[Sensation, Tangelika Bolen](#) , 2006, 0977343847, 9780977343843. Teresa Tucker a.k.a. "Sensation" is a small-town, sexy, yet naive Georgia-peach with the assets to make it big in the strip-game. Lured by the money and the attention, she soon finds there's much more to this lifestyle. The people in this game, may have a gang of cash to flash, but make no mistake, they play for keeps. Originally encouraged to become a dancer by smooth-talking Abdul, a dope-slangin' strip-club regular, Teresa is easily convinced by his golden-tongue and her own greed, into dealing cocaine to other dancers at the club for him. Brought to the A-T-L from her hometown of Tifton-GA by Delvin, a correctional officer and a man 10-years older than her. In Delvin she had hopes that she'd found the stability that she's been searching for all of her young 21-years. Though he has shown signs of having her back, soon she's disappointed to discover that age doesn't equal maturity, as Delvin is just as triflin' of a cheater as any other man. Someone had once told him that dying was quite painless. He didn't believe it, though he secretly hoped it was true as he and his men prepared to ride into chaos and horror. The battle of Mine Run had begun. Jennifer Winston could hear the booming sounds of cannon fire miles away from her Virginia home. She knew that the war had begun two years ago but had been insulated from it all by her father. Little did she know that her life was about to irrevocably change, and she would be tested to the limits of her courage and endurance for a man who was the enemy.

[Crossing Into Medicine Country: A Journey in Native American Healing, David Carson](#) , 2011, 161145395X, 9781611453959. From the coauthor of the million-copy bestselling Medicine Cards comes this riveting account of initiation into ancient wisdom and the healing power of a Native American shaman. Of Choctaw descent, David Carson has absorbed and sought out Native American spiritual knowledge since growing up in Oklahoma Indian country. He distilled some of that knowledge in Medicine Cards, the hugely successful divination system based on traditional animal medicine that became a New Age bestseller in the 1990s. Now, in CROSSING INTO MEDICINE COUNTRY, he tells the story of his initiation as a conjure man—a ceremonial healer—with the Choctaw medicine woman Mary Gardener. For three years, he studied the arts of power plants and medicine animals, how to manipulate the layers of energy surrounding human

beings, and how to use sacred tobacco in ritual, curing, and divination. Through Mary+s teachings, often conveyed in folk tales of the primordial healer Yellow Tobacco Boy, and through his own, sometimes mind-bending experiences, he gives us a glimpse into an alternate reality, in which health and illness express the balance between man and nature, and Western notions of physics do not always apply. A fascinating personal narrative, here is a work rich in spirit and Native American lore that will appeal to anyone interested in alternative beliefs.

[Challenges in synthetic organic chemistry, Teruaki Mukaiyama, J. E. Baldwin](#) , 1994, 0198558554, 9780198558552. This volume describes the life's work of Professor Teruaki Mukaiyama, one of Japan's most important and respected synthetic organic chemists. It includes information on his early research into a wide range of reactions, including dehydration reactions, the use of organosulfur compounds, and oxidation-reduction condensations in peptide and nucleotide synthesis reagents, as well as an account of Mukaiyama's important work on the applications of titanium compounds in organic synthesis. Three final chapters review Mukaiyama's work in synthetic control, stereoselective synthesis of carbohydrates, the stereoselective aldol, and Michael reactions. This unique book makes accessible much research that has only been available in Japanese, and provides a rare account of the contributions of one of the world's leading chemists.

Sex and sexual intrigue careens him through the dark back-alley of self-deception until one captivating woman sets him on a path toward redemption and enlightenment.

[Servant of the Bones, Anne Rice](#) , 1997, 0099184427, 9780099184423. SERVANT OF THE BONES is Anne Rice's new electrifying novel, with a hero as mesmerising, seductive and ambivalent as the vampire Lestat. Azriel is a restless Jewish spirit, born almost 2500 years ago in Babylon, who can be called forth by whoever holds and understands the arcane mystery of the casket of golden bones he is tied to. Caught between heaven and earth, Azriel is forced to bear witness to the long and troubled history of Western civilisation, from the household of an ancient Greek philosopher and the deathbed of Alexander the Great, to the Mongolian Steppes and fourteenth century Strasbourg, where Jews were made scapegoats for the Black Death. And finally in the present, he is summoned to witness and avenge a brutal murder on Fifth Avenue. The dead woman is Esther, step-daughter of Gregory Belkin, fanatical messianic leader of a worldwide cult, the Temple of the Mind. Belkin is known to be the son of Holocaust victims, but he has a secret history which binds Azriel's fate to his. SERVANT OF THE BONES is as rich and terrifying, as sensual and violent as any novel by Anne Rice - an enthralling epic which conjures up more than two thousand years of Jewish history and penetrates the unfolding mysteries of evil, redemption, life and death.

[Hoge](#) , 2005, 0976568209, 9780976568209. A Portable Identity: A Woman's Guide to Maintaining a Sense of Self While Moving Overseas, Revised Edition, is written by two former expatriate spouses who are also counselors. The book educates and empowers expatriate spouses to take charge of the changes in identity that occur during an international relocation. The most profound change a woman will experience when she moves overseas in support of her husband's career comes from within herself, to her own sense of identity. With two, three, or more years of an overseas assignment, a woman faces the formidable task of creating a life for herself in an unfamiliar country. Unlike any other book about overseas living, this book explains with clarity, candor and compassion, how each stage of the move affects a woman's identity. A Portable Identity is an interactive book with practical exercises and inspiring stories. It is designed to be a companion and guide for the woman who wants to know how her identity is affected at each stage of the move, from pre-departure to arrival, and while living overseas. The book also explains why the thoughts and feelings she may experience as an expatriate spouse are normal within the context of so much change, and how she can use the steps of The Wheel to shape her identity in a way that honors her sense of self while living in a foreign country and culture, as well as during repatriation. A Portable Identity is essential reading for military, corporate, non-governmental organization, missionary, and foreign service spouses. By learning how to take charge of change, a spouse can make choices for a happier and more meaningful life overseas. The result is a more successful transition to life abroad and a more "portable" identity that can thrive away from home. A Portable Identity is also a valuable resource for professionals, including human resource managers, international relocation specialists, employee assistance professionals and therapists. The book provides them with critical information that they can utilize to better assist the accompanying spouse during an international move...

[The Angels of Morgan Hill, Donna VanLiere](#) , 2006, 1418555673, 9781418555672. From Donna VanLiere--the author of the beloved Christmas Hope series--comes a moving novel of faith, family, and destiny. Jane Gable thinks 1947 will be like every other year in Morgan Hill, Tennessee, but it turns out to be the year everything changes. Jane first lays eyes on young Milo Turner the day that her abusive, alcoholic father is buried in the Morgan Hill cemetery. The Turners are the first black family ever to move into the area, and while their presence challenges the comfort of many in the small, tight-knit community, Jane and her brother, John, have found new friends. Then tragedy strikes the Turner household, and the Gable family is asked to make a decision that could rip their world apart. One path might open up a whole new world and bring them closer than ever. Or it might bring them nothing but trouble and heartache. On their journey, Jane discovers that angels are all around us, every day, in the most extraordinary--and ordinary--ways. The Angels of Morgan Hill is filled with unforgettable characters who show us the ways and means of the heart and prove that even in the darkest

hours, we are never truly alone.

[Millionaire: The Philanderer, Gambler, and Duelist Who Invented Modern Finance, Janet Gleeson](#) , 2001, 0743211898, 9780743211895. On the death of France's most glorious king, Louis XIV, in 1715, few people benefited from the shift in power more than the intriguing financial genius from Edinburgh, John Law. Already notorious for killing a man in a duel

and for acquiring a huge fortune from gambling, Law had proposed to the English monarch that a bank be established to issue paper money with the credit based on the value of land. But Queen Anne was not about to take advice from a gambler and felon. So, in exile in Paris, he convinced the bankrupt court of Louis XV of the value of his idea. Law soon engineered the revival of the French economy and found himself one of the most powerful men in Europe. In August 1717, he founded the Mississippi Company, and the Court granted him the right to trade in France's vast territory in America. The shareholders in his new trading company made such enormous profits that the term "millionaire" was coined to describe them. Paris was soon in a frenzy of speculation, conspiracies, and insatiable consumption. Before this first boom-and-bust cycle was complete, markets throughout Europe crashed, the mob began calling for Law's head, and his visionary ideas about what money could do were abandoned and forgotten. In *Millionaire*, Janet Gleeson lucidly reconstructs this epic drama where fortunes were made and lost, paupers grew rich, and lords fell into penury -- and a modern fiscal philosophy was born. Her enthralling tragicomic tale reveals two great characters: John Law, with his complex personality and inscrutable motives, and money itself, whose true nature even to this day remains elusive.

[Edward Hopper: Portraits Of America, Wieland Schmied](#) , 2005, 3791333003, 9783791333007. A penetrating exploration of the American realist painter, who was able to capture the many moods of the nation he called home. Edward Hopper's talent for depicting multiple aspects of the post-war experience is the focus of this flexi-cover edition of *Edward Hopper - Portraits of America*. From his images of deserted small towns and solitary figures in empty offices to his cheerfully tranquil New England landscapes, Hopper's most famous compositions are presented as products of a life spent observing human nature. Hopper's images evoke an enigmatic uncertainty, which speaks to the heart of the American experience.

[Printers And Press Freedom: The Ideology of Early American Journalism, Jeffery Alan Smith](#) , 1988, 0195051440, 9780195051445. In the United States, the press has sometimes been described as an unofficial fourth branch of government, a branch that serves as a check on the other three and provides the information necessary for a democracy to function. Freedom of the press--guaranteed but not defined by the First Amendment of the Constitution--can be fully understood only when examined in the context of the political and intellectual experiences of 18th-century America. Here, Jeffery A. Smith explores how Madison, Franklin, Jefferson, and their contemporaries came to see liberty of the press as a natural and vital part of a democratic republic. Drawing on sources ranging from political philosophers to court records and newspaper essayists, *Printers and Press Freedom* traces the development of a widespread conception of the press as necessarily exempt from all government restrictions, but still liable for the defamation of individuals. Smith carefully analyzes libertarian press theory and practice in the context of republican ideology and Enlightenment thought--paying particular attention to the cases of Benjamin Franklin and his relatives and associates in the printing business--and

concludes that the generation that produced the First Amendment believed that government should not be trusted and that the press needed the broadest possible protection in order to serve as a check on the misuse of power.

[Starting with Tuscany, Giovanna Peel](#) , 2000, 0968586201, 9780968586204. A fine artist of classical training and considerable talent, Giovanna Peel has used her painting ability to give a stunningly visual quality to this erudite description of Italy, both past and present -- starting with Tuscany. The author returns to Italy after a thirty year self-imposed absence in search of places of the heart. What she finds is not always what she expected, but is always enlightening, and at times hilarious. In the end her love for the country of her birth shows through in her intimate knowledge of the locale, and her humorous acceptance of the country's political minestrone and other theatrical paradoxes. Throughout this gem of a book the author describes her recollections and present encounters with a witty, unsentimental, and deeply personal prose. Beautifully written, vividly descriptive and enormously entertaining.

But what lies behind the buy-one-get-one-free offers at your supermarket and who picks our strawberries? The Ukrainians: Irina, just off the coach from Kiev, and Andriy, the miner's son from the other Ukraine; the Poles: Tomasz and Yola; two Chinese girls; Emanuel, the round-eyed eighteen-year-old from Malawi. And although he can't pick strawberries, there's also the Dog . . . Hilarious, gritty, moving and slapstick, Two Caravans has all the ingredients that made A Short History of Tractors in Ukrainian so successful.

[Angelic Healing: Working with Your Angel to Heal Your Life, Eileen Elias Freeman](#) , 2001, 075952033X, 9780759520332. People are really hurting today -- not just physically, but mentally, emotionally, spiritually, and in their relationships. All of us need healing. Maybe we have an addiction we're trying to break. Maybe there's no happiness or love in our lives. Maybe the hurt is from being lonely, even in the midst of family, job, or social gatherings. And when we need healing, we often hurt those around us. We strike out at the environment until it, too, is hurting. The angels, our unseen companions and guardians, can help us heal. In fact, from New York to California, angels are doing just that. People are telling stories of being healed of everything from serious illness to addictions to bad relationships, simply by calling on angels for their help. "Angelic Healing" will reveal the lessons of history, while offering stories of angelic healing today -- moving tales of people for whom being touched by angels has meant major healing in their lives and the lives of those around them. "Angelic Healing" also shows you how to tap into your angelic resources to bring about healing in your own life and empower you to be all you were meant to be. Bri

[Oxford History of Western Music: 5-vol. set, Richard Taruskin](#) , 2009, 0199813698, 9780199813698. The universally acclaimed and award-winning Oxford History of Western Music by one of the most prominent and provocative

musicologists of our time, Richard Taruskin. Now in paperback, the set has been reconstructed to be available for the first time as individual books, each one taking on a critical time period in the history of western music. All five books are also being offered in a shrink wrapped set for a discounted price. Each book in this magnificent set illuminates - through a representative sampling of masterworks - those themes, styles, and currents that give shape and direction to each musical age. The five titles cover Western music from its earliest days to the sixteenth century, the seventeenth and eighteenth century, the nineteenth century, the early twentieth century, and the late twentieth century. Taking a critical perspective, Taruskin sets the details of music, the chronological sweep of figures, works, and musical ideas, within the larger context of world affairs and cultural history. He combines an emphasis on structure and form with a discussion of relevant theoretical concepts in each age, to illustrate how the music itself works, and how contemporaries heard and understood it. He also describes how the context of each stylistic period - key cultural, historical, social, economic, and scientific events - influenced and directed compositional choices. Moreover, the five books are filled with helpful illustrations that enhance the historical context of musical composition, as well as musical examples, black-and-white pictures throughout, suggestions for further reading, and indexes. Laced with brilliant observations, memorable musical analysis, and a panoramic sense of the interactions between history, culture, politics, art, literature, religion, and music, these books will be essential reading for anyone who wishes to understand this rich and diverse tradition.

In her major address to the 99th annual meeting of the American Sociological Association on August 16, 2004, "Public Power in the Age of Empire," broadcast nationally on C-Span Book TV and on Democracy Now! and Alternative Radio, writer Arundhati Roy brilliantly examines the limits to democracy in the world today. Bringing the same care to her prose that she brought to her Booker

Prize-winning novel *The God of Small Things*, Roy discusses the need for social movements to contest the occupation of Iraq and the reduction of "democracy" to elections with no meaningful alternatives allowed. She explores the dangers of the "NGO-ization of resistance," shows how governments that block nonviolent dissent in fact encourage terrorism, and examines the role of the corporate media in marginalizing oppositional voices.

[Good and Angry: Exchanging Frustration for Character in You and Your Kids!](#), Scott Turansky, Joanne Miller , 2009, 0307553175, 9780307553171. Parents often feel angry when their children do the wrong things. But responding to children in anger rarely brings about the desired result and can even have a damaging effect instead. Yet anger doesn't have to be the enemy. It can be a trigger that makes parents even more effective. Dr. Scott Turansky and Joanne Miller show them how. Recognizing the very real emotions parents feel, *Good and Angry* taps into the constructive side of parents' anger and teaches welcome strategies for addressing the things their children do to drive them crazy. Addressing common problem areas for children such as annoying behavior, lying, not following instructions, and bad attitudes, this book outlines seven routines that will help children improve in these areas and allow them to thrive in their relationship with parents and with others. In *Good and Angry*, moms and dads will come to understand anger's true purpose and how they can use it successfully in their day-to-day parenting. They will also learn new approaches that will solve many common problems and, in the process, help both them and their children grow closer to God. From the Trade Paperback edition.

Previous ASCM meetings were held in Beijing, China (1995), Kobe, Japan (1996), Lanzhou, China (1998), Chiang Mai, Thailand (2000), Matsuyama, Japan (2001), Beijing, China (2003), and Seoul, Korea (2005). Amongst 65 submissions by authors from 20 mostly Asian countries, the Program Committee selected 23 regular papers and 13 posters for presentation at the symposium. The presentations and papers went through another round of reviewing after the symposium, and 22 regular papers and 7 short papers on posters were selected for the proceedings. The international Program Committee of ASCM 2007 had strong Asian participation, and the reviewing process was aided by numerous reviewers from around the world. I am very grateful to the Program Committee members and the reviewers for their work in evaluating the submissions before and after the conference. In addition to contributed papers, ASCM 2007 had three invited talks by Rida Farouki on computational

[Artisans and Industrialization: Indian Weaving in the Twentieth Century, Tirthankar Roy](#) , 1993, 0195631005, 9780195631005. It is well known that after the mid-nineteenth century, trade between Europe and Asia caused a 'deindustrialization' in the latter. This book argues, more specifically, that the effects of English goods on Indian industry were more complex than just loss of employment. In textiles, Indian handwoven cloth only partially competed with imported powerloom cloth, which therefore had a selective impact. On the other hand imported cloth and yarn, by integrating product markets and creating a labour market for those weavers who continued, speeded up capital accumulation in weaving. Centrally, this volume attempts two tasks: first, it ties together various kinds of changes that craftsmen experienced, the significance of which would otherwise escape notice. These include diversifications, increased labour hiring, weavers' participation in trade, the adoption of labour-saving appliances, the urbanization of weaving and, in consequence of all these, increased inequalities. Second, it draws the past closer to the present. Sections of handloom weaving in the late-twentieth century have been competitive and responsive to the market. Weaving has also been a source of capital and enterprise in many of India's textile towns. A vision of artisans as historically adaptive is more consistent with this dynamism than one suggesting passive decay.

Supramolecular Chemistry: From Molecules to Nanomaterials is a new major reference work which links supramolecular chemistry and nanomaterials. Presenting over 150 tutorial articles and spanning over 10 comprehensive sections, this new resource covers: Concepts Techniques Molecular recognition Supramolecular reactivity Supramolecular aspects of chemical biology Self processes Supramolecular devices Supramolecular materials chemistry Soft matter Nanotechnology Supramolecular chemistry is 'chemistry beyond the molecule'. While traditional chemistry focuses on the bonds that hold atoms together in a molecule, supramolecular chemistry examines the weaker interactions that hold groups of molecules together. Important concepts that have been demonstrated by supramolecular chemistry include molecular self-assembly, folding, molecular recognition, host-guest chemistry, mechanically-interlocked molecular architectures, and dynamic covalent chemistry. The importance of supramolecular chemistry was established by the 1987 Nobel Prize for Chemistry, which was awarded to Donald J. Cram, Jean-Marie Lehn, and Charles J. Pedersen in recognition of their work in the field. The past decade has seen dramatic developments in the field, with supramolecular chemistry leaving its roots in classical host guest chemistry and expanding into exciting areas of materials chemistry and nanoscience with many

real and potential applications. Supramolecular findings are evolving our understanding of the way chemical concepts at the molecular level build up into materials and systems with fascinating, emergent properties on the nanoscale. Supramolecular chemistry: the biggest challenge yet!" Creating that link between the chemist's understanding of the way in which molecules interact with one another, and the understanding a materials scientist, engineer or biologist has of the resulting properties of a material or system comprised of those molecules is one of the huge grand challenges facing modern molecular science." Philip A. Gale and Jonathan W. Steed, Editors-in-Chief

Linking supramolecular chemistry and nanotechnology to define the field in the 21st Century

Supramolecular Chemistry: From Molecules to Nanomaterials is the first major reference to link supramolecular chemistry and nanotechnology. A global team of experts present an overview of the concepts and techniques of modern supramolecular chemistry, demonstrating how these paradigms evolve into nanoscale systems chemistry, nanotechnology, materials science and beyond. Breaking down the barriers between synthetic chemistry and materials science, the authors demonstrate how modern techniques allow access increasingly far along the 'synthesising-up' pathway.

Supramolecular Chemistry: From Molecules to Nanomaterials explains the fundamental concepts and provides invaluable practical guidance on the applications and limitations of modern instrumental techniques for addressing molecular and materials-based problems. The printed edition of Supramolecular Chemistry: From Molecules to Nanomaterials is available as an eight-volume set. Publishing in full colour to enhance the interpretation of complex supramolecular structures the printed edition is highly illustrated with an average of three images per page features fully indexed articles with cross-references integrated into the text includes a glossary of key terms

[Commentary on the UNIDROIT principles of international commercial contracts \(PICC\), Stefan Vogenauer, Jan Kleinheisterkamp](#) , 2009, 0199291756, 9780199291755. The UNIDROIT Principles of International Commercial Contracts are the result of the ambitious quest for codifying the *lex mercatoria*, i.e. those unwritten rules of the game by which merchants presumably have always understood to do international business. Since the publication of their first version in 1994, the UNIDROIT Principles have had an impressive success. They have become a serious alternative to national contract laws in international disputes decided by arbitral tribunals, such as those administered by the International Chamber of Commerce (ICC). At the same time, they have been accepted as a model for reforming the laws on international contract (as recently Russia, Lithuania, and China). With the publication of a new version of the Principles in 2004, this first phase of codifying international contract law is now considered to be finished. While there is much writing about the theoretic legal nature and the practical applicability of the Principles, there is hardly any research on their substance, meaning their substantive rules on contracts. This book fills this gap. A comprehensive analysis of each provision of the Principles allows a better understanding of the rules governing international contracts. In short, this book contributes to make the application of the Principles more predictable and thus more efficient.

[Ecospirit: Religions and Philosophies for the Earth, Laurel Kearns, Catherine Keller](#) , 2007, 0823227464, 9780823227464.

We hope-- even as we often doubt-- that the environmental crisis can be controlled. Public awareness of our species' self-destructive relation to its own materiality is growing. But so is the destruction. The needed practical interventions seem to require a collective shift of such magnitude as to take on spiritual or religious intensity. Traditions of ecological theology and eco-religious praxis have been preparing the way for several decades, yet they have remained marginal to society, academy, and church. With a fresh, transdisciplinary approach, *Ecospirit* probes the possibility of a green shift

radical enough to permeate the ancient roots of our sensibility and the social sources of our practice. Its authors undertake an elemental deconstruction of our theological habits of supernaturalism, our under-thought praxis, as well as our philosophical models of nature. But in this study deconstruction begins to turn upon itself, perplexed by its own earth-blind anthropocentrism. The possibility of "econstruction" arises. The essays of *Ecospirit* transmute a paralyzing sense of emergency into the emergence of a moving language of the earth. Grounded in the complex ecosocial contexts in which all creatures become, a discourse for a genesis collective begins to take form. The essays pursue a thought-experiment in multi-leveled, multi-religious, multi-contextual ecospirituality. They embrace introductory exercises in ecotheology, conceptually rigorous engagements with the theological tradition and its philosophical underpinnings, and explorations of the ways that religious praxis can both harm and heal. The book ranges across theology, religious studies, philosophy, literary criticism, ethics, sociology, and cultural studies--all serving to explore

[Planting Churches in the Real World, Joel Rainey](#) , 2008, 0979805325, 9780979805325. Most church planting literature highlights enormously successful ministries. While such ministries can serve as a noble benchmark for every church planter, they are far from the norm. Most who plant churches will never see their name in lights, and all who plant churches will find it to be one of the most difficult things they have ever sought to accomplish. In this book, the author invites you to take an "inside look" at those difficulties. He shares his own successes and failures with candor, and lays bare the reality of planting a new church, which include both strenuous difficulties and glorious rewards. Read this book to be prepared for the effort, and ready for the blessing that comes from planting churches. *Planting Churches in the Real World* is written by Dr. Joel Rainey, Director of Missions for the Mid-Maryland Baptist Association, a network of more than 50 evangelical churches located in the Baltimore-Washington, D.C. area. Dr. Rainey has been involved in planting more than 30 churches, and trains church planters nationally and internationally. He lives in central Maryland with his wife and their two sons. Praise for *Planting Churches*: Church planting is not for the easily discouraged. The average new church is less than 100 attenders after four years, but most conference speakers and book writers tell stories of hundreds after the first year- a reality few church planters experience. Rainey paints a picture of reality, including both the difficulties involved in starting a new church, and the evidence that planting a church is worth enduring those difficulties. If you are a planter drunk with vision, this will sober you up. But, it is more than that. It also shows that church plants make a difference whether they are thousands or dozens after the first year. I've known Joel for years, and he tells the stories from his own journey- telling lessons he learned the hard way. It's real world church planting and it is worth your time. Dr. Ed Stetzer, author of *Planting Missional Churches*. Director of Research, Lifeway Christian Resources, Nashville, TN "Dr. Rainey amuses the reader with countless stories of life on the field. His "lessons learned" approach to the book serves as a clear warning for future church planters: "The Kingdom of Heaven is near you, but this won't be easy!" Dr. Jack Allen, Director, The Day Center for Church Planting. New Orleans, LA "Candid, winsome, thoroughly biblical, keenly missional, and sensibly linked to the real world. Don't be fooled. The weightiness of this little book is inversely proportional to its size, and its wise counsel will help point a safe way through the tangle of neglected assumptions,

misguided strategies, ill-founded hopes, and unintentional blunders that accosts the unwary planter on the way to church. Well done!" B. Spencer Haygood, Senior Pastor, Orange Hill Baptist Church. Marietta, GA "Reality bites, as the saying goes. Yet in the age of incredible lostness in America, we must see church planting for what it is . . . a way to spread Gospel influence to every, man, woman and child. High birth weight churches, although fun and influential for the Kingdom, are not the norm, nor are they the answer. Joel Rainey has captured the reality and yet the incredible potential of church planting. New churches running less than 100 are key players in the Kingdom. Small does not have to mean ineffective. Small groups of missionary Christians are critical to our mission and our future. Way to go!" Dr. Dino Senesi. Church Planting Movement Leader, Columbia, SC

Kimi and Hana have been reunited with their mother and youngest brother, Moriyasu, but the family are still in hiding. When their treacherous uncle's men attack the peasants who are sheltering them, Kimi retaliates. It is a fight that ends in fire, and both Kimi and Hana will be left with scars that will change them forever - scars that are both physical and emotional. In order to raise an army against their Uncle, Kimi's mother requests an audience with the powerful Shogun. The family are welcomed into his court, but while Hana is swept away by the fine clothes and grandeur, Kimi prefers to be with the servants, unable to

enjoy luxury while others suffer as a result of their uncle's tyranny. It is the beginning of a division between the two sisters who were once inseparable. Yet even at the Shogun's court they are surrounded by danger. As well as encountering a face from the past, there is now a deadly new adversary plotting against them. The sisters' lives are about to change irrevocably once again . . .

[Selected Letters, Jane Austen](#) , 2009, 0199538433, 9780199538430. 'Little Matters they are to be sure, but highly important.' Letter-writing was something of an addiction for young women of Jane Austen's time and social position, and Austen's letters have a freedom and familiarity that only intimate writing can convey. Wiser than her critics, who were disappointed that her correspondence dwelt on gossip and the minutiae of everyday living, Austen understood the importance of 'Little Matters', of the emotional and material details of individual lives shared with friends and family through the medium of the letter. Ironic, acerbic, always entertaining, Jane Austen's letters are a fascinating record not only of her own day-to-day existence, but of the pleasures and frustrations experienced by women of her social class which are so central to her novels. Vivien Jones's selection includes very nearly two-thirds of Austen's surviving correspondence, and her lively introduction and notes set the novelist's most private writings in their wider cultural context. [Motivation for Achievement: Possibilities for Teaching and Learning, M. Kay Alderman](#) , 2013, 1136769803, 9781136769801. Understanding student and teacher motivation and developing strategies to foster motivation for students at all levels of performance are essential to effective teaching. This text is designed to help prospective and practicing teachers achieve these goals. Its premise is that current research and theory about motivation offer hope and possibilities for educators teachers, parents, coaches, and administrators to enhance motivation for achievement. The orientation draws primarily on social-cognitive perspectives that have generated much research relevant to classroom

practice. Ideal for any course that is dedicated to, or includes coverage of, motivation and achievement, the text focuses on two key roles teachers play in supporting and cultivating motivation in the classroom: establishing the classroom structure and instruction that provides the environment for optimal motivation, engagement, and learning; and helping students develop the tools that will enable them to be self-regulated learners and develop their potential. Pedagogical features aid the understanding of concepts and the application to practice: Strategy boxes present guidelines and strategies for using the various concepts. Exhibit boxes include forms for different purposes (for example, goal setting), examples of teacher beliefs and practices, and samples of student work. Reflection boxes stimulate readers thinking about motivational issues inherent in the topics, their experiences, and their beliefs. A motivational toolbox at the end of each chapter helps readers identify important points to think about, lingering questions, strategies to use now, and strategies to develop in the future. NEW IN THE THIRD EDITION Updated research and new topics are added throughout as warranted by current inquiry in the field. Chapters are reorganized to provide more coherence and to account for new findings. New and updated material is included on issues of educational reform, standards for achievement, and high-stakes testing, and on achievement goal theory, especially regarding performance goals and the distinction between performance-approach and performance-avoidance goals as relevant to classroom practice.

[Essays on the Anthropology of Reason, Paul Rabinow](#) , 1996, 0691011583, 9780691011585. "Essays on the Anthropology of Reason will provide an important sense of the solidity of research in the new and exciting terrains that anthropology has entered. In so doing, it will remove discussion of such new work from the celebrity/fashion circuit' of recent trends in cultural studies. Paul Rabinow's collection both illuminates and extends a major research career that has never waned in the power of its intellect, curiosity, and depth of achievement." George E. Marcus, Rice University This collection of essays explains and encourages new reflection on Paul Rabinow's pioneering project to anthropologize the West. His goal is to exoticize the Western constitution of reality, emphasize those domains most taken for granted as universal, and show how their claims to truth are linked to particular social practices, hence becoming effective social forces. He has recently begun to focus on the core of Western rationality, in particular the practices of molecular biology as they apply to our understanding of human nature. This book moves in new directions by posing questions about how scientific practice can be understood in terms of ethics as well as in terms of power. The topics include how French socialist urban planning in the 1930s engineered the transition from city planning to life planning; how the discursive and nondiscursive practices of the Human Genome Project and biotechnology have refigured life, labor, and language; and how a debate over patenting cell lines and over the dignity of life required secular courts to invoke medieval notions of the sacred. Building on an ethnographic study of the invention of the polymerase chain reaction which enables the rapid production of specific sequences of DNA in millions of copies Rabinow, in the final essay, reflects in dialogue with biochemist Tom White on the place of science in modernity, on science as a vocation, and on the differences between the human and natural sciences.

[Chee](#) , 2013, 0071804633, 9780071804639. A powerful new coaching method from Chicken Soup for the Soul co-creator Jack Canfield! At the heart of a great coach is a firm belief that each player is a uniquely valuable individual with distinct giftedness and potential for greatness. That's the premise behind this brilliant empowering guide from Jack Canfield, coauthor of the 125 million-copy-selling Chicken Soup for the Soul series, and legendary global leadership development guru and CEO Dr. Peter Chee. Combining time-tested principles of exemplary coaches with the latest disruptive techniques used by the world's top performing leaders, this step-by-step playbook shows you how to nurture in yourself and others the three essential requirements of coaching excellence: 1. HEART: The Coaching Principles (TCP) unveils the secret to life impacting values, beliefs, and philosophies that permeate all aspects of great coaching. 2. MIND: The Situational Coaching Model (SCM) unleashes the genius of a coach to apply the right combination of crucial paradigms in any given coaching challenge. 3. ENERGY: The Achievers Coaching Techniques (ACT) equips you with proven methods that enable you to deliver breakthrough results in coaching. Coaching for Breakthrough Success is packed with stirring personal stories, life changing case studies, crucial coaching conversations, exemplary coaching questions, and ready-to-use tools that equip you to achieve professional mastery in coaching. This practical manual guides you through the top 30 principles every coach needs to succeed. You'll learn the six paradigms of Situational Coaching, the ultimate power of Achievers Coaching Techniques, and the tried-and-true secret to making impossible dreams possible. All you need to lead your team to victory is heart, mind, energy and Coaching for Breakthrough Success. Praise for Coaching for Breakthrough Success "Canfield and Chee have crafted the standard for anyone wanting to be an effective coach. Their actionable and timeless wisdom shows up through principles, questions, quotes, cases, and tools that will enable any aspiring coach to achieve their aspirations. Anyone being coached should make sure that their coach knows and follows these standards." -- Dave Ulrich, Professor, Ross School of Management, University of Michigan, Author of Leadership Sustainability "After years of working as an executive coach, I slowly came to the realization that knowing the answers to the tough questions wasn't as important as knowing the right questions to ask in the first place. This book provides just such resources. Read it and enter the pantheon of great coaches!" -- Kerry Patterson, four-time New York Times bestselling author of Crucial Conversations "Coaching for Breakthrough Success masterfully shares extremely powerful questions, the heart of professional coaching approaches. The Situational Coaching Model combined with the wonderfully long, and comprehensive list in many chapters will dramatically inform your coaching and empower your clients. This is a 'must have' for any professional coach who wants to take their clients to new heights of understanding and transform their effectiveness. Extremely well done!" -- Thomas G. Crane, author of The Heart of Coaching-Using Transformational Coaching to Create a High Performance Coaching Culture "Coaching for Breakthrough Success is the most exciting and innovative book on the art of coaching to come along in years. Using their Six Paradigms of Situational Coaching, Canfield and Chee show step by step how anyone, anywhere can assist others in improving performance, and achieving personal

satisfaction in life." -- Robert B. Tucker, innovation expert and author of *Innovation is Everybody's Business* "This powerful, practical book gives you the tools and strategies you need to be an excellent business and executive coach, to help your clients in every area, and to build your coaching business profitably." -- Brian Tracy, author of over 58 books in 38 languages "The ability to coach is the very essence of effective leaders. Engaging the heart and inspiring the mind will unlock the utmost potential of people in any organisation. This book puts it all together and provides proven techniques to achieve breakthrough performance. I believe it will have a profound impact on you as it has done for me and my organisation." -- Thomas Soo, General Manager, Intel Technology "Coaching is one of those terms that is thrown around on nearly a daily basis in modern management circles. But what does coaching mean? What should people do to make coaching effective? Why is coaching so valuable? These otherwise vague questions are insightfully answered in this outstanding book." -- William J. Rothwell, Ph.D., SPHR, Professor, The Pennsylvania State University and Author of over 80 books "Coaching for Breakthrough Success contains practical techniques to help you engage the hearts and minds of your people and inspire them to realize their fullest potential." -- Christopher Goh Soon Keat, Director, Global Learning and Leadership Development, Agilent Technologies Singapore (International) Pte Ltd "Coaching for Breakthrough Success has had a profound effect on me, as well as the people in my workplace. My team has told me that since studying Jack and Peter's book I have become a better listener, communicator and leader. The decisions we now make are our decisions, and my staff are taking more ownership of the work they do. My career development has come on leaps and bounds after I applied what I learned from this book." -Nick Jonsson, General Director, Sophie Paris

[American legal history: cases and materials, Kermit Hall, Kermit L. Hall, Paul Finkelman, James W. Ely](#) , 2005, 0195162242, 9780195162240. Revised and expanded in this third edition, American Legal History now features a new coauthor, James Ely, who is a specialist in the history of property rights. This highly acclaimed text provides a comprehensive selection of the most important documents in the field, which integrates the history of public and private law from America's colonial origins to the present. Devoting special attention to the interaction of social and legal change, it shows how legal ideas developed in tandem with specific historical events and reveals a rich legal culture unique to America. The book also deals with state and federal courts and looks at the relationship between the development of American society, politics, and economy, and how it relates to the evolution of American law. Introductions and instructive headnotes accompany each document, tying legal developments to broader historical themes and providing a social and political context essential to an understanding of the history of law in America. American Legal History, Third Edition, offers fresh material throughout and increased coverage of cases on such topics as slave law, politics, and terrorism. The authors have incorporated more cases dealing with minority rights, including Native American and Asian American rights, women's rights, and gender and gay rights. Two new chapters have been added to this edition: one on law and economics in modern America, including a discussion of the new federalism, and the other on law, politics, and terrorism, including a full discussion of the USA PATRIOT Act. The "since 1945" portion includes up-to-date material and current cases. The section on English background and colonial America has been expanded. In addition, there is new material on the most recent developments in American constitutional and legal history. Setting the legal challenges of the twenty-first century in a broad context, American Legal History, Third Edition, is an essential text for students and teachers of constitutional and legal history, the judicial process, and the effects of society on law.

The first and most successful in the Baroness's series of books that feature Percy Blakeney, who leads a double life as an English fop and a swashbuckling rescuer of aristocrats, "The Scarlet Pimpernel" was the blueprint for what became known as the masked-avenger genre. As Anne Perry writes in her Introduction, the novel "has almost reached its first centenary, and it is as vivid and appealing as ever because the plotting is perfect. It is a classic example of how to construct, pace, and conclude a plot. . . . To rise on the crest of laughter without capsizing, to survive being written, rewritten, and reinterpreted by each generation, is the mark of a plot that is timeless and universal, even though it

happens to be set in England and France of 1792."

[My War: Killing Time in Iraq, Colby Buzzell](#) , 2006, 0425211363, 9780425211366. An underemployed, skateboarding party animal, Colby Buzzell traded a dead-end future for the army and ended up as a machine gunner in Iraq. To make sense of the absurd and frightening events surrounding him, he started writing a blog about the war and how it differed from the government's official version. But as his blog's popularity grew, Buzzell became the embedded reporter the Army couldn't control despite its often hilarious efforts to do so. The result is an extraordinary narrative, rich with unforgettable scenes: the Iraqi woman crying uncontrollably during a raid on her home; the soldier too afraid to fight; the troops chain-smoking in a guard tower and counting tracer rounds; the first, fierce firefight against the men in black. Drawing comparisons to everything from Charles Bukowski to Catch-22, My War depicts a generation caught in a complicated and dangerous world and marks the debut of a raw, remarkable new voice.

[A cultural history of Madrid: modernism and the urban spectacle, Deborah L. Parsons](#) , 2003, 1859736467, 9781859736463. Despite its international significance, Madrid has been almost entirely ignored by urban, literary and cultural studies published in English. A Cultural History of Madrid: Modernism and the Urban Spectacle corrects that oversight by presenting an urban and cultural history of the city from the turn of the century to the early 1930s. Between 1900 and 1930, Madrid's population doubled to almost one million, with less than half the population being indigenous to the city itself. Far from the Castilian capital it was made out to be, Madrid was fast becoming a socially magnetic, increasingly secular and cosmopolitan metropolis. Parsons explores the interface between elite, mass and popular culture in Madrid while considering the construction of a modern Madrileño identity that developed alongside urban and social modernization. She emphasizes the interconnection of art and popular culture in the creation of a metropolitan personality and temperament. The book draws on literary, theatrical, cinematic and photographic texts, including the work of such figures as Ramón Mesonero Romanos, Benito Pérez Galdós, Pío Baroja, Ramón Gómez de la Serna, Ramón Valle-Inclán and Maruja Mallo. In addition, the author examines the development of new urban-based art forms and entertainments such as the zarzuela, music halls and cinema, and considers their interaction with more traditional cultural

identities and activities. In arguing that traditional aspects of culture were incorporated into the everyday life of urban modernity, Parsons shows how the boundaries between high and low culture became increasingly blurred as a new identity influenced by modern consumerism emerged. She investigates the interaction of the geographical landscape of the city with its expression in both the popular imagination and in aesthetic representations, detailing and interrogating the new freedoms, desires and perspectives of the Madrid modernista.

[Hannah's winter of hope, Jean Van Leeuwen](#) , 2001, 0141309504, 9780141309507. In the winter of 1780, Hannah's family lives in a one-room shed since the British burned down their house. When news comes that Hannah's brother Ben, a soldier, has been captured by the British, Hannah tries to keep busy making candles and helping to rebuild their home. She can't help worrying about Ben, until a stranger brings unexpected news. B&W illustrations.

[Oak: A British History, Esmond Harris, Jeanette Harris, N. D. G. James](#) , 2003, 0953863085, 9780953863082. Oak has always held pride of place amongst trees in Britain. For centuries, its durability, strength and attractiveness have made it the timber of choice. When the British state was forged in the seventeenth and eighteenth centuries, these qualities made it a metaphor for the virtues of the nation. This book tells the story of man's use of this wonderful natural resource and argues that oak still has a rich future, both as a material and as a key element in an ecologically rich countryside. The authors are concerned with how people have managed and exploited oakwoods over time and with the uses to which oak timber has been put, in ships, furniture and buildings. As practicing foresters, they revisit with an expert's eye the silvicultural techniques of the past - the methods of propagating, raising, managing, coppicing and felling oak through the tree's life, from acorn to standard. They reveal the skills needed to work with oak timber, and tell the story of the great industries of iron-smelting and shipbuilding which relied on the tree. They also explore the myths, symbols and cultural associations that have connected people in Britain with the oak tree over hundreds of years. An appendix lists over 700 particularly significant oak trees, with notes on their location, present condition and historical connections. This book is a cultural history not only of a tree, but also of a timber. It reclaims the disappearing forestry and carpentry skills of our ancestors and shows how, in an era of climate change, oak can enrich our future as well as our past. Esmond Harris has spent a lifetime working as a forester, and is a past Director of The Royal Forestry Society. Jeanette Harris is a farmer and author. Together they wrote the best-selling Reader's Digest Guide to the Trees and Shrubs of Britain. They run a small farm in Cornwall, where their renovation of woodlands won the 2002 Duke of Cornwall's Award for Forestry and Conservation. N. D. G. James, OBE was President of The Royal Forestry Society and author of several tree books. He died in 1993, having laid the foundations for this book.

[A Can of Madness, Jason Pegler](#) , 2002, 0954221826, 9780954221829. Product Description A Can of Madness does what it says in the er can. A brilliant memoir of mania; all the pain, humour, fear and despair is chronicled here in prose of clarity and distinction. Unforgettable and important" - Stephen Fry This book will help people to understand one of the

greatest issues of our time, how to treat those who are mentally disturbed, as human beings Rt. Hon. Tony Benn MP The author has done all of us a service by writing about how it feels, not just to be manic depressive, but to have a life of fraught and edgy encounters with just about everyone The Times Literary Supplement Description A vivid, honest and sometimes disturbing memoir about the experience of having a diagnosis of manic-depression. It was in two stages (not using a diary that i collected as it says in the Mind Press Release 2002. After i read Prozac Nation in 1998 i wrote two pages. Knowing i had something amazing to say i was paralysed for two years with the thought of writing it. Then when i was given my own flat in Vauxhall after my last hospitalisation in St Thomas's Hospital in 2000 i wrote every day for about 12-16 weeks and got it all of my chest. From that moment i felt that i had written the book that had saved the Ecstasy generation although it turned into a mental health crusade to give other people a voice. Like other books in this genre, the author is often painfully honest about his experiences. He recounts a dizzying, dark and sometimes euphoric journey through a world of elation, despair, binge drinking, drugs, raves and psychiatric wards. As well as attempting to educate the reader, the book also provides optimism and hope, showing that it is finally possible to learn to live with, and accept, having a mental health problem. Writing A Can of Madness saved my life and alot of other people have told me that it has helped their lives. About the Author Jason Pegler is 33 and lives in London. Jason was diagnosed with manic depression in 1993 and wrote 'A Can of Madness' to stop other seventeen year olds going through what he went through. Graduating from Manchester University in 1998 he founded Chipmunk publishing the mental health publisher which aims to help mental health sufferers. Pegler is a mental health activist, journalist, rapper, public speaker and consultant on anything that promotes a positive image on mental health. In 2005 Pegler won the New Statesman's Young Social Entrepreneur of the Year Award. He is a key figure in the mental health movement. Book Extract As I was being driven off in the back of a police van in a space suit, I thought I was Donovan Bad Boy Smith being driven to a rave. I could hear music in my head and flashed back to another night at The Brunel Rooms in Swindon. The Brunel Rooms, a hard-core Mecca for druggies from Gloucester and surrounding areas in the early to mid nineties. Donovan was so hardcore when I saw him there that he'd refused to turn off his set at 3. He'd carried on until 3.30 when someone finally turned off the electricity mid flow. Talking of flows (as opposed to stable mindsets), just how the fuck do you live with a mental illness? Don't ask me, I'm still trying to find out now. After all, it's not something you plan, let alone something you'd ever expect to have. As we all say: it won't happen to me. But it can. And in this case, it did. And if Hercules and Ajax couldn't hack it, how the hell could I? Unsurprisingly, I didn't - and that's why I wallowed in self-pity for so long. So, do you want to know what it's like to be crazy, mad, loopy? Well I'm about to tell you. I'm also going to tell you how it feels to be suicidal for months on end - the fate of the manic. One thing, however, is for sure: The sooner you kill mania the better. For you're a danger to yourself and other people when you don't know what you're doing.

[The Sense of an Ending, Julian Barnes](#) , 2011, 0307360830, 9780307360830. Winner of the 2011 Man Booker Prize and

#1 international bestseller, *The Sense of an Ending* is a masterpiece. The story of a man coming to terms with the mutable past, Julian Barnes's new novel is laced with his trademark precision, dexterity and insight. It is the work of one of the world's most distinguished writers. Tony Webster and his clique first met Adrian Finn at school. Sex-hungry and book-hungry, they navigated the girl drought of gawky adolescence together, trading in affectations, in-jokes, rumour and wit. Maybe Adrian was a little more serious than the others, certainly more intelligent, but they swore to stay friends forever. Until Adrian's life took a turn into tragedy, and all of them, especially Tony, moved on and did their best to forget. Now Tony is in middle age. He's had a career and a marriage, a calm divorce. He gets along nicely, he thinks, with his one child, a daughter, and even with his ex-wife. He's certainly never tried to hurt anybody. Memory, though, is imperfect. It can always throw up surprises, as a lawyer's letter is about to prove. The unexpected bequest conveyed by that letter leads Tony on a dogged search through a past suddenly turned murky. And how do you carry on, contentedly, when events conspire to upset all your vaunted truths?

The innovative maps and graphics in this atlas give new insights into many of today's most controversial subjects, such as: human genetics (is our sexuality programmed?), the implications of cloning, why we choose the partners we do, what the real purpose of our relationships is, and infertility. Indeed, public reaction to certain sexual behaviors is powerful but rarely constant. This remarkable survey of human sexual behavior around the world reveals intriguing differences -- as well as some surprising similarities -- from country to country and between different cultures.

[Ethnicity and the Economy: The State, Chinese Business, and Multinationals in Malaysia, James V. Jesudason](#) , 1990, 0195889703, 9780195889703. This book offers an in-depth analysis of transformations in the Malaysian economy and argues for the central role of ethnic structures in shaping development outcomes. The activities of key economic actors, such as the state, local Chinese business, and multinationals, are analysed in the context of the countries' ethnic-political structure. The authors show how shifts in the political coalitions among the elite affect the alliances between these economic groups and their respective bargaining powers. These changes, in turn, have important implications for development, and explain the twists and turns of the Malaysian economy. By highlighting the role of ethnic politics in shaping such macroeconomic characteristics as state economic intervention, the fiscal position of the state, and the role of multinationals, this book demonstrates that ethnic studies should go beyond looking at the economic role of middlemen minorities to consider the broader political economy, and, as such, provides a useful framework for studying other ethnically divided societies.

[Religion and Culture in Early Modern Europe, 1500-1800, Kasper von Greyerz Professor of Early Modern History University of Basel](#) , 2007, 0198043848, 9780198043843. In the pre-industrial societies of early modern Europe, religion was a vessel of fundamental importance in making sense of personal and collective social, cultural and spiritual exercises. Developments from this era had immediate impact on these societies, much of which resonates to the present day. Published in German seven years ago, Kaspar von Greyerz important overview and interpretation of the religions and cultures of Early Modern Europe now appears in the English language for the first time. He approaches his subject matter with the concerns of a social anthropologist, rejecting the conventional dichotomy between popular and elite religion to focus instead on religion in its everyday cultural contexts. Concentrating primarily on Central and Western Europe, von Greyerz analyzes the dynamic strengths of early modern religion in three parts. First, he identifies the changes in religious life resulting from the Protestant Reformation and Catholic Counter-Reformation. He then reveals how the dynamic religious climate triggered various radical and separatist movements, such as the Anabaptists, puritans, and

Quakers, and how the newfound emphasis on collective religious identity contributed to the marginalization of non-Christians and outsiders. Last, von Greyerz investigates the broad and still much divided field of research on secularization during the period covered. While many large-scale historical approaches to early modern religion have concentrated on institutional aspects, this important study consciously neglects these elements to provide new and fascinating insights. The resulting work delves into the many distinguishing marks of the period: religious reform and renewal, the hotly debated issue of "confessionalism", social inclusion and exclusion, and the increasing fragmentation of early modern religiosity in the context of the Enlightenment. In a final chapter, von Greyerz addresses the question as to whether early modern religion carried in itself the seeds of its own relativization.

[Welsh Castles: A Guide by Counties, Adrian Pettifer](#), 2000, 0851157785, 9780851157788. The medieval castles of Wales are an imposing group of monuments. Although there are examples from the Norman period, the vast majority of the surviving castles date from the thirteenth century, a dramatic and turbulent period when Wales was nearly united under native rule before succumbing to Edward I's conquest: Caernarfon, Conway, Harlech and Beaumaris are justly famous, but equally fine examples can be found elsewhere, including Pembroke, Kidwelly and Chepstow in south Wales; native Welsh castles feature prominently. This book provides a brief account and complete gazetteer of every surviving castle in Wales, from the impressive earthworks raised by the Norman invaders to the castle-palaces of the later middle ages, and including the remarkable town fortifications of Wales; it is arranged by county for convenience of reference, and offers full Ordnance Survey details. Lavishly illustrated. ADRIAN PETTIFER gained his degree in ancient and medieval history from Birmingham University.

[Cicero the Advocate, J. G. F. Powell, Jeremy Paterson](#) , 2004, 0198152809, 9780198152804. This is the first book in English to take Cicero's forensic speeches seriously as acts of advocacy, i.e. as designed to ensure that the person he represents is acquitted or that the person he is prosecuting is found guilty. It seeks to set the speeches within the context of the court system of the Late Roman Republic and to explore in detail the strategies available to Roman advocates to win the votes of jurors. The volume comprises a substantial introduction, fourteen chapters by prominent Ciceronian scholars in Britain, North America, and Germany, and a final chapter by a current British Appeal Court judge who comments on Cicero's techniques from the point of view of a modern advocate. The introduction deals with issues concerning the general nature of advocacy, the Roman court system as compared with other ancient and modern systems, the Roman "profession" of advocacy and its etiquette, the place of advocacy in Cicero's career, the ancient theory of rhetoric and argument as applied to courtroom advocacy, and the relationship between the published texts of the speeches as we have them and the speeches actually delivered in court. The first eight chapters discuss general themes: legal procedure in Cicero's time, Cicero's Italian clients, Cicero's methods of setting out or alluding to the facts of a case, his use of legal arguments, arguments from character, invective, self-reference, and emotional appeal, the last of these especially in the concluding sections of his speeches. Chapters 9-14 examine a range of particular speeches as case studies--In Verrem II.1 (from Cicero's only major extant prosecution case), Pro Archia, De Domo Sua, Pro Caecina, Pro Cluentio, Pro Ligario. These speeches cover the period of the height of Cicero's career, from 70 BC, when Cicero became acknowledged as the leading Roman advocate, to 49 BC when Caesar's dictatorship required Cicero to adapt his well-tried forensic techniques to drastically new circumstances, and they contain arguments on a wide range of subject-matter, including provincial maladministration, usurpation of citizenship rights, violent dispossession, the religious law relating to the consecration of property, poisoning, bribery, and political offences. Other speeches, including all the better-

known ones, are used as illustrative examples in the introduction and in the more general chapters. An appendix lists all Cicero's known appearances as an advocate.

[The TAMAR BIBLE, the First Judeo-Christian Scripture: The First Bible Ever Written, Buried in Your Own Bible, Extracted Without Changing Or Adding a Single Word and Without Changing Word Order -- A Unique Way to Read Scripture, Better Understand Your Religion and Enhance Your Faith, for Jews ..., Walter Lamp](#) , 2010, . A thousand years ago, scholars used the words of the Bible itself to prove that Moses did not write it. In this book, Mr. Lamp uses the Bible itself to uncover the very first Bible ever written. He was able to do this because Jewish priests had added much to that first Bible effectively burying it with their additions. Because that first Bible was sacred, they never deleted a word. So that first Bible remained buried in the Old Testament or Hebrew Bible you have at home today, whichever you prefer to call it, and

Mr. Lamp was able to excavate it. Without adding or changing a word, and without changing the word order, he excavated the complete hidden Bible and it is coherent, readily recognizable and very readable -- proving it was there in the first place and nothing had been deleted by the priests. The complete text of that first Bible, which is relatively short compared to what the priests added, is presented in its entirety in this book. Mr. Lamp spells out the methodology he used to extract the buried text and you can follow the fascinating trail from your Bible to what he calls The Tamar Bible after the name of that first author. That first author was Tamar, the raped daughter of King David. She became unmarriageable and desolate, and undertook the endeavor to write down for the first time the oral transmitted beliefs of the Jewish people, using the alphabet invented just a few centuries earlier. Thus, the Tamar Bible presents the original beliefs of the Jewish people, beliefs that became the core of the Judeo-Christian tradition we know today.

[Where are You?, Maire Buonocore](#) , 1999, 0199156239, 9780199156238. The Oxford Literacy Web is an exciting new literacy programme designed to guide schools successfully through the primary years. Fitting the requirements of the National Literacy Strategy, National Curriculum in England and Wales, English Language 5-14 in Scotland, and Common Curriculum in Northern Ireland, the Oxford Literacy Web guides pupils through the core skills associated with learning to read and write with a diverse range of literary styles within the genres of fiction, non-fiction, rhymes, language, and poetry. The "Fiction" strand: there can be no better way to learn to read than through the Duck Green School and Variety story strands. Exciting stories, hilarious events, and dynamic illustrations combine to ensure diversity and enjoyment. Variety stories extend children's experience of different styles of fiction. They reinforce vocabulary but include a more challenging element to push upward toward the next level. Starter Stage Pack A is a pack of wordless stories for beginning readers to develop book knowledge and practise language skills. The "Stories We Know" cluster consists of 3 amusing retellings of traditional stories and rhymes by Keith Gaines, while the "Teddy and Me" books are original stories by Maire Buonocore about a young girl and her toys. The books are available in both standard and 'big book' format.

[Silent Spaces and Other Stories of Architecture, Gautam Bhatia](#) , 1994, 0140246096, 9780140246094. An insiders view of public architecture ancient monuments and contemporary landmarksIn this sequel to Punjabi Baroque and Other Memories of Architecture, Gautam Bhatia is on a reflective journey, as a tourist and architect, viewing Indias architectural legacy. There has been a discernible purpose and design in all architecture down the ages, be it the quiet peace offered

by ancient temples, the beauty and comfort reflected in Mughal architecture, or the expression of an imperial presence in British architecture. But public architecture today subsides into crumbling, peeling ruins even before work is completed on the buildings. As Gautam Bhatia notes in this account that is dosed liberally with his hallmark wit and sarcasm, neither utility nor aesthetics but caprice and prejudice form the guiding principles for those in power effecting architecture today.

Clive Staples Lewis (1898-1963) was a distinguished scholar of medieval and Renaissance literature who taught at both Oxford University and Cambridge University. After his conversion to Christianity, Lewis began writing Christian apologetic works aimed at a popular audience. It is for these works that Lewis is now best remembered; especially in the U.S., where his books have sold in the millions and continue to be popular today. Perhaps because of this popularity, however, Lewis's Christian writings are generally dismissed by theologians as oversimplified and conceptually flawed. With this book, Wesley A. Kort hopes to rehabilitate Lewis and to demonstrate the value and continuing relevance of his work.

[Bitching, Marion Meade](#) , 2011, 1617560510, 9781617560514. In the early 1970s, the national conversation regarding feminism was very different. Public discussions of womanhood--single life, marriage, workplace harassment, rights, gripes--were often channeled through movement spokeswomen and always refracted through the lens of talking to men about men. Little was shared about the chats happening behind closed doors where everyday women talked to women without the threat of men listening in. But, all that changed with the book BITCHING. Originally published in 1973, BITCHING is journalist and author Marion Meade's deep and insightful investigation into the real dialogue happening

inside coffee klatches, consciousness-raising groups, and therapist's sessions. Using excerpts from real taped conversations, Meade presents the frustration, anger, resigned acceptance, and scathing humor that make up the female experience from birth to grave. For the first time, male chauvinist behavior goes fully examined and unexcused, and the roles men force upon women get broken down to their sometimes ridiculous component parts. A snapshot into a key time in the feminist movement, this book is a must-read for anyone interested in how far we've come... or how much we've stayed the same.

[Mathematical techniques: an introduction for the engineering, physical, and mathematical sciences](#), Dominic William Jordan, Peter Smith, 1994, 0198562675, 9780198562672. Although the rigors of modern science increasingly require of its practitioners greater and greater mathematical sophistication, today's students are often ill-prepared to meet the challenge. Mathematical Techniques aims to rectify that situation. Aimed at beginning students in the engineering, mathematical, and physical sciences, the book offers a course in essential mathematical methods--such as analytic geometry, vector algebra, complex numbers, matrix operations, differential equations, double integrals, Laplace

transforms, and Fourier series, among many others. Throughout, the book omits mathematical pedantry and obscure proofs, and presents summary material clearly. A large number of exercises and worked examples are included. Students taking the road down to careers in engineering, chemistry, mathematics, and physics will welcome this friendly introduction to important mathematical techniques.
