In Adam Bede(1859) George Eliot took the well-worn tale of a lovely dairy-maid seduced by a careless squire, and out of it created a wonderfully innovative and sympathetic portrait of the lives of ordinary Midlands working people--their labors and loves, their beliefs, their talk. This edition reprints the original broadsheet reports of the murder case that was a starting point for the book, and detailed notes illuminate Eliot's many literary and Biblical allusions.

[Gun Violence in America: The Struggle for Control, Alexander DeConde](#) , 2003, 1555535925, 9781555535926. Few social issues have produced more exaggerated claims and contention among Americans than the struggle to control gun violence. Fuelling the emotional fire in debates between firearm groups such as the National Rifle Association (NRA) and gun control advocates is the dispute over the importance of guns in American culture. Is the fondness for firearms, truly part of a venerable American tradition, one to be observed with very few limits? In this inquiry, Alexander DeConde delves into the myths and politics regarding gun keeping, as well as the controversies over gun use, crime and policing from the early days of the republic to the 21st century. explains why the United States, with all its resources, fails repeatedly to confine gun violence to the same low levels achieved by other advanced democracies. A new epilogue by the author addresses the state of the gun control debate in today's political climate.

[The Literary Detective: 100 Puzzles in Classic Fiction, John Sutherland](#) , 2000, 019210036X, 9780192100368. The Literary Detective is an omnibus edition of John Sutherland's three best-selling collections of literary puzzles, Is Heathcliffe a Murderer?, Can Jane Eyre be Happy?, and Who Betrays Elizabeth Bennet? Investigating a variety of anomalies, enigmas, and conundrums such as 'Why does Robinson Crusoe find only one footprint?' and 'Where does Fanny Hill keep her contraceptives?', Professor Sutherland explores the questions readers often ask and critics rarely discuss. His forensic skills focus on authors from Defoe and Fielding to Wells and Woolf, relishing in particular the nineteenth-century novelists, Austen, Collins, Dickens, and the Brontes. By addressing 'real world' questions John Sutherland has brought lit. crit. Down from the rarefied heights of academe and into the everyday discourse of ordinary readers, who bring their own expertise to bear on these novels. In his introduction he quotes from some of the many letters he has received, which demonstrate that we can all be astute and entertaining critics. The 'Sherlock Holmes of Literature', as he has been called, John Sutherland reminds us of the sheer pleasure and excitement that good books inspire, and of their endless ability to surprise and delight us.

[Becoming a Legend, B. Kristin McMichael](#) , 2013, 0989121836, 9780989121835. Arianna Grace is about to turn seventeen, and her life has been very complicated lately. She is the leader of four clans of night humans: dearg-dul, baku, tengu, and lycan. While the four clans seem to get along better with each other, there is internal conflict on both sides of her family, not to mention the three boys vying for her attention. Devin is set on keeping her safe above all else. Turner's goal is to make her happy. And Andrew wants her for himself. At some point Arianna will have to choose between them, but first she needs to survive the plots against her. Edward Lucan is making a chase for the power to lead

the baku clans and is playing his cards by using his nephew Andrew to lure Arianna into a trap. Unfortunately for Lucan, Andrew has his own plans. He has spent the last year waiting for Arianna to see him as more than a friend, and he now finds it necessary to make a move for her affection, despite his uncle. In the dearg-dul estate, Arianna discovers that the ambitious Lord Seeger has been laying his own strategies for power and is slowly poisoning her. After getting away with her grandfather's murder, he is setting his sights on her. Luckily for Arianna, her team is on to all of the plans and is making their own counter strategies. Will it be enough to keep Arianna safe? Several people close to Arianna have been keeping secrets. If Arianna is to take power and control of the night, she will need to know the truth. Will someone finally tell her what it really means to become the legend everyone is waiting for, before it is too late to turn back?

[The Story of A: The Alphabetization of America from the New England Primer to the Scarlet Letter, Patricia Crain](#) , 2000, 0804731756, 9780804731751. Richly illustrated with often antic images from alphabet books and primers, The Story of A relates the history of the alphabet as a genre of text for children and of alphabetization as a social practice in America, from early modern reading primers to the literature of the American Renaissance. Offering a poetics of alphabetization and explicating the alphabet's tropes and rhetorical strategies, the author demonstrates the far-reaching cultural power of such apparently neutral statements as "A is for apple." The new market for children's books in the eighteenth century established for the "republic of ABC" a cultural potency equivalent to its high-culture counterpart, the "republic of letters,"

while shaping its child-readers into consumers. As a central rite of socialization, alphabetization schooled children to conflicting expectations, as well as to changing models of authority, understandings of the world, and uses of literature. In the nineteenth century, literacy became a crucial aspect of American middle-class personality and subjectivity. Furnishing the readers and writers needed for a national literature, the alphabetization of America between 1800 and 1850 informed the sentimental-reform novel as well as the self-consciously aesthetic novel of the 1850s. Through readings of conduct manuals, reading primers, and a sentimental bestseller, the author shows how the alphabet became embedded in a maternal narrative, which organized the world through domestic affections. Nathaniel Hawthorne, by contrast, insisted on the artificiality of the alphabet and its practices in his antimimetic, hermetic *The Scarlet Letter*, with its insistent focus on the letter A. By understanding this novel as part of the network of alphabetization, *The Story of A* accounts for its uniquely persistent cultural role. The author concludes, in an epilogue, with a reading of postmodern alphabets and their implications for the future of literacy.

[Companies We Keep: Employee Ownership and the Business of Community and Place, 2nd Edition, John Abrams](#) , 2008, 1603581405, 9781603581400. Part memoir and part examination of a new business model, the 2005 release of *The Company We Keep* marked the debut of an important new voice in the literature of American business. Now, in *Companies We Keep*, the revised and expanded edition of his 2005 work, John Abrams further develops his idea that companies flourish when they become centers of interdependence, or communities of enterprise. Thoroughly revised with an expanded focus on employee ownership and workplace democracy, *Companies We Keep* celebrates the idea that

when employees share in the rewards as well as the responsibility for the decisions they make, better decisions result. This is an especially timely topic. Most of the baby boomer generation the owners of millions of American businesses will retire within the next two decades. In 2001, 50,000 businesses changed hands. In 2005, that number rose to 350,000. Projections call for 750,000 ownership transitions in 2009. Employee ownership in both the philosophical and the practical sense is gathering steam as businesses change hands, and Abrams examines some of the many ways this is done. *Companies We Keep* is structured around eight principles from *Sharing Ownership and Cultivating Workplace Democracy* to *Thinking Like Cathedral Builders and Committing to the Business of Place* that Abrams has discovered in the 32 years since he cofounded South Mountain Company on the island of Marthas Vineyard. Together, these principles reveal communities of enterprise as a potent force of change that can and will improve the way Americans do business.

[Fraud of the Century: Rutherford B. Hayes, Samuel Tilden, and the Stolen Election of 1876, Roy Jr. Morris](#) , 2007, 1416585451, 9781416585459. In this major work of popular history and scholarship, acclaimed historian and biographer Roy Morris, Jr., tells the extraordinary story of how, in America's centennial year, the presidency was stolen, the Civil War was almost reignited, and black Americans were consigned to nearly ninety years of legalized segregation in the South. The bitter 1876 contest between Ohio Republican governor Rutherford B. Hayes and New York Democratic governor Samuel J. Tilden is the most sensational, ethically sordid, and legally questionable presidential election in American history. The first since Lincoln's in 1860 in which the Democrats had a real chance of recapturing the White House, the election was in some ways the last battle of the Civil War, as the two parties fought to preserve or overturn what had been decided by armies just eleven years earlier. Riding a wave of popular revulsion at the numerous scandals of the Grant administration and a sluggish economy, Tilden received some 260,000 more votes than his opponent. But contested returns in Florida, Louisiana, and South Carolina ultimately led to Hayes's being declared the winner by a specially created, Republican-dominated Electoral Commission after four tense months of political intrigue and threats of violence. President Grant took the threats seriously: he ordered armed federal troops into the streets of Washington to keep the peace. Morris brings to life all the colorful personalities and high drama of this most remarkable -- and largely forgotten -- election. He presents vivid portraits of the bachelor lawyer Tilden, a wealthy New York sophisticate whose passion for clean government propelled him to the very brink of the presidency, and of Hayes, a family man whose midwestern simplicity masked a cunning political mind. We travel to Philadelphia, where the Centennial Exhibition celebrated America's industrial might and democratic ideals, and to the nation's heartland, where Republicans waged a cynical but effective "bloody shirt" campaign to tar the Democrats, once again, as the party of disunion and rebellion. Morris dramatically recreates the suspenseful events of election night, when both candidates went to bed believing Tilden had won, and a one-legged former Union army general, "Devil Dan" Sickles, stumped into Republican

headquarters and hastily improvised a devious plan to subvert the election in the three disputed southern states. We watch Hayes outmaneuver the curiously passive Tilden and his supporters in the days following the election, and witness the late-night backroom maneuvering of party leaders in the nation's capital, where democracy itself was ultimately subverted and the will of the people thwarted. Fraud of the Century presents compelling evidence that fraud by Republican vote-counters in the three southern states, and especially in Louisiana, robbed Tilden of the presidency. It is at once a masterful example of political reporting and an absorbing read.

In The Things They Cannot Say, award-winning journalist and author Kevin Sites asks these difficult questions of eleven soldiers and marines, who by sharing the truth about their wars display a rare courage that transcends battlefield heroics. For each of these men, many of whom Sites first met while in Afghanistan and Iraq, the truth means something different. One struggles to recover from a head injury he believes has stolen his ability to love; another attempts to make amends for the killing of an innocent man; yet another finds respect for the enemy fighter who tried to kill him. Sites also shares the unsettling narrative of his own failures during war including his complicity in a murder and the redemptive powers of storytelling that saved him from a self-destructive downward spiral.

[Confederate Streets, Erin E. Tocknell](#) , 2011, 0984462910, 9780984462919. Literary Nonfiction. "We're born into a world already in progress, like arriving late at a movie. Erin Tocknell, born to Nashville, loved the city in a wide-eyed, child's way, before she had a glimmer of the history that had shaped what she took to be her world. CONFEDERATE STREETS recalls how it feels to wake up to history, to understand you are living right in the midst of it. Not all the lessons are easy, but in Tocknell's telling we come to appreciate the rewards of facing up to the hard facts, of refusing the false glamour of living innocent of history. CONFEDERATE STREETS reminds us what as a nation we seem always to be forgetting, just how far love and understanding and goodwill can take us toward the promised America"--Kevin Oderman.

[Abraham Lincoln and the Second American Revolution, James M. McPherson](#) , 1992, 0195076060, 9780195076066.

James McPherson has emerged as one of America's finest historians. *Battle Cry of Freedom*, his Pulitzer Prize-winning account of the Civil War, was a national bestseller that Hugh Brogan, in *The New York Times Book Review*, called "history writing of the highest order." In that volume, McPherson gathered in the broad sweep of events, the political, social, and cultural forces at work during the Civil War era. Now, in *Abraham Lincoln and the Second American Revolution*, he offers a series of thoughtful and engaging essays on aspects of Lincoln and the war that have rarely been discussed in depth. McPherson again displays his keen insight and sterling prose as he examines several critical themes in American history. He looks closely at the President's role as Commander-in-Chief of the Union forces, showing how Lincoln forged a national military strategy for victory. He explores the importance of Lincoln's great rhetorical skills, uncovering how--through parables and figurative language--he was uniquely able to communicate both the purpose of the war and a new meaning of liberty to the people of the North. In another section, McPherson examines the Civil War as a Second American Revolution, describing how the Republican Congress elected in 1860 passed an astonishing blitz of new laws (rivaling the first hundred days of the New Deal), and how the war not only destroyed the social structure of the old South, but radically altered the balance of power in America, ending 70 years of Southern power in the national government. The Civil War was the single most transforming and defining experience in American history, and Abraham Lincoln remains the most important figure in the pantheon of our mythology. These graceful essays, written by one of

America's leading historians, offer fresh and unusual perspectives on both.

In nineteenth-century Queensland, Lieutenant Freddie Buckmaster takes a band of men to 'disperse the natives' from Mandarana, an outback town. Violence is the inevitable result. Terrified, a young mother, Kowaha, leaps from a cliff, holding her baby. Two decades after the massacre, Tom Dorahy returns to his hometown for a reunion, bringing with him memories of its dark past and an attempt to reclaim justice for the victims of that night. A Kindness Cup addresses the efforts made to forget and to remember by both white and indigenous Australians, so that they may negotiate a future together.

By combining elements of Catholic liturgy with poetic narration and wildly innovative characterizations of familiar Biblical characters, this play provides a new way for theatre practitioners everywhere to reengage with a familiar story. Ecclesia imagines the Church as a mysteriously beautiful Bride who accepts Jesus' proposal at Pentecost. In His absence over the following years, the Bride's unfaithfulness to the unseen schemer culminates in the apocalyptic return of Christ. Visions of prophets and ceremonial readings from clergymen punctuate the story of the Bride and ask pointed, difficult questions of the modern Church. A must read for a generation of playwrights

interested in the intersection of faith and artistic practice.

[Rolling Thunder in a Gentle Land: The Vietnam War Revisited, Andrew Wiest](#) , 2007, 1846032164, 9781846032165.

From the Colonial War with France in the 1940s and 50s, through to the final evacuation of Saigon, each chapter of Rolling Thunder in a Gentle Land focuses on a different aspect of the Vietnam War. The 15 chapters are written by a diverse set of expert authors including participants in the war, journalists and historians, who give startling and, in some cases exclusive, insights into one of the most controversial conflicts of the 20th century. Officers from both the NVA and ARVN take a first-hand look at the strategy and tactics of both sides and give critical assessments of where the war went wrong; Le Ly Hayslip, a Vietnamese civilian trapped between the Viet Cong and Southern authorities, provides a harrowing account of life for the typical South Vietnamese civilian caught up in the war; and acclaimed historians and journalists, such as Bernard Edelman and Arnold Isaacs, take a critical look at the many aspects of the war from the river and air wars to the strategy and doctrine used by the USA forces and the controversial roll of the media in the war. Illustrated with contemporary color photography that evocatively complements the text, this book shows the Vietnam War in a radically new light.

[Smoking Typewriters: The Sixties Underground Press and the Rise of Alternative Media in America, John McMillian](#) , 2011, 0199752656, 9780199752652. How did the New Left uprising of the 1960s happen? What caused millions of young people-many of them affluent and college educated-to suddenly decide that American society needed to be completely overhauled? In Smoking Typewriters, historian John McMillian shows that one answer to these questions can be found in the emergence of a dynamic underground press in the 1960s. Following the lead of papers like the Los Angeles Free Press, the East Village Other, and the Berkeley Barb, young people across the country launched hundreds of mimeographed pamphlets and flyers, small press magazines, and underground newspapers. New, cheaper printing technologies democratized the publishing process and by the decade's end the combined circulation of underground papers stretched into the millions. Though not technically illegal, these papers were often genuinely subversive, and

many of those who produced and sold them-on street-corners, at poetry readings, gallery openings, and coffeehouses- became targets of harassment from local and federal authorities. With writers who actively participated in the events they described, underground newspapers captured the zeitgeist of the '60s, speaking directly to their readers, and reflecting and magnifying the spirit of cultural and political protest. McMillian pays special attention to the ways underground newspapers fostered a sense of community and played a vital role in shaping the New Left's highly democratic "movement culture." Deeply researched and eloquently written, *Smoking Typewriters* captures all the youthful idealism and vibrant tumult of the 1960s as it delivers a brilliant reappraisal of the origins and development of the New Left rebellion.

[Fire in the City: Savonarola and the Struggle for the Soul of Renaissance Florence, Lauro Martines](#) , 2006, 0199884307, 9780199884308. A gripping and beautifully written narrative that reads like a novel, *Fire in the City* presents a compelling account of a key moment in the history of the Renaissance, illuminating the remarkable man who dominated the period, the charismatic Savonarola. Lauro Martines, whose decades of scholarship have made him one of the most admired historians of Renaissance Italy, here provides a remarkably fresh perspective on Girolamo Savonarola, the preacher and agitator who flamed like a comet through late fifteenth-century Florence. The Dominican friar has long been portrayed as a dour, puritanical demagogue who urged his followers to burn their worldly goods in "the bonfire of the vanities." But as Martines shows, this is a caricature of the truth--the version propagated by the wealthy and powerful who feared the

political reforms he represented. In fact, Savonarola emerges as a complex and subtle man: compassionate, wise, a poet and scholar, and even, at critical moments, a force for moderation. The friar, a mesmerizing preacher, set the city afire with his message of Christian charity wedded to republican ideals. It is this reality--of Savonarola as both religious and civic leader--that Martines captures in all its complexity, showing how he inspired an outpouring of political debate in a city newly freed from the tyranny of the Medici. In the end, the volatile passions he unleashed--and the powerful families he threatened--sent the friar to his own fiery death. But the fusion of morality and politics that he represented would leave a lasting mark on Renaissance Florence. For the many readers fascinated by histories of Renaissance Italy--such as Brunelleschi's Dome or Galileo's Daughter, and Martines's acclaimed April Blood--Fire in the City offers a vivid portrait of one of the most memorable characters from that dazzling era.

'3-Dimensional VLSI: A 2.5-Dimensional Integration Scheme'elaborates the concept and importance of 3-Dimensional (3-D) VLSI. The authors have developed a new 3-D IC integration paradigm, so-called 2.5-D integration, to address many problems that are hard to resolve using traditional non-monolithic integration schemes. The book also introduces major 3-D VLSI design issues that need to be solved by IC designers and Electronic Design Automation (EDA) developers. By treating 3-D integration in an integrated framework, the book provides important insights for semiconductor process engineers, IC designers, and those working in EDA R&D. [Medieval Marriage Sermons : Mass Communication in a Culture without Print: Mass Communication in a Culture without Print, David D'Avray](#) , 2001, . Before the advent of printing, the preaching of the friars was the mass medium of the middle ages. This edition of marriage sermons reveals what a number of famous preachers actually taught about marriage. David D'Avray teases out the close connection between marriage symbolism and social, cultural, and legal realities in the thirteenth century. The relation between genre, content, and gender is analysed, with particular attention to the likely impact of preaching, viewed as a means of intellectual power in competition with vernacular genres and other social forces. Its mass diffusion anticipated printing, but the means of production were those of the monastic scriptorium. Professor D'Avray's textual criticism and palaeographical analysis of these sermons undermines central assumptions of both medieval and early modern historians of the book. He establishes a technique of textual criticism appropriate for texts of this kind: a pragmatic compromise between simple transcriptions which ignore stemmatic relation and full-scale editions attempting to fit all manuscripts into a genealogical table, Medieval Marriage Sermons makes an important contribution both to the sermon literature of the period, and to our understanding of marriage and its religious and cultural significance in the middle ages.

[An Agenda for a Growing Europe: The Sapir Report, Andr Sapir](#) , 2004, 0199271488, 9780199271481. Over the past decade European economic integration has seen considerable institutional success, but the economic performance of the EU has been varied. While macroeconomic stability has improved and an emphasis on cohesion preserved, the EU economic system has not delivered satisfactory growth performance. This book is the report of a high-level group commissioned by the President of the European Commission to review the EU economic system and propose a blueprint for an economic system capable of delivering faster growth along with stability and cohesion. It assesses the EU's economic performance, examines the challenges facing the EU in the coming years, and presents a series of recommendations. The report views Europe's unsatisfactory growth performance during the last decades as a symptom of its failure to transform into an innovation-based economy. It has now become clear that the context in which economic policies have been developed has changed fundamentally over the past thirty years. A system built around the assimilation of existing technologies, mass production generating economics of scale, and an industrial structure dominated by large firms with stable markets and long term employment patterns no longer delivers in the world of today, characterized by economic globalization and strong external competition. What is needed now is more opportunity for new entrants, greater mobility of employees within and across firms, more retraining, greater reliance on market financing, and higher investment in both R&D and higher education. This requires a massive and urgent change in economic policies in Europe.

[The Poker Party Is Over: What Will You Do Now?, Alan N. Schoonmaker, Ph.D.](#) , 2012, 1886070393, 9781886070394.

Poker is much more than knowing the right strategies; it's also knowing how to actualize those strategies. The game is full of losing players who know how to play, yet can't seem to induce themselves to consistently make the right plays. "Black Friday" and the current state of the U.S. economy have changed the sub-culture in which we live and play. The dynamics of the poker world have drastically changed. Internet poker is not the cash cow it used to be, thereby changing the face of live poker. The games got tougher as Internet pros gravitated to the live action, the only action they can currently find. A player looking to become a major winner in live poker this involves changes in skill sets and mindsets. For the B&M players it involves adjusting to the skills and styles of former online players. The Internet game and the live game, though related, have very different fundamentals, not to mention all the innumerable different nuances. And, because there are fewer weak players, everybody must adjust to tougher games. This book will show you how to adjust to today's tougher games and create a new understanding about yourself and your opponents' minds. Being in tune with yourself will greatly improve your poker game. Being in tune with your opponents' minds will cause you to crush them.

Offering further evidence of his astounding range as a novelist, the bestselling author of *The Colony of Unrequited Dreams* and *The Navigator of New York* crafts a hilarious and moving paean to the dawn of the television age. Henry Prendergast grew up on television not merely watching it, but starring in the wildly popular childrens show *Rumpus Room*. Cast in the roles of *Bee Good* and *Bee Bad* by his mother Audrey, the shows creator, Henry came of age along with the new medium one that would soon propel his family out Torontos middle-class life and into the tabloids. Henrys father Peter, a would-be novelist, refuses to have any part in his wifes burgeoning television empire, but commits himself instead to the task of being a walking, talking mostly scathing reminder of the familys humble beginnings. Then, on the heels of *Rumpus Room*, Audrey dreams up *The Philo Farnsworth Show*, loosely based on the life story of the young teen credited with inventing the tube and starring Henry in the lead role. Rapidly amassing a cult-like following of Philosophers, the show challenges the Prendergasts anew. Forced into increasing isolation by a fervent media, they must work harder than ever to not let success get the best of them. From the Trade Paperback edition.

[Metaheuristic Search Concepts: A Tutorial with Applications to Production and Logistics, Roland Braune, Gnther Zpfel](#) , 2010, 3642113435, 9783642113437. The book gives an introduction to metaheuristics for students and practitioners. It requires no prior knowledge of the field, as the basic concepts are developed step by step from the bottom up using the knapsack problem and therefore allowing the user to concentrate on the main ideas of metaheuristics. The concepts are then expanded to concrete algorithms, which are described in detail. Then a systematization of the algorithms is established and compared with existing classification schemes from literature. The last part of the book deals with the application of popular metaheuristics to two optimization problems from the field of production and logistics, namely the Job Shop Scheduling and the Vehicle Routing Problem, based on examples.

[Radioactive Contamination Research Developments, Nadine K. Henshaw, Cade S. Alleyne](#) , 2010, 1607411741, 9781607411741. Radioactive contamination is the uncontrolled distribution of radioactive material in a given environment. Radioactive contamination is typically the result of a spill or accident during the production or use of a radionuclide. Contamination may occur from radioactive gases, liquids or particles. For example, if a radionuclide used in nuclear medicine is accidentally spilled, the material could be spread by people as they walk around. Radioactive contamination may also be an inevitable result of certain processes, such as the release of radioactive xenon in nuclear fuel reprocessing. In cases where radioactive material cannot be contained, it may be diluted to safe concentrations. Containment is what differentiates radioactive material from radioactive contamination. Therefore, radioactive material in sealed and designated containers is not properly referred to as contamination. According to various studies, although some radioactive contamination may be smaller than the internationally permitted radioactivity standards, it gains significance day by day and therefore is one of the potentially developing concerns in years to come. This book presents

current research on this serious environmental and health issue.

[Signals and Systems for Bioengineers: A MATLAB-Based Introduction, John Semmlow](#) , 2011, 0123849837, 9780123849830. This book guides the reader through the electrical engineering principles that can be applied to biological systems and are therefore important to biomedical studies. The basic engineering concepts that underlie biomedical systems, medical devices, biocontrol, and biosignal analysis are explained in detail. This textbook is perfect for the one-semester bioengineering course usually offered in conjunction with a laboratory on signals and measurements which presents the fundamentals of systems and signal analysis. The target course occupies a pivotal position in the bioengineering curriculum and will play a critical role in the future development of bioengineering students. There are extensive questions and problems that are available through a companion site to enhance the learning experience. New to this edition: Reorganized to emphasize signal and system analysis Increased coverage of time-domain signal analysis Expanded coverage of biomeasurement, using examples in ultrasound and electrophysiology New applications in biocontrol, with examples from physiological systems modeling such as the respiratory system Double the number of Matlab and non-Matlab exercises to provide ample practice solving problems - by hand and with computational tools More Biomedical and real-world examples More biomedical figures throughout For instructors using this text in their course, accompanying website includes support materials such as MATLAB data and functions needed to solve the problems, a few helpful routines, and all of the MATLAB examples. In a digital laboratory on the shores of Puget Sound, virtual reality researchers race to complete the Cavern, a bland white room that can become a jungle, a painting, or a vast Byzantine cathedral. In a war-torn city on the eastern shores of the Mediterranean, an American is held

hostage, chained to a radiator in an empty white room ... Adie Klarpol, a disillusioned artist, is invigorated by the thrill of working with the Cavern's cutting-edge technology. As Cold War empires collapse and the Berlin Wall falls, she retreats into the cyber-realities she has been hired to create. In Beirut, English teacher Taimur Martin is held in solitary confinement by Islamic fundamentalists, where he must keep his mind whole by the force of his memory alone. What can possibly joint two such remote places? Only the shared imagination, a room that these two people unwittingly build in common, where the strands of this wildly inventive novel coalesce into one.

[Michael Faraday's Mental Exercises: An Artisan Essay-circle in Regency London, Alice Jenkins](#) , 2008, 1846311403, 9781846311406. In 1818 Michael Faraday and a handful of London artisans formed a self-help group with the aim of teaching themselves how to write like gentleman. For a year and a half, this essay circle met regularly to read and

critique one another's writings and the Mental Exercises they produced are a record of life, literary tastes, and the social and political ideas of dissenting artisans in Regency London. This volume is the first to publish the essays and poems produced by Faraday's circle and it includes not only the complete corpus of the group's writings, but detailed annotations, extracts from key sources, a full-length biographical, historical, and a literary introduction as well. Valuable not only for Romantic and early-Victorian historians, but for literary scholars and the general reader as well, this collection sheds considerable light on the developing mind of one of our greatest scientists. Mental Exercises is an important document for historians interested in the lives and education of artisans of the period. Geoffrey Cantor, University of Leeds

Since its inception, the Journal of Environmental Psychology has demonstrated its pre-eminence through publishing original, innovative papers. By bringing them together in one volume, ready access has been provided to the first-hand accounts of a range of explorations that are central to the growth and development of environmental psychology itself. This volume of papers drawn from the journal brings together a number of studies that explore children's knowledge and experience of the environment. By bringing together these papers with an introduction from their editor, Christopher Spencer, the reader is provided with a valuable overview of some of the most significant studies in this important area of environmental psychology. This book will be of value to everyone who wishes to enhance their knowledge of children's experiences of the places in which they live. People who have not looked at environmental psychological studies before will find it a useful introduction to that growing field. For those who know environmental psychology and the Journal of Environmental Psychology, it will provide a valuable compendium of key papers that have laid the basis for future research into children and their environment.

[Best Practices for the Formal Software Testing Process: A Menu of Testing Tasks, Rodger Drabick](#) , 2013, 0133489329, 9780133489323. This is the digital version of the printed book (Copyright 2004). Testing is not a phase. Software developers should not simply throw software over the wall to test engineers when the developers have finished coding. A coordinated program of peer reviews and testing not only supplements a good software development process, it supports it. A good testing life cycle begins during the requirements elucidation phase of software development, and concludes when the product is ready to install or ship following a successful system test. Nevertheless, there is no one true way to test software; the best one can hope for is to possess a formal testing process that fits the needs of the testers as well as those of the organization and its customers. A formal test plan is more than an early step in the software testing process it's a vital part of your software development life cycle. This book presents a series of tasks to help you develop a formal testing process model, as well as the inputs and outputs associated with each task. These tasks include: review of program plans development of the formal test plan creation of test documentation (test design, test cases, test software, and test procedures) acquisition of automated testing tools test execution updating the test documentation tailoring the model for projects of all sizes Whether you are an experienced test engineer looking for ways to improve your testing process, a new test engineer hoping to learn how to perform a good testing process, a newly assigned test manager or team leader who needs to learn more about testing, or a process improvement leader, this book will help you maximize your effectiveness.

Thuggee, the controversial cult of ritual highway murderers "discovered" by the British in early nineteenth-century India, is one of the most sensational and contentious practices in South Asian history. This anthology brings together primary sources from the period of British involvement with thuggee many of which have long languished in the archives. It provides an insight into the production of colonial knowledge and explores how far the authentic voices of the accused thugs could be discerned in the detailed interviews and interrogations conducted by the British. The volume also includes a wide range of popular accounts and academic assessments from 1824 to 2006 shedding light on the shifting interpretations of this custom over the past two centuries.

[The Principles of Correspondences, Akram Al-Majid, Mukhtar Hussain Ali](#) , 2013, 0983751749, 9780983751748. This seminal treatise is a translation of twelve chapters of a larger work on spiritual intuition ( ilm al-fir sa) by Shaykh Akram al-M jid, an expert in Islamic mysticism. The present work lays the foundation for the essential knowledge that guides the perceptive observer to discern inward properties from outward appearances. The author achieves this by providing a careful exposition of the various levels of correspondences and interrelationships within creation. An understanding of these correspondences not only opens up a window into various spiritual disciplines but more significantly it casts light onto the mystical worldview which focuses upon the creative patterns and divine connections within existence. From the spiritual vantage point, this work surveys the varying dimensions of divine manifestation as they unfold within the different degrees of Being. In this respect the work outlines the philosophical underpinnings of mystical inquiry, dealing with the nature of Being and the method by which it is understood and attained. Dr Mukhtar Ali has now made available this superlative work for English readers, providing a complete translation of the original Arabic text and the authors's extensive footnotes. This newly revised parallel English-Arabic translation will be a valuable asset to both students and scholars alike.

[The Life Cycle of Civilizations, Stephen Blaha](#) , 2002, 0972079580, 9780972079587. This book is an expanded version of The Rhythms of History, the book that made macro-History into a semi-quantitative Science. New features include: 1. an appendix showing how the history of Mayan civilization conforms to the book"s Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas, Guatemala; 2. an appendix on the sub-Saharan African civilization, Great Zimbabwe, showing it fits the theory; 3. a comparison of the theory with Toynbee"s observations showing the many new features resulting from a quantitative theory; 4. numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century; 5. a chapter describing the potentially disturbing implications of patterns in civilizations - Are we free? ? and the implications for the Philosophy of History; and 6. expanded comments in many sections such as the sections on the future of Humanity, the role of China, and the Islamic - West conflict. The book begins with a hard hitting, "tell it like it is" chapter on the current international situation with statements such as: "The United States and Western civilization is now engaged in a small Vietnam-style war on a global scale at the time of this writing. This war is still in the early stages of development. ... The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire (the First Century AD) had for the future of Rome. They may be a premonition of things to come - not necessarily soon but perhaps in a few centuries. The Goths returned three centuries later and remained as permanent conquerors. ... Over the long term the West must free itself from a dependence on Muslim oil. Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq. In the future they will supply the revenues of an expansionist Islam. ... As the silk trade looted the

Roman Empire of its gold and reduced its economy, the trade in oil is looting the West of its prosperity and freedom of action. The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks. " The book then describes a theory of civilizations that led to these observations. Currently unfolding events seem to be fulfilling the predictions which were made last year (including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan ? North Korea will create major problems with Japan. As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense.) THE EVENTS DESCRIBED IN THIS BOOK, AND ITS PREDECESSOR, APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR. According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation (found by Ding et al) 40,000 years ago that created bold enterprising individuals who became the leadership group of civilizations: a group that Toynbee called the "creative minority." When the world's climate became warmer and more stable 10,000 years ago the seeds of civilizations began to germinate. Thus the origin of civilizations is tied to human genetics. The book then shows that a long-term social behavior pattern of mankind (based on four generation trends) causes civilizations to develop and "oscillate" in patterns of routs and rallies. Civilizations rise and fall due to their internal human dynamics. The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian, European and African civilizations over the last 5,500 years. The theory projects the future of today's civilizations (including the future of Western and Islamic civilizations). It also successfully describes the interaction of barbarians and civilizations, the interaction of two civilizations, the impact of modern technology on civilizations (it accounts for the Luddite reaction to the Industrial Revolution), the impact of major environmental events on civilizations (e.g. the collapse of Minoan civilization due to a volcanic eruption), and the disintegration of civilizations. It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations. Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations. Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established. The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future. The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations. Predictions are made for the "state of the world" for 2050 and 2100. A detailed understanding the past enables the theory of civilizations to make predictions for the future. Defining Progress to be the sum of the world's civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5,500 years. A plot of Progress appears on the book's cover (shown on this web page) together with the contributions of each civilization to Progress. (The vertical order of the civilizations in the plot is arbitrary. Older civilizations tend to be lower in the plot.) The book is a tour de force that makes History a Science rather than a collection of random events. It is the first detailed

mathematical treatment of history. Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined. There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events. A qualitative, descriptive theory of civilizations is also presented that is like a "Dow Theory of Civilizations."

[Falcon in the Glass, Susan Fletcher](#) , 2013, 1442429925, 9781442429925. A boy risks his life to save some very special children in this fantasy adventure, set amidst the rich backdrop of Renaissance Venice. In Venice in 1487, the secrets of glassblowing are guarded jealously. Renzo, a twelve-year-old laborer in a glassworks, has just a few months to prepare for a test of his abilities, and no one to teach him. If he passes, he will qualify as a skilled glassblower. If he fails, he will be expelled from the glassworks. Becoming a glassblower is his murdered father's dying wish for him, and the means of supporting his mother and sister. But Renzo desperately needs another pair of hands to help him turn the glass as he practices at night. One night he is disturbed by a bird, a small falcon that seems to belong to a girl hiding in the glassworks. Soon Renzo learns about her and others like her, the bird people, who can communicate with birds and are condemned as witches. He tries to get her to help him and discovers that she comes with baggage: ten hungry bird-kenned children who desperately need his aid. Caught between devotion to his family and his art and protecting a group of outcast children, Renzo struggles for a solution that will keep everyone safe in this atmospheric adventure.

[Interventional Cardiology: Essential Clinician's Guide, Richard J. Caselli, Pierre N. Tariot](#) , 2009, 0195393376, 9780195393378. The number of patients with dementia is rising in proportion to the aging of our population; therefore, by 2050 the prevalence of Alzheimer's disease is expected to triple, risking the integrity of the entire U.S. healthcare economy. More NIH dollars are spent on Alzheimer's disease research than on any other neurological disease and our available fund of information has commensurately accelerated. Whereas 30 years ago little distinction was made between different forms of dementia, clinicians now distinguish multiple degenerative and vascular syndromes, each with their own etiologic, therapeutic and prognostic implications. New genetic insights reach the popular press on a regular basis. Consequently Alzheimer's disease (and related disorders) has become a special concern to the majority of the population

whose main avenue of care lies with the primary care physician. The primary care physician (general internist, family practitioner, nurse practitioner), geriatrician, and geriatric psychiatrist are the target audiences for this book; in short anyone who is not a neurological expert who provides dementia-related care. As the primary care physician is the target audience for this title, the volume begins with a discussion of how to produce an effective diagnosis through a series of precise, easy-to-follow steps. Additional sections detail the current research state of each of the major individual dementia diseases that the general clinician frequently encounters. The last section provides a clinically focused 'how to' guide for treatment including symptom-directed pharmacotherapy, as well as an up-to-date summary of ongoing major therapeutic trials and an assessment non-pharmacological management issues such as driving and end-of-life consideration. Aiming to be clear, concise and practical, this volume provides the essential information in dementia related care, from disease diagnosis to symptom management. Because it uses the most up-to-date dementia research available, this volume will become a close companion of the primary care physician, who seeks direct answers to the common questions and issues that arise in the diagnosis and management of patients with dementia.

He uses familiar and surprising characters to illustrate the positive choices conscience can direct--and the disaster that results when a conscience is undeveloped or ignored. Questions he tackles include "Is it more important to be smart or good?" "Is there a morally right thing to do in every situation?" and "Is the Christian moral life an exciting adventure, or a necessary burden?" Rich, provocative, and practical for everyday decision making, KNOWING RIGHT FROM WRONG is a must-read for all who hunger for personal holiness.

[The Development of Law and Legal Institutions Among the Cherokees, Thomas Lee Ballenger](#) , 2010, 098269072X, 9780982690727. Before the arrival of Europeans to North America, Cherokee Indians practiced a form of justice called blood law, or clan law. In this system, responsibility for the punishment of a homicide fell to the clan of the victim. In the nineteenth century, following the forced removal of tribal members to Indian Territory, the Cherokee Nation developed a court system that is still in use today. In this thorough account, Thomas Lee Ballenger traces the history of Cherokee justice from its traditional beginnings to the development of its modern-day institutions. The Development of Law and Legal Institutions among the Cherokees was submitted by Ballenger to the University of Oklahoma as his doctoral dissertation in 1937. Although he later published many books, his dissertation was never published during his lifetime. Yet this work contains research and information still valuable and pertinent for today's readers and scholars. Here,

Ballenger describes how the Cherokee Nation adapted legal ideals and customs to create an efficient government and debunks popular inaccuracies about American Indians. During his research, he interviewed many Cherokee people, including judges and law officers, who were active participants in the Cherokee Nation's legal system in the latter half of the nineteenth century. Ballenger's work serves as significant documentation of a strong judicial system, developed by an advanced people who, in the face of adversity, were able to survive, adapt, prosper, and excel.

[Thanks for the View, Mr. Mies: Lafayette Park, Detroit, Danielle Aubert, Lana Cavar, Natasha Chandani](#) , 2012, 1935202928, 9781935202929. Lafayette Park, an affordable middle-class residential area in downtown Detroit, is home to the largest collection of buildings designed by Ludwig Mies van der Rohe in the world. Today, it is one of Detroit's most racially integrated and economically stable neighborhoods, although it is surrounded by evidence of a city in financial distress. Through interviews with and essays by residents; reproductions of archival material; and new photographs by Karin Jobst, Vasco Roma, and Corine Vermeulen, and previously unpublished photographs by documentary filmmaker Janine Debann, *Thanks for the View, Mr. Mies* examines the way that Lafayette Park residents confront and interact with this unique modernist environment. Lafayette Park has not received the level of international

attention that other similar projects by Mies have. This may be due in part to its location in Detroit, a city whose most positive qualities are often overlooked in the media. This book is a reaction against the way that iconic modernist architecture is often represented. Whereas other writers may focus on the design intentions of the architect, authors Aubert, Cavar and Chandani seek to show the organic and idiosyncratic ways that the people who live in Lafayette Park actually use the architecture and how this experience, in turn, affects their everyday lives. While there are many publications about abandoned buildings in Detroit and about the city's prosperous past, this book is about a remarkable part of the city as it exists today, in the twenty-first century."Thanks for the View, Mr. Mies is a superb field guide to the diverse cross-section of inhabitants, the variety of habitats they have constructed within their brilliant biome, the lush and abundant flora and the ground fauna of Lafayette Park. The variety of environments created by each particular species in their words, actions and images is a joy to behold. And like the best field guides, wonderfully instructive." - Phyllis Lambert, founder, Canadian Centre for Architecture" This beautiful and wonderfully ambitious book tells the comprehensive story of a unique place - Ludwig Mies van der Rohe's magnificent modernist vision built in the midst of a city undergoing the worst of the urban crisis. The story is told through a collage of archival records, insightful essays and, above all, interviews with the residents and photographs of what they have made of Mies. The collision between Mies's purer-than-pure modernism and the realities of Detroit is both comic and tragic - surprising, disturbing and, finally, inspiring." - Robert Fishman, Taubman College of Architecture and Planning, University of Michigan" Thanks for the View is a surprising paean to human passion and idiosyncrasy, terms not usually associated with the International Style or the architecture of Mies van der Rohe - which in large part is what makes this book all the more welcome. As charming as it is well researched, Thanks for the View celebrates the mutual effect that Mies's Lafayette Park and its longtime residents have had on each other and, by extension, on the city of Detroit." - Joe Scanlan, Visual Arts Program, Princeton University

[Women in Old Norse Society, Jenny Jochens](#) , 1998, 0801485207, 9780801485206. Jenny Jochens captures in fascinating detail the lives of women in pagan and early Christian Iceland and Norway - their work, sexual behavior, marriage customs, reproductive practices, familial relations, leisure activities, religious practices, and legal constraints and protections. Much of this information also applies to everyday life in the entire Germanic world. Conveying the experiences not only of aristocrats but also of ordinary farmers, the author draws from her extensive knowledge of the oldest and fullest record of the Germanic tribes. *Women in Old Norse Society* places particular emphasis on changing sexual mores and the impact of the imposition of Christianity by the clergy and the Norwegian kings. It also demonstrates the vital role women played in economic production: homespun was used for every conceivable domestic purpose; the lengths of cloth became the standard of measurement for local commercial exchange and were used to obtain commodities abroad. Jochens's masterly command of the Old Norse narratives and legal texts enables her to provide a rich social history that includes the fullest analysis to date of pagan and Christian marriage and the first comprehensive study of infanticide in the North.

[Susan Laughs, Jeanne Willis](#) , 2011, 1842709909, 9781842709900. Susan laughs, she sings, she rides, she swings. She gets angry, she gets sad, she is good, she is bad. In fact, Susan is the same as any other child. It is only when we turn the last page that we discover that Susan is in a wheelchair a revelation that paves the way for discussion about an important issue.

[Cutters Don't Cry, Christine Dzidrums](#) , 2011, 0982643535, 9780982643532. 19-year-old Charity Graff engages in self-harm. More specifically she cuts herself to numb emotions. In a series of raw journal entries, the confused teenager writes to her estranged father, filling him in on what's happened in her life since he left her nearly 18 years ago. Throughout the course of her letter writing, Charity chronicles her penchant for cutting, a serious struggle with depression and her inability to vocally express her feelings.

[Surviving Aunt Marsha, Sofie Laguna](#) , 2005, 0439644852, 9780439644853. Mary Poppins meets Mrs. Doubtfire in this hilarious story about three kids whose aunt is in charge while the parents are away. Families are strong enough to survive a little separation-- aren't they? For Bettina, Vince, and Aidan it's a testing time. They have to find a way to survive Aunt Marsha for three weeks while their parents take a much-needed vacation. It won't be easy. Aunt Marsha wants the dog outside. NOW. And the comic books MUST go. And just to cheer them up, how about a nice big slice of kidney pie?! Aunt Marsha seems very much in control, until a near-tragedy bares her deepest fear, and ends up bringing her closer to the kids than any of them could ever have imagined.

[Applied Nonlinear Time Series Analysis: Applications in Physics, Physiology and Finance, Michael Small](#) , 2005, 9812567771, 9789812567772. Nonlinear time series methods have developed rapidly over a quarter of a century and have reached an advanced state of maturity during the last decade. Implementations of these methods for experimental data are now widely accepted and fairly routine; however, genuinely useful applications remain rare. This book focuses on the practice of applying these methods to solve real problems. To illustrate the usefulness of these methods, a wide variety of physical and physiological systems are considered. The technical tools utilized in this book fall into three distinct, but interconnected areas: quantitative measures of nonlinear dynamics, Monte-Carlo statistical hypothesis testing, and nonlinear modeling. Ten highly detailed applications serve as case studies of fruitful applications and illustrate the mathematical techniques described in the text.

[Nine Lives and Counting, Christopher John Williamson, Sr.](#) , 2010, 0982725116, 9780982725115. Christopher "Crackerjack" Williamson was diagnosed with cancer at the age of 22 and began a long and terrifying experience that would take him to the brink of death and back time and time again. After he emerged from the hospital with a clean bill of health and a story to tell he now begins his "Crackerjack Williamson's Imagination Tour," a mission to visit pediatric wards across America to share his story with other children battling for their life. From anger to rage, from rage to rebellion and from rebellion to realization, "Crackerjack" emerges with a determination to touch hearts and lives with hope and to lead a crusade against cancer. Read how all the doctors, nurses, friends and family members helped him through it all. And his thanks to all of them lies in the pages of "Nine Lives & Counting," his gift to the world.

It is now recognized that heritable diseases are due to defective structure or function of specific genes. The knowledge of various developments in genetics can greatly reduce individual human suffering as well as the economic and social costs to the society. Simultaneously, this deluge of genetic information also poses several ethical, legal and social dilemmas which must be resolved by broad discussions at the popular level. This is possible only if the common people have the knowledge of at least the basics of this field. This richly illustrated book will be a small but significant step in this

direction. The focus is on thalassaemia, a major inherited disease in India.

[A Moment in Time, Eric Brook](#) , 2010, 0980865905, 9780980865905. Dateline: Sydney. Thursday April 01, 2010 For many people, it is the day before a 4 day long weekend because of Easter. However, for a group of Sydney women doing extraordinary jobs, it is a regular day. A Moment In Time follows these women as they go about their work in traditional male roles. The women are all aiming to do the best that they can to get through each day regardless of what Sydney throws at them. Their aim is to be able to go home at the end of their shift, alive. Most people take for granted that they will go home alive at the end of the day. But for these women, lots of training, teamwork, dedication and a little bit of luck is needed. Written by Eric Brook (aka Erk), this is his first novel. You might know him better from the online world and podcasting. This book is partly based on his experiences working on the Sydney railway system, as a volunteer in an Emergency Service organisation and as a life long Sydney resident. The book is entirely set on Thursday 01 April 2010. Following each character through the city of Sydney, incidents and their lives interconnect through the story. A Moment In Time was almost entirely written on an iPhone using an application called My Writing Nook. There will also be an accompanying podcast commencing on 01 April 2011.

[Christianity in the Twenty-First Century: Reflections on the Challenges Ahead, Robert Wuthnow](#) , 1995, 0195096517, 9780195096514. In the year 2000--and beyond--what will the church be like? What challenges will it face? Will the church be able to provide a strong sense of community? Will it be an ethical force in the lives of Americans? And what role will religion play in politics and in the marketplace? In *Christianity in the 21st Century* Robert Wuthnow reflects on these provocative questions as he seeks to identify changes that are taking place now in American society that churches must address if they are to remain vital in the future. He foresees five critical areas--institutional, ethical, doctrinal, political, and cultural--in which major challenges will arise, then meets the thorny issues head-on. How will churches' resource bases, their very identity, and their capacity to carry on their spiritual traditions be altered? Will they continue to function as sources of caring in a needy world? What impact will the resurgence of fundamentalism have, and how will moderate and liberal congregations react? How will the political activities of churches influence their capacity to be heard in the public arena, and what will the impact be of pluralism and the prevailing materialism of our society? Drawing on a wide range of first-hand observations and research, Wuthnow demonstrates that in each of these five areas people of faith have strong reasons to enter the next century with confidence in their religious institutions. But he also highlights worrisome signs, and points to specific areas that need to be addressed to ensure the continuing vitality for Christianity in America--not least among these are the rampant individualism that erodes spiritual communities and the religious infighting that diminishes the Christian sense of unity. The onset of a new millennium affords a historic opportunity to take stock of the present situation and to plan for the future--in the years ahead, much reflection is likely to occur about all our major institutions. *Christianity in the 21st Century* aims to contribute to those reflections by offering a sobering, realistic, and ultimately hopeful assessment of where the church is now, and where the church is headed.
