Change report

**PRIMERGY Server**

# Instructions

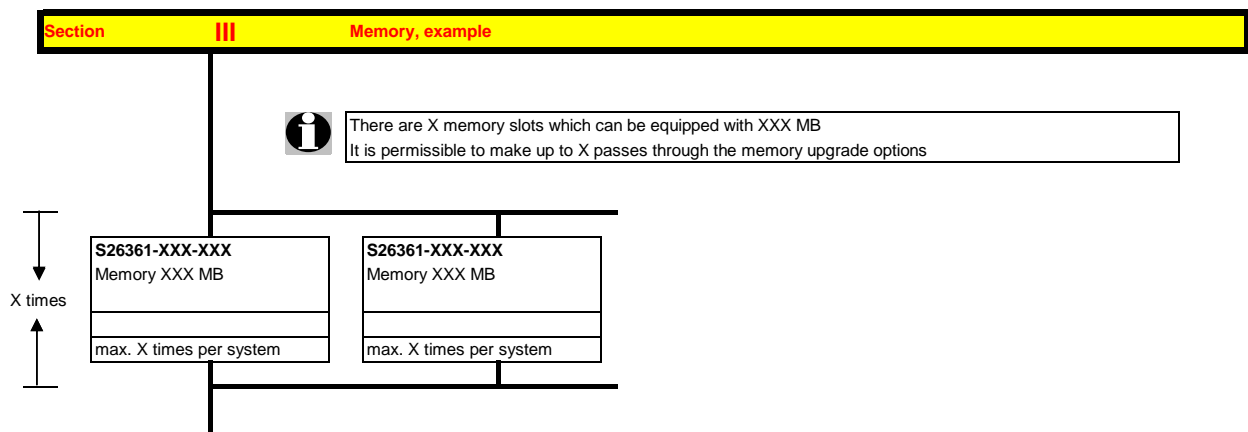

This document contains basic product and configuration information that will enable you to configure your system via PC-/System-Architect

Only these tools will ensure a fast and proper configuration of your PRIMERGY server or your complete PRIMERGY Rack system.

You can configure your individual PRIMERGY server in order to adjust your specific requirements.

The System configurator is divided into several chapters that are identical to the current price list and PC-/System-Architect.

Please follow the lines. If there is a junction, you can choose which way or component you would like to take. Go through the configurator by following the lines from the top to the bottom.

In one chapter you can only select as many components (here 4x) as the arrow indicates.

Please note that there are information symbols which indicate necessary information.

### Further information in the internet see:

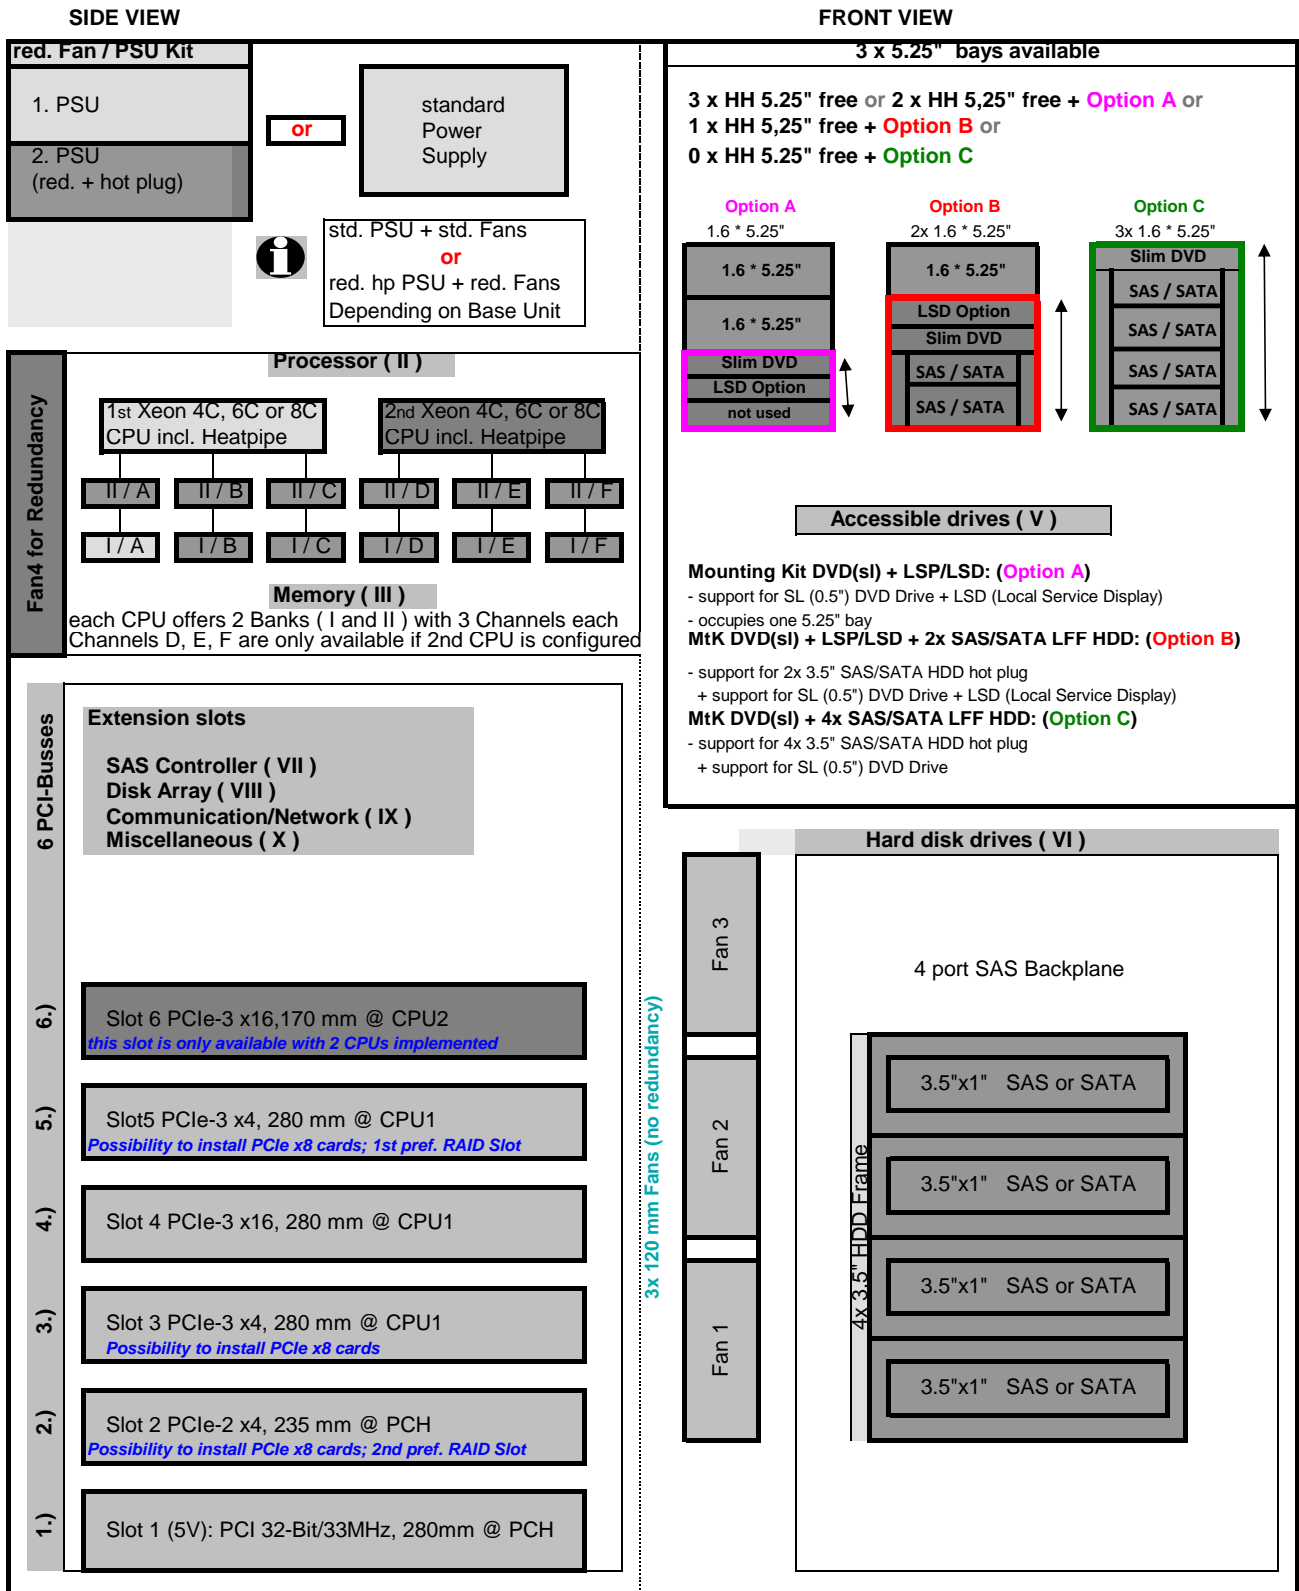

[http://ts.fujitsu.com/products/standard\\_servers/index.html](http://ts.fujitsu.com/products/standard_servers/index.html) (internet)

[https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy\\_config/current/Pages/default.aspx](https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy_config/current/Pages/default.aspx) (extranet)

Prices and availability see price list and PC-/System-Architect.  
 Subject to change and errors excepted.

**SW Configurator 64 bit (EM64T / IA64)**

with OEM-Software  
for PRIMERGY Server

without OEM-Software  
for PRIMERGY Server

For all SW products please refer to the corresponding software configurator accessible via the Extranet under \*Configuration & Tools, -All configurations, -Software, URL see below.

OEM- SW is bound to HW and is not allowed to be ordered separately.  
Exceptions: VMware SW, Citrix XenServer

**VMware-Software**

- VirtualCenter Management Server for any server released for Windows Server 2003
- Virtual Infrastructure 3 for PRIMERGY > except all mono PRIMERGY systems
- ESX2 for PRIMERGY RX/TX300S2, RX/TX600S3, BX620S2, BX630 Dual/Quad, BX630 8-way

**Citrix XenServer / Essentials for XenServer**

- XenCenter Management Server for any server released for Windows 2000/XP/Vista and Server 2003/2008
- XenServer editions released for PRIMERGY except all mono PRIMERGY systems (see release matrix for details)

**Microsoft Hyper-V Server and System Center for SME**

- Microsoft System Center Virtual Machine Manager Workgroup Edition for any server released for Windows Server 2008 R2
- Microsoft System Center Essentials 2010 for any server released for Windows Server 2008 R2
- Microsoft Hyper-V Server 2008 R2 - Free Microsoft Web Download (not necessary for Windows Server 2008 R2 customers)

**Microsoft - Windows Server 2008 R2 Server Licenses**

- Windows HPC Server 2008 R2 Suite
- Windows Server 2008 R2 Datacenter
- Windows Server 2008 R2 Enterprise
- Windows Server 2008 R2 Standard
- Windows Web Server 2008 R2

**Microsoft - Windows Small Business Server 2011**

- Windows Small Business Server Standard 2011
- Windows Small Business Server 2011 Premium Add-on
- Windows Small Business Server Essentials 2011

**Microsoft - Downgrade Media Only**

- Windows Server 2008 Enterprise
- Windows Server 2008 Standard

**Microsoft Windows Small Business Server 2011 Client Access Licenses**

- Windows Small Business Server 2011 Standard I Premium Device CAL
- Windows Small Business Server 2011 Standard I Premium User CAL
- Windows Server 2008 Remote Desktop Services Device CAL
- Windows Server 2008 Remote Desktop Services User CAL

**Microsoft - Windows Server 2008 Client Access Licenses**

- Windows Server 2008 Device CAL
- Windows Server 2008 User CAL
- Windows Server 2008 Remote Desktop Services Device CAL
- Windows Server 2008 Remote Desktop Services User CAL

Fujitsu PRIMERGY Server

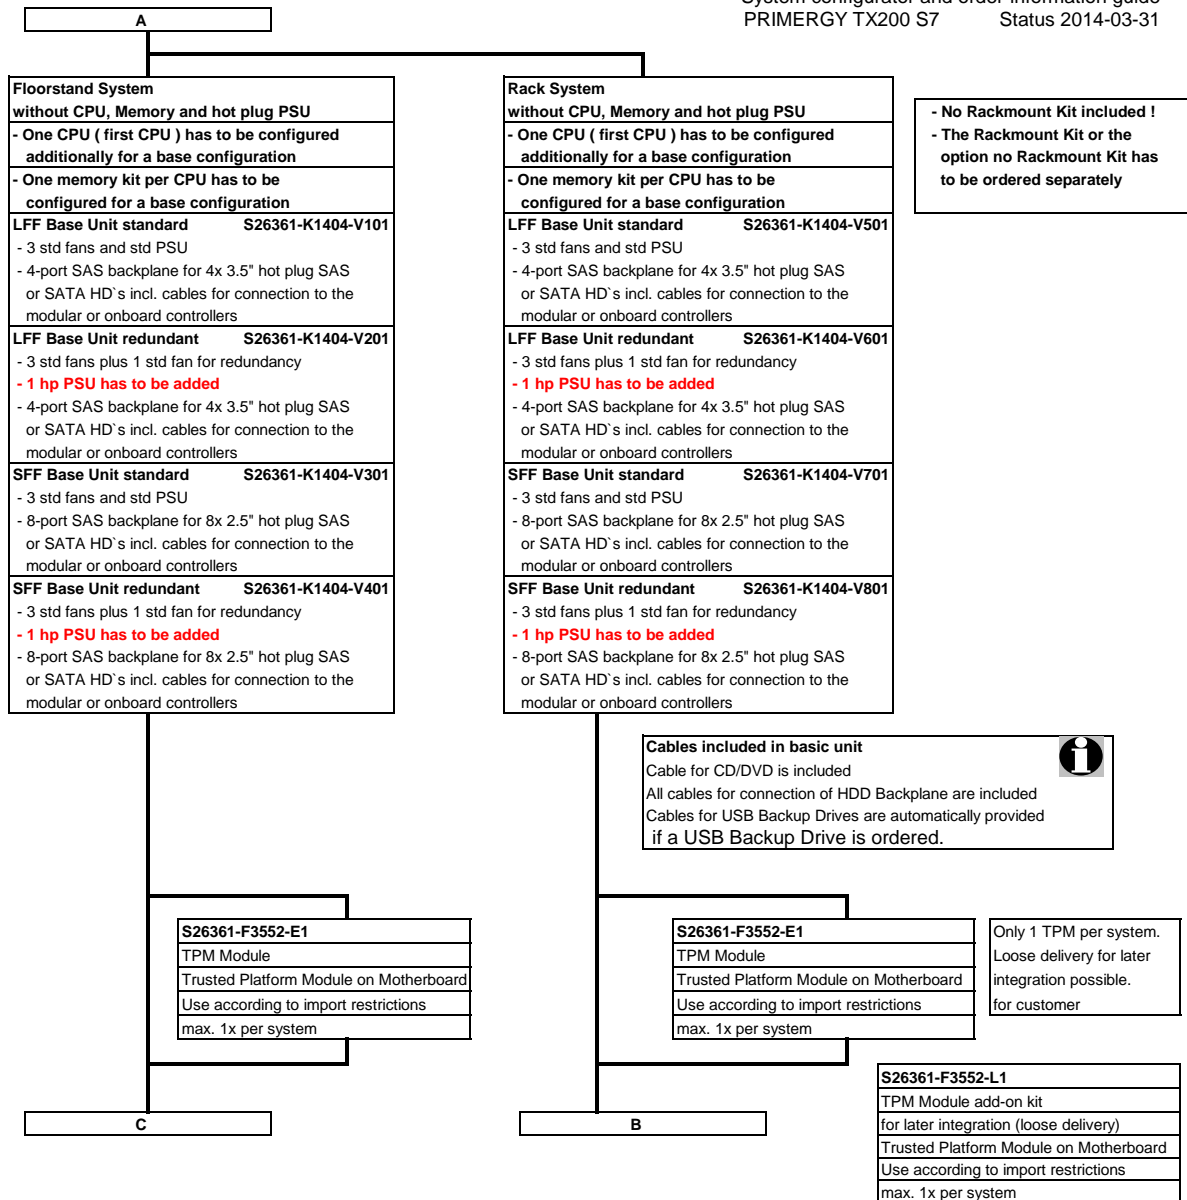

## Section I Basic unit

**System unit, Rack and Floorstand, including:**

- \* **Two lockable front covers in floorstand version**  
Door #1 for accessible drive bays  
Door #2 for hot plug HDD bays  
Both doors may be locked or door #1 may be left open while door #2 is still locked
- \* **backplane with 4 (LFF) or 8 (SFF) bays for hot-plug HD's. Type depending on base unit:**  
Type 1: 4x hot plug LFF (3.5") SAS/SATA HDD (SAS/SATA LFF base units only)  
Type 2: 8x (2x4) hot plug SFF (2.5") SAS HDD (SAS SFF base units only)
- \* **PSU and Fan Type depending on base unit:**  
Type 1: standard PSU and standard Fans (3 System Fans)  
(V101 and V301, V501 and V701 base units)  
Type 2: without PSU (450W or 800W must be added), but 1 additional fan for redundancy  
(V201, V401, V601 and V801 base units)  
for Type 1 base units there is an upgrade to  
hot plug redundant PSU and redundant Fans available
- \* **3 bays 5.25" for accessible drives (half High)**  
Systemboard D3099 with:
- \* **Up to two Xeon 4C, 6C & 8C CPU's (Socket-B2)**  
with 1 serial QPI link ( Quick Path Interconnect ) and 3 memory channels per CPU  
First CPU has to be selected for an orderable basic unit,
- \* **Chipset Intel® C600 Series (codenamed Patsburg)**
- \* **6 PCI slots:**
  - 2x PCIe-3 x16
  - 2x PCIe-3 x4 (mechanically x8)
  - 1x PCIe-2 x4 (mechanically x8)
  - 1x PCI 32/33
- No mix of registered and unbuffered modules is allowed
- First Memory ( one module ) has to be selected for an orderable basic unit per CPU
- Memory upgrade is possible module wise for the Independent Channel Mode or for the Performance Mode,
- Memory mirroring is supported with 2 identical modules in channel B+C CPU 1 or E+F CPU 2
- Hot Spare Memory is supported with 3 identical modules in channel A+B+C CPU 1 or D+E+F CPU 2
- SDDC (Chipkill) is supported only for registered memory modules,
- \* **6-port SATA controller on-board included in Intel Southbridge Patsburg A for SATA Raid0/1,**  
optional Southbridge Patsburg B with 4 ports for SAS RAID 0/1  
**Max. 4 SATA / SAS HD's are supported**  
**Max. 2 SATA accessible drives are supported (DVD, Backup)**
- \* **2x1 Gbit Ethernet LAN on board ( Intel Hartwell);**  
iSCSI boot integrated in System BIOS as selectable option
- \* **iRMC S3 (integrated Remote Management Controller) on-board server management controller**  
with dedicated 10/100 Service LAN-port and  
integrated graphics controller ( max. Resolution: 1600 x 1200 at 16 bpp)  
The Service LAN-port can be switched alternatively on standard Gbit LAN port
- Interfaces:**
- \* 1x RS-232-C (serial, 9pin) (usable for BMC or OS or shared)
- \* 1x VGA (15 pin)
- \* 9x USB 2.0 (UHCl ) with 480MBit/s (4x external at the rear, 2x external at the frontside, 3x internal for backup or UFM)
- \* 2x LAN RJ45, 1x Service-LAN RJ45
- \* **Internal Cables:**
  1. SATA cable for CD/DVD.
  2. Cable for HDD Backplane
  3. USB cable (if USB Backup is used)
- \* **ServerView Suite Software package incl. ServerStart, ServerBooks, Management Software and Updates**
- \* **Documentation engl. (multilingual on CD)**

A

**B**  
**PRIMECENTER Rack**

**S26361-F2735-E285**  
 RMK-F2\_DI\_CMA\_QRL\_LV  
 telescopic drop-in rail, full extr.  
 1-hand-mounting  
 RMK - 1 pair consisting of  
 - vario carrier length variable  
   with quick release lever support  
 - telescopic drop-in rails  
   with CMA adapter  
 1x per system

**S26361-F2735-E111**  
 No Rackmount-Kit option  
 Only for loose deliveries  
 No mounting in racks possible  
 max. 1x per system

**C**

**S26361-F4530-E12**  
 Bracket 2U in asymmetrical racks

**S26361-F4530-E10**  
 Mounting of RMK in symmetrical racks  
 (no support brackets needed)

**S26361-F2735-E71**  
 Lateral cable management  
 for 2U servers or higher  
 - for asymmetrical racks  
   **PRIMECENTER S2 or M1**  
 - 1 bracket **PC Rack asym.**  
 1x per system

**S26361-F2735-E82**  
 2U cable management arm (CMA)  
 for 2U server or higher  
 - for symmetrical racks  
   **M1 or 3rd party racks**  
   **Fujitsu racks**  
 1x per system

**SNP:SY-F1647E301-P**  
 Installation ex works for one  
 server or subsystem.  
 Hereby the rack will be delivered  
 completely pre-mounted and  
 all wired connections are tested.  
 With PCR S2 12U, 24U, 38U and  
 PRC M1 16U, 24U, 42U:  
 Systems and components  
 will be delivered installed in the rack  
 With PCR S2 racks 46U:  
 Systems and components  
 will be delivered separately  
 To be ordered only together with  
 a PRIMECENTER rack  
 PCR S2 e.g. S26361-K826-V10x  
 new PCR M1 e.g. S26361-K827-Vxxx  
 refer PCR S2 or M1 rack configurator  
 max. 1x per System

**C**

**Rack Mount Kit F2-C S7 LV**  
 length variable (559mm- 860mm)  
 for loose delivery  
 with CMA adapter  
**S26361-F2735-L285**  
 without CMA adapter  
**S26361-F2735-L286**

**Sideways cable management arm**  
 for mounting in asymmetrical FJ racks.  
 Has to be mounted above the RMK.  
**S26361-F2735-L7**  
 Support bracket 3U S26361-F2735-L31  
 has to be ordered for loose delivery  
**S26361-F2735-L31**

Cable Management Arm (CMA) can  
 only be used for FTS RMKs with  
 CMA adapter

**S26361-F2735-L82**  
 Cable management arm for 2U Server  
 or higher for loose delivery  
 can only be mounted at RMK with  
 CMA adapter  
 for loose delivery

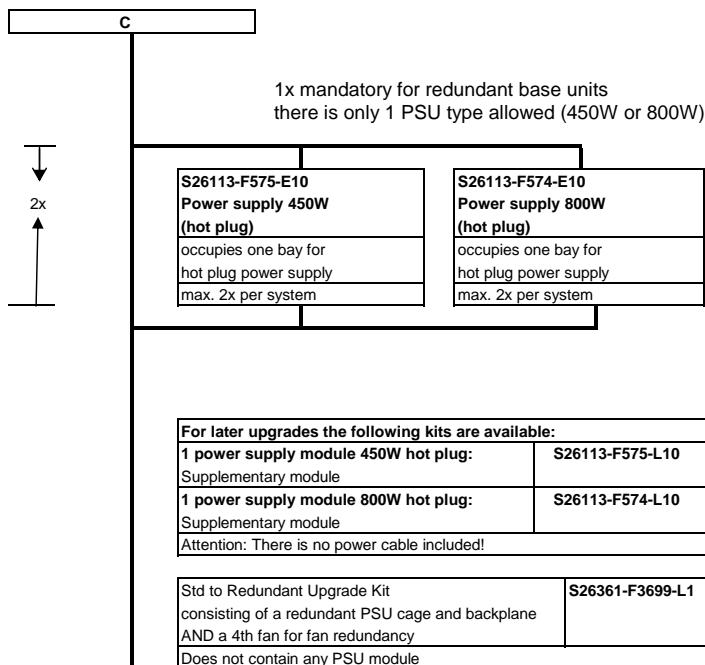

**"Rack-mounting ex factory"**  
 This service is to be ordered once  
 per installable server/storage  
 subsystem, in order to get the  
 server/storage subsystem  
 mounted into the racks.  
 In case of the 46 U PCR S2  
 this service has to be ordered,  
 to get the mounting kits and the  
 cables installed.

**PRIMERGY Classic 19" rack is not supported**

For later conversion the following kits are available:	
1.) Conversion kit 2 Floor -> Rack Conversion PRIMERGY TX200 S7 base unit floorstand into base unit rack. Only conversion, no mounting kit. Mounting kit has to be ordered seperatly.	<b>S26361-F1729-L260</b>

**\*For order completeness only**  
 Will be added automatically with  
 System Architect Version ≥ V9.3

**i For redundant Base Units only**  
 (V201, V401, V601 and V801)

**i For redundant floorstand versions only**  
 (V201 and V401)  
 A second, redundant power supply requires an additional country specific power cord (section XIII)

**Section Processor**

There are 2 processor sockets available.  
 The first socket is always equipped with the **first CPU** which can be selected via configurator  
 It is also possible to upgrade a dual-processor system later on with a **second CPU**  
**Two processors with different clock frequencies are not possible**  
 A multi-processor operating system is required for a dual-processor system.

<b>Max. two CPU's can be selected per basic unit</b>	
One of following CPU's has to be selected as first CPU	
for an orderable basic unit	
Optional second CPU has to be the same type like the first CPU	
<b>Basic 4C CPU's</b>	
- 1x 64-bit Intel Xeon (10MB shared TLC = Third Level Cache ) 1066 MHz DDR3 Bus, 6,40 GT/s QPI Bus and passive heat sink occupies socket for one CPU	
Xeon E5-2403 4C/4T 1.80GHz 10MB 6.40GT/s 1066MHz 80W	S26361-F3684-E180
Xeon E5-2407 4C/4T 2.20GHz 10MB 6.40GT/s 1066MHz 80W	S26361-F3684-E220
<b>Standard Turbo 6C CPU's</b>	
- 1x 64-bit Intel Xeon (15MB shared TLC = Third Level Cache ); Hyper-Threading (HT); 1333 MHz DDR3 Bus, 7,20 GT/s QPI Bus and passive heat sink occupies socket for one CPU	
Xeon E5-2420 6C/12T 1.90GHz 15MB 7.20GT/s 1333MHz 95W	S26361-F3723-E190
Xeon E5-2430 6C/12T 2.20GHz 15MB 7.20GT/s 1333MHz 95W	S26361-F3723-E220
Xeon E5-2440 6C/12T 2.40GHz 15MB 7.20GT/s 1333MHz 95W	S26361-F3723-E240
<b>Advanced Turbo+ 8C CPU</b>	
- 1x 64-bit Intel Xeon (20MB shared TLC = Third Level Cache ); Hyper-Threading (HT); 1600 MHz DDR3 Bus, 8,00 GT/s QPI Bus and passive heat sink occupies socket for one CPU	
Xeon E5-2450 8C/16T 2.10GHz 20MB 8.00GT/s 1600MHz 95W	S26361-F3724-E210
Xeon E5-2470 8C/16T 2.30GHz 20MB 8.00GT/s 1600MHz 95W	S26361-F3724-E230
<b>Low Power 6C CPU</b>	
- 1x 64-bit Intel Xeon (15MB shared TLC = Third Level Cache ); Hyper-Threading (HT); 1333 MHz DDR3 Bus, 7,20 GT/s QPI Bus and passive heat sink occupies socket for one CPU	
Xeon E5-2430L 6C/12T 2.00GHz 15MB 7.20GT/s 1333MHz 60W	S26361-F3725-E200

**i Note: Max. DDR3 Bus Speed depends on:**  
 - max. DDR3 Bus Speed from the CPU and  
 - max. DDR3 Memory Speed and  
 - max. memory modules on one memory channel

D

Section III Memory

<p>- There are 6 memory slots per CPU for max.                  96GB RDIMM (6x 16GB 2R)                  24GB UDIMM (6x 4GB)                  =&gt; max. 192GB for two CPU's ( 96GB per CPU ), using RDIMM</p> <p>- The memory area is divided into 3 channels per CPU with 2 slots per channel                  - Slot 1 of each channel belongs to memory bank 1, the slot 2 belongs to memory bank 2.</p>
<p><b>Registered and unbuffered memory modules can be selected</b>  <b>No mix of registered and unbuffered modules allowed.</b>                  Memory can be operated at 1.5V or 1.35V, even if the modules are of low voltage type.                  Memory operating voltage can be set within BIOS (<b>1.5V is default</b> setting for max. speed).                  In a 2 DIMMs per channel configuration, following frequencies are supported:                  - 1.5V - 1600MHz max (depending on CPU, special memory modules)                  - 1.35V - 1333MHz max (depending on CPU)  <b>SDDC (Chipkill) is supported for registered x4 organized memory modules only</b></p>
<p>1.) <b>In the "Independent Channel Mode" is following configuration possible</b>                  Channels can be populated in any order in Independent Channel Mode. All 3 channels may be populated in any order and have no matching requirements. All channels must run at the same interface frequency but individual channels may run at different DIMM timings (RAS latency, CAS latency, and so forth)  <b>No mix of registered and unbuffered modules allowed.</b></p>
<p>2.) <b>"Rank Sparing Mode" configuration</b>                  - Within a memory channel, one rank is a spare of the other ranks.                  The Spare Rank is held in reserve and is not available as system memory                  For the effective memory capacity, please refer to the spreadsheet below.                  The BIOS is set to the rank sparing setting.  <b>Minimum configuration is: 2x 1R, 2x 2R or 1x4R DDR3 module per channel</b>  <b>This mode is not supported by x8 organized memory modules</b></p>
<p>3.) <b>"Performance Mode" configuration</b>                  - In this configuration, the memory module population ex factory is spread across all channels.                  The BIOS is set to the max. performance for memory.  <b>Minimum configuration is: 3x identical modules</b></p>
<p>4.) <b>In the "Mirrored Channel Mode" is following configuration possible</b>                  - Each memory bank can optionally be equipped with 2x registered memory modules  <b>In each memory bank channel B and C of CPU 1 or channel E and F of CPU 2 have to be equipped with identical modules for mirrored channel mode.</b>                  In channel C is always the mirrored memory of channel B of CPU 1                  In channel F is always the mirrored memory of channel E of CPU 2  <b>Minimum configuration is: 2x identical modules</b>  <b>This mode is not supported by x8 organized memory modules</b></p>

D1

D1

1x per CPU ↓ ↑	S26361-F3694-E10 Independent Mode Independent Channel Mode allows all channels to be populated in any order. No specific Memory RAS features are defined <b>Requires min 1 memory Module per CPU</b>
	S26361-F3695-E1 Rank Sparing Mode Installation BIOS Setup factory preinstalled to this mode. One Rank is spare of other ranks on the same channel. Spare Rank is not shown in System Memory. For effective capacity within a channel, please have a look below. <b>Supported for RDIMM only.</b> <b>Requires min 2x 1R/2R or 1x 4R modules per CPU</b>
	S26361-F3695-E2 Performance Mode Installation BIOS Setup factory preinstalled for max. Performance, LV memory might be set to 1.5V operation. 3 identical memory modules will be equipped in one memory bank to achieve highest memory performance. All 3 modules are active and full capacity can be used. <b>Multiple of 3 identical modules to be configured per CPU</b>
	S26361-F3695-E3 Mirrored Channel Mode Installation BIOS Setup factory preinstalled to this mode. 2 identical memory modules are always equipped in one memory bank to use the Mirrored channel Mode. Only two modules contain active data, the remain two modules contain mirrored data <b>Supported for RDIMM only.</b> <b>Multiple of 2 identical modules to be configured per CPU</b>

Effective Memory capacity / Rank Sparing Mode, 1 Channel populated						
	UDIMM		RDIMM			
	2GB 1R	2GB 2R	4GB 1R	8GB 2R	16GB 2R	
1DPC	na	na	na	na	na	
2DPC	na	na	4GB	12GB	24GB	

**Minimum one memory module or order code per CPU = first memory**

6x per CPU, max. 2 modules per channel ↓ ↑	<b>Unbuffered Memory (UDIMM) no SDDC (chipkill) support</b> - one DDR3 unbuffered ECC mem. Module, 1.35V <b>Choose up to 6 order codes per CPU</b>
	2GB (1x2GB) 1Rx8 L DDR3-1600 U ECC S26361-F3694-E513 4GB (1x4GB) 2Rx8 L DDR3-1600 U ECC S26361-F3694-E514
	<b>Registered Memory (RDIMM) with SDDC (chipkill) support</b> - one DDR3 registered ECC mem. Module, 1.35V 1600MHz supported with up to 2DPC (8 modules/CPU) at 1.5V <b>Choose up to 6 order codes per CPU</b>
	4GB (1x4GB) 1Rx4 L DDR3-1600 R ECC S26361-F3697-E514 8GB (1x8GB) 2Rx4 L DDR3-1600 R ECC S26361-F3697-E515 16GB (1x16GB) 2Rx4 L DDR3-1600 R ECC S26361-F3697-E516

Note 1.)  
 Max. DDR3 memory speed depends on the memory configuration (No of mem modules per channe) as well as on the CPU type.  
 The memory channel with the lowest speed defines the speed of all CPU channels in the system, also for the channels of the second CPU if configured.  
 For real memory speed (depending on memory type / population),

Mix of memory modules is only possible within the same group

H

## Memory Configuration PRIMERGY TX200 S7

Each CPU offers 6 **Slots** for DDR3 Memory Modules organised in **2 Banks and 3 Channels**.

If you need more than 6 Slots you have to configure the 2nd CPU.

Depending on the amount of memory configured you can decide between 4 basic modes of operation (see explanation below).

There are 2 different kinds of DDR3 Memory Modules available: UDIMM and RDIMM

UDIMM / RDIMM offer different functionality. Mix of UDIMM / RDIMM is not allowed.

If 1.5V and 1.35V DIMMs are mixed, the DIMMs will run at 1.5V

Mode	Configuration	UDIMM	RDIMM	RDIMM	Application
		<b>x8</b>	<b>x8</b>	<b>x4</b>	
SDDC (chipkill) support	any	no	no	yes	detect multi-bit errors
Independent Channel Mode	1, 2 or 3 Modules per Bank	yes	yes	yes	offers max. flexibility, upgradeability, capacity use UDIMM modules for lowest cost
Mirrored Channel Mode *)	2 identical Modules / Bank	no	no	yes	offers maximum security
Performance Mode	3 identical Modules / Bank	yes	yes	yes	offers maximum performance and capacity
Rank Sparing Mode *)	min. 2 Ranks / Channel	no	no	yes	balances security and capacity

\*) For the delivery ex works the system will be prepared with dedicated BIOS setting.

Capacity	Configuration	UDIMM	RDIMM	Notes
Min. Memory per CPU	1 Module / CPU	1x2GB	1x4GB	with one CPU
Max. Memory per CPU	4/6 Modules / CPU	6x4GB	6x16GB	with one CPU
Max. Memory per System	8/12 Modules / System	48GB	96GB	if second CPU is configured

### Memory-Speed:

**Max. DDR3 memory speed depends on the memory configuration on one memory channel and the speed of the CPU**

The memory channel with the lowest speed defines the speed of all CPU channels in the system

Mem. Speed provided by CPU	Real maximum memory-bus speed depending on CPU type, memory configuration (DPC) and voltage setting (BIOS)										
	UDIMM 1600MHz					RDIMM 1600MHz					
	1.5V [default]		1.35V			1.5V [default]		1.35V			
Voltage setting (BIOS)	1	2		1	2		1	2	3	1	2
	DPC	DPC		DPC	DPC		DPC	DPC	DPC	DPC	DPC
CPU with 1600MHz DDR3 Bus	1333	1066		1333	1066		1600	1600	-	1333	1333
CPU with 1333MHz DDR3 Bus	1333	1333		1066	1066		1333	1333	-	1333	1333
CPU with 1066MHz DDR3 Bus	1066	1066		1066	1066		1066	1066	-	1066	1066

1R - Single Rank

2R - Dual Rank

1DPC = 1 DIMM per Channel

2DPC = 2 DIMM per Channel

Configuration hints:

- The memory sockets on the systemboard offer a color coding:

**Bank I** black sockets

**Bank II** blue sockets

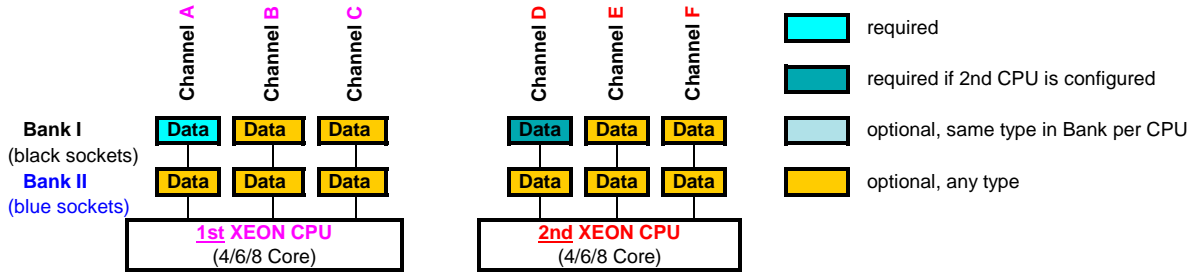

- A so called Bank consists of 1 memory module on every Channel available on one CPU (examples see below)

**Bank I on CPU 1/2** up to 3 memory modules connected to Channel A - F on the 1st/2nd CPU

**Bank II on CPU 1/2** up to 3 memory modules connected to Channel A - F on the 1st/2nd CPU

- See below and next page for a detailed descriptions of the memory configuration supported.

### 1. Independent Channel Mode

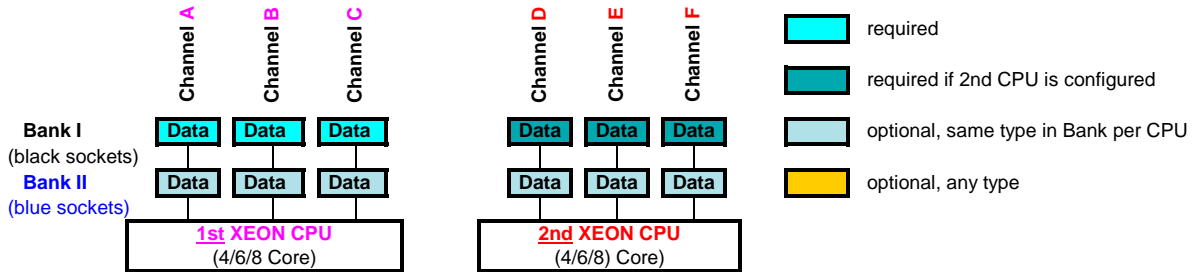

Independent Channel Mode allows all channels to be populated in any order  
 Can run with differently rated DIMMs and use the settings of the slowest DIMM installed in the system

### 2. Mirrored Channel Mode

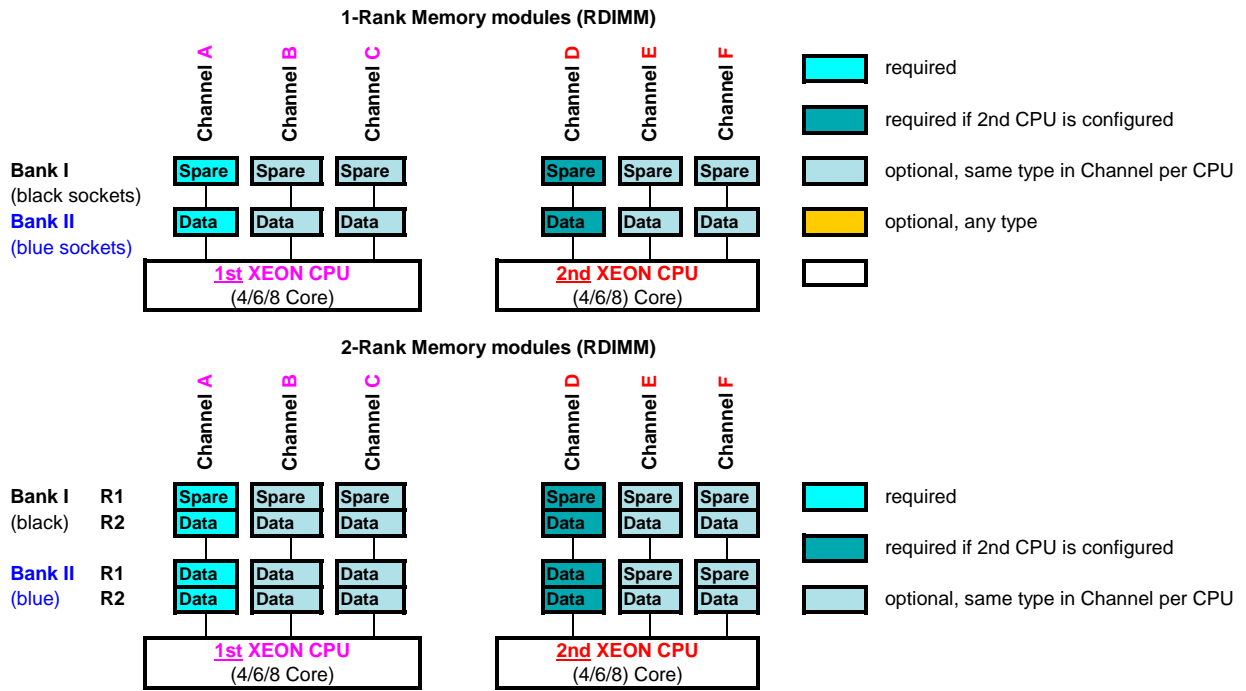

Mirrored Channel Mode requires identical modules on channel B / C (1st CPU) or channel E / F (2nd CPU)  
 50% of the capacity is used for the mirror => the available memory for applications is only half of the installed memory  
 If this mode is used, a multiple of 2 identical modules has to be ordered.

### 3. Performance Channel Mode

Performance Channel Mode requires identical modules on all channels of each Bank per CPU.  
 If this mode is used, a multiple of 3 identical modules has to be ordered.

### 4. Rank Sparing Mode

Rank Sparing Mode requires identical modules (same capacity and technology) within the same channel. The available memory for applications will vary depending on configuration. Please refer to the spreadsheet above "Effective Memory capacity with active Rank Sparing Mode". Population rule for Rank sparing mode is to achieve max. available memory.

H

**Section IV Grafik**

<b>S26361-F2748-E537</b>
PY VGA card 512MB PCI-e x1
NVIDIA NVS300
512 MB PCI-e-x1
Connectors: 1x LFH 59
cable kit for 2x DVI or 2x VGA
cable kits included
Dual head + professional 2-D + 3-D
supported for Windows OS
native driver support for Linux OS
full height bracket
max. 1x per system

The high end optional NVIDIA NVS300 graphic card offers dual head operation and fully 3D video support. The cables for either two times DVI-I or VGA (cable kit) connections are part of the delivery.  
**Remote Video direction via iRMC must be disabled.**  
This PCI-e-x1 card can also be installed in any PCI-e-x4, x8 or x16 slot.  
Only one card per server is allowed.

<b>S26361-F2748-L537</b>
PY VGA card 512MB PCI-e x1
for loose delivery

**Section V Accessible drives**

There are 3 bays (1.6" x 5.25") for accessible drives usable for all or for LFF related base units.  
For all SFF base units there is an additional bay; please refer to section VI hard disk drives SFF HDDs

see Conf. Diagram **Option A** occupies 1 accessible bay for all base units

see Conf. Diagram **Option B** occupies 2 accessible bays only 3.5" HDD base units

see Conf. Diagram **Option C** occupies all 3 bays only 3.5" HDD base units

<b>S26361-F2826-E205</b>
Mounting Kit DVD(sl) + LSP/LSD
Occupies <b>one</b> 5.25" x 1.6" bay in the accessible bay area
Offers bays for:
- 1x <b>Local Sv. Display</b> option
- 1x 0.5 * 5.25" SATA DVD
max. 1x per system

<b>S26361-F2826-E106</b>
Mounting Kit DVD(sl) + LSP/LSD + SAS LFF HDD
Occ. <b>two</b> 5.25" x 1.6" bays in the accessible bay area
Offers bays for:
- 1x <b>Local Sv. Display</b> option
- 1x 0.5 * 5.25" SATA DVD
- 2x 3.5" SAS/SATA HDD's
One 0.5 * 3.5" satin black bezel for Local Sv. Display bay
One 0.5 * 5.25" satin black bezel for 0.5 * 5.25" DVD bay
Two 1 * 3,25" satin black bezels for SAS HDD bays
max. 1 per system

<b>S26361-F2826-E436</b>
Mounting Kit DVD(sl) + SAS LFF HDD
Occupies <b>all</b> 5.25" x 1.6" bays in the accessible bay area
Offers bays for:
- 1x 0.5 * 5.25" SATA DVD
- 4x 3.5" SAS/SATA HDD's
Two 1 * 3,25" satin black bezels for SAS HDD bays
max. 1x per system

For the mounting kits **Option B** or **C** **S26361-F2826-E106** or **-E436** a PCI based modular RAID controller is necessary!  
see Section VIII!

 10x RDX320 = S26361-F3857-L329

The bundle is also available as optional (loose) delivery  
 S26361-F3750-L604 with USB3.0 cable for adapter card.  
 The USB3.0 Adapter card or the USB2.0 cable set  
 S26361-F3750-L20 must be ordered with the drive!

For internal SAS Backup drives  
 the onboard 4-port SAS controller "Patsburg B" has to be configured  
 Patsburg B is not available for SLES10!

**Section VI Hard disks drives**

**SAS RAID Controller for up to 4 SAS HDDs**

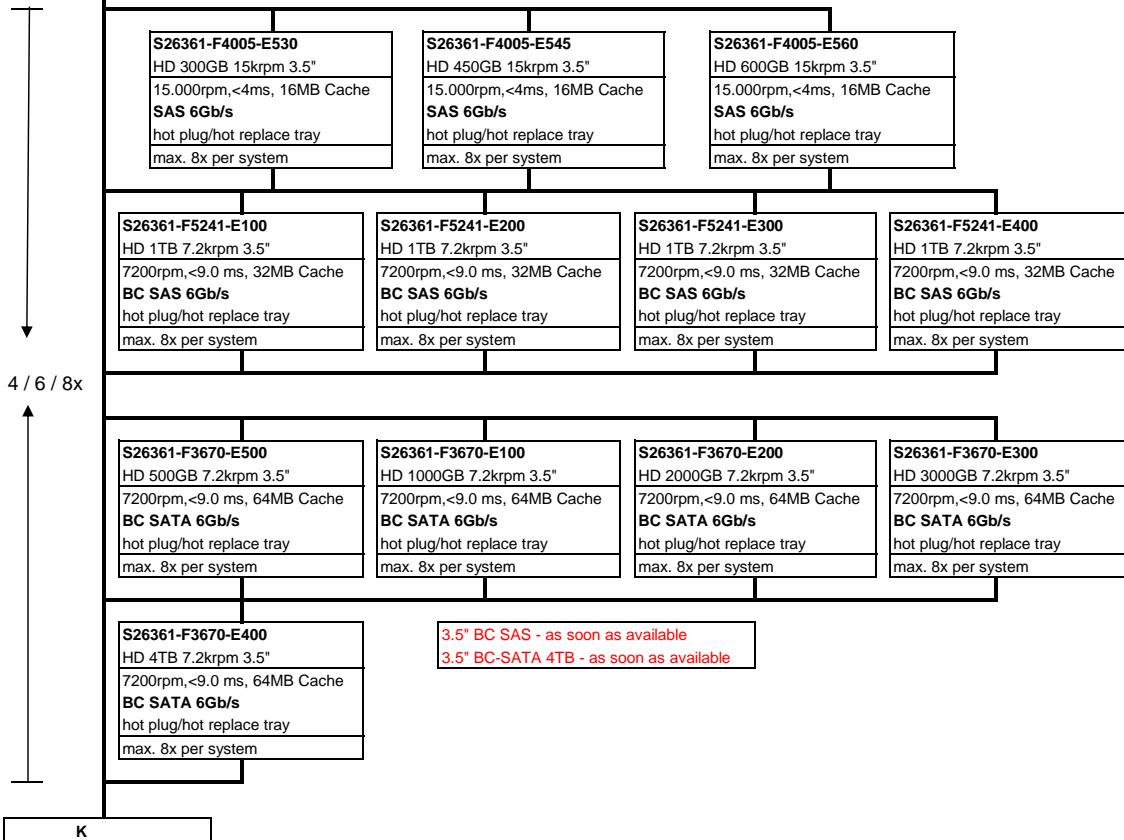

<b>S26361-F3674-E1</b>
Onboard 4 port SAS Controller
LSI
Patsburg B replaces 4 onb. SATA ports
RAID 0, 1 & 10
no controller cache
SAS 6Gb/sec
4 internal ports
PCIe x4
<b>no PCI slot required</b>
max. 1x per system

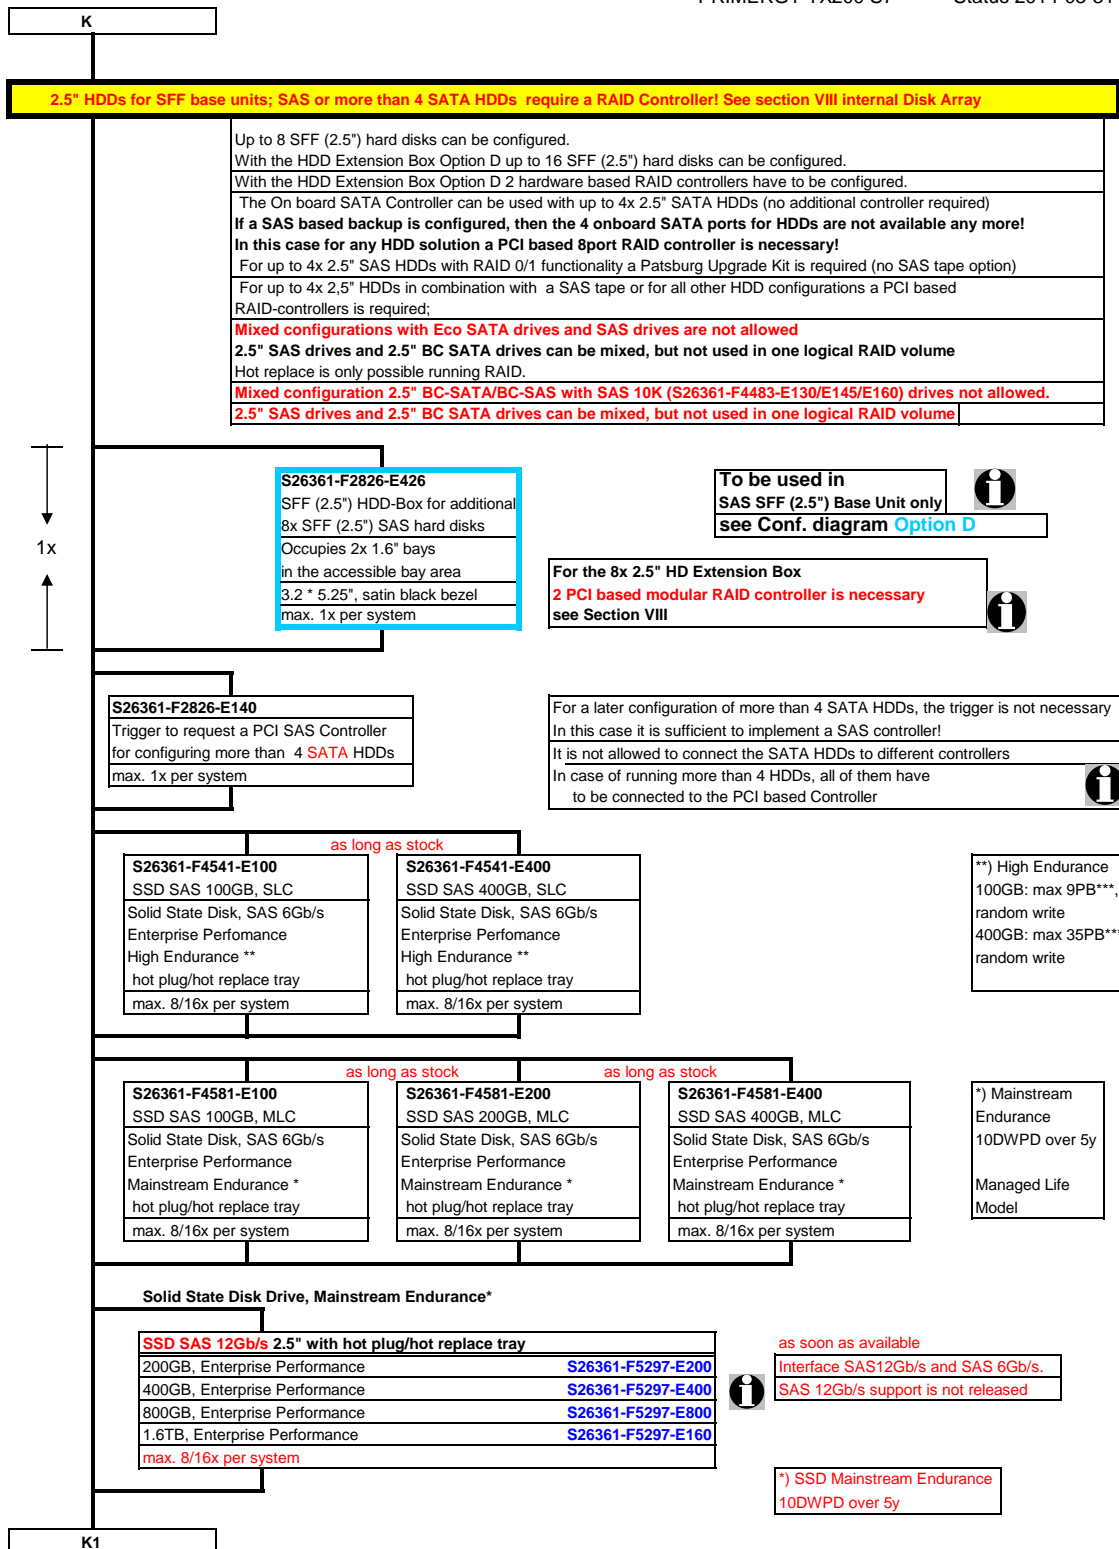

**If the onboard 4 port SATA or SAS Controller is used for HDD, it is not possible to implement a LTO drive later**

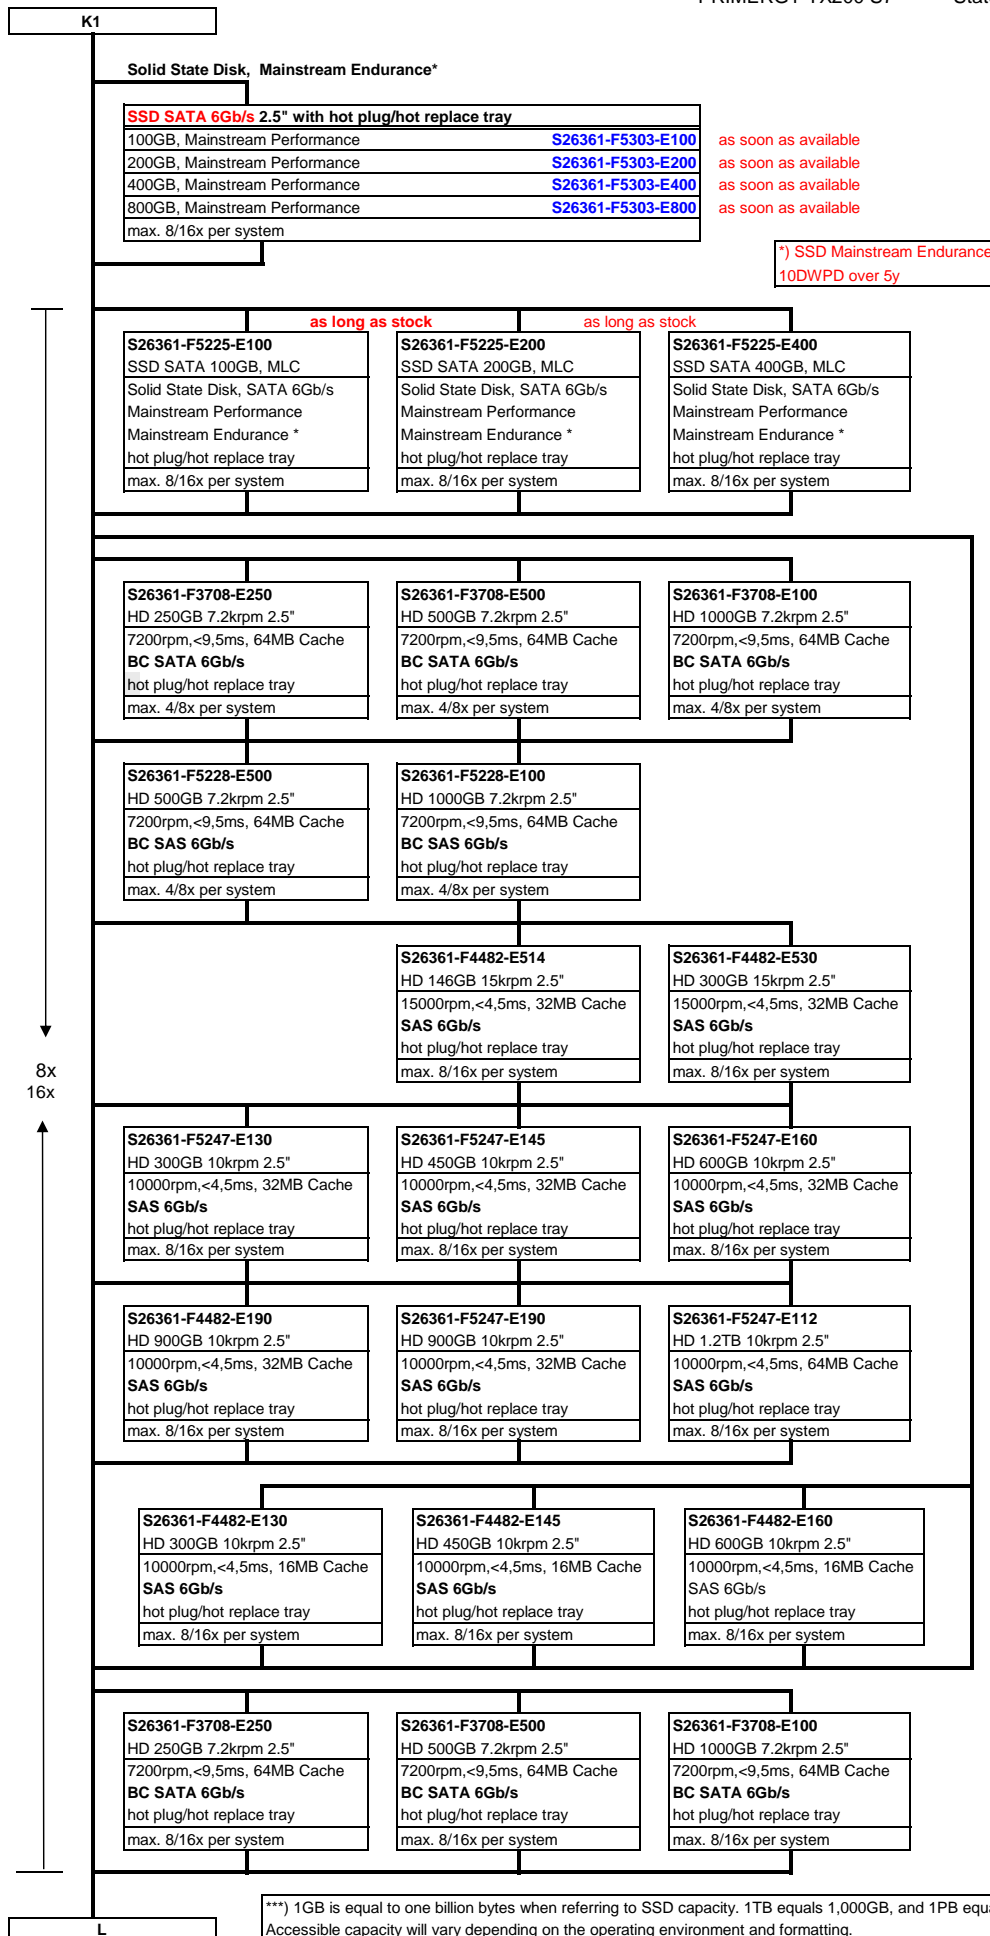

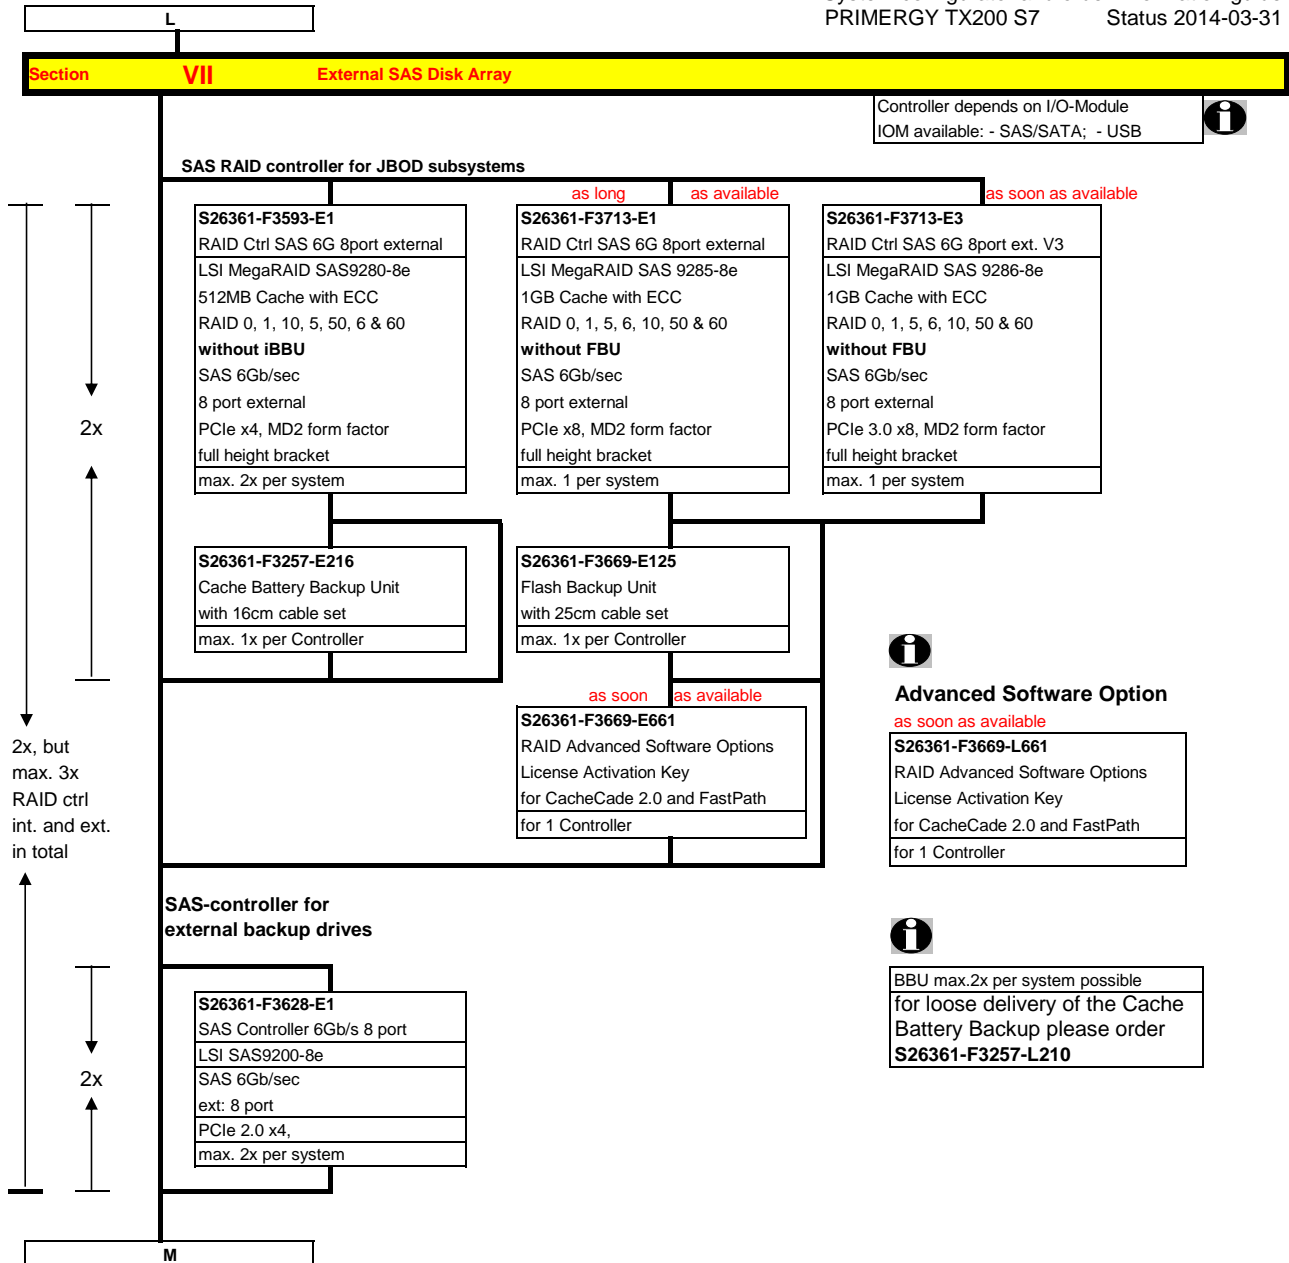

**3.5" HDDs for LFF base units; SAS or more than 4 SATA HDDs require a RAID Controller! See section VIII internal Disk Array**

Up to 4 LFF (3.5") hard disks can be configured into the base unit  
 With the HDD Extension Box Option B up to 6 LFF (3.5") hard disks can be configured, with Option C up to 8 HDDs.  
 The on board SATA Controller can be used with up to 4x 3.5" SATA HDDs (no additional controller required), BUT:  
**If a LTO backup drive is configured, then the 4 onboard SATA ports for HDDs are not available!**  
**In this case for any HDD solution a PCI based 8port RAID controller is necessary!**  
 For up to 4x 3.5" SAS HDDs without SAS Tape a Patsburg SAS RAID controller is available  
 For up to 4x 3.5" SAS HDDs in combination with a SAS tape or fr all other HDD configurations a 8port PCIcontroller is required  
**Mixed configurations with Eco SATA drives and SAS drives are not allowed**  
 3.5" SAS drives and 3.5" BC SATA drives can be mixed, but not used in one logical RAID volume  
 Hot replace is only possible running RAID.

M

**Section VIII internal Disk Array**

All Base Units contain a 6-port on-board SATA controller supporting RAID Levels 0, 1, 10  
 If a SAS Backup drive is configured, then the 4 SATA HDD boards are not available any more  
 If no SAS Backup drive is configured, then there is an optional SAS onboard controller available for up to 4 SAS HDDs  
 For more than 4 HDDs or for any HDD in combination with a SAS tape  
 it is necessary to select an 8 port PCI based RAID0/1 or RAID5 controller!

**SAS RAID Controller for up to 4 SAS HDDs**

<b>S26361-F3674-E1</b>
Onboard 4 port SAS Controller
LSI
Patsburg B replaces 4 onb. SATA ports
RAID 0, 1 & 10
no controller cache
SAS 6Gb/sec
4 internal ports
PCIe x4
<b>no PCI slot required</b>
max. 1x per system

A mix of onboard RAID and HW RAID is not allowed!

**Controller for 1 to 8 LFF (3.5") or SFF (2.5") HDD**

1x for LFF base  
 2x for SFF, but  
 max. 3x
