

Bootstrap 3 in Joomla!

	Meinung	contra	pro
Argument 1	<ul style="list-style-type: none"> • aktuell BS2 - Update nicht möglich • BS2 need to be updated Kai Røen 	<ul style="list-style-type: none"> • BS3 is not BWC to BS2 -> adapting components templates neccessary • problems still there if BS is updating again • BS3 isn't compatible with BS2 (existing templates without overrides and maybe 3rd party extensions would break) Bakual • By using BS3 there will be BS4 and so on wdburgdorf, • Just because BS3 is the latest version doesn't mean that BS2 isn't sufficient anymore Niv Froehlich • With BS3 you don't have the assurance to use all extensions which are compatible with Joomla!3.x Niv Froehlich 	<ul style="list-style-type: none"> • BS3 has better semantics, much of bugs fixed • the number of BS3 templates increases more and more Niv Froehlich • BS2.3.2 is no longer officially supported by the kids at Bootstrap Niv Froehlich • Semantics on BS3 is better, improvements for support of things like screen readers Chad Windnagle
Argument 2	<ul style="list-style-type: none"> • there must be a better idea than just integrate one BS version wdburgdorf 	<ul style="list-style-type: none"> • extensiondevelopers need standardization on which they can rely on, nobody has come up with a winning alternative Niv Froehlich 	<ul style="list-style-type: none"> • By using BS3 there will be BS4 and so on, this problem would be solved wdburgdorf • flexibility needed developing our own standards and make it possible to integrate other CSS frameworks
Argument 3	<ul style="list-style-type: none"> • LESS sheet that simple took some removed BS2 class names and keyed them into the new BS3 classnames Chad Windnagle 	<ul style="list-style-type: none"> • BS3 is available in LESS and SASS, what if BS3.1 is only available in SASS Niv Froehlich • issues on Joostrap.com running both Philip Locke • users can't use extensions with different BS versions Hannes Papenberg 	<ul style="list-style-type: none"> • Use of BS2 AND 3 is possible Beat • our own framework should run with only one CSS-pre-processor, otherwise it is too much work because both have to maintained
Argument 4	<ul style="list-style-type: none"> • javascript and any markup changes Chad Windnagle 		<ul style="list-style-type: none"> • can be solved by building up alternative templates using different BS

			versions
Argument 5	<ul style="list-style-type: none"> a switch in template manager (plugin + extra classes) Youjoomla.com 	<ul style="list-style-type: none"> issues on Joostrap.com running both Philip Locke users can't use extensions which different BS versions Hannes Papenberg 	<ul style="list-style-type: none"> All templates and extensions can be used Niv Froehlich knowledge of what's installed/required Philip Locke I don't know how this should work
Argument 6	<ul style="list-style-type: none"> staying with BS2 until the end of Joomla!3.x 		<ul style="list-style-type: none"> can be solved by building up alternative templates using different BS versions
