[Energy Choices: A Guide to Facts and Perspectives, ASME Committee of Past Presidents](#) , 2010, 0791859517, 9780791859513. booklet is intended to give the reader some information to better understand the complexities of the energy world and its ongoing evolution. It provides a context for our total energy future as we know it today. Energy Choices: A Guide to Facts and Perspectives is the result of the efforts of numerous members and associates of the ASME who have unique professional and technical backgrounds that are directly relevant to this undertaking. Their inputs are intended to provide an overview of energy issues at a relatively non-technical level. It is directed at the general public and other stakeholders who want more knowledge of energy sources, energy conversion, and energy end use and their challenges and limitations. While we hope this book serves as an information tool that should be utilized for educational purposes, it is also the sincere hope of the contributors to this document that it will be used to create informed opinions and perspectives on energy choices.

[Interview with an Exorcist: An Insider's Look at the Devil, Demonic Possession, and the Path to Deliverance, Jose Antonio Fortea](#) , 2006, 1932645969, 9781932645965. In today's culture of scientific enlightenment, many consider belief in demonic possession and exorcism to be superstitious remnants of the Dark Ages. Even many Christians, contrary to the clear words of Jesus in the Gospel, scoff at the notion that the Devil and demons really exist. Is demonic possession real? Are believers really in any danger from Satan and his crafty minions? What is the truth about exorcism? Written by one of the Church's foremost experts on the topic, Interview with an Exorcist is based on Fr. Jose Antonio Fortea's years of working as an exorcist, his extensive investigations of cases of suspected possessions, and his attendance at hundreds of exorcisms.

[Evaluation of regulatory impact assessments compendium report 2004-05: report, Great Britain: National Audit Office](#) , 2005, 0102932476, 9780102932478. This report sets out the NAO's second annual report on the effectiveness of Regulatory Impact Assessments (RIAs), which are used by Government to assess the costs and benefits of individual policies, and establish a balance between under and over regulation. Out of 175 RIAs produced during 2003-04, the report examines a sample of 10 , based on those identified by the Better Regulation Task Force as examples where lessons can be drawn. The evaluation is based on consideration of seven technical aspects of RIAs: defining the problem; the identification of alternative solutions; the analysis of costs and benefits; competition assessment; compliance analysis; taking account of small business; monitoring and evaluation. Findings include that there were examples where the RIA process had helped departments to develop a better policy proposal, and in one case had even led a Department to decide not to use regulation at all. However, there were also cases where its impact was limited because it had not been an integral part of the policy making process.

With readings from major thinkers from the classical era up to the present, the collection provides a thematic overview of the concept of justice. Moreover, Sandel's organization of the readings and his own commentaries allow readers to engage with a variety of pressing contemporary issues. Looking at a host of ethical dilemmas, including affirmative action, conscription, income distribution, and gay rights, from a variety of anglesmorally, legally, politicallythe collection engages with the core concerns of political philosophy: individual rights and the claims of community, equality and inequality, morality and law, and ultimately, justice. With concise section introductions that put the readings in context, this anthology is an invaluable tool for students, teachers, and anyone who wishes to engage in the great moral debates that have animated politics from classical times to our own.

[Discourses on Livy, Niccolo Machiavelli](#) , 1997, 0191604666, 9780191604669. Machiavelli's commentary on Livy's history of Rome sets out his fundamental preference for a republican state. This translation is richly annotated, providing the contemporary reader with sufficient historical, linguistic, and political information to understand and interpret the

revolutionary affirmations Machiavelli made, based on the historical evidence he found in Livy. - ;IDiscourses on Livy (1531) is as essential to an understanding of Machiavelli as his famous treatise, The Prince. Equally controversial, it reveals his fundamental preference for a republican state. Comparing the practice of the ancient Romans with that of his contemporaries provided Machiavelli with a consistent point of view in all his works. Machiavelli's close analysis of Livy's history of Rome led him to advance his most original and outspoken view of politics - the belief that a healthy body politic was characterized by social friction and conflict rather than by rigid stability. His discussion of conspiracies in Discourses on Livy is one of the most sophisticated treatments of archetypal political upheaval ever written. In an age of increasing political absolutism, Machiavelli's theories became a dangerous ideology. This new translation is richly annotated, providing the contemporary reader with sufficient historical, linguistic, and political information to understand and interpret the revolutionary affirmations Machiavelli made, based on the historical evidence he found in Livy. -

Fourier Transform Spectrometry is of immediate use to those who use Fourier transform spectrometers in their research, or are considering their use. The authors' presentations enable readers to obtain a clear understanding of FTS, which is crucial to their studies and research. Due to the increasing complexity and commercialization of instrumentation, achieving optimum performance in research applications and automated usage can be challenging. For example, a thorough understanding of the instrument can dramatically affect the outcome of the experiment and the generation of reliable data in applications where conditions are not ideal and resulting signals are weak. This book provides a comprehensive discussion of FTS from the ground up, covering basic concepts, instrumentation, data-processing algorithms, and techniques for computerized spectral analysis.

Enthusiastic employees far out-produce and outperform the average workforce: they step up to do the hard, even 'impossible' jobs. Most people are enthusiastic when they're hired:

hopeful, ready to work hard, eager to contribute. What happens? Management, that's what. The authors tell you what managers do wrong, and what they need to do instead. It's about giving workers what they want most, summarized in the Three-Factor Theory: to be treated fairly; to feel proud of their work and organizations; and to experience camaraderie. Sounds simple, but every manager knows how tough it can be. Nostrums, fads, and quick and easy solutions have abounded in the management literature, but swiftly go out of style when they fail to meet the test in the workplace. The authors provide research-grounded answers to crucial questions such as: Which leadership and management practices can have the greatest positive performance impact? What does employee satisfaction really mean? What's the relationship between employee satisfaction, customer loyalty, and profit? Sirota and his colleagues detail exactly how to create an environment where enthusiasm flourishes and businesses grow.

At the height of his career, Beaudine worked for every major studio and directed many greats of the Silent Era, including Mabel Normand, George Sidney, Laura LaPlante, and Tom Mix. When Mary Pickford returned to the screen after a yearlong hiatus, she chose Beaudine to direct her comeback film Little Annie Rooney." "Beaudine's career continued after the era of silent films and well into the golden age of television and beyond, where he worked on such programs as The Green Hornet and Lassie. During his 60 years in the business, Beaudine racked up credits on more than 500 films and 350 television programs. Until his death at age 78, he was the oldest active director in the business. In 1969, The Canadian, his 1926 film starring Thomas Meighan, was acknowledged as one of the best films of the pre-sound era and received the Film Critics Award of the New York Arts Institute." "In this detailed biography, Marshall chronicles Beaudine's swift rise through the ranks, his triumph as one of the most successful directors of British comedies, accumulation and loss of personal fortunes, and prolific work in television. William Beaudine: From Silents to Television also corrects much misinformation that has been written about the director. With the most complete list of his directorial credits to date, this volume serves as the ultimate authority on Beaudine's life and career."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. [Wind Dancing: The Gift of Healing Traumatic Brain Injury, Deborah Ellen Schneider](#) , 2009, 098411470X, 9780984114702. Editorial ReviewsDeborah Schneider has lived through a nightmare that most of us can't even imagine. She opens herself up and invites us in an act that requires great courage under even the best of circumstances. Her experience of kindness, compassion and grace in the midst of darkness is an inspiring testament to our shared humanity. Hearing of the struggles she continues to deal with on a daily basis, one can only stand back and admire her commitment to living a full and productive life.--Penny Marshall, Actress and ProducerWith grace and dignityDeb reclaims her life after a serious brain injury. Her humor and direct speaking provide insight and inspiration...Truly, the sky is the limit!--Judith

Avner, Executive Director, Brain Injury Association of New York State (BIANYS) Deborah exemplifies the process of spiritual transformation. Even at her lowest emotional and physical points, the author acknowledges love, patience, care, and perhaps above all an abiding sense of grace to see her through the darkness and into a dynamic experience of light and wholeness Her story is a powerful testament to the possibility of finding hope and healing, even in the midst of trial and danger, and will surely inspire all who have ever walked in the valley of despair to dream about dancing.--John Cecero, Associate Professor of Psychology, Fordham University Wind Dancing is unique in that it gives the reader a rare opportunity to understand the effects and impact of traumatic injuries from the inside out rather than from the outside in. With grace, dignity and an unbending openness and honesty, Deborah shares with the reader her ongoing journey of healing and recovery from the depths of despair, confusion, fear and pain the author's story highlights the importance of an integrative mind-body approach to healing the crisis that initially disrupted her entire life ultimately became an opportunity for tremendous personal growth.--Leslie Nadler, Adjunct Professor of Psychology, CW Post College Wind Dancing takes the reader on a poignant and spiritual journey... [Deborah's] courage, resilience and ultimate transformation are an inspiration, and a wonderful reminder of the power of the human spirit to not only survive but triumph over trauma and adversity.--Deborah M. Benson, Rehabilitation Neuropsychologist Product Description Survival. Hope. Renewal. These three simple words sum up Deborah Ellen Schneider's life. In this memoir of tragedy and triumph, she teaches people suffering from disability, depression and abuse how to reclaim their lives and learn the joyful art of Wind Dancing. Deborah was a senior manager at the second-largest bank in the world. Then in 1995, the driver of a two-ton New York utility truck smashed into her station wagon at 50 mph. Her head whipped back against the seat so violently that the headrest broke. The traumatic brain injury she suffered reduced her mental abilities to that of a five-year-old child. Years of chronic pain, debilitating dizziness and therapy followed. Simple tasks took monumental effort. The smallest things, like pulling her hair back into a ponytail, were impossible. As her marriage dissolved and her sons became her caregivers, she was trapped in a perpetual nightmare of post-traumatic stress and haunting childhood memories. A rehab facility called Transitions and a host of neighbors, friends and strangers formed a lifeline to hope. With their help, Deborah fought to regain her independence. As she leaned on her faith and her long experience as a survivor, she began an amazing spiritual transformation. She could never be the person she was before the accident. Instead she built a new life that allowed her to dance in the breeze called joy. As she emerged into a miraculous new life, Deborah knew she had to help others. She began advocating for people with a host of disabilities and now speaks for those who cannot speak for themselves. She is the founder of Wind Dancing Ne

[Entropy, Large Deviations, and Statistical Mechanics, R.S. Ellis](#) , 2011, 1461385350, 9781461385356. This book has two

main topics: large deviations and equilibrium statistical mechanics. I hope to convince the reader that these topics have many points of contact and that in being treated together, they enrich each other. Entropy, in its various guises, is their common core. The large deviation theory which is developed in this book focuses upon convergence properties of certain stochastic systems. An elementary example is the weak law of large numbers. For each positive ϵ , $P\{|S_n/n| \geq \epsilon\}$ converges to zero as $n \rightarrow \infty$, where S_n is the n th partial sum of independent identically distributed random variables with zero mean. Large deviation theory shows that if the random variables are exponentially bounded, then the probabilities converge to zero exponentially fast as $n \rightarrow \infty$. The exponential decay allows one to prove the stronger property of almost sure convergence ($S_n/n \rightarrow 0$ a.s.). This example will be generalized extensively in the book. We will treat a large class of stochastic systems which involve both independent and dependent random variables and which have the following features: probabilities converge to zero exponentially fast as the size of the system increases; the exponential decay leads to strong convergence properties of the system. The most fascinating aspect of the theory is that the exponential decay rates are computable in terms of entropy functions. This identification between entropy and decay rates of large deviation probabilities enhances the theory significantly.

George Schindler, the Dean of the Society of American Magicians, has kept audiences spellbound for more than forty years. In this guide for beginners and experienced ventriloquists alike, he defines the art and offers practical advice as well as inspiration. Starting with basic "vent" techniques, Schindler discusses the cultivation of a variety of voices and explains how to make puppets appear lifelike. He also presents helpful suggestions for putting an act together, developing comedy material and scripts, and even handling bookings and publicity. Thirty-eight figures and photos illustrate basic and advanced techniques in addition to puppets and their movements.

9780470440315. An updated and expanded Second Edition of the popular guide to social media for the business community. Marketers must look to the Web for new ways of finding customers and communicating with them, rather than at them. From Facebook and YouTube to blogs and Twitter-ing, social media on the Internet is the most promising new way to reach customers. Marketing to the Social Web, Second Edition helps marketers and their companies understand how to engage customers, build customer communities, and maximize profits in a time of marketing confusion. Author and social media guru Larry Weber describes newly available tools and platforms, and shows you how to apply them to see immediate results and growth. Rather than broadcast messages to audiences, savvy marketers should encourage participation in social networks to which people want to belong, where dialogue with customers, and between customers, can flourish. In Networking sites like MySpace, Facebook, and even Flickr are the perfect forums for this dialog; this book shows you how to tap into this new media. In addition to the tools and tactics that made Marketing to the Social Web a critical hit among marketers, this second edition includes three entirely new chapters that cover recent changes in the field. These new chapters describe how Facebook will monetize its business and one day surpass Google; how companies can measure the influence and effectiveness of their social media campaigns; and how marketing to mobile social media will grow into an effective practice in the near future. Marketing must reach out into new forms, media, and models. Marketing to the Social Web, Second Edition presents an exceptional opportunity to use these new tools and models to reach new markets, even in today's fragmented media environment. Larry Weber has spent the last three decades building global communications companies, including Weber Shandwick Worldwide and the W2 Group. He is also the founder and Chairman of the Massachusetts Innovation and Technology Exchange, the nation's largest interactive advocate association.

[The Way It Was: My Autobiography, Stanley Matthews](#) , 2001, 0747264279, 9780747264279. Stanley Matthews was the most popular footballer of his era, the man who epitomized a generation of legendary players: Tom Finney, Nat Lofthouse, Billy Wright, and many more. He was the first footballer ever to be knighted, the first European Footballer of the Year (at 41), and he played in the top division until he was 50. He will be forever remembered for his performance in the Matthews FA Cup final of 1953, when he inspired Blackpool to victory over Bolton. The Way It Was is the fascinating memoir of a great footballer and the remarkable story of an extraordinary life, written in the last months of his life.

Fishing with his father and his Uncle Prosek - the two finest fishermen in the world - he takes a peaceful pleasure from the rivers and ponds of his country. But when the Nazis invade, his father and two older brothers are sent to concentration camps and Pavel must steal their confiscated fish back from under the noses of the SS to feed his family. With tales of his father's battle to provide for his family both in wealthy freedom and in terrifying persecution, this is one boy's passionate and affecting tale of life, love and fishing.

[Scottish Highlanders and Native Americans: Indigenous Education in the Eighteenth-century Atlantic World, Margaret Szasz](#) , 2007, 0806138610, 9780806138619. Two indigenous cultures encounter Scottish educators in the eighteenth century. The Society in Scotland for the Propagation of Christian Knowledge (SSPCK) was founded in 1709 by Scottish Lowlanders for the education of Highlanders: specifically to convert them from the Gaelic language to English, from the Episcopal faith to Presbyterianism, and from latent Jacobitism to loyalty to the crown. In a transatlantic translation of this effort, the Scottish Society also established itself in the New World to educate and assimilate Iroquois, Algonquin, and southeastern Native peoples. In this first book-length examination of the SSPCK, Margaret Connell Szasz explores the origins of the Scottish Society's policies of cultural colonialism and their influence on two disparate frontiers. Drawing intriguing parallels between the treatment of Highland Scots and of Native Americans, she incorporates multiple perspectives on the cultural encounter, juxtaposing the attitudes of Highlanders and Lowlanders, English colonials and Native peoples, while giving voice to the Society's pupils and graduates, its schoolmasters, and religious leaders. Featuring more than two dozen illustrations, Scottish Highlanders and Native Americans brims with intriguing comparisons and insights into two cultures on the cusp of modernity. It is a benchmark in emerging studies of comparative education and a major contribution to the growing literature of cross-cultural encounters.

[I Look Around For My Life, John Knoepfle](#) , 2008, 0977731839, 9780977731831. For six decades, John Knoepfle has been writing poems, and he's still going strong. Knoepfle writes love poems, among the best we have, of the joys, loneliness, danger and the infinite transformations of marriage. He writes narrative poems, surreal, sardonic and magical about astronauts on the moon or an angry farmer and a prophetic owl. He recovers the stories of folks who never made it into the history books. Always he has a respect for the spoken word and lays his lines out on the page so that you too can hear it. And a spiritual force runs through his books like the slow and powerful rivers of the Midwest he inhabits. Both moving and humorous, Knoepfle's autobiography shows us how by hard work and lucky accident he came to be the poet he is.

[Cavalleria Rusticana and Other Stories, Giovanni Verga](#) , 1999, 0140447415, 9780140447415. The stories of Giovanni Verga (1840-1922) are wonderful evocations of ordinary Italian life, focusing in particular on his native Sicily. In an original and dynamic prose style, he portrays such eternal human themes as love, honour and adultery with rich and colourful language. The inspiration for Mascagni's opera, 'Cavalleria Rusticana' depicts a young man's triumphal return home from the army, spoilt when he learns that his beloved is engaged to another man. Verga's acute awareness of the hardships and aspirations of peasant life can be seen in stories such as 'Nedda', 'Picturesque Lives' and 'Black Bread', while others such as 'The Reverend' and 'Don Licciu Papa' show the dominance of the church and the law in the Sicilian communities he portrays so vividly.

[Wild Honey, Bookey Peek, Richard Peek](#) , 2012, 0143527282, 9780143527282. 'We Africans,' said Khanye, rapidly backing away from the beady-eyed cub at my feet,' are far more frightened of meeting a honey badger in the bush than a lion!' Following on from the highly acclaimed All the Way Home, here is a brand new volume of unforgettable adventures from Richard and Bookey Peek's wildlife sanctuary amongst Zimbabwe's ancient Matobo Hills. Packed with anecdote and adventure, Wild Honey leads us back to the Stone Hills sanctuary, where comedy, tragedy and the extraordinary antics of the most misunderstood animal in the world make every day unforgettable. In these troubled times Stone Hills has become more than a sanctuary. As thousands of farms all over Zimbabwe are invaded, often violently, under the government's disastrous land policy, Stone Hills is now an island rocked by the turbulence that surrounds it. How much longer can they hold on?

Each book is about a familiar domestic occurrence in a toddler's life, with much to recognise and to amuse. The rhyming text is perfect for reading aloud. Best-selling artist Nick Sharratt has illustrated these in bold primary colours with a much bolder, more modern look than other baby board books. Reworked from our successful range of picture books, these titles will have fresh appeal in board book form, just right for little hands to handle.

[The Revolution That Never Was, Will Hutton](#) , 2012, 1448155177, 9781448155170. Will Hutton argues that Keynesian revolution has yet to take place. Economists, he finds, have not yet come to terms with the heart of Keynes' argument: that there are limits to what prices can do in a market economy. But referring closely to Keynes' writings, Hutton demonstrates that Keynes was concerned to show how the financial sector of the economy originated and how it reinforced the incapacities of the market economy. Post-war Keynesianism, Will Hutton concludes, has overstressed the role of fiscal policy in programmes of Keynesian economic management: it is but one element in a larger policy of financial and momentary leverage aimed at leaning against these market incapacities. By insisting that government intervention is a prerequisite to the proper functioning of the market, Keynesianism in effect becomes a political philosophy challenging the entire panoply of economic and political liberalism. As such it may require important changes in the structure of government if it is to be implemented successfully.

[Gathering the Magic: Creating 21st Century Esoteric Groups, Nick Farrell](#) , 2007, 1905713096, 9781905713097. Many people on the spiritual path spend their lives looking for an esoteric order or school to join. If they find one they will inevitably find it a hotbed of intrigue and egos that eclipses any spiritual work. Despite this, author Nick Farrell believes that esoteric groups are the way forward in the Aquarian Age, provided there are fundamental changes in the way they run. The book applies the rules of group dynamics and conflict resolution to set up organizations that not only work but are fun to be involved in. The author calls on seekers to set up working esoteric groups of their own instead of waiting to find that perfect group, organization or teacher. As the title suggests, the book is written light-heartedly with plenty of humorous case studies of what happens when things go wrong. Gathering the Magic provides seekers with a window of what is happening within esoteric groups and the unique dynamics that take place when two or more gather to look at new age subjects. This book will prove invaluable to magicians, Wiccans and members of the New Age movement who wish to set up a group. It will also help those who more information about how esoteric groups work, and those who are members of organizations and want to know what is going on!

[The History of Radiology, Adrian M. K. Thomas, Arpan K. Banerjee](#) , 2013, 0199639973, 9780199639977. In 1890, Professor Arthur Willis Goodspeed, a professor of physics at Pennsylvania USA was working with an English born photographer, William N Jennings, when they accidentally produced a Röntgen Ray picture. Unfortunately, the significance of their findings were overlooked, and the formal discovery of X-rays was credited to Wilhelm Roentgen in 1895. The discovery has since transformed the practice of medicine, and over the course of the past 130 years, the development of new radiological techniques has continued to grow. The impact has been seen in virtually every hospital in the world, from the routine use of ultrasound for pregnancy scans, through to the diagnosis of complex medical issues such as brain tumours. More subtly, X-rays were also used in the discovery of DNA and in military combat, and their social influence through popular culture can be seen in cartoons, books, movies and art. Written by two radiologists who have a passion for the history of their field, *The History of Radiology* is a beautifully illustrated review of the remarkable developments within radiology and the scientists and pioneers who were involved. This engaging and authoritative history will appeal to a wide audience including medical students studying for the Diploma in the History of Medicine of the Society of Apothecaries (DHMSA), doctors, medical physicists, medical historians and radiographers.

When their effete son Claude succumbs to an opium habit, it is Tom Endicott's lusty bastard son Patrick by Molly, the Irish maid, who carries on his name. Bloodlines are crossed again when Patrick's daughter Alice elopes with an Italian barrow boy who shares her passion for opera. By WWI, the Village, engulfed by New York City, has become an artistic enclave. Patrick, now a self-made civil engineer, defies his wife and bulldozes the heart of the Village to put through his beloved subway. His son, Eugene, unhappily married, and a new father, finds his real sexual identity on the night streets of the Village. When his father catches him with a man, it is years before he accepts himself. In the twenties his sister Polly is jilted by a roguish entrepreneur Hymie Liebman and she almost destroys herself with sex and booze, but is coaxed back to life by her brother Eugene and his boyfriend Manny. After WWII, it is Polly who persuades her nephew Seth, home from the war, to produce his gay father's long-forgotten play, and he moves on to a Hollywood career, leaving her the last Endicott in the Village...

[Funding Evil: How Terrorism is Financed--and how to Stop it, Rachel Ehrenfeld](#) , 2003, 1566251966, 9781566251969.

The tentacles of terrorism have reached deep into America, threatening to make Osama bin Laden's dream of destroying the American economy a reality. As the United States spends billions upon billions more towards trying to fend off another 9/11-type attack, terrorist groups grow wealthier, and thus more capable of financing large-scale missions of murder and mayhem. This book, by terrorism expert Rachel Ehrenfeld Ph.D, uncovers the clandestine and sinister ways that Islamic terrorist groups finance their global network. From innocent-looking American businesses that serve as fronts for terrorism to joint efforts with established groups in organised crime, terrorists have grown increasingly savvy in ways to bolster their financial power. Dr. Ehrenfeld's investigation also details how these undetected billions are spent to methodically bring about chaos and destabilisation in American society.

Like Merrill, Liam is often misunderstood as he helps those seeking for purpose in their extraordinary talents. Liam's visionary abilities gain him international notoriety as The Prophecy Boy who swims with dolphins, dreams of a mysterious red door, and champions those who are often misjudged for their uncommon gifts. Surviving kidnapping, near-drowning, and imprisonment leads to the discovery that despite differences, when people respect each other and their wide variety of abilities, the thread of commonality that runs through mankind grows ever stronger. Turn the pages to join in this unforgettable journey.

[Kerrigan in Copenhagen: A Love Story, Thomas E. Kennedy](#) , 2013, 162040110X, 9781620401101. Kerrigan is writing a guide book to his adopted city of Copenhagen. Specifically, a guide to the city's drinking establishments-of which there are more than 1,500. Thus, it is a project potentially without end, and one with a certain amount of numbness built into it, through countless drinks imbibed. And that is part of the point: for Kerrigan, an American expat fleeing a brutal family tragedy, has plenty he wants to numb. The only problem with his project is his research associate, a voluptuous, green eyed gal who makes him tremble with forgotten desire. Kerrigan in Copenhagen is a love story. It is also a deeply human, Joycean romp through a magical city-its people, history, literature, and culture-giving Copenhagen its literary due and establishing Kennedy as a tremendously gifted novelist.

Studying the elegance and romance of Venetian architecture has long been the inspiration of thousands of painters for hundreds of years, and the scenes in this workbook pay tribute to this longstanding tradition. With projects that include Andrea Palladios celebrated Renaissance church on the island of St. George replete with passing gondolas, the authoritative grandeur of the Gallerie dellAccademia, and a true icon of Venetian 16th-century design, the Ponte di Rialto, each of the five projects captures the light, texture, and history of this birthplace of Western culture. Each scene is accompanied by tracing papers that allow beginning painters without advanced drawing skills an easy way to transfer a balanced layout to the watercolor surface.

[The Willow Field, William Kittredge](#) , 2009, 0307549364, 9780307549365. After numerous essays, short stories and the heralded memoir A Hole in the Sky, William Kittredge gives us a debut novel that ratifies his standing as a leading writer of the American West. Rossie Benascos horseback existence begins at age 15 and culminates in a thousand-mile drive of more than 200 head of horses through the Rockies into Calgary. Its a journey that leads him, ultimately, to Eliza Stevenson and a passion so powerful, his previously unfocused life gains clarity and purpose. From the settlers, cowboys, and gamblers who opened up this country to the landholders and politicians who ran it, this is an epic tale of love and wide open spaces that stretches over the grand canvas of the twentieth-century West. From the Trade Paperback edition.

[Jean Arthur: The Actress Nobody Knew, John Oller](#) , 1999, 0879102780, 9780879102784. The luminous star of Mr. Smith Goes to Washington, Shane, and other classic films was, as the subtitle aptly puts it, "the actress nobody knew." Jean Arthur (1900-91) kept her personal life private, disdained the Hollywood publicity machine, and was called "difficult" because of her perfectionism and remoteness from costars on the movie set. John Oller, a lawyer, tracked down kinsfolk and friends never before interviewed to capture the elusive personality of a free spirit best embodied in her favorite role, Peter Pan. Arthur herself might have appreciated his warm, respectful portrait. "...[An] insightful, painstakingly researched analysis of Arthur's life and career raises the curtain on the complex, conflicted person behind the screen persona...Captures the special shine of a unique star who turned out to be a genuine eccentric." -Chicago Tribune

For eleven years they taught school with the Bureau of Indian Affairs in Eskimo villages of the Arctic, & an Indian village in Interior Alaska. EMPIRE ON ICE is the story of their first assignment in the little village of Shungnak on the Kobuk River thirty miles north of the Arctic Circle. For three years, in addition to teaching school, they worked side by side with their Eskimo neighbors' to establish their first native store, open a post office, & stake claims on the jade deposits at the head of the Shungnak River. For the Warbelows, going through the door to the Arctic was like going back fifty years in time. They were faced with problems of food supply, mail service, medical needs, heating systems, transportation, & communication. During those years they learned as much from their Eskimo neighbors about their about their native skills & crafts, their happy dispositions, & their entire way of life as the village children learned from their school books.

[Three Early Modern Utopias: Thomas More: Utopia / Francis Bacon: New Atlantis / Henry Neville: The Isle of Pines, Thomas More](#) , 1999, 0192838857, 9780192838858. A unique edition of three early modern utopian texts, using a contemporary translation of More's Utopia and examining the Renaissance world view as shown by these writers. The edition includes the illustrative material that accompanied early editions of Utopia, full chronologies of the authors, notes, and glossary. - ;Thomas More: Utopia/ Francis Bacon: New Atlantis/Henry Neville: The Isle of Pines With the publication of Utopia (1516), Thomas More introduced into the English language not only a new word, but a new way of thinking about the gulf between what ought to be and what is. His Utopia is at once a scathing analysis of the shortcomings of his own society, a realistic suggestion for an alternative mode of social organization, and a satire on unrealistic idealism. Enormously influential, it remains a challenging as well as a playful text. This edition reprints Ralph Robinson's 1556 translation from More's original Latin together with letters and illustrations that accompanied early editions of Utopia. Utopia was only one of many early modern treatments of other worlds. This edition also includes two other, hitherto less accessible, utopian narratives. New Atlantis (1627) offers a fictional illustration of Francis Bacon's visionary ideal of the role that science should play in the modern society. Henry Neville's The Isle of Pines (1668), a precursor of Defoe's Robinson Crusoe, engages with some of the sexual, racial, and colonialist anxieties of the end of the early modern period. Together these texts illustrate the diversity of the early modern utopian imagination, as well as the different purposes to which it could be put. -

[Civilizations of Ancient Iraq, Benjamin Read Foster, Karen Polinger Foster](#) , 2009, 0691137226, 9780691137223.

"Civilizations of Ancient Iraq" is an elegantly engaging account of cultural and political history around the Tigris and Euphrates rivers from the first human settlements to the coming of Islam. Equally importantly the authors describe the rediscovery of Mesopotamia beginning in the mid-nineteenth century and highlight the dire state of Iraqi heritage today. They deftly interweave quotations from Babylonian and Sumerian literature with the latest archaeological and historical research to bring their narrative to life."--Eleanor Robson, author of "Mathematics in Ancient Iraq: A Social History" "With its penetrating asides about Iraq's archaeological history and the recent fate of its antiquities, this introduction to the country's ancient history will be a revelation to general readers. Iraqi history has not been covered before with this concision or with this concern for the history of archaeology and how the archaeological record has been affected by the

country's current conditions. "Civilizations of Ancient Iraq" is written with flair."--Daniel C. Snell, author of "Life in the Ancient Near East""Original and unique, this ambitious grand survey provides a refreshing history of ancient Iraq in its entirety in one brief and accessible volume. Considering the current crisis in Iraq, and especially the catastrophe facing its ancient heritage, general readers should find this book interesting. It should also inspire students and scholars to approach the history of ancient Iraq as a whole rather than a set of fragments."--Marc Van De Mieroop, author of "King Hammurabi of Babylon: A Biography"

There are 584 marching bands in Northern Ireland, yet their existence and activities are unreported apart from news of flashpoint tensions and riots. This book will reveal the inside story of the most dynamic Irish cultural phenomenon of the early 21st Century. It will argue that, in many respects, the Blood and Thunder' bands fulfil a role similar to the GAA by espousing Irish culture, passing on traditional skills and instilling local pride in young participants who compete against each other over a season that extends from March to October. Woven around the extended diary of an outside observer with an insider's viewpoint' during the 2009 Blood and Thunder band season, the book will focus on prize-winning Castleberg Young Loyalist Flute Band which boasts that it has been marching along the border' since 1977. The book will also examine the cultural, historical, social and political nature of Blood and Thunder bands. It includes interviews with current and former band members including founding CYLFB bandmaster and recent Ulster Unionist Party front bench Assembly spokesman on security, Derek Hussey.

The conference, held November 47 in Charleston, South Carolins, included preconferences, plenary sessions, and concurrent sessions. The theme reflected the changes and innovations that are taking place in libraries, collection development, and acquisitions as we expand our services in the global marketplace amid tough economic times of budget cuts, furloughs, and cancelation of some resources. We are looking for ideas and innovation. The Charleston Conference continues to be a major event for information exchange among librarians, vendors, and publishers. Now in its twenty-ninth year, the conference continues to be one of the most popular conferences in the Southeast. Conference attendees continue to remark on the informative and thought-provoking sessions. The conference provides a collegial atmosphere where librarians, publishers, and vendors talk freely and directly about issues facing their libraries and information providers.

[Terence Irwin](#) , 2007, 0198242670, 9780198242673. Terence Irwin presents a historical and critical study of the development of moral philosophy over two thousand years, from ancient Greece to the Reformation. Starting with the seminal ideas of Socrates, Plato, and Aristotle, he guides the reader through the centuries that follow, introducing each of the thinkers he discusses with generous quotations from their works. He offers not only careful interpretation but critical evaluation of what they have to offer philosophically. This is the first of three volumes which will examine the history of ethics in the Socratic tradition, up to the late 20th century.

[The Bears' Famous Invasion of Sicily,](#) , 2005, 0060726083, 9780060726089. One terrible winter, King Leander leads his troop of bears down the mountains of Sicily in search of food. Along their treacherous and sometimes heartbreaking journey, the bears encounter an army of wild boars, a wily professor who may or may not be a magician, ghosts, snarling Marmoset the Cat, and, worst of all, treachery within their own ranks. If the bears' famous invasion of sicily sounds too distressing to read alone, that's because it is. Lemony Snicket's introduction to this extraordinary tale is unlikely to make you feel any better, and a careful study of Snicket's Reader's Companion, cleverly hidden at the back, may actually make you feel worse. For that reason, among many others, it is recommended that you either abandon this book, abandon plans to read it, or abandon all hope.

A work Booklist called vng and lifeaffirming, Crossing Over is the true story of one woman's extraordinary flight from the protected world of the Amish people to the chaos of contemporary life. Ruth Irene Garrett was the fifth of seven children raised in Kalona, Iowa, as a member of a strict Old Order Amish community. She was brought up in a world filled with rigid rules and intense secrecy, in an environment where the dress, buggies, codes of conduct, and way of life differed even from other Amish societies only 100 miles away. This Old Order community actively avoided all interaction with e English'96 everyone who lived on the outside. As a result, Ruth knew only one way of life, and one way of doing things. This compelling narrative takes us inside a hidden community, offering a striking look as one woman comes to terms with her discontent and ultimately leaves her family, faith and the sheltered world of her childhood. Unsatisfied, she bravely crosses over to contemporary life to fully explore the foreign and frightening reality in hope of better understanding her emotional and spiritual desires. What emerges is a powerful tale of one woman's search for meaning and the extraordinary lessons she learns along the way.

Advances in Quantum Chemistry presents surveys of current developments in this rapidly developing field that falls between the historically established areas of mathematics, physics, chemistry, and biology. With invited reviews written by leading international researchers, each presenting new results, it provides a single vehicle for following progress in this interdisciplinary area. This Volume and Volume 39 will be thematic volumes based on the proceedings of the Fifth European Workshop on Quantum Systems in Chemistry and Physics which was held April 13-18, 2000, in Uppsala, Sweden. We published the proceedings from a previous meeting in 1998. See Volumes 31 and 32.

[Getting Even : Forgiveness and Its Limits: Forgiveness and Its Limits, Jeffrie G. Murphy Regents Professor of Law and Philosophy and Affiliated Professor of Religious Studies Arizona State University](#) , 2003, 0198034555, 9780198034551.

We have all been victims of wrongdoing. Forgiving that wrongdoing is one of the staples of current pop psychology dogma; it is seen as a universal prescription for moral and mental health in the self-help and recovery section of bookstores. At the same time, personal vindictiveness as a rule is seen as irrational and immoral. In many ways, our thinking on these issues is deeply inconsistent; we value forgiveness yet at the same time now use victim-impact statements to argue for harsher penalties for criminals. Do we have a right to hate others for what they have done to us? The distinguished philosopher and law professor Jeffrie Murphy is a skeptic when it comes to our views on both emotions. In this short and accessible book, he proposes that vindictive emotions (anger, resentment, and the desire for

revenge) actually deserve a more legitimate place in our emotional, social, and legal lives than we currently recognize, while forgiveness deserves to be more selectively granted. Murphy grounds his views on careful analysis of the nature of forgiveness, a subtle understanding of the psychology of anger and resentment, and a fine appreciation of the ethical issues of self-respect and self-defense. He also uses accessible examples from law, literature, and religion to make his points. Providing a nuanced approach to a proper understanding of the place of our strongest emotions in moral, political, and personal life, and using lucid, easily understood prose, this volume is a classic example of philosophical thinking applied to a thorny, everyday problem.

[My Mommy Wears Combat Boots, Sharon G. McBride](#) , 2008, 1434351645, 9781434351647. As we march on through another year of war, many service members have already completed more than one deployment. Astonishingly, a lot of these service members are mothers, and they are not only balancing their commitments to their families but to the nation as well. My Mommy Wears Combat Boots is based the personal experience of a soldier and a mother who was seeking a way to explain why she needed to leave her child again and go to war. Young children are very limited when it comes to communication skills, and often have a difficult time expressing guilt, frustration, anger, loneliness and sadness and often don't realize that it's normal to feel all of this and more as the result of their mom's deployment. Books about mummies going to war are few and far between, and My Mommy Wears Combat Boots is for mothers in uniform everywhere that are seeking a way to explain to their children the emotions associated with deployment and a way to

positively channel those emotions when they are away.

[Divergent Social Worlds: Neighborhood Crime and the Racial-Spatial Divide, Ruth D. Peterson, Lauren Joy Krivo](#) , 2010, 0871546930, 9780871546937. More than half a century after the first Jim Crow laws were dismantled, the majority of urban neighborhoods in the United States remain segregated by race. The degree of social and economic advantage or disadvantage that each community experiences particularly its crime rate is most often a reflection of which group is in the majority. As Ruth Peterson and Lauren Krivo note in *Divergent Social Worlds*, Race, place, and crime are still inextricably linked in the minds of the public. This book broadens the scope of single-city, black/white studies by using national data to compare local crime patterns in five racially distinct types of neighborhoods. Peterson and Krivo meticulously demonstrate how residential segregation creates and maintains inequality in neighborhood crime rates. Based on the authors groundbreaking National Neighborhood Crime Study (NNCS), *Divergent Social Worlds* provides a more complete picture of the social conditions underlying neighborhood crime patterns than has ever before been drawn. The study includes economic, social, and local investment data for nearly nine thousand neighborhoods in eighty-seven cities, and

the findings reveal a pattern across neighborhoods of racialized separation among unequal groups. Residential segregation reproduces existing privilege or disadvantage in neighborhoods such as adequate or inadequate schools, political representation, and local business increasing the potential for crime and instability in impoverished non-white areas yet providing few opportunities for residents to improve conditions or leave. And the numbers bear this out. Among urban residents, more than two-thirds of all whites, half of all African Americans, and one-third of Latinos live in segregated local neighborhoods. More than 90 percent of white neighborhoods have low poverty, but this is only true for one quarter of black, Latino, and minority areas. Of the five types of neighborhoods studied, African American communities experience violent crime on average at a rate five times that of their white counterparts, with violence rates for Latino, minority, and integrated neighborhoods falling between the two extremes. *Divergent Social Worlds* lays to rest the popular misconception that persistently high crime rates in impoverished, non-white neighborhoods are merely the result of individual pathologies or, worse, inherent group criminality. Yet Peterson and Krivo also show that the reality of crime inequality in urban neighborhoods is no less alarming. Separate, the book emphasizes, is inherently unequal. *Divergent Social Worlds* lays the groundwork for closing the gap and for next steps among organizers, policymakers, and future researchers. [Egan's Fundamentals of Respiratory Care,](#) , 2008, 032305188X, 9780323051880. A leader in respiratory care education for more than 35 years, this comprehensive textbook lays a strong foundation for a successful career. You'll gain a

thorough understanding of the role of respiratory therapists (RTs), a scientific basis for treatment, and clinical applications. In-depth discussions progress from the principles of respiratory care to applied anatomy and physiology, assessment, discussion of specific respiratory illnesses, basic therapy, acute and critical care, and preventive and long-term care. Clinical Practice Guidelines (CPGs) and Therapist Driven Protocols (TDPs) in appropriate chapters familiarize you with patient care guidelines and decision trees as they are used in practice. A full-color format makes the text easier to read and brings out key detail in the illustrations. Mini-Clinis provide short vignettes applying content in the text to actual patient care, asking you to think critically on problems you may encounter. Clinical Practice Guidelines (CPGs) cover the steps of patient care with important information on indications/contraindications, hazards and complications, assessment of need, assessment of outcome, and monitoring. Therapist-Driven Protocols (TDPs) provide decision trees developed by hospitals, helping you to assess patients, initiate care, and evaluate outcomes. Rules of Thumb highlights rules, formulas, and key points important to clinical practice. Measurable Learning Objectives parallel the areas tested by the NBRC exam, helping you identify important information that goes beyond memorization and recall. Key Point summaries in bulleted format help you clearly identify key concepts covered in each chapter. A Workbook includes a wide range of activities such as NBRC-type multiple-choice questions, case studies, experiments, and hands-on activities, allowing you to apply the knowledge you've gained from the text. New History of Respiratory Care chapter describes the evolution and challenges of this profession. Updated content reflects changes in the field, with additions to the text including: more coverage of evidence-based care; information on HIPAA; a discussion of computer applications in a health care setting; an emphasis on how nutrition impacts the respiratory system; and the role of the respiratory therapist in disease management is discussed in the Cardiopulmonary Diseases section. A new appendix cross-references the NBRC examination matrices for the CRT and RRT to content in the book, making it easier to prepare for the NBRC exams.--From the publisher.

[America's Shame: Women and Children in Shelter and the Degradation of Family Roles, Barbara A. Arrighi](#) , 1997, 0275957322, 9780275957322. Rejecting those who urge a "bootstrap" approach to people living in extreme poverty on the edge of society, sociologist Barbara Arrighi makes an eloquent, compassionate plea for empathy and collective responsibility toward those for whom "either the boots or the straps are missing." This book further offers solutions in consciousness raising, community collaboration, and informed, responsible public policy. The book is a critique of a system that purports to serve yet sometimes impedes the welfare of those who are in need of the basic elements for survival, including affordable shelter. It analyzes the structural factors of poverty and the social psychological costs of being poor and lacking a home. Utilizing interview findings from families who have lived in a shelter in northern Kentucky and from staff members, the book examines the degrading effects of shelter life on women's self-respect and children's development. Rather than an examination of individual pathologies leading to lack of shelter, it centers on women and children living in shelters and offers a sociological study of poverty and the family.

This lavish book invites readers aboard the glamorous renovated cars of the GrandLuxe railway train. In 1989, the American-European Express, a stylish train created in emulation of Europe's Orient Express, commenced operation between Washington and Chicago. Forced to close down two years later, it was reborn in 1994 as the American Orient Express. The AOE, as this luxury streamliner was often known, matured under the tutelage of various owners until 2006, when under new ownership it acquired a new name, the GrandLuxe Express. Trackside, the train gleamed as a classic American streamliner. Aboard, travelers enjoy old-fashioned, wood-paneled elegance that harkens back to the 1920s and Europe's posh Wagons-Lits sleepers and restaurant cars.

[A Course in Miracles in a Nutshell -- Value Pack, Three Books, Francis "Bud" Morris](#) , 2006, . Drawing on the wisdom of this famous and much-loved source of spiritual education and inspiration, A Course in Miracles, Bud Morris' imaginative and relevant interpretation focuses - in revealing direct quotations from the Course itself mated with incisive commentary and observation - on nearly 70 topics that are studied and lived by hundreds of thousands of devoted people all around the globe. It is more than a "reading experience," it is a "workbook for living." Here for you is a wonderful opportunity to learn and grow in an easy-to-absorb way, facilitated by Rev. Bud Morris' decades of experience in living and teaching Course principles and productive life practices. Of his own experiences, the author says, "I've been studying metaphysical principles and often facilitating study groups in A Course in Miracles for close to twenty years. This book is taken from my teaching notes and material that has inspired me through the years. My goal in life is to remember more of my spiritual truth each day and to teach that truth to everyone I meet; i.e., to love unconditionally everyone I encounter and to help heal the insanity of this world through that unconditional love."

Since 1999, Child Wise (an Australian non-government organisation) has worked with the Association of South East Asian Nations (ASEAN) Member States to implement activities to counter child-sex tourism in the region. In 2008 and early 2009, Child Wise conducted research and consultations with stakeholders to understand national legal frameworks and identify national laws that could be used to prosecute travelling child-sex offenders and those who assist or facilitate child-sex tourism. While further research is required to comprehensively analyse the legal response and understand how laws interact and are being implemented, this initial publication provides a high-level summary. This publication is intended to assist national action and enable regional comparisons to enhance the legal

response to child-sex tourism in South East Asia.

[The Diary of Antera Duke, an Eighteenth-Century African Slave Trader: An Eighteenth-Century African Slave Trader, Stephen D. Behrendt, A.J.H. Latham, David Northrup](#) , 2012, 0199922837, 9780199922833. In his diary, Antera Duke (ca.1735-ca.1809) wrote the only surviving eyewitness account of the slave trade by an African merchant. A leader in late eighteenth-century Old Calabar, a cluster of Efik-speaking communities in the Cross River region, he resided in Duke Town, forty-five miles from the Atlantic Ocean in what is now southeast Nigeria. His diary, written in trade English from 1785 to 1788, is a candid account of daily life in an African community at the height of Calabar's overseas commerce. It

provides valuable information on Old Calabar's economic activity both with other African businessmen and with European ship captains who arrived to trade for slaves, produce, and provisions. This new edition of Antera's diary, the first in fifty years, draws on the latest scholarship to place the diary in its historical context. Introductory essays set the stage for the Old Calabar of Antera Duke's lifetime, explore the range of trades, from slaves to produce, in which he rose to prominence, and follow Antera on trading missions across an extensive commercial hinterland. The essays trace the settlement and development of the towns that comprised Old Calabar and survey the community's social and political structure, rivalries among families, sacrifices of slaves, and witchcraft ordeals. This edition reproduces Antera's original trade-English diary with a translation into standard English on facing pages, along with extensive annotation. The editors draw on Antera's first language, Efik, to illuminate his diary. The Diary of Antera Duke furnishes a uniquely valuable source for the history of precolonial Nigeria and the Atlantic slave trade, and this new edition enriches our understanding of it.

[Are You God Or His Mailman, Chibuzor Obasi](#) , 2013, 0988780216, 9780988780217. Time spirals away. It is captured in the play of light and dark, in the back and forth movements of the Niger and its tributaries. It's an intricate intertwining of fates, S.A Stone Jr. is born to a man and woman who had nothing in common other than that they were both on the run. He is one of America's wealthiest men, she a ravishing beauty from a long line of African matriarchs. Here the salvation of a country riddled with greed, corruption and wars is in question. Mr. Sylvester Stone was on the FBI's most wanted list, the KGB wanted him. The Chinese did not care much about him, though he was not their friend. The Middle East still had what he always wanted. Ngozika and her children by a miracle have escaped a war that has left millions dead. In a land where things that once mattered were fast becoming nothing, the Masses constantly question their survival and fate. Are they to be led forever by corrupt warlords? What will the secret held in the discovered ancient Nsibidi Script bring to the nations and their forgotten kingdoms? S.A Stone Jr. is greatly favored, only human. He may have the answer, but the circumstances of his birth pose a personal question, one that may hinder the hope of a future of peace.

Boys aren't the only ones who read comics-girls do too! From Betty and Veronica to Slutburger and Art Babe, Girls to Grrrlz explores the amazing but true history of girl comics. Pop culture fans will delight in author Trina Robbins's chronological commentary (with attitude) on the authors, artists, trends, and sassy, brassy characters featured in comic books for the last half-century. Meet the bubble-headed bombshells of the '40s, the lovelorn ladies of the '50s, the wimmin libbers of the '70s, and the grrrowing grrrlz of today. Her commentary is paired with a ton

of rare comic book art pulled from the best girl comics published since World War II. Bridging the gap between Ms. and Sassy, between Miss America and Naomi Wolf, *From Girls to Grrrlz* reminds us how comic book characters humorously and critically reflect our changing culture.

Password sniffing, spoofing, buffer overflows, and denial of service: these are only a few of the attacks on today's computer systems and networks. At the root of this epidemic is poorly written, poorly tested, and insecure code that puts everyone at risk. Clearly, today's developers need help figuring out how to write code that attackers won't be able to exploit. But writing such code is surprisingly difficult. *Secure Programming Cookbook for C and C++* is an important new resource for developers serious about writing secure code. It contains a wealth of solutions to problems faced by those who care about the security of their applications. It covers a wide range of topics, including safe initialization, access control, input validation, symmetric and public key cryptography, cryptographic hashes and MACs, authentication and key exchange, PKI, random numbers, and anti-tampering. The rich set of code samples provided in the book's more than 200 recipes will help programmers secure the C and C++ programs they write for both Unix (including Linux) and Windows environments. Readers will learn: How to avoid common programming errors, such as buffer overflows, race conditions, and format string problems How to properly SSL-enable applications How to create secure channels for client-server communication without SSL How to integrate Public Key Infrastructure (PKI) into applications Best practices for using cryptography properly Techniques and strategies for properly validating input to programs How to launch programs securely How to use file access mechanisms properly Techniques for protecting applications from reverse engineering The book's web site supplements the book by providing a place to post new recipes, including those written in additional languages like Perl, Java, and Python. Monthly prizes will reward the best recipes submitted by readers. *Secure Programming Cookbook for C and C++* is destined to become an essential part of any developer's library, a code companion developers will turn to again and again as they seek to protect their systems from attackers and reduce the risks they face in today's dangerous world.

[Deadly invaders: virus outbreaks around the world, from Marburg fever to avian flu, Denise Grady](#) , 2006, 0753459957, 9780753459959. An epidemic strikes the United States, plunging the country into chaos. New York Times medical reporter Denise Grady uses this terrifying scenario, taken from the pages of a U.S. government report on the potential outcome of a pandemic, as the starting point for a journey into the gripping world of emerging diseases. In search of a better understanding of these often deadly diseases, Grady heads to Angola, the site of the 2005 Marburg virus epidemic, a disease closely related to Ebola. On the ground, and sometimes frighteningly close to victims of the disease, Denise explores the realities of health care in the developing world, and its potential effects on our own welfare. With supplemental sidebars that explain key scientific and social issues and in-depth chapters on the origins and spread of Marburg, avian flu, HIV, SARS, West Nile virus, hantavirus, and monkeypox, this is a fascinating look at the health dangers we face in a global society.

[American Politics: A Very Short Introduction, Richard M. Valelly](#) , 2013, 0199912114, 9780199912117. American politics seems to grow more contentious and complicated by the day, and whether American democracy works well is hotly debated. Amidst all this roiling partisan argument and confusing claims and counterclaims, there has never been a greater need for an impartial primer on the basics of the American political system. This Very Short Introduction gives readers a concise, accessible, and sophisticated overview of the vital elements of American democracy, emphasizing both how these elements function, their historical origins, and how they have evolved into their present forms. Richard Valelly covers all facets of America's political system: the bicameral Congress and the place of the filibuster, the legislative-executive process, the role of the Supreme Court, political parties and democratic choice, bureaucracy, the partisan revival, and the political economy. He offers as well an original analysis of the evolution of the American presidency and a fascinating chapter on the effects of public polling on political decision-making and voter representation. Valelly shows that the American political system is, and always has been, very much a work in progress--unfolding within, and also constantly updating, an eighteenth-century constitutional framework. In a refreshingly balanced and judicious assessment, he explores the strengths of American democracy while candidly acknowledging both gaps in representation and the increasing income inequality have sparked protest and intense public discussion. Finally, Valelly considers the remarkable persistence, for more than two centuries, of the basic constitutional forms established in 1787, despite the dramatic social changes that have reshaped virtually all aspects of American life. For anyone wishing to understand the nuts and bolts of how our political system works--and sometimes fails to work--this Very Short Introduction is the very best place to start. About the Series: Oxford's Very Short Introductions series offers concise and original introductions to a wide range of subjects--from Islam to Sociology, Politics to Classics, Literary Theory to History, and Archaeology to the Bible. Not simply a textbook of definitions, each volume in this series provides trenchant and provocative--yet always balanced and complete--discussions of the central issues in a given discipline or field. Every Very Short Introduction gives a readable evolution of the subject in question, demonstrating how the subject has developed and how it has influenced society. Eventually, the series will encompass every major academic discipline, offering all students an accessible and abundant reference library. Whatever the area of study that one deems important or appealing, whatever the topic that fascinates the general reader, the Very Short Introductions series has a handy and affordable guide that will likely prove indispensable.

[Winds of Battle - The Journey of James Addington, John F. Schork](#) , 2013, 0984334483, 9780984334483. WINDS OF BATTLE The Journey of James Addington by John F. Schork Sent to sea as a young midshipman, James Addington, is the son of a British Admiral following in his father's footsteps. Born in the colonies, he sails from New York City in 1770 aboard H.M.S. Andromeda. Over the next three years, battling pirates and slavers, the young man matures into a loyal officer of the Royal Navy. But the terrible events of 1776 drag James back to the land of his birth. As a lieutenant in the frigate Challenger, he is a witness to the bloody Battle of Breed's Hill, as the fledging rebel army takes on the pride of the British Army. Stunned by what he sees, he knows the colonies will be forever changed. What he doesn't realize is that he will change along with them. Falling in love with a young lady from Massachusetts, Addington finds himself immersed in a tangled web of conflicting loyalties and passions. Does he help crush the rebellion or does he fall victim to the lure of independence? His journey takes him from north to south in the colonies and across the Atlantic as captain of his own ship. From the Battles of Saratoga to Yorktown, he learns the price of friendship and loyalty as the fight for America's independence builds to a thundering climax. ----- John Schork is the author of the popular naval aviation adventure novel "Destiny In The Pacific" as well as seven other historical fiction adventure novels available for Kindle and iPad. -----
