, Saint John, Toronto, Glasgow, London, Paris, Halifax and Ottawa. From these centres, he wrote hundreds of articles for the popular press and for literary, political and labour publications. McKay's insights into a broad range of twentieth-century social, economic and cultural issues make a forceful, but until now unrecognized, contribution to Canadian intellectual history. For a Working-Class Culture in Canada rediscovers this author and his ideas. Ian McKay and Lewis Jackson have gathered more than 125 of Colin McKay's most trenchant essays, and Ian McKay's introduction and annotations set them into their intellectual and social context. Acadiensis Press and the Canadian Committee on Labour History have co-operated to publish this unique document in the history of the Canadian working class.

[Fuzzy logic, Dan McNeill, Paul Freiberger](#) , 1993, 0671738437, 9780671738433. Fuzzy Logic is an eye-opening book - an exciting tour of a high-tech world where visionary computer scientists are inventing the future, and a disturbing lesson in shortsighted business practices. Imagine tossing your laundry into a "fuzzy" washing machine, pushing a button, and leaving the machine to do the rest, from measuring out detergent to choosing a wash temperature. Imagine a microwave oven that watches over meals with more sensitivity than a human cook. Imagine a subway system that stops and starts so smoothly that passengers don't bother holding on to straps. Futuristic fantasy? No. In Japan, this is reality - and it's starting to explode into our marketplace. Lotfi Zadeh, a professor at the University of California at Berkeley, invented fuzzy logic in 1964. Conventional logic divides the world into yes and no, black and white. Fuzzy logic deals in shades of gray. It can thus make computers think like people. But when Zadeh tried to sell his idea to the American academic community and to American companies, he met with ridicule and scorn. Only the Japanese saw the logic of fuzzy logic, and soon such companies as Matsushita and Sony will earn billions selling it back to us. And they will have a head start on the dazzling future possibilities of fuzzy logic: software that predicts the stock market based on the daily news, cars that drive themselves, sex robots with a humanlike repertoire of behavior, computers that understand and respond to normal human language, and molecule-size soldiers of health that roam the bloodstream, killing cancer cells and slowing the aging process. Fuzzy Logic is the compelling tale of this remarkable new technology and the fascinating people whomade it happen. It is also the story of what it took for American business to catch on to fuzzy logic - and how it will soon affect the lives of every one of us.

[BizTalk: Implementing Business-to-business E-commerce, James G. Kobielus](#) , 2001, 0130891592, 9780130891594.

BizTalk, Microsoft's strategic e-Commerce initiative, enables companies and industries to develop and evolve sophisticated e-marketplaces far more easily than ever before. In this authoritative book, renowned e-business consultant James Kobielus walks you through every issue associated with BizTalk deployment -- business and technical. He introduces the fundamentals of BizTalk: what it is, who supports and oversees it, the value it adds to B2B e-Commerce, and the current status of BizTalk-compliant products and services. Next, he reviews anticipated BizTalk applications in B2B e-Commerce to be based on Microsoft's BizTalk Server 2000. BizTalk: Implementing Business-to-Business E-Commerce outlines three common BizTalk scenarios: hubbed marketplace integration that integrates your internal business processes indirectly, via external trading hubs and exchanges; extranet supply-chain integration that your internal business processes directly, with trading partners; and enterprise application integration: integrating internal "back end" business applications with your e-Commerce site. The book reviews commercial BizTalk-enabled products and services, and Microsoft's strategy for rolling out BizTalk-enabled offerings both as server-based software and as portal-based services. It introduces Microsoft's BizTalk Server 2000 product roadmap; shows how BizTalk Server integrates with Windows 2000, Active Directory and COM+; and demonstrates how it utilizes XML technologies, including XSLT, XML schemas, and namespaces.

[War of the Running Dogs: How Malaya Defeated the Communist Guerrillas 1948-1960, Noel Barber](#) , 1971, 0304366714, 9780304366712. Only three short years after the end of the Japanese occupation, war came again to Malaya. The Chinese-backed guerrillas called it the War of the Running Dogs - their contemptuous term for those in Malaya who remained loyal to the British. The British Government referred to this bloody and costly struggle as the 'Malayan Emergency'. Yet it was a war that lasted twelve years and cost thousands of lives. By the time it was over Malaya had obtained its independence - but on British, not on Chinese or Communist terms. Here is the war as it was. Here are the planters and their wives on their remote rubber estates, the policemen, the generals and the soldiers, the Malays, Chinese and Indians of a polyglot country, all fighting an astute, ruthless, and well organized enemy.

[Living the Kingdom Life: Stepping Into Kingdom Life by Walking in the Divine Nature, Brian Higbee](#) , 2013, . Your kingdom come is not a futuristic hope, It is what God intends for your life now. The steps you take now will affect walking out this kingdom life. Jesus set an example for us in His life. Peter, one of Jesus' closest disciples, gives us clear steps to walk out life in the kingdom of God. Most Christians focus on several of the "kingdom stages," but knowing what the steps are, how to approach them, and how to know when you are "off" will move you from wallowing in the dust of the earth to living in the divine nature that God intended.

[Rich Widows Live Forever: Protecting and Preserving Your Family Wealth, Joe Goodman](#) , 2004, 0975333704, 9780975333709. When most people think about wealth, they picture money and jewels, estates and yachts and vacation homes. They all miss the point. By the time you finish this book, you'll understand that wealth is really about Families! Building and sustaining family relationships is the essence of protecting and preserving family wealth. Whether you come from old money or just hit the jackpot, you'll only find happiness if you understand your family dynamic. In fact, money can buy a lot of unhappiness if you don't handle it right. Here you'll find two hundred axioms -- some light-hearted and some hard-hitting -- to stimulate your thinking about wealth and illuminate the family system at its heart. Each addresses the often-dramatic impact wealth has on families, whether it involves a hundred thousand dollars or a hundred million. Don't underestimate these simple axioms. They comprise extremely important, even life-changing, advice. Many statements are direct and blunt, some even cynical, but all will open your eyes and help you look beyond the technical side of wealth to the emotion-based issues and dynamics of the family. [A Perfect America, Peter Meredith](#) , 2013, . Phil Tarsus is a dreadful instrument of State justice. He's an Inquisitor, a man who makes a living rooting out and executing those people who have been charged with treason. Guilt or innocence mean little to him--he has quotas to fill after all. Yet when he unwittingly stumbles upon a secret involving someone high up in the new American government, he becomes a target himself. Unfortunately for Phil, there's nowhere to run that the government can't find him. In the year 2122, in the perfect state of America, the government owns everything...from the shoes you wear, to the apple you eat, to your next door neighbor. The government owns everything and is everything. Under these conditions Phil can trust no one but the man he's slated to murder next.

[Don Juan: His Own Version, Peter Handke](#) , 2011, 0374532648, 9780374532642. A MODERN MASTERS WRY AND ENTERTAINING TAKE ON HISTORY'S BEST-KNOWN LOVER In Don Juan, Peter Handke offers his take on the famous seducer. Don Juan's story is filtered through the consciousness of an anonymous narrator, a failed

innkeeper and chef, into whose solitude Don Juan bursts one day. On each day of the week that follows, Don Juan describes the adventures he experienced on that same day a week earlier. The adventures are erotic, but Handkes Don Juan is more pursued than pursuer. What makes his accounts riveting are the remarkable evocations of places and people, and the nature of his narration. This is, above all, a book about storytelling and its ability to burst the ordinary boundaries of time and space. In this brief and wry volume, Handke conjures images and depicts the subtleties of human interaction with an unforgettable vividness. Along the way, he offers a sharp commentary on many features of contemporary life.

[Desperate Hours: The Epic Rescue of the Andrea Doria, Richard Goldstein](#) , 2001, 047138934X, 9780471389347. "A stupendous feat of reportage." -Ron Powers, cowriter of *Flags of Our Fathers* Praise for *Desperate Hours* "Goldstein's book is packed with detail. . . . This description of the Doria's sinking is especially moving." -The New York Times "A stupendous feat of reportage. Goldstein has virtually put us into lifeboats and sent us hurtling into the North Atlantic on the night of July 25, 1956." -Ron Powers, cowriter, *Flags of Our Fathers*, and author of *Dangerous Water* and *Tom and Huck Don't Live Here Anymore* On an extraordinary summer's night in 1956, in a fog off Nantucket, the world-renowned ocean liner Andrea Doria collided with the Swedish liner Stockholm and, eleven hours later, tragically sank. But in that brief time the Doria became, after the Titanic, the most storied vessel of the century, as nearly 1,700 people were saved in an unforgettable rescue punctuated by countless acts of heroism amid confusion, terror, and even cowardice. In the tradition of Walter Lord's *A Night To Remember*, *Desperate Hours* re-creates the ill-fated voyage, from the passengers' parting waves at Genoa, to their last evening highball in the Doria's lavish lounge, to the unbelievable realization that catastrophe was imminent. Richard Goldstein draws from dozens of interviews, court documents, memoirs, and reports that relate never-before-told stories. He also presents technical findings that shed light on the blame for the disaster. The result is a definitive history of a fateful day, a legendary liner, and a deadly shipwreck now considered by scuba divers to be the Mount Everest of the deep.

book, award-winning designer Jennifer Playford, inspired by the traditional Japanese fabric wraps known as furoshiki, shows exactly how to use fabric to create modern, eco-friendly (they're reusable) gift wraps. It's so easy all you need is a square piece of fabric and with a few simple twists and ties, you can creatively wrap a wide variety of shapes from simple rectangles (such as books) to more challenging shapes (bottles) to things you might previously have thought un-wrappable (melons). Clear written instructions, easy-to-follow diagrams, and beautiful photos of the finished wraps make it easy to wrap expertly the first time. Jennifer shows the basic techniques for every shape, and presents twenty-five stunning wraps, complete with decorative embellishments for every occasion, from weddings to birthdays. Also included are innovative ideas galore for using wrapagami every day (carry your lunch, and then use the wrap as a picnic blanket) and reusing the wraps (to wrap again, or repurpose in a multitude of ways). Let Wrapagami inspire you to start a new tradition!

The authors have made three main kinds of changes. First, they have enlarged on the

topics treated in the first edition. Second, they have added many exercises and problems at the end of each chapter. Third, and most important, they have supplied, in new chapters, broad introductory discussions of several classes of stochastic processes not dealt with in the first edition, notably martingales, renewal and fluctuation phenomena associated with random sums, stationary stochastic processes, and diffusion theory.

[Michael Van Gessel: Landscape Architect, Christian Bertram, Erik Jong](#) , 2008, 905662038X, 9789056620387. Amsterdam-based landscape architect Michael van Gessel has been working with, rather than against, nature for the past three decades. He expresses his ethos by quoting the English author and landscape architect Joseph Spence: "Respect for the past, combined with a curiosity for what is and a feeling for what could be. This is the dynamo that starts the engine of the design." Accordingly, van Gessel embraces a diversity of projects, from private gardens to urban planning. He supervised the renovation of Amsterdam's Vondel Park, drew up the master plan to restore the landscaping around Utrecht's Castle De Haar and managed to integrate the inner courtyards of the Ministry of Agriculture in The Hague into the urban fabric. This comprehensive volume places van Gessel's myriad approaches into context and illuminates his pivotal role in the formation of contemporary Dutch landscape architecture.

[The Sai Prophecy, Barbara Gardner](#) , 1997, 155874679X, 9781558746794. The year is 1899. A dying aborigine in Tasmania gives anthropologist Philo Hoffman a ring engraved with the words, Shirdi, Sathya, Prema. This ring takes Philo to a small town near Bombay where he encounters a remarkable Indian holy man. Thus begins a sweeping 160-year saga of romance, intrigue, tragedy and enlightenment, as five generations of the Hoffman family find their lives impacted by the three Sai Baba avatars of modern India. When the story shifts to modern times, Gina Hoffman, a cynical '90s-style businesswoman, inherits Philo's ring, fulfilling her destiny that connects her family to the Indian avatars. Against a background of political conspiracies, conflicting ideologies, and disintegrating social structures, the Hoffman clan is caught up in a global game of power and corruption. This suspenseful, masterfully crafted saga moves with purpose from

the breezy mansions of Santa Barbara to the steaming byways of India, from a pastoral homestead in the mountains of California to the salons of Paris, from the religious melting pot of Jerusalem to an austere monastery in Ladakh. As a beleaguered civilization struggles to survive during the 21st century, the transformation of consciousness fostered by the Sai avatars begins to take hold. But, before the Golden Age can be realized, the long-awaited battle of Armageddon must be played out on a desolate, barren hilltop in the Holy Land.

[Shoveling Fuel for a Runaway Train: Errant Economists, Shameful Spenders, and a Plan to Stop them All, Brian Czech](#) , 2000, 0520925602, 9780520925601. Americans have been conditioned to appreciate, cheer, and serve economic growth.

Brian Czech argues that, while economic growth was a good thing for much of American history, somewhere along the way it turned bad, depleting resources, polluting the environment, and threatening posterity. Yet growth remains a top priority of the public and polity. In this revolutionary manifesto, Czech knocks economic growth off the pedestal of American ideology. Seeking nothing less than a fundamental change in public opinion, Czech makes a bold plea for castigating society's biggest spenders and sets the stage for the "steady state revolution." Czech offers a sophisticated yet accessible critique of the principles of economic growth theory and the fallacious extension of these principles into the "pop economics" of Julian Simon and others. He points with hope to the new discipline of ecological economics, which prescribes the steady state economy as a sustainable alternative to economic growth. Czech explores the psychological underpinnings of our consumer culture by synthesizing theories of Charles Darwin, Thorstein Veblen, and Abraham Maslow. Speaking to ordinary American citizens, he urges us to recognize conspicuous consumers for who they are: bad citizens who are liquidating our grandkids' future. Combining insights from economics, psychology, and ecology with a large dose of common sense, Czech drafts a blueprint for a more satisfying and sustainable society. His ideas reach deeply into our everyday lives as he asks us to re-examine our perspectives on everything from our shopping habits to romance. From his perspective as a wildlife ecologist, Czech draws revealing parallels between the economy of nature and the human economy. His style is lively, easy to read, humorous, and bound to be controversial. Czech will provoke all of us to ask when we will stop the runaway train of economic growth. His book answers the question, "How do we do it?"

[The Fear Index, Robert Harris](#) , 2012, 0099553279, 9780099553274. A chilling contemporary thriller from Robert Harris set in the competitive world of high finance. Dr Max Hoffman is a legend. A physicist once employed on the Large Hadron Collider, he now uses a revolutionary and highly secret system of computer algorithms to trade on the world's financial markets. None of his rivals is sure how he does it, but somehow Hoffman's hedge fund -- built around the standard measure of market volatility: the VIX or "Fear Index" -- generates astonishing returns for his investors. Late one night, in his house beside Lake Geneva, an intruder disturbs Hoffman and his wife while they are asleep. This terrifying moment is the start of Robert Harris's new novel -- a story just as compelling and timely as his most recent contemporary thriller, The Ghost. Over the next 48 hours, as the markets edge towards another great crash, Hoffman's world disintegrates. But who is trying to destroy him? From the Trade Paperback edition.

[Flash Flood, , , , Chris Ryan](#) , 2006, 0099488639, 9780099488637. It begins as a school trip to London. But with a sudden tidal surge and a dramatic thunderstorm that hurls rainwater down on the capital, it suddenly becomes something totally different - the site of a major disaster as the Thames Barrier is breached and London is flooded. With streets underwater, communications down, rats pouring up out of the sewers and thousands of people in a state of panic, survival becomes a very key issue for Ben and his mates. But worse is to come when a high-security prison is evacuated and a vanload of category A prisoners is caught in the torrent...

9780198537601. The Oxford Topology Symposium was held in June 1989. Since techniques from topology and category theory have been used increasingly by theoretical computer scientists in recent years, it was decided to hold a special session at the symposium which would be devoted to the application of these topics in computer science. By holding this session in the context of the topology symposium, the organisers hoped to achieve a cross-fertilization between the communities they brought together - giving one a course of new problems with a more practical flavour, and the other a source of solutions and ideas. The session itself proved successful, attracting a large audience of mathematicians as well as computer scientists. The organizing committee decided to produce two separate proceedings for the conference. All those who had presented papers, plus a very few others, were invited to submit papers for these proceedings of the special session on topology and category theory in computerscience.

This story of Thomas Jefferson's children by one of his slaves, Sally Hemings, tells a darker piece of America's history from an often unseen perspective-that of three of Jefferson's slaves-including two of his own children. As each child grows up and tells his story, the contradiction between slavery and freedom becomes starker, calling into question the real meaning of "life, liberty, and the pursuit of happiness." This poignant story sheds light on what life was like as one of Jefferson's invisible offspring.

[Bravo Two Zero, Andy McNab](#) , 1994, 0440218802, 9780440218807. Their mission: To take out the scuds. Eight went out. Five came back. Their story had been closed in secrecy. Until now. They were British Special Forces, trained to be the best. In January 1991 a squad of eight men went behind the Iraqi lines on a top secret mission. It was called Bravo Two Zero. On command was Sergeant Andy McNab. " They are the true unsung heroes of the war." -- Lt. Col. Steven Turner, American F-15E commander. Dropped into " scud alley" carrying 210-pound packs, McNab and his men found themselves surrounded by Saddam's army. Their radios didn't work. The weather turned cold enough to freeze diesel fuel. And they had been spotted. Their only chance at survival was to fight their way to the Syrian border seventy-five miles to the northwest and swim the Euphrates river to freedom. Eight set out. Five came back. " I'll tell you who destroyed the scuds -- it was the British SAS. They were fabulous." -- John Major, British Prime Minister. This is their story. Filled with no-holds-barred detail about McNab's capture and excruciating torture, it tells of men tested beyond the limits of human endurance... and of the war you didn't see on CNN. Dirty, deadly, and fought outside the rules.

[Dear God ...: Letters from the Nursing Home, Mary-Ellen Low](#) , 2013, 0985726792, 9780985726799. Dear God ... And so begins each story in "Dear God ... Letters from the Nursing Home." The stories are actually letters to God about what goes on in the minds and hearts of those who reside in, visit or work in the nursing home environment. They are about hope, healing, friendship, joy, and dreams as well as sadness and dying with dignity. They are stories about life. "My hope is that when people read this book, they will realize that a nursing home just might be a wonderful place to visit a family member or neighbor, meet a new friend, share a hobby or even comfort a total stranger," says Dear God's author, Mary-Ellen Low, a nursing home caregiver for more than thirty years. "It's my wish to bring attention to the problem of loneliness in the nursing home environment." The letters in "Dear God ..." will make readers smile, laugh, cry, and think

about those who reside in nursing homes, as well as their families, and those who care for them.

[Naming the Frame, Jonathan Ingleby](#) , 2011, 0956594336, 9780956594334. "Living in context is worth doing if it reminds us that we are in a battle, indeed in a struggle for survival. It is worth doing if it tunes us into the world's suffering and our part in it as followers of the 'suffering servant'. It is worth doing if it gives us a new sense of urgency. 'The end of all things is near, ' as the Apostle Peter says, 'be serious and discipline yourselves'. Above all it challenges us to be better disciples of Jesus 'in this present age'." As Christians in the 21st century, what is our context? Global megatrends-postmodernism, globalisation, postcolonialism, international migration and environmental catastrophe-may appear to be too vast for us to contemplate, let alone formulate a Christian response to; yet we cannot ignore them, as they profoundly affect who we are, how we read the Bible, and how we see the world. In Naming the Frame, Jonathan Ingleby challenges us to commit ourselves to a deeper understanding of what is going on in the world-and what is going on in our lives-and to speak and act prophetically as faithful servants of God into these situations.

[Liability of Asset Managers, Danny Busch, Deborah DeMott](#) , 2012, 0191630977, 9780191630972. Given the international nature of the asset management industry, lawyers representing investors, asset managers, and regulators are often confronted with asset management agreements governed by foreign law. This book provides the necessary points of law and practice in the leading jurisdictions allowing lawyers to identify the main pitfalls concerning the foreign law in question. This book is the only comparative analysis of the law of asset manager liability in the major European jurisdictions, the United States, and Canada, each written by specialists from the relevant jurisdiction. This is a much-needed guide on the disparate regulation of asset manager liability in these countries highlighting the absence of uniformity in this area of law despite the implementation of MiFID in Europe. The section on European law provides an overview of the regulation in this field regionally and provides the context in which the national chapters explore the regulation at country level. The comparative evaluation at the end of the book provides a thoughtful assessment of the impact of regulatory frameworks on asset managers private law duties and liabilities. The Introduction situates the country-by-country material within the broader context of questions about regulatory design and effectiveness.

[Choose Them Wisely: Thoughts Become Things!, Mike Dooley](#) , 2009, 1439109877, 9781439109878. Living the life of your dreams isn't just about dreaming. It's also about living: following your impulses, turning over every stone, and stepping out into the world so that the wind can catch your sails. To those in the know, it's as if your dreams paint the picture and the Universe stands ready to bring it to life. Choose them Wisely is filled with the same inspirational messages from "the Universe" that made the Notes from the Universe trilogy so popular, but the thoughts have been expanded, containing even more information and concrete examples for how to actually apply these ideas to everyday life. Author Mike Dooley's conversational, inviting tone welcomes readers at every level of self-development into the wonder of their own self-directed futures.
