

ViewPoint 簡易マニュアル

The screenshot displays the ViewPoint software interface. At the top, there is a menu bar with options like 'ファイル(F)', '編集(E)', '表示(V)', 'お気に入り(A)', 'ツール(T)', and 'ヘルプ(H)'. Below the menu bar, there are filters for 'Fleet', 'Unit', 'Alert', and 'Warning'. The main area shows a 'LIVE VIEW' of a map from 2013-10-13 14:20:53 to 2013-10-30 17:14:55. The map is a Google Map of the Atami area in Japan. A vertical zoom slider on the left is labeled '拡大・縮小' (Zoom In/Out). A callout box labeled '最新の位置' (Latest Position) points to a green dot on the map. A detailed popup window for 'LuckyLady7-2' is open, showing the following information:

LuckyLady7-2
2013-10-30 17:14:55
35°05'41"N 139°04'36"E
54SUD2468485252
0.9 km NE of Atami, Japan
Speed: 0km/h Course: 3°
STATUS: OK

On the right side, there are control panels for 'UNITS' and 'GEOFENCES'. The 'UNITS' panel has checkboxes for 'Show units', 'Show tracking', and 'Show directions'. An arrow points from the 'Show tracking' checkbox to a callout box labeled '航跡表示の有無' (Presence of tracking). Another arrow points from the popup window to a callout box labeled 'クリックで詳細表示' (Click for detailed display), which lists: '○受信日時' (Receive date/time), '○緯度経度' (Latitude/longitude), and '○速度・方位' (Speed/direction). The bottom of the screen shows a Windows taskbar with the time 10:19 and date 2013/10/31.
