[Ghost Ship: A Port Chatham Mystery, P. J. Alderman](#) , 2011, 0553908014, 9780553908015. RITA-nominated author P. J. Alderman's delightful new mystery series blends haunting ghosts with hunting criminals as therapist Jordan Marsh dives deep into the past to solve a modern murder. A recent transplant to Washington States charming seaside town of Port Chatham, Jordan is still getting used to sharing her slightly run-down but historic lodging with ghosts. As if living with the long-deceased isn't enough of a challenge, she's just found a corpse: The town's notorious womanizer Holt Stillwell is lying on the beach with a bullet in his head. Before Jordan can reel in a suspect, another victim surfaces. And this one isn't

taking murder lying down. Holts ancestor Michael Seavey, the Pacific Northwests most infamous shanghaier, has materialized in Jordans house, seeking to solve his own death in a suspicious shipwreck in 1893. With two murders to solve and a killer on the loose, Jordan faces yet another equally terrifying prospect: her growing attraction to the very alive and criminally attractive pub owner Jase Cunningham. [Dialogues and Essays, Lucius Annaeus Seneca](#) , 2007, 0192807145, 9780192807144. Alain de Botton's bestselling *The Consolations of Philosophy*--later made into a six-part TV series--has helped popularize ancient philosophy and especially the work of Seneca. This superb volume offers the finest translation of Seneca's dialogues and essays in print, capturing the full range of his philosophical interests. Here the Stoic philosopher outlines his thoughts on how to live in a troubled world. Tutor to the young emperor Nero, Seneca wrote exercises in practical philosophy that draw upon contemporary Roman life and illuminate the intellectual concerns of the day. They also have much to say to the modern reader, as Seneca ranges widely across subjects such as the shortness of life, tranquility of mind, anger, mercy, happiness, and grief at the loss of a loved one. Seneca's accessible, aphoristic style makes his writing especially attractive as an introduction to Stoic philosophy, and belies its reputation for austerity and dogmatism. This edition combines a clear and modern translation by John Davies with Tobias Reinhardt's fascinating introduction to Seneca's career, literary style, and influence, including a superb summary of Stoic philosophy and Seneca's interpretation of it. The book's notes are the fullest of any comparable edition. About the Series: For over 100 years Oxford World's Classics has made available the broadest spectrum of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, voluminous notes to clarify the text, up-to-date bibliographies for further study, and much more.

[Song of Slaves in the Desert, Alan Cheuse](#) , 2011, 1402242999, 9781402242991. The Legacy of Slavery The Loyalty of Family The Lure of Love He has no history in the rice fields, no background in being a master. Plantations are as foreign to him as the African plain that birthed the slaves his uncle owns. Surely, though, he knows his own heart. She has no say in his decisions, his day, his life. She doesn't even have a say in her own. But when Nathaniel Pereira plunges into the murky mysteries of freedom and survival in the suffocating Southern heat, Liza can see how she might change her life forever. Tracing the thread of slavery from sixteenth-century Timbuktu, Song of Slaves in the Desert explores one man's struggle to understand a world where honor is in short supply yet dignity cannot be sold. His mission in peril, his mind nearly undone, Nathaniel's obsession binds him to his fate more tightly than chains ever could. "Cheuse shows that in one way or another, we all experience slavery, and that freedom is never given but must be taken at all cost. The book's epic vision is deeply human and humane." Helon Habila, author of Waiting for an Angel and Measuring Time "Alan

Cheuse, one of our most respected men of letters, has written a daring, provocative novel. Some readers will be captivated by his depiction of the horrors of slavery and Jewish involvement in the peculiar institution, and others will be troubled and perhaps even offended, for the subject of race in America is always controversial, but no one who reads *Song of Slaves in the Desert* will emerge from its pages unaffected." Charles Johnson, author of the National Book Award winner *Middle Passage* "A novelist's dream is to conjure up a whole world, one the reader can tumble right into and inhabit. I fell into Alan Cheuse's *Song of Slaves in the Desert* like that. I confess I felt a twinge of envy at Cheuse's success, his fully imagined song and its people. But the envy immediately gave way to gratitude for having had the chance to enter and treasure the world he's made here." Josephine Humphreys, author of *Dreams of Sleep* "Cheuse passionately evokes a vanished world of master and slave, Jew and Gentile, all hurtling toward the tumult and destruction of war. The novel is full of the loss and longing that come with a world divided forever, people from their people and from their past. Fascinating." Lynn Freed, author of *The Servants' Quarters* A masterful writer skilled in both accuracy and nuance, Alan Cheuse grapples with the nether parts of our history, the murky boundary between right and wrong, and the wild tendency of love to break free. For more than two decades, Alan Cheuse has served as NPR's "voice of books." He is the author of four novels, including *The Grandmothers' Club*, *The Light Possessed*, and *To Catch the Lightning* (winner of the 2009 Grub Street National Prize for fiction), several collections of short stories, and a pair of novellas. He is also the editor of *Seeing Ourselves: Great Early American Short Stories* and coeditor of *Writers Workshop in a Book*.

[Romances of the Republic: Women, the Family, and Violence in the Literature of the Early American Nation, Shirley Samuels](#) , 1996, 0195079884, 9780195079883. Romances of the Republic contributes to the lively field of scholarship on the interconnection of ideology and history in early American literature. Shirley Samuels illustrates the relations of sexual, political, and familial rhetoric in American writing from 1790 to the 1850s. With special focus on depictions of the American Revolution and on the use of the family as a model and instrument of political forces, she examines how the historical novel formalizes the more extravagant features of the gothic novel--incest, murder, the horror of family--while incorporating a sentimental vision of the family. Samuels's analysis deals with writers like Charles Brockden Brown, Catherine Sedgwick, James Fenimore Cooper, and Mason Weems, and argues that their novels formulated a family structure that, unlike earlier models, was neither patriarchal nor a revolt against patriarchy. In emphasizing sibling rivalry and inter-generational quarrels about marriage, the novel of this period attempted to unite disparate political, national, class, and even racial positions.

In 1867, Mark Twain set out from New York City for Europe and the Holy Land on the paddle-steamer Quaker City. The result of that trip was *The Innocents Abroad*, a travel book unlike any that had gone before it. Irreverent and irrepressible, Twain pokes fun at officious tour guides and offensive tourists alike. The book offers a glimpse of a major writer when he was young and just beginning to flex his muscles, and also serves as an enduring no-nonsense guide for the first-time traveler to Europe and the Holy Land. The trip stimulates Twain to meditate on how the "new world" is different from the "old" and engenders reflections on what a society must be like to be thought of as genuinely "civilized." *The Innocents Abroad* is alternately profound and profoundly entertaining. Twain may find himself exasperated or exhausted--but the story he tells is never dull. It is no wonder that the book was a hit on both sides of the Atlantic.

[Playing Cricket, Debbie Croft](#) , 2008, 0195563271, 9780195563276. Oxford Literacy has been specifically designed to support guided reading in the first three years of school. The Oxford Literacy fiction and non-fiction guided reading texts recognise that a guided reading group in a 'real' classroom never has every student on the same level; therefore, the texts and supporting teaching versions allow educators to work with small groups of students across a range of levels within their stage of reading. Because Oxford Literacy is a guided reading program, a single title has limited use in a

classroom; therefore, it is recommended that educators use multiple copies of a title in guided reading groups to achieve maximum benefit from Oxford Literacy.

[The Minotaur's Children, Alan McKee](#) , 2009, 0981352413, 9780981352411. When Julia Winstanely, daughter of a prominent west end family starts to work with W.T. Stead, muck raking editor of the Pall Mall Gazette, she finds herself and her family involved with some of the worst and most powerful people in Victorian London, people who kidnap and sell young girls to brothels on the continent. As Julia and her suffragette sister, Serafina, battle for legal means to find missing girls, the crimes of Jack the Ripper begin. Julia's handsome cousin, Miles, tries, with Julia's help to stalk the monster through the back streets of Whitechapel. With the aid of a clairvoyant photographer they discover, to their horror, that the answer to the Ripper murders and the trade in young girls lies in their own family's past. The true facts of the trade in children and the involvement of public officials will amaze readers who thought Victorian London was a tame place.

[Green Man Hopkins: Poetry and the Victorian Ecological Imagination, ISSN 1572-4344, John Parham](#) , 2010, 9042031069, 9789042031067. This book, the first to consider Gerard Manley Hopkins as an ecological writer, explores the dimension that social ecology offers to an ecocriticism hitherto dominated by romantic nature writing. The case for a 'green Hopkins is made through a paradigm of 'Victorian Ecology that expands the scope of existing studies in Victorian literature and science. Parham argues that Hopkins developed a two-fold understanding of ecology as a scientific philosophy constructed around ecosystems theory; and as a corresponding theory of society organised around the sustainable use of energy as well as a corresponding poetic practice. In a radical new reading of the poems, he suggests that Hopkins translated an innovative nature poetry, in which rhythm conveyed a nature characterised by dialectical energy exchange, into a social 'ecopoetry that embodied the environmental impact of Victorian 'risk society on its human population. Located within a 'Victorian ecological imagination that fused romanticism and pragmatism, the book views Hopkins work as indicating the value of reconciling a deep ecological assertion of the intrinsic value of (nonhuman) nature with social ecology's more pragmatic attempts to critique and re-conceptualise human life.

[Painterly Abstraction in Modernist American Poetry: The Contemporaneity of Modernism, Charles Altieri](#) , 1989, 0521330858, 9780521330855. Charles Altieri's groundbreaking new book sets modernist American poetry in a precise cultural context by analyzing how major poets reacted to the challenge posed by modernist painting's radical critique of traditional representational models for art. It argues that modernist poets have tended to resist the received values of their contemporary culture by finding idealizing principles in modes of pure abstraction. It traces the use of such abstraction in literature from Wordsworth, through Baudelaire and Mallarmé, to T.S. Eliot, William Carlos Williams, Marianne Moore, and Gertrude Stein. There are summary chapters also on Wallace Stevens and Ezra Pound,

considerations of Czanne and the Cubists, and a substantial theoretical discussion of the nature of abstract art.

[The Simone Weil Reader, Simone Weil](#) , 1977, 0918825016, 9780918825018. Simone Weil (1909-1943) was a teacher, classical scholar, philosopher, political activist and seeker of the truth. She confronted the rootlessness of modern life and the death of the spirit in an age of materialism. Her writing was visionary and her vision, radical. Born in France, a contemporary of Jean-Paul Sartre and Albert Camus, Weil inspired T.S. Eliot to say of her, "We must simply expose ourselves to the personality of a woman of genius, of a kind of genius akin to that of a saint." Today, nearly sixty years after her death, her work has, perhaps, an even greater immediacy and relevance. This book is a collection of the best of her writings from The Notebooks of Simone Weil, Oppression and Liberty and Gravity and Grace.

[Narratives of Agency: Self-making in China, India, and Japan, Wimal Dissanayake](#) , 1996, 081662657X, 9780816626571.

This multidisciplinary collection underlines the importance of understanding the operations of human agency - defined here as the ability to exert power, specifically in resistance to ideological pressure. In particular, the contributors emphasize the historical and cultural conditions that facilitate the production of agency in an effort to gain a deeper understanding of the cultures of China, India, and Japan. The contributors argue that traditional Western approaches to the study of these cultures have unduly focused on the pervasive influence of family and clan (China), caste and fatalism (India), and groupism (Japan), reminding us that members of a community have to make personal choices, struggle and interact with others, and confront new challenges, all of which involve intentionality and human agency.

the story of Clare and Henry who have known each other since Clare was six and Henry was thirty-six, and were married when Clare was twenty-two and Henry thirty. Impossible but true, because Henry is one of the first people diagnosed with Chrono-Displacement Disorder: periodically his genetic clock resets and he finds himself pulled suddenly into his past or future. His disappearances are spontaneous and his experiences are alternately harrowing and amusing. The Time Traveler's Wife depicts the effects of time travel on Henry and Clare's passionate love for each other with grace and humour. Their struggle to lead normal lives in the face of a force they can neither prevent nor control is intensely moving and entirely unforgettable.

The "Traditional" teaching on the "THE KINGDOM" has taken the Church captive into believing all Christians will rule and reign with Christ no matter how they have lived their life. The whole purpose of this book is to help Christians understand what seeking the Kingdom of God is all about and help them be among the chosen few who will "enter into" the Kingdom: "For many are called, but few are chosen." (Matthew 22:14) Jesus Christ is returning for His faithful overcoming followers. Don't miss out on ruling and reigning with Christ in His KINGDOM. NEW DISCOVERY - THE SIGN of Christ's Coming. [The Color of Our Shame: Race and Justice in Our Time, Christopher J. Lebron](#) , 2013, 019993634X, 9780199936342. For many Americans, the election of Barack Obama as the country's first black president signaled that we had become a post-racial nation - some even suggested that race was no longer worth discussing. Of course, the evidence tells a very different story. While social scientists are fully engaged in examining the facts of race, normative political thought has fallen behind the curve in making race not only an interesting moral case, but making it a focus in the expansive theory of social justice. Political thought's under participation in the debate over the status of blacks in American society raises serious concerns, since its main task is to adjudicate discrepancies between the demands of ideal justice and social realities. Christopher Lebron argues that political thought must supply the arguments necessary to address the moral problems that attend racial inequality and make those problems salient to a democratic polity. Thus, in *The Color of Our Shame* he asks two major questions. First, given the success of the Civil Rights Act and the sharp decline in overt racist

norms, how can we explain the persistence of systemic racial inequality? Second, once we have settled on an explanation, what might political philosophy have to offer in terms of a solution? In order to answer these questions Lebron suggests that we reconceive of racial inequality as a condition that marks the normative status of black citizens in the eyes of the nation. He argues that our collective response to racial inequality ought to be shame. While we reject race as a reason for marginalizing blacks on the basis of liberal democratic ideals, we fail to live up to those ideals - a situation that Lebron sees as a failure of national character. He proposes a move toward a "perfectionist politics" that would compel a higher level of racially relevant moral excellence from individuals and institutions and enable America to meet the democratic ideals that it has set for itself.

[Simply Face Reading, Jonathan Dee](#) , 2005, 1402722761, 9781402722769. Every face tells a story, and here's how to read what it says--not merely its expression, but the deeper meanings conveyed by its shapes. These include 23 forms of eyes, 23 conformations of eyebrows, 13 kinds of ears, 13 nose profiles, and nine types of mouth. The art of face reading, like feng shui, comes from China, but despite its Asian origins, applies equally well to all racial types. Well-known author Jonathan Dee, with the help of full-color illustrations, analyzes in detail what each feature reveals about the character of the person behind it. With a little study, you'll be able to interpret each form, line, and wrinkle to uncover the personalities of friends and enemies, family and business associates.

Easy is a New York Times bestseller - a must-read in the New Adult genre for everyone who loves Slammed by Colleen Hoover or Beautiful Disaster by Jamie McGuire. Deeply romantic and utterly gripping, this is not to be missed. "I took a deep breath and exhaled it slowly before turning around. It was Lucas who stood there. His gaze was penetrating, not wavering for a moment, and my pulse hammered under his silent scrutiny. I couldn't remember the last time I'd been so full of pure, unqualified desire." Lucas is the stranger who saved Jacqueline from an attack by a fellow student - she'd never noticed him before then, and now he's everywhere. But can Jacqueline trust him - or will the secrets he's hiding come between them?

In the mid-seventeenth century, the poets associated with the court of Charles I of England, known as the Cavaliers, were strongly influenced by the classicism of Ben Jonson. Their verse, often concerned with the vagaries of love, is characteristically charming, witty, graceful and elegant. This volume contains a rich sampling of more than 120 works by four Cavalier poets - Robert Herrick, Thomas Carew, Sir John Suckling and Richard Lovelace. Included are such well - know gems as Herrick's 'To The Virgins to Make Much of Time,' Carew's 'A Cruel Mistress,' Suckling's 'Why so pale and wan, fond lover?' and many more. Gathered in this inexpensive volume, this garland of memorable verse will delight and student of English literature or lover of fine poetry.

Describing the statistical models and methods for the analysis of longitudinal data, it covers both the underlying statistical theory of each method, and its application to a range of examples from the agricultural and biomedical sciences. The main topics discussed are design issues, exploratory methods of analysis, linear models for continuous data, general linear models for discrete data, and models and methods for handling data and missing values. Under each heading, worked examples are presented in parallel with the methodological development, and sufficient detail is given to enable the reader to reproduce the author's results using the data-sets as an appendix. This second edition, published for the first time in paperback, provides a thorough and expanded revision of this important text. It includes two new chapters; the first discusses fully parametric models for discrete repeated measures data, and the second explores statistical models for time-dependent predictors.

[A Knight at the Opera: Heine, Wagner, Herzl, Peretz, and the Legacy of Der Tannhuser, Leah Garrett](#) , 2011, 1557536015, 9781557536013. A Knight at the Opera examines the remarkable and unknown role that the medieval legend (and Wagner opera) Tannhuser played in Jewish cultural life in the nineteenth and early twentieth centuries. The book analyzes how three of the greatest Jewish thinkers of that era, Heinrich Heine, Theodor Herzl, and I. L. Peretz, used this central myth of Germany to strengthen Jewish culture and to attack anti-Semitism. Readers will see how Tannhuser evolves from a medieval knight to Peretz's pious Jewish scholar in the Land of Israel. The book also discusses how the founder of Zionism, Theodor Herzl, was so inspired by Wagner's opera that he wrote The Jewish State while attending performances of it. A Knight at the Opera uses Tannhuser as a way to examine the changing relationship between Jews and the broader world during the advent of the modern era, and to question if any art, even that of a prominent anti-Semite, should be considered taboo.

9781440331961. Your Comprehensive Encaustic Guidebook! Everything you need to know to get started with encaustic painting is contained inside this book. Featuring techniques and projects from Encaustic Workshop and Encaustic Mixed Media--plus a multitude of brand new projects--Encaustic Painting Techniques is the Whole Ball of Wax! Painting with wax might seem intimidating or dangerous, but have no fear. The myths of encaustic are dispelled as you discover how easy and safe this dynamic art form can be. Whether you're a beginner or a more experienced artist, you will experience new inspiration as you experiment with tar, shellac, acrylic, watercolors, paper and more. Inside you'll find: More than 40 step-by-step technique demonstrations. 20 projects to inspire gorgeous encaustic art. Dozens of tips and words of wisdom for getting the most out of your encaustic practice. Add encaustic to your creative toolbox!

[Evolution: An Introduction, Stephen C. Stearns, Rolf Hoekstra](#) , 2000, 0198549695, 9780198549697. A major new textbook. A concise and clear introduction to evolutionary biology. This book introduces what is essential and exciting in evolutionary biology. It covers whole field and emphasises the important concepts for the student. Care has been taken to express complex and stimulating ideas in simple language, while the frequent examples and running summaries make reading fun. Its logical structure means that it can be read straight through, one chapter per sitting. * Concise, clear, and states what is important * Concentrates on the central concepts and illustrates them with telling examples * Running summaries in the margins make navigation easy * Suitable for a one-year or one-semester course in evolution * Summaries at chapter ends * Each chapter's links to neighbouring chapters are explained Evolution: an introduction takes a fresh approach to classical topics such as population genetics and natural selection, and gives an overview of recent advances in hot areas such as sexual selection, genetic conflict, life history evolution, and phenotypic plasticity. Detail of contents The Prologue is unique and uniquely motivating. It makes four central points about evolution in the form of four case studies told as brief stories. Chapters 1-3 describe natural selection and the essential difference between adaptive and neutral evolution with unmatched clarity and simplicity. Chapter 4 emphasizes the essential message of population genetics without burdening the students with any of the unessential details and places unique emphasis on the role of the genetic system in constraining the response to selection. Chapter 6 is not found in any other evolution textbook, although there are a number of recent books on the subject, and it therefore provides an introductory overview of a topic that has been the object of much recent interest and promises to generate much more insight: the expression of genetic variation analysed with the concept of reaction norms. Chapters 7-9 cover sex, life histories, and sexual selection in greater depth than they are dealt with in any other introductory textbook but without introducing advanced technical language and analysis. Chapters 6-9 thus give unprecedented coverage to phenotypic evolution in an introductory text.

Chapter 10 on multilevel selection and genetic conflict is unique in introductory textbooks. Rolf Hoekstra has achieved a wonder of clarity and concision on the essentials of this exciting topic. Chapters 11 and 12 on speciation and systematics are, by comparison, pretty standard, but they continue the policy of clarity and concision with the focus on essentials. Chapter 13 on the history of the planet and of life is a completely new approach unabashedly designed to motivate students to think about deep time, geology, paleontology, and fossils. Chapter 14 on the major transitions in evolution is also not found in any other introductory textbook. It documents the conceptual issues raised in the history of life briefly and in a form that will stimulate the gifted. Chapter 15 profiles the chief insights made possible by molecular systematics in the form of four case studies ranging from deep time to recent European history. It has standard content but unique structure. A strong point is the way mitochondrial Eve is contrasted with transspecies polymorphism to show students how to think about inferences with molecular evidence. Chapter 16 briefly presents the principle comparative methods and the kinds of insights that can be achieved with them. It is not unique - Ridley covers this ground well - but the examples used are new and the essential features of the methods - including potential pitfalls - are quite clearly described. Chapter 17 places evolutionary thought into the context both of the natural sciences and of society at large.

[A Passage to India, Edward Morgan Forster](#) , 2005, 014144116X, 9780141441160. Exploring issues of colonialism, faith and the limits of comprehension, E.M. Forster's *A Passage to India* is edited by Oliver Stallybrass, with an introduction by Pankaj Mishra. When Adela Quested and her elderly companion Mrs Moore arrive in the Indian town of Chandrapore, they quickly feel trapped by its insular and prejudiced 'Anglo-Indian' community. Determined to escape the parochial English enclave and explore the 'real India', they seek the guidance of the charming and mercurial Dr Aziz, a cultivated Indian Muslim. But a mysterious incident occurs while they are exploring the Marabar caves with Aziz, and the well-respected doctor soon finds himself at the centre of a scandal that rouses violent passions among both the British and their Indian subjects. A masterly portrait of a society in the grip of imperialism, *A Passage to India* compellingly depicts the fate of individuals caught between the great political and cultural conflicts of the modern world. In his introduction, Pankaj Mishra outlines Forster's complex engagement with Indian society and culture. This edition reproduces the Abinger text and notes, and also includes four of Forster's essays on India, a chronology and further reading. E. M. Forster (1879-1970) was a noted English author and critic and a member of the Bloomsbury group. His first novel, *Where Angels Fear To Tread* appeared in 1905. *The Longest Journey* appeared in 1907, followed by *A Room With A View* (1908), based partly on the material from extended holidays in Italy with his mother. *Howards End* (1910) was a story that centred on an English country house and dealt with the clash between two families, one interested in art and literature, the other only in business. *Maurice* was revised several times during his life, and finally published posthumously in 1971. If you enjoyed *A Passage to India*, you might like Rudyard Kipling's *Kim*, also available in Penguin Classics. 'His great book ... masterly in its presence and its lucidity' Anita Desai

[The Los Alamos Primer: The First Lectures on how to Build an Atomic Bomb, Robert Serber](#) , 1992, 0520075765, 9780520075764. The classified lectures that galvanized the Manhattan Project scientists--with annotations for the nonspecialist reader and an introduction by a Pulitzer Prize-winning historian. In March 1943 a group of young scientists, sequestered on a mesa near Santa Fe, attended a crash course in the new atomic physics. The lecturer was Robert Serber, J. Robert Oppenheimer's protégé, and they learned that their job was to invent the world's first atomic bomb. Serber's lecture notes, nicknamed the "Los Alamos Primer," were mimeographed and passed from hand to hand, remaining classified for many years. They are published here for the first time, and now contemporary readers can see just how much was known and how terrifyingly much was unknown when the Manhattan Project began. Could this "gadget," based on the newly discovered principles of nuclear fission, really be designed and built? Could it be small enough and light enough for an airplane to carry? If it could be built, could it be controlled? Working with Richard Rhodes, Pulitzer Prize-winning historian of the development of the atomic bomb, Professor Serber has annotated original lecture notes with explanations of the physics terms for the nonspecialist. His preface, an informal memoir, vividly conveys the mingled excitement, uncertainty, and intensity felt by the Manhattan Project scientists. Rhodes's introduction provides a brief history of the development of atomic physics up to the day that Serber stood before his blackboard at Los Alamos. In this edition, The Los Alamos Primer finally emerges from the archives to give a new understanding of the very beginning of nuclear weapons. No seminar anywhere has had greater historical consequences.
