

Acaleph, a global enterprise startup based in Singapore, Manila and Los Angeles is now hiring Support Engineer in Indonesia!

The role of Support Engineer is to provide first line support for Acaleph's unified storage and digital infrastructure. These duties include close interaction with customers to determine the source of the problem and work in coordination with Infrastructure Engineer to solve it and clearly document and report changes made in the system. Most work will revolve around Linux, networking and distributed file systems.

Come and join the pioneering team! Work globally - Live in Indonesia.

Fresh graduates and Interns are welcome to apply.
