Blah blah blah, such and such and so and so and on and on and on and on and on and on and on, and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on. That's the end of the abstract.

Key words: keyword1, keyword2, keyword 3.

## 1. Introduction

Lalalala, an article by So and So about Such and Such, yielding theories about This and That.

## 2. Methods

We did blah blah, such and such and so and so and on and on and on and on and on and on and on, and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and here's an equation [1]:

$$
\begin{equation*}
N_{t+1}=N_{t} e^{r-b N_{t}+\varepsilon_{t}} \tag{2.1}
\end{equation*}
$$

on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on. That's the end of the methods.

## 3. Results

We found blah blah, such and such and so and so and on and on and on and on and on and on and on, and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and here's a reference to the figure that we'll put somewhere around here.

## [Figure 1 about here.]

on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and the rest of the results are in Table 1.

So back to blah blah on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on. That's the end of the results, but make sure to check out Fig. 1.

## 4. Discussion

This means blah blah, such and such and so and so and on and on and on and on and on and on and on, and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on and on. That's the end of the discussion.

## List of Figures

1 I'm a cow, hear me mooooooooooo. I weight twice as much as you, and I look good on the BBQ.

Figure 1. I'm a cow, hear me mooooooooooo. I weight twice as much as you, and I look good on the BBQ.

## List of Tables

1 Weights of 3 cows and number of steaks produced. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 6

Table 1. Weights of 3 cows and number of steaks produced.

| Cow number | Weight | Steaks |
| :--- | :---: | :---: |
| Cow 1 | 907 kg | 1200 |
| Cow 2 | 714 kg | 912 |
| Cow 3 | 615 kg | 867 |
