[An Illustrated Journey: Inspiration From the Private Art Journals of Traveling Artists, Illustrators and Designers, Danny Gregory](#) , 2013, 1440320292, 9781440320293. Travel + Sketching = Inspiration When we travel, we don't want to follow the same itinerary as everyone who's come before us. We want to feel like explorers, adventurers in undiscovered territory. And that's exactly what sketching can bring to the travel experience. An Illustrated Journey captures the world through the eyes of 40 talented artists, illustrators and designers. You'll experience the wonder of seeing familiar sights through a fresh lens but, more important, you'll be inspired to set pen to paper and capture your own vistas. The really wonderful thing about a sketchbook is that it can be totally private. You don't have to have an ounce of talent to enjoy learning how to really see what's in front of you. But lucky for us, the sketchbooks captured here are lovely, creative, intimate windows into each artist's mind. So, whether you're just returning to the art of drawing, abandoned by most of us after childhood, or you're looking for inspiration to take your illustration work in a new direction, An Illustrated Journey will take you on a wonderful trip of the imagination. All you need to pack are a pencil and a piece of paper.

[Reckless Disregard, A Spanking Novel, Lizbeth Dusseau](#) , 2005, 0976651912, 9780976651918. She's sassy, sexy, charming and always in trouble. Shanghaied into helping her friend Alecia with a bad debt, the plan goes sour and the pair are busted, forced to confront their husbands with their embarrassing misdeed. Instead of a simple spanking, the angry husbands turn to an old friend, Andrew Lassiter, and his disciplinary tribunal for punishing their naughty wives. While Bridget earns a miserable turn over the dreaded spanking bench, Alecia is sentenced to a month of 'house arrest' at Lassiter's estate, doing hard labor and getting her bottom paddled daily. Soon, an old flame returns, and a moment of reckless abandon finds Bridget doing time in Lassiter's domain, too. This spanking novel includes the details of Bridget's shocking 'house arrest' and the strict, submissive training she endures to save her marriage. This renowned Spanking Fiction author pairs spanking and eroticism within an unforgettable story. "Lizbeth Dusseau is the mistress of the spanking scene!" Don Winslow.

Presented clearly and beautifully in full color throughout, this is an invaluable guide to color principles and design techniques for students and professionals alike. This Second Edition offers 50% new material in an enlarged format. In addition to offering a solid foundation to color design principles, the Second Edition contains two completely new sections on the computer and electronic color. Basic concepts and methods for generating colors electronically are introduced, and 11 new color guides demonstrate more efficient ways of attaining color harmony on the computer. Principles of Color Design, Second Edition, continues to provide the beginner with a foundation to develop a personal color sense. Written by Wucius Wong, an internationally recognized fine artist and authority in the design field, this classic book presents principles, theories, and applications simply and elegantly.

[Curious Folks Ask: 162 Real Answers on Amazing Inventions, Fascinating Products, and Medical Mysteries, Sherry Seethaler](#) , 2010, 0137057385, 9780137057382. Fascinating, plain-English answers to real science and health questions asked by real people \* \*162 questions, posed by real people, answered in light of the best current scientific understanding. \*By a truly gifted explainer of science: balanced, accurate, and a pleasure to read. \*Cuts through jargon, hype, and mystification, offering insights anyone can use to evaluate controversial claims. Why do your muscles ache when you get the flu? Does the brand of gasoline you choose really matter? Will adult stem cells work as well as embryonic stem cells? What causes out-of-body experiences? Is the Star Wars light saber possible? Are there beneficial viruses, just as there are beneficial bacteria? What makes your voice age? Is one 'horsepower' really equal to the power of one horse? How did the ancient Romans engineer those magnificent buildings using those clumsy Roman numerals? What makes glue sticky? What causes dandruff? These are just a few of the fascinating science and health questions real people asked renowned science writer and San Diego Union Tribune columnist Sherry Seethaler. This book brings together 162 of her answers, each one page or less, magnificently clear, and a pleasure to read. Seethaler is one of this generation's most gifted explainers of science. She's accurate, and balanced, an expert at cutting through jargon and myths, and passionate about sharing what scientists have learned and what they still find mysterious. In AskCurious Folks, she explores the products of our civilization, the oddities of our bodies, what makes us healthy and what can lay us low, how we got here, what makes us human, and a whole lot more. Even if you haven't read anything about science in decades, this book will rekindle your childhood curiosity. If you're already interested in science, you won't be able to put it down. Sherry Seethaler of California, San Diego, works with scientists to communicate their discoveries to the public. Seethaler also writes a weekly column for the San Diego Union Tribune, answering readers' questions spanning nearly every imaginable science topic. She holds a Ph.D. in science and mathematics education from the University of California, Berkeley. She is author of Damned Lies, and Science (San Diego, CA), a science writer and educator at the UniversityLies,(FT Press Science, 2009).

[Word Crimes: Blasphemy, Culture, and Literature in Nineteenth-Century England, Joss Marsh](#) , 1998, 0226506916, 9780226506913. In 1883 the editor of a penny newspaper stood trial three times for the "obsolete" crime of blasphemy. The editor was G. W. Foote, the paper was the Freethinker, and the trial was the defining event of the decade. Foote's "martyrdom" completed blasphemy's nineteenth-century transformation from a religious offense to a class and cultural crime. From extensive archival and literary research, Joss Marsh reconstructs a unified and particular account of blasphemy in Victorian England. Rewriting English history from the bottom up, she tells the forgotten stories of more than two hundred working-class "blasphemers," like Foote, whose stubborn refusal to silence their "hooligan" voices helped secure our rights to speak and write freely today. The new standards of criminality used to judge their "word crimes" rewrote the terms of literary judgment, demoting the Bible to literary masterpiece and raising Literature as the primary standard of Victorian cultural value.

[Inorganic Nanoparticles: Synthesis, Applications, and Perspectives, Claudia Altavilla, Enrico Ciliberto](#) , 2010, 1439817626, 9781439817629. Among the various nanomaterials, inorganic nanoparticles are extremely important in modern technologies. They can be easily and cheaply synthesized and mass produced, and for this reason, they can also be more readily integrated into applications. *Inorganic Nanoparticles: Synthesis, Applications, and Perspectives* presents an overview of these special materials and explores the myriad ways in which they are used. It addresses a wide range of topics, including: Application of nanoparticles in magnetic storage media Use of metal and oxide nanoparticles to improve performance of oxide thin films as conducting media in commercial gas and vapor sensors Advances in semiconductors for light-emitting devices and other areas related to the energy sector, such as solar energy and energy storage devices (fuel cells, rechargeable batteries, etc.) The expanding role of nanosized particles in the field of catalysis, art conservation, and biomedicine The books contributors address the growing global interest in the application of inorganic nanoparticles in various technological sectors. Discussing advances in materials, device fabrication, and large-scale production all of which are urgently required to reduce global energy demands they cover innovations in areas such as solid-state lighting, detailing how it still offers higher efficiency but higher costs, compared to conventional lighting. They also address the impact of nanotechnology in the biomedical field, focusing on topics such as quantum dots for bioimaging, nanoparticle-based cancer therapy, drug delivery, antibacterial agents, and more. Fills the informational gap on the wide range of applications for inorganic nanoparticles in areas including biomedicine, electronics, storage media, conservation of cultural heritage, optics, textiles, and cosmetics Assembling work from an array of experts at the top of their respective fields, this book delivers a useful analysis of the vast scope of existing and potential applications for inorganic nanoparticles. Versatile as either a professional research resource or textbook, this effective tool elucidates fundamentals and current advances associated with design, characterization, and application development of this promising and ever-evolving device.

[Overcoming inequality: why governance matters, Unesco](#) , 2009, 0199544190, 9780199544196. Gaping inequalities confront education today. Simply put, not all children have access to a good quality education and large numbers of youth and adults are excluded from participation in their societies. Deeply entrenched disparities based on wealth, gender, ethnic or cultural belonging, disability and geographical residence represent tall obstacles to achieving Education for All, a set of six goals to which over 160 governments committed themselves in 2000. *Overcoming inequality--why governance matters* is the seventh edition of the Education for All Global Monitoring Report. It maps the complex and

multiple facets of inequality and examines some of the key questions that national governments and donors must address in attempting to ensure that the benefits of education are shared by the poor, disadvantaged groups and regions that are being left behind. It shows that public policy and governance reform, together with sustained financial commitment, can break the cycle of disadvantage, improve access, raise quality and enhance participation and accountability. Prepared by an independent team of researchers based at UNESCO, this report is based on case studies, commissioned research and extensive data analysis relating to early childhood care and education programmes, primary and secondary education, gender, life skills, adult literacy and quality. It includes an analysis of aid to basic education, crucial to supporting educational development, especially in fragile states, where conflict and weak governance have severely undermined the provision of education. Written by an international research team hosted by the United Nations Educational, Scientific and Cultural Organization (UNESCO), directed by Nicholas Burnett. UNESCO is a specialised agency of the UN founded on 16 November 1945. Today, UNESCO functions as a laboratory of ideas and a standard-setter to forge universal agreements on emerging ethical issues. The Organization also serves as a clearinghouse- for the dissemination and sharing of information and knowledge- while helping Member States to build their human and institutional capacities in diverse fields. In short, UNESCO promotes international co-operation among its Member States and Associate Members in the fields of education, science, culture and communication.

The Design Guidelines Collaborative Framework describes a knowledge-based design for multi-X method, aimed at improving and assisting the work of designers, manufacturers, and inspectors in the areas of product redesign and process reconfiguration. The Design Guidelines Collaborative Framework uses the simple IDEF0 formalism to describe the DGLs-CF framework in a top-down way, in order to facilitate readers comprehension, and their adoption and development of the framework. Several case studies on the application of the DGLs-CF in industrial environments show the frameworks effectiveness and robustness. Industrial and academic researchers will find this book a useful guide to the DGLs-CF and mechanical engineers will be quick to appreciate the streamlined approach it describes.

[Systems Engineering: Coping with Complexity](#), 1998, 0130950858, 9780130950857. In an age of shrinking development cycles, it is harder than ever to bring the right product to market at the right time. Good product, especially complex products, is underpinned by good systems, and systems engineering itself is recognised as the key tool to product development. This book covers the principles of systems design in an easy to read format. The authors have decades of practical industrial experience, and the material is ideal for industrial project teams. For academic courses, the book acts as a component for graduate and undergraduate engineering studies, particularly those on systems engineering. It covers how to handle requirements, architectural design, integration and verification, starting from the perspective of a simple linear lifecycle. The book then gradually introduces recent work on the complexity of real world systems, with issues such as multi-level systems, and iterative development. There is also coverage of the impact of systems engineering at the organisational level.

[Nursing: The Philosophy and Science of Caring, Jean Watson](#), 2008, 0870819798, 9780870819797. Jean Watson's first edition of Nursing, now considered a classic, introduced the science of human caring and quickly became one of the most widely used and respected sources of conceptual models for nursing. This completely new edition offers a contemporary update and the most current perspectives on the evolution of the original philosophy and science of caring from the field's founding scholar. A core concept for nurses and the professional and non-professional people they interact with, "care" is one of the field's least understood terms, enshrouded in conflicting expectations and meanings. Although its usages vary among cultures, caring is universal and timeless at the human level, transcending societies, religions, belief systems, and geographic boundaries, moving from Self to Other to community and beyond, affecting all of life. This new edition reflects on the universal effects of caring and connects caring with love as the primordial moral basis both for the philosophy and science of caring practices and for healing itself. It introduces Caritas Processes, offers centering and mediation exercises on an included audio CD, and provides other energetic and reflective models to assist students and practitioners in cultivating a new level of Caritas Nursing in their work and world.

[Mom, Dad, Tell Me about Money: A Primer, J. Jack Andrade](#) , 2004, 0975949403, 9780975949405. This primer is for parents and teachers to use as a guide to explain the basics regarding banking, business, investing and the future value

of money. In the 21st century, saving is not enough. A child and young adult needs to understand how a business works, what a bank or credit union does for the community, the functions of a board of directors and a simple breakdown of the stock market. More importantly, it simplifies what a dollar will be worth 10, 20 or 30 years in their future. The book has three sections: for ages 12 to 14, 15 to 17 and college age young adults who need information for budgeting and personal financial management. This book answers questions and helps to begin an honest discussion between you and your child about money. Parents will be able to explain money deeper than saving for a rainy day. Each chapter is introduced by a translation of Aesop's Fables by George Fyler Townsend.

"Thin as Bone China, painted with exquisite precision, the best Mata Ortiz pots . . . seem to float above a shelf like ceramic balloons, " writes Susan Lowell in The Many Faces of Mata Ortiz, which captures the beauty and magic of this emerging, indigenous art form. The Many Faces of Mata Ortiz introduces ceramic collectors to the remarkable village artists of Mata Ortiz in northern Chihuahua, Mexico. One hundred potters are featured, along with their most impressive works of art. This beautifully illustrated volume also includes directions for travelers planning to visit the village, an index of potters profiled, a schedule of exhibitions in the U.S. and Mexico, a glossary, and a bibliography.

[Duty and Desire: A Novel of Fitzwilliam Darcy, Gentleman, Pamela Aidan](#) , 2006, 0743298373, 9780743298377. There was little danger of encountering the Bennet sisters ever again. Jane Austen's classic novel Pride and Prejudice is beloved by millions, but little is revealed in the book about the mysterious and handsome hero, Mr. Darcy. And so the question has long remained: Who is Fitzwilliam Darcy? Pamela Aidan's trilogy finally answers that long-standing question, creating a rich parallel story that follows Darcy as he meets and falls in love with Elizabeth Bennet. Duty and Desire, the second book in the trilogy, covers the "silent time" of Austen's novel, revealing Darcy's private struggle to overcome his

attraction to Elizabeth while fulfilling his roles as landlord, master, brother, and friend. When Darcy pays a visit to an old classmate in Oxford in an attempt to shake Elizabeth from his mind, he is set upon by husband-hunting society ladies and ne'er-do-well friends from his university days, all with designs on him -- some for good and some for ill. He and his sartorial genius of a valet, Fletcher, must match wits with them all, but especially with the curious Lady Sylvania.

Irresistibly authentic and entertaining, *Duty and Desire* remains true to the spirit and events of *Pride and Prejudice* while incorporating fascinating new characters, and is sure to dazzle Austen fans and newcomers alike.

[Of Body and Brush: Grand Sacrifice as Text/Performance in Eighteenth-Century China](#), Angela Zito , 1997, 0226987280, 9780226987286. The Qianlong emperor, who dominated the religious and political life of eighteenth-century China, was in turn dominated by elaborate ritual prescriptions. These texts determined what he wore and ate, how he moved, and above all how he performed the yearly Grand Sacrifices. In *Of Body and Brush*, Angela Zito offers a stunningly original analysis of the way ritualizing power was produced jointly by the throne and the official literati who dictated these prescriptions. Forging a critical cultural historical method that challenges traditional categories of Chinese studies, Zito

shows for the first time that in their performance, the ritual texts embodied, literally, the metaphysics upon which imperial power rested. By combining rule through the brush (the production of ritual texts) with rule through the body (mandated performance), the throne both exhibited its power and attempted to control resistance to it. Bridging Chinese history, anthropology, religion, and performance and cultural studies, Zito brings an important new perspective to the human sciences in general.

[The Inner-city of God: The Diary of an East End Parson, John Pridmore](#) , 2008, 1853118826, 9781853118821. Out of a situation which many would give up on, John Pridmore writes a captivating, moving, funny and self-deprecating account of life as an inner-city priest in one of the most deprived parts of London. His jottings, he says, are a collection of the

absurd, the poignant and the comic. They are emphatically not a record of 'good practice', he insists, but anyone countenancing working in a city parish will find more wisdom in this book than in all the theological volumes on the subject put together. For the last ten years John Pridmore has lived what he calls a roller-coaster life as vicar of an inner city parish that incorporates Britain's 'murder mile'. Police raids, gun and knife crimes are everyday events. In this unpromising soil, stands a vast, ugly and largely crumbling building which is the parish church. From here, John says his work is to suggest 'that Christianity might be true'. It's an uphill struggle, not helped by constant insistence on growth strategies and targets from an increasingly managerial church hierarchy. He is sure the bishop thinks he's doing a terrible job. Yet warmth and love shine from every page. No-one can fail to be moved by this extraordinary memoir.

[Chocolate Dove, Cas Sigers](#) , 2012, 1601623461, 9781601623461. When Basra Sadiq realizes that catalog modeling isn't enough to pay her college tuition, she reluctantly becomes a high-end escort. With her exotic Somalian looks, there are plenty of men willing to pamper her, showering her with money and expensive gifts. It's not long before she becomes hooked on the extravagant lifestyle. She joins Choice, an elite international escort agency in Manhattan, where she works under the name Dove. In spite of her "no sex" rule, affluent patrons are willing to pay top dollar for just a few hours in her company. Dove is in high demand. After months of wild parties and expensive vacations, Dove finds it harder to hold her slot as "top chocolate." There is plenty of competition from girls who are willing to do any and everything to make a buck. Dove realizes that she's got to do whatever is necessary to stay on top. However, matters become complicated when she falls in love with Grayson Charles, an abstract artist. Dove would like to leave behind the escort business, but that proves to be harder than she expected. Not only has she become accustomed to the perks of her job, but she's also boosting Grayson's career by convincing her clients to buy his artwork. Even after she marries Grayson, she hasn't been able to break free from the escort service. How long will she be able to balance her life as the wife of one man and the fantasy of many?

[The Rider, Tim Krabb](#) , 2002, 0747559414, 9780747559412. THE RIDER describes one 150-kilometre race in just 150 pages. In the course of the narrative, we get to know the forceful, bumbling Lebusque, the aesthete Barthlemy, the young Turk Reilhan and the mysterious 'rider from Cycles Goff'. Krabb battles with and against each of them in turn, failing on the descents, shining on the climbs, suffering on the (false) flats. The outcome of the race is, in fact, merely

the last stanza of an exciting and too-brief paean to stamina, suffering and the redeeming power of humour. This is not a history of road racing, a hagiography of the European greats or even a factual account of his own amateur cycling career. Instead, Krabb allows us to race with him, inside his skull as it were, during a mythical Tour de Mont Aigoual.

They introduce us to people and events usually ignored by mainstream media and, in the process, create a fresh history of Los Angeles. Roughly dividing the city into six regions North Los Angeles, the Eastside and San Gabriel Valley, South Los Angeles, Long Beach and the Harbor, the Westside, and the San Fernando Valley this illuminating guide shows how power operates in the shaping of places, and how it remains embedded in the landscape.

Another day without Test-Driven Development means more time wasted chasing bugs and watching your code deteriorate. You thought TDD was for someone else, but it's not! It's for you, the embedded C programmer. TDD helps you prevent defects and build software with a long useful life. This is the first book to teach the hows and whys of TDD for C programmers. TDD is a modern programming practice C developers need to know. It's a different way to program---unit tests are written in a tight feedback loop with the production code, assuring your code does what you think. You get

valuable feedback every few minutes. You find mistakes before they become bugs. You get early warning of design problems. You get immediate notification of side effect defects. You get to spend more time adding valuable features to your product. James is one of the few experts in applying TDD to embedded C. With his 1.5 decades of training, coaching, and practicing TDD in C, C++, Java, and C# he will lead you from being a novice in TDD to using the techniques that few have mastered. This book is full of code written for embedded C programmers. You don't just see the end product, you see code and tests evolve. James leads you through the thought process and decisions made each step of the way. You'll learn techniques for test-driving code right next to the hardware, and you'll learn design principles and how to apply them to C to keep your code clean and flexible. To run the examples in this book, you will need a C/C++ development environment on your machine, and the GNU GCC tool chain or Microsoft Visual Studio for C++ (some project conversion may be needed).

[Invitations to Love: Literacy, Love Letters, and Social Change in Nepal, Laura M. Ahearn](#) , 2001, 0472067842, 9780472067848. Invitations to Love provides a close examination of the dramatic shift away from arranged marriage and capture marriage toward elopement in the village of Junigau, Nepal. Laura M. Ahearn shows that young Nepalese people are applying their newly acquired literacy skills to love-letter writing, fostering a transition that involves not only a shift in marriage rituals, but also a change in how villagers conceive of their own ability to act and attribute responsibility for events. These developments have potential ramifications that extend far beyond the realm of marriage and well past the Himalayas. The love-letter correspondences examined by Ahearn also provide a deeper understanding of the social effects of literacy. While the acquisition of literary skills may open up new opportunities for some individuals, such skills can also impose new constraints, expectations, and disappointments. The increase in female literacy rates in Junigau in the 1990s made possible the emergence of new courtship practices and facilitated self-initiated marriages, but it also reinforced certain gender ideologies and undercut some avenues to social power, especially for women. Scholars, and students in such fields as anthropology, women's studies, linguistics, development studies, and South Asian studies will find this book ethnographically rich and theoretically insightful. Laura M. Ahearn is Assistant Professor of Anthropology, Rutgers University.

This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In classics, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is just one of many articles from Oxford Bibliographies Online: Classics, a continuously updated and growing online resource designed to provide authoritative guidance through the scholarship and other materials relevant to the study of classics. Molecular techniques are proving invaluable in determining the phylogenetic status of potentially endangered species, for investigating mechanisms of speciation, and for measuring the genetic structure of populations. It is increasingly important for ecologists and evolutionary and conservation biologists to understand and use such molecular techniques, but most workers in these areas have not been trained in molecular biology. This book lays out the principles and basic techniques for the molecular tools appropriate for addressing issues in conservation, and it presents case studies showing

how these tools have been used successfully in conservation biology. Examples include the genetic analysis of population structure, various uses of DNA in conservation genetics, and estimation of migration parameters from genetic data.

Wildlife managers, as well as researchers in these areas, will find this a valuable book.

The lives of these two persons are so interconnected, yet volumes have been written on Catherine & very little on William Flete. This book seeks to remedy this situation. For the first time what we know of Flete & all of his writings, especially those on Catherine of Siena, are produced in one volume. In addition background information is given on the spirituality of the English Austin Friars & on the Lecceto community, where Flete lived & where Catherine visited. Flete's famous treatise on the spiritual life is given in English translation as well as his letters & his testimony to Catherine: her spiritual document & a sermon. All this is rounded off with the Augustinian foundations of Catherine's thought. Volume discounts available from: Augustinian Press, P.O. Box 476, 214 Ashwood Road, Villanova, PA 19085.

[China, Asia, and the New World Economy, Barry Eichengreen, Yung Chul Park, Charles Wyplosz](#) , 2008, 0191647659, 9780191647659. The rise of Asia, and China specifically, is the single most important force reshaping the world economy at the beginning of the 21st century. From a low of 20 per cent in 1950, Asia's share of global GDP has now risen to 33 per cent and will exceed 40 per cent within a generation if current forecasts are realized. Asia's growing weight in the world economy is elevating it to a central position in global economic and financial affairs. The potential global impact of this astonishing growth is far reaching, from oil markets and the environment to a reshaping of trade relations in the current multilateral system dominated by the WTO. This collection of original essays written by leading economists explores the likely impact of the rapid growth in the East Asian economies, and in particular China, on the world economy in the coming decades and the consequent challenges for the development of trade, macroeconomic, and environmental

policy.

[The Tale of Hawthorn House: The Cottage Tales of Beatrix Potter, , , Susan Wittig Albert](#) , 2007, 1597226173, 9781597226172. A brand-new mystery in the endearing Beatrix Potter series from a national bestselling author. During Sawrey's annual summer fte, Miss Beatrix Potter receives an unexpected visitor in the form of Baby Flora, left in a basket on her doorstep with a note, a sprig of hawthorn, and a scarab ring. All Beatrix knows about Flora's previous guardian is that she was a gray-haired woman, capable of scaling a brick wall in seconds. An investigation reveals that the ring was pawned and reclaimed in Sawrey by a resident of Hawthorn House. The legendary manor is supposed to be vacant-and rumored to be haunted. Now Beatrix and her animal friends are left pondering the possible involvement of fairy folk in these utterly puzzling happenings.

Award-winning journalist Liza Mundy captures the human narratives, as well as the science, behind the controversial, multibillion-dollar fertility industry, and examines how this huge social experiment is transforming our most basic relationships and even our destiny as a species. Skyrocketing infertility rates and dizzying technological advances are revolutionizing American families and changing the way we think about parenthood, childbirth, and life itself. Using in-depth reporting and riveting anecdotal material from doctors, families, surrogates, sperm and egg donors, infertile men and women, single and gay and lesbian parents, and children conceived through technology, Mundy explores the impact of assisted reproduction on individuals as well as the ethical issues raised and the potentially vast social consequences. The unforgettable personal stories in Everything Conceivable run the gamut from joyous to tragic; all of them raise questions we dare not ignore. From the Trade Paperback edition.

[The Zen of Law School Success, Chad Noreuil](#) , 2011, 1611631211, 9781611631210. The Zen of Law School Success offers a comprehensive approach to succeeding in law school. Zen is about simplicity, balance, knowing your universe, knowing yourself, and staying focused on the path to enlightenment. Similarly, these principles should be the foundation for success in law school, and this book details how to put these principles into practice in order to maximize your ability to have a successful law school career. Like the Zen path to enlightenment, law school success is about balance (between studying and other aspects of life, as well as balancing your study time between subjects, outlining, etc.), knowing your universe (knowing not only the subject matter tested, but knowing how the questions are constructed, knowing what to look for, etc.), knowing yourself (what type of essay writer you are, what type of learner you are, what type of exam taker you are, etc.), and staying focused on your path (when to study, what to do when you are stressed out, what to do when you don't know a subject very well, etc.). In addition to offering a comprehensive approach to succeeding in law school, the book also offers practical advice for doing well during the classroom Socratic method, navigating the law school environment, managing law school stress, and getting a job after graduation. Moreover, The Zen of Law School Success focuses on doing well on final exams, including specific strategies and tips for both essay and multiple choice exams. The book includes many exercises and model answers that will benefit any law student and is an

ideal resource for any law school Academic Achievement Program.

[The Unwritten Diary of Israel Unger, Carolyn Gammon, Israel Unger](#) , 2013, 1554588316, 9781554588312. At the beginning of the Nazi period, 25,000 Jewish people lived in Tarnow, Poland. By the end of the Second World War, nine remained. Like Anne Frank, Israel Unger and his family hid for two years in an attic crawl space. Against all odds, they emerged alive. Now, after decades of silence, here is Israel's unwritten diary. Nine people lived behind that false wall above the Dagnan factory in Tarnow. Their stove was the chimney that went up through the attic; their windows were cracks in the wall. Survival depended on the food the adults leaving the hideout at night were able to forage. Even at the end of the war, however, Jewish people emerging from hiding were still not safe. After the infamous postwar Kielce

pogrom, Israel's parents sent him and his brother as orphans to France in a program called Rescue Children, a Europe-wide attempt to find Jewish children orphaned by the Holocaust. When the family was finally reunited, they lived a precarious existence between France's people sans pays and England until the immigration papers for Canada came through in 1951. In Montreal, in the world described so well by Mordecai Richler, Israel's father, a co-owner of a factory in Poland, was reduced to sweeping factory floors. At the local yeshiva (Jewish high school), Israel discovered chemistry, and a few short years later he left poverty behind. He had a stellar academic career, married, and raised a family in Fredericton, New Brunswick. The Unwritten Diary of Israel Unger is as much a Holocaust story as it is a story of a young immigrant making every possible use of the opportunities Canada had to offer.

[Slavery, Empathy, and Pornography, Marcus Wood](#) , 2002, 0198187203, 9780198187202. Slavery, Empathy, and Pornography considers the operations of slavery and of abolition propoganda on the thought and literature of English

from the late-eighteenth to the mid-nineteenth centuries. Incorporating materials ranging from canonical literatures to the lowest form of street publication, Marcus Wood writes from the conviction that slavery was, and still is, a dilemma for everyone in England, and seeks to explain why English society has constructed Atlantic slavery in the way it has. He takes on the works of canonic eighteenth- and nineteenth-century white authors which claimed, when written, to 'account' for slavery, and asks with some scepticism what kind of 'truth' they hold. Taking an interdisciplinary approach, chapters focus on the writings of the major Romantic poets, English Radicals William Cobbett and John Thelwall, the Surinam writings of John Stedman, the full range of slavery texts generated by Harriet Martineau, John Newton, and the social prophets Carlyle and Ruskin. *Slavery, Empathy, and Pornography* also contains a radical new critique of the operations of slavery within the work of Austen and Charlotte Bronte.

[Academic Success and Social Power: Examinations and Inequality, Richard Teese](#) , 2000, 0522848966, 9780522848960.

A most significant text that says something new about how student achievement is shaped. Richard Teese cuts across much of the recent talk about reform and allows us to think about the issues afresh. His findings will fascinate all. Professor Simon Marginson, Monash University This eye-opening study of Australian secondary education looks beyond clichés about 'excellence' to analyse the historically specific nature of the scholarly ideal against which successive generations of Australian students have been judged. Drawing on a wealth of strikingly original research, Richard Teese offers a penetrating analysis of Victorian secondary schooling in the half-century after World War Two. This was a era in which higher secondary schooling ceased to be the preserve of an elite and emerged as a system of mass education. It was also a period marked by successive waves of reform in curriculum and assessment. Yet, at the end of it all, Australians have been left with a sharply polarised system of schooling in which the most economically vulnerable populations of young people are also those most at risk of educational failure. This book asks the hard questions. Are our systems of secondary teaching -- and the expectations they place on students -- anachronistic in an age of mass education? How far is the curriculum itself responsible for the manifest disparities in achievement between sectors and regions, and between boys and girls? What has been the universities' role in the process of reform and counter-reform? And what have all these upheavals implied for the practice of teaching?

9780563488712. Rick Stein's classic guide to the best of British seafood is now available in paperback. Rick (and Chalky his trusty dog) discover great dishes and small delicacies amongst the tidal estuaries, shingle banks and rocky shores of Britain. Rick travels from the bleak Suffolk coast -awhere fishermen scrape a living catching cod -ato the wild, clear waters of Scotland's lochs bringing back an abundance of stories and imaginative, colourful recipes. The book is organised geographically with each chapter covering one of the regions featured in the series. Rick describes the fish-catching and fish-eating traditions of each area as well as details of the local life, legends and literature. He singles out

local delicacies and includes six to eight recipes per chapter. Each chapter is illustrated with stunning food and landscape photography and ends with an area map and a guide to a small selection of the best hotels, restaurants, pubs and specialist suppliers (including information on extra locations, not featured in the series). 'Just as I do in the restaurant to keep ahead of the game, I look for the best suppliers, the freshest fish and who catches them. In a way, this is what this series is about, the fish I love, for all sorts of reasons -not just taste or fashion -awhere they come from and the people who catch them and the best way to cook them. As a result of looking around the country for the best seafood, it's turned out to be a love affair with the changing coastline of Great Britain and Ireland and the business of going to sea in small boats to catch the freshest prime fish we have.' [Devil's Daughter, Catherine Coulter](#) , 2001, 1587240343, 9781587240348. The devil's daughter is Arabella Welles, daughter of Anthony Welles, Earl of Clare, the dashing hero of Catherine Coulter's Devil's Embrace. Independent and as strong-willed as her father, she is a blonde hellion with eyes as black as midnight. When Arabella travels to Naples to solve the mystery of her father's missing ships and cargoes, she discovers that the person behind this thievery is an enemy from her father's past who packs Arabella off to a harem in North Africa. Arabella finds the harem a frightening yet fascinating place, a golden prison from which there is little chance of escape. Her master is Kamal, the Bey of Oran, a man who must be her enemy but who is unlike any man she has ever known. And Kamal suddenly finds himself faced with a woman willing to fight him to the death -- a woman who both bewitches and infuriates him.

ABOUT MOURNING: Support and Guidance for the Bereaved deals with the subject of bereavement in a sensitive and effective way. The process of mourning is described interspersed with tender vignettes drawn from the cases of many who have experienced the death of a significant person. This organic approach addresses the family loss, the loss of various relationships, i.e., mate, child, parent and the effect on the family. Included are chapters on helping children to mourn and ethical wills. This book is for everyone, as we inevitably confront the death of a significant person

at some point in our lives. ABOUT MOURNING will be valuable not only for the mourner but also for mental health professionals.

[Contemporary Poetry and Contemporary Science, Robert Crawford](#) , 2006, 0191531588, 9780191531583. A unique collaboration between leading poets and scientists, Contemporary Poetry and Contemporary Science demonstrates through its form, and through practice as well as reflection, that poetry and science can meet with productive results. Crossing between disciplines, and between prose and verse, the book shows how modes of scientific knowledge and of poetic making continue to be intertwined. Often drawing on Scottish intellectual traditions, rather than on the notorious 'two cultures' argument, Contemporary Poetry and Contemporary Science argues through examples for a more open and mutually sympathetic engagement of poetry and science in contemporary culture. Provocative, nimble, and surprising, this book is in several senses a crossover volume. In its gathering of essays as well as poems, it is the first book of its kind. Readers can see how a poet and a solar physicist may share working assumptions; how poetic insight may inform psychiatric practice; how a poet's encounter with an MRI scanner leads to a fresh neurological experiment. As well as new essays by internationally distinguished poets, scientists, and literary critics including Simon Armitage, Gillian Beer, Jocelyn Bell Burnell, Miroslav Holub, Kay Redfield Jamison, and Edwin Morgan, the book includes a series of specially commissioned poems by John Burnside, Michael Donaghy, Sarah Maguire, Paul Muldoon, Don Paterson, and others. Each poem is introduced by the scientist whose work prompted the poem. Though Contemporary Poetry and Contemporary Science exposes and investigates strains between the way poets and scientists see and reinvent the world, the book is most arresting and enjoyable when it shows just how often poets and scientists agree.

[Tribal Science: Brains, Beliefs and Bad Ideas, Mike McRae](#) , 2011, 0702247340, 9780702247347. How do you define science? And whose theories are the right ones? Take a humorous and intriguing journey through the uncharted territory of scientific squabbles with scientist Mike McRae, Australia's next-gen Dr Karl, as he reveals arguments and accusations about who is right and who is wrong in the world of science. Over time, science has come to permeate our everyday existence: advertisements for beauty products use words that sound scientific, movie makers blur the lines between science and science fiction, and people spend billions and risk their health on bogus medical treatments. Without knowing it, we have accepted science as a social practice to explain and understand the world around us. Charting the history of science and our trust and blind faith in 'science', Mike McRae boldly examines the boundaries of what constitutes science and what doesn't. In an engaging and straightforward way, McRae explains how and why

science developed and why it works, and gives us tools to interpret the good science from the bad. Intelligent and entertaining, Tribal Science reveals a compelling paradox that lies at the very heart of science and our everyday lives.
