

THIS IS AGILE

BEYOND THE BASICS. BEYOND THE HYPE.
BEYOND SCRUM.

TechTalk@Capgemini

Wrocławskie Capgemini Software Solutions Center
zaprasza w dniu 03.07.2014 na wykład
Sandera Hoogendoorna:

Pragmatic agile model driven development using smart use cases

Unlikely the more popular user stories, smart use cases provide a unique, and structured way to deliver requirements in both agile and traditional projects. During this high speed talk Sander Hoogendoorn, Principal Technology Officer and Global Agile Thoughtleader at Capgemini, will demonstrate a proven approach to identifying, modeling and estimating smart use cases from the project's scope and business processes. It will also show how smart use cases nicely fit your online dashboards, your software architecture, how code is generated from them, and how testing can be automated as well. This interactive talk contains live demos and answers a lot of questions:

- How do you model smart use cases using Enterprise Architect?
- How can we estimate smart use cases?
- How do functional requirements match model driven development?
- Can code actually be generated from requirements?
- Can model driven development be applied in agile projects?
- Can model driven development using Enterprise Architect speed up testing?

This talk is high-paced, interactive and packed with new insights. It will also demonstrate the effective use of tools in effective and pragmatic agile model driven development and contains live coding (in C#) on stage.

Wykład będzie prowadzony w języku angielskim.

Ponieważ jest skierowany do osób doświadczonych, warunkiem uczestnictwa jest co najmniej dwuletnie doświadczenie zawodowe na stanowisku związanym z IT.

Spotkanie odbędzie się 03.07.2014, o godz. 18:00
W biurze Capgemini we Wrocławiu, przy ul. Strzegomskiej 42B

Udział w spotkaniu wymaga wcześniejszej rejestracji poprzez formularz na stronie: www.pl.capgemini-sdm.com/techtalk
