Frank Pope pulls back the curtain on the intensely competitive underworld of shipwrecks in this thrilling story of treasure hunting gone wrong. When Oxford archeologist Mensun Bounddubbed the "Indiana Jones of the Deep" by the Discovery Channel teamed up with a financier to salvage a sunken trove of fifteenth-century porcelain, it seemed a dream enterprise. The stakes were high: The Hoi An wreck lay hundreds of feet down in a typhoon-prone stretch of water off the coast of Vietnam known as the Dragon Sea. Raising its contents required saturation diving, a crew of 160, and a fleet of boats. But the potential rewards were equally high: Bound would revolutionize thinking about Vietnamese ceramics, and his partner would make a fortune auctioning off the pieces. Or so they thought. In Dragon Sea, Pope delivers an engrossing tale of danger, adventure, and ambition a fascinating lesson in what happens when scholarship and money join forces to recover lost treasure.

[Serenity: It's a God Deal, Bill Hanks](#) , 2010, 1615667296, 9781615667291. My name is Bill H., and I'm, well...complicated! Clinically, I'm a recovering drug addicta "with Attention Deficit Disorder to boota "who, after twenty-two years of consuming a plethora of mind-bending toxins, is very much grateful to be alive. In 1996, Bill recognized a problem with drugs and alcohol, and subsequently checked himself into a treatment center. As a result, Bill, in a volunteer capacity, taught weekly classes on recovery for ten years at the rehab center that helped him to help himself. Having personally worked with approximately eight thousand patients in recovery, he provided Twelve-Step based support and teachings to those in need. One of the objectives of this book is to incorporate into the mainstream the author's understanding of the Twelve-Step Program of Recovery. Although this book was written from the perspective of a recovering addict, the reality is that you don't have to be a drug addict or alcoholic to benefit from a spiritual pilgrimage that has led millions to peace of minda "from desperation and despair, to hope and then Serenity. After all, the only difference between the people of 'mainstream America' and those with addiction(s) are the ways in which they handle their problems. Peace of mind resides within these pages. This book is Bill's effort to reach out and, through lessons learned from his own experiences, help those in need find their way to Sobriety, Sanity and Serenity. Through his teachings and stories (some funny, some not so funny), the author hopes to touch every emotion, and perhaps feelings you didn't know you had.

[The Third Term, Darryl Nyznyk](#) , 1997, 0965651347, 9780965651349. US President Aidan Sullivan won a landslide victory to a second term. His popularity has reached heights never imagined as his term nears its end. The economy

thrives, the US is feared by friend and foe; perfect for his followers to push for repeal of the 22nd Amendment and open the door for a third term. [Out of Touch: When Parents and Children Lose Contact After Divorce, Geoffrey L. Greif](#) , 1997, 0195095359,

9780195095357. The breakdown of the family has moved in recent years to the forefront of national consciousness. All manner of social ills, from poor academic performance to teenage drug use and gang crime, have been attributed to high divorce rates and the collapse of the traditional two-parent family. Targets of particularly harsh criticism are parents who lose all contact with their children after a divorce. So-called "deadbeat dads" are denounced in political speeches and ridiculed on billboard advertisements; mothers who lose touch with their children are stigmatized as emotionally unstable or lacking maternal instincts. Everyone seems to understand the importance of children being raised by two-parent families and the damage that can occur when one parent loses contact completely. What is significantly less clear is why this loss of contact occurs and what can be done to prevent it. In *Out of Touch*, Geoffrey Greif explores these issues with clarity, compassion, insight, and an evenhandedness rarely encountered in an arena far more susceptible to acrimonious debate than sympathetic understanding. Setting out to find the reality beneath the catchall categorization of out-of-touch parents as deadbeats, substance abusers, child mistreaters, or criminals, Greif focuses on those parents who tried and, for a vast array of reasons, failed to maintain contact with their children. It is their voices, in a discussion dominated up till now by the custodial parent, that we most need to hear, Greif argues, if we are to uncover ways to avoid such failures in the future. Rather than offering dry statistics and abstract generalizations, Greif lets us hear these voices directly in 26 in-depth interviews with estranged parents and with children caught in the crossfire of painful divorces. Extending over a period of two to ten years, these interviews, and Greif's perceptive analyses of them, reveal the whole spectrum of logistical, emotional, and legal difficulties that keep parents and children apart. From the ordinary problems of visitation rights and child support to the more complex and troubling issues--bitter court battles, accusations of sexual abuse, domestic violence, children rejecting a parent, child kidnapping, and many others--*Out of Touch* vividly and often heartbreakingly presents all the ways that fathers and mothers, even with the best intentions, can lose contact with their children. But the book does more than tell the stories of failed relationships. Its concluding chapter offers a series of specific and extremely helpful suggestions for families--parents, children, grandparents--who find themselves in danger of complete estrangement. Greif outlines how families can employ support systems, communication skills, mediation, and many other strategies to overcome the most difficult obstacles that occur after a divorce. It is here that the lessons gleaned from the broken relationships of the past become invaluable advice for the future. Informed by fresh perspectives, moving personal accounts, and a clear-sighted approach to a tangled issue, *Out of Touch* is a timely and deeply important book about both the forces that drive parents and children apart and the understanding that can keep

them together.

[Adeline Mowbray, Amelia Alderson Opie, Shelley King, John B. Pierce](#) , 1999, 0192833308, 9780192833303. "How strange and irrational," thought Adeline, "are the prejudices of society! Because an idle ceremony has not been muttered over me at the altar, I am liable to be thought a woman of vicious inclinations, and to be exposed to the most daring insults." Encouraged by her mother to pursue an interest in radical social ideas, Adeline Mowbray innocently puts her theories of idealized love into practice. Her attempt to live with the philosopher Frederic Glenmurray outside marriage is condemned by both her mother and society. Adeline and Glenmurray's relationship becomes the focal point for Opie's satire on society's attitudes to education, women, marriage, masculine and feminine codes of honour, filial loyalty and the struggle to justify individual choice. Personal as well as political, Adeline Mowbray (1804) is loosely based on the relationship between Opie's friends, Mary Wollstonecraft and William Godwin. Written in a period of conservative reaction in Britain and recalling the earlier radical era of the 1790s the novel offers a gripping exploration of the 'world as it is' and the 'world as it ought to be.'

[The Tender Years: Toward Developmentally Sensitive Child Welfare Services for Very Young Children, Jill Duerr Berrick](#) , 1998, 0195114523, 9780195114522. The first few years of life are a time of unparalleled physical, intellectual, and emotional development. But they can also be a time of neglect and abuse: this is the period when children are most likely to suffer mistreatment by their parents and most likely to be placed in foster care. Today most children entering the child welfare system are very young, and, in most large states, infants are the largest group of children entering foster care each year. Social service systems are typically not designed for very young children, however, and therefore fail to serve their special needs. This shortcoming is significant because protecting very young children from physical harm is not enough; they must also be protected from developmental harm. The Tender Years is the first textbook to address this critical situation. Beginning with an overview of child development theory, it examines child abuse reporting patients and discusses placement in foster care, reunification, and adoption

The Oxford Textbook of Palliative Medicine is the most comprehensive work existing on the rapidly developing specialty of care for the dying. Written by over 100 leading experts from Europe and North America, this is the first text to bring together research and practice. It provides comprehensive coverage of the physical, emotional, social, and spiritual aspects of palliative care. Throughout the book emphasis is placed on an interdisciplinary, team approach to care and the involvement of the family. Introductory chapters consider the challenge presented by palliative medicine and discuss the historical development and the future of the specialty, cultural aspects of dying, models of care

provision, and aspects of communication with patients. Following sections examine the scientific principles underlying the subject, and offer a thorough review of the current status of research in the field. Comprehensive and up-to-date guidance is given on the management of pain and other problems with the dying. As well as emphasizing the emotional, social, and psychological needs of the dying, the book considers the needs of the family and discusses bereavement, support and involvement of relatives, and home. Other chapters cover ethical aspects of care, rehabilitation, and the education and training of health professionals. Specific chapters are devoted to children and those dying of AIDS. The Oxford Textbook of Palliative Medicine is unique in its broad-reaching, scientific, and humane coverage of the specialty, and in its emphasis upon the interdisciplinary team approach. [Here's Your Irony Back](#), 2012, 3865217419, 9783865217417. Since the late 1970s, as a pioneer of Southern California underground culture, Raymond Pettibon has radically blurred the boundaries of high and low. His obsessively worked drawings pull freely from myriad sources spanning the cultural spectrum. The resulting, highly poetic constructions function as acute and authentic reflections of contemporary society. Inspired by September 11, 2001, Pettibon's focus has grown increasingly political, as evidenced by his 2006 exhibition at Regen Projects and his 2007 exhibition at David Zwirner. This probing catalogue, which is a collaborative effort between Regen Projects, Los Angeles and David Zwirner, New York, includes a text by art historian Benjamin Buchloh. Raymond Pettibon was born in 1957 in Tucson, Arizona and currently lives and works in Venice, California. He received his B.A. from the University of California at Los Angeles in Economics. A self-taught artist, he received the Bucksbaum Award following his participation in the 2004 Whitney Biennial, and the 2001 Wolfgang Hahn Prize from Museum Ludwig, Cologne, Germany. Pettibon has recently been the subject of expansive surveys at Kestner Gesellschaft, Hanover, Germany (2007); Kunsthalle Wien, Vienna, Austria (2006); and CAC Mlaga, Mlaga, Spain (2006). Recently included in the 52nd Venice Biennale, Pettibon is widely considered one of the most influential contemporary artists working today.

evocative prose and watercolor illustrations, "The Survivor Tree: Inspired by a True Story" takes the reader on a journey of hope and healing that parallels our nation's own journey following the events of September 11, 2001. A month after the collapse of the Twin Towers, workers on the site discovered a few green leaves showing through the gray concrete and ash. Clearing the debris, they found a badly injured Callery Pear Tree. She was rescued, taken to a nursery outside the city, and put in the care of Richie, a City Parks Worker. No one was sure if she would live. But the following spring, a dove built a nest in her branches and new green buds appeared. Over the years, the tree, although still bearing scars, grew tall and strong. She is planted in a place of honor on the 9/11 Memorial Plaza and now known as "The 9/11 Survivor Tree." This story imaginatively describes the experience, memories, and feelings of the tree throughout her healing and her eventual return home. All profits from the sale of this book go to charity.

[Insect Ecology, Peter W. Price](#) , 1997, 0471161845, 9780471161844. Insect Ecology is the world's foremost reference to the never-ending and crucial interactions of the richest taxon of organisms on this earth, with perhaps some 8 million extant species. Now in its Third Edition and twentieth year of publication, Insect Ecology has endured as an unparalleled classic. Taking the reader from an explanation of the science to its significance as a discipline, Insect Ecology is a meticulous, systematic examination of the underlying dynamics of plant-insect interactions, predation, parasites and hosts, and mutualistic relationships, including pollination ecology, that are central to understanding the insects' role in nature. Viewing the largely invisible drama of natural protagonists and antagonists, hidden in the lush foliage of a tropical rain forest or temperate woody vegetation, Peter Price details the unique traits, behaviors, and functions of insects, while placing them in the broader contexts of their places in food webs, ecosystem function, population dynamics, and community interactions. The author also describes the various levels of insect interaction, from trophic relationships (Part II), populations (Part III), and communities (Part IV), while unfolding the infinite variety of insect species and their visible legacy in the fossil record. Full of fascinating details ("Ants are everywhere, but only occasionally noticed. They run much of the terrestrial world as the premier soil turners." "[Insect] galls provide tanning acids and the basis for inks."), Insect Ecology offers detail and breadth, while providing timely discussion on the conservation of biodiversity, the existence and study of vacant ecological niches, latitudinal gradients in species richness, and evolutionary perspectives on population dynamics. The book also examines the development of theory in insect ecology and how it is advanced. Novel features in the Third Edition include four new chapters, covering the importance of insect ecology, the development of theory in the science, hypotheses on plant and herbivore interactions, and a synthesis chapter on population dynamics. Subheadings within chapters provide easier subject access, and many new figures contribute to the book's aesthetic appeal. Clearly organized and with a bibliography of 2,000 references to up-to-date and classic literature, the Third Edition of Insect Ecology is a practical, well-formatted resource. Also copiously illustrated with over 350 figures, many new to this edition, Insect Ecology is a lush graphic tour of the minute, often startling universe of insects in their native habitat. With a

history in geologic time much older than the terrestrial vertebrates, insects speak to us-the scarab beetle encased in amber, or New Zealand's endangered large Wellington speargrass weevil-of a resilience and ingenuity oddly reflective of our own. Insect Ecology has let generations of agriculturalists, ecologists, entomologists, environmental scientists, foresters, professionals, and students understand the insects' world, and ours. With unerring detail and breadth, Insect Ecology has described for generations of professionals the interactions and dynamics of the world's richest group of species-the insects-whose wildly various 8 million forms have been the source of endless fascination and study. From caterpillars to the goliath beetle, from the adult copper butterfly to the agromyzid fly, the insect universe is at once ordinary and exotic, capturing, in microcosm, nature's complexity and beauty.

Travelling against the backdrop of Ghana's Black Stars' thrilling performance in the 2010 World Cup, Alan Whelan sets off on a motorcycle adventure into the heart of West Africa. Curious to discover the current state of Ghana after two generations of independent rule within his lifetime, he rides optimistically on a continent that has had its fair share of trauma. On this, his second major African journey, he aims to prove the lie to the warning in 1951 by a British politician that to allow African colonies their independence would be "like giving a child a latch-key, a bank account and a shotgun." He meets witches, fetish priestesses, custodians of the slave trade, and the only white chief of Ashanti who confirm that - if Ghana is an indication of progress - the future of the continent is bright. The fuel for the trip becomes the electric atmosphere in every town and village he visits as the Black Stars progress through the World Cup taking place in South Africa. He becomes convinced that their success is partially down to the mysterious black powder he is given by a fetish priest. 'It is from the bush, ' says the priest. 'This powder will keep you safe. It is powerful!' But will it see the Black Stars to the final - and will it see him to the end of the journey?

[American Encounters: Art, History and Cultural Identity, Janet Catherine Berlo, Bryan Jay Wolf, Jennifer L. Roberts](#) , 2008, 0136140483, 9780136140481. American Encounters is a long-awaited dynamic new narrative of the history of American art that focuses on historical encounters among diverse cultures, upon broad structural transformations such as the rise of the middle classes and the emergence of consumer and mass culture, and on the fluid exchanges between "high" art and vernacular expression. The text emphasizes the intersections among cultures and populations, as well as the influences, borrowings, and appropriations that have enriched and vitalized our collective cultural heritage. "There was a readily perceived need for an up-to-date survey of American art that addressed the thematic, cultural, and historical concerns of the field in the 21st century. American Encounters offers a new narrative of American art organized around the theme of cross-cultural exchanges. It locates America at the cross-roads of cultural encounters between Asia, Africa, Europe, and the New World, for over five centuries. The authors do not treat traditions separately, rather they explore how peoples and cultures encounter and influence each other and then evolve based on an exchange of ideas, materials etc."

["One Valley and a Thousand": Dams, Nationalism, and Development, Daniel Klingensmith](#) , 2007, 0195687833, 9780195687835. By the end of the twentieth century, more than 45,000 large dams were built world wide displacing millions of people, and dramatically altering both ecosystems and social systems centered on rivers. A majority of these dams were constructed after 1945. This book seeks to explain the enormous global investment in dams since 1945 and

explores their connections to political ideologies. It shows the lack of concern and awareness of policymakers and electorates about the human tragedies. It also sheds light on the disappointing performance of many river valley projects. The author traces the history of the politics and the political culture that influenced economic and technical decisions in the creation of particular dams in India and the United States. In doing so, he contributes to a broader discussion on the political significance of dams worldwide, and of the connections between development and nationalism.

Beaten by the boom and bust of the dot.com bubble, mixed up in corporate scandals and accused of uncontrolled and rampant conflict of interest, the game seemed over for the masters of the universe. Then the bounce back came. New rules, promises to be more vigilant and rising markets took the heat off. Having learned their lesson and paid their dues, the investment banks could be relied upon to oil the wheels of capitalism in this best of all possible worlds. Philip Augar's cutting critique challenges this consensus. By being able to act simultaneously for buyers, sellers and themselves, they can generate huge returns at their customers expense. This book explains how this systematic and legal transfer of wealth occurs and answers some important questions. Do the investment banks add value through their advice? Is there a cartel? Are there any alternatives? What will happen next?

[Dear John, I Love Jane: Women Write About Leaving Men for Women, Candace Walsh, Laura Andr](#) , 2010, 1580053394, 9781580053396. The new buzzword in female sexuality is sexual fluiditythe idea that for many women, sexual identity can shift over time, often in the direction of same-sex relationships. Examples abound in popular culture, from actress Cynthia Nixon, who left her male partner of 15 years to be with a woman, to writer and comedienne Carol Leifer, who divorced her husband for the same reason. In a culture increasingly open to accepting this fluidity, Dear John, I Love Jane is a timely, fiercely candid exploration of female sexuality and personal choice. The book is comprised of essays written by a broad spectrum of women, including a number of well-known writers and personalities. Their stories are sometimes funny, sometimes painful but always achingly honest accounts of leaving a man for a woman, and the consequences of making such a choice. Arousing, inspiring, bawdy, bold, and heartfelt, Dear John, I Love Jane is an engrossing reflection of a new era of female sexuality.

[Many Worlds?: Everett, Quantum Theory, & Reality, Simon Saunders, Jonathan Barrett, Adrian Kent, David Wallace](#) , 2010, 0191614114, 9780191614118. What would it mean to apply quantum theory, without restriction and without involving any notion of measurement and state reduction, to the whole universe? What would realism about the quantum state then imply? This book brings together an illustrious team of philosophers and physicists to debate these questions. The contributors broadly agree on the need, or aspiration, for a realist theory that unites micro- and macro-worlds. But they disagree on what this implies. Some argue that if unitary quantum evolution has unrestricted application, and if the quantum state is taken to be something physically real, then this universe emerges from the quantum state as one of countless others, constantly branching in time, all of which are real. The result, they argue, is many worlds quantum theory, also known as the Everett interpretation of quantum mechanics. No other realist interpretation of unitary quantum theory has ever been found. Others argue in reply that this picture of many worlds is in no sense inherent to quantum theory, or fails to make physical sense, or is scientifically inadequate. The stuff of these worlds, what they are made of, is never adequately explained, nor are the worlds precisely defined; ordinary ideas about time and identity over time are compromised; no satisfactory role or substitute for probability can be found in many worlds theories; they can't explain experimental data; anyway, there are attractive realist alternatives to many worlds. Twenty original essays, accompanied by commentaries and discussions, examine these claims and counterclaims in depth. They consider questions of ontology - the existence of worlds; probability - whether and how probability can be related to the branching structure of the quantum state; alternatives to many worlds - whether there are one-world realist interpretations of quantum theory that leave quantum dynamics unchanged; and open questions even given many worlds, including the multiverse concept as it has arisen elsewhere in modern cosmology. A comprehensive introduction lays out the main arguments of the book, which provides a state-of-the-art guide to many worlds quantum theory and its problems.

For ten years, Calvin and Hobbes was one the world's most beloved comic strips. And then, on the last day of 1995, the strip ended. Its mercurial and reclusive creator, Bill Watterson, not only finished the strip but withdrew entirely from public life. In Looking for Calvin and Hobbes, Nevin Martell sets out on a very personal odyssey to understand the life and career of the intensely private man behind Calvin and Hobbes. Martell talks to a wide range of artists and writers (including Dave Barry, Harvey Pekar, and Brad Bird) as well as some of Watterson's closest friends and professional colleagues, and along the way reflects upon the nature of his own fandom and on the extraordinary legacy that Watterson left behind. This is as close as we're ever likely to get to one of America's most ingenious and intriguing figures - and it's the fascinating story of an intrepid author's search for him, too.

predecessors, 'it is impossible to know/where music ends, the world begins.' H.L. Hix In Bruce Bond's seventh book, we see a sustained exploration of mortality and its embodiment in the consolations of beauty, most notably in music. As if even the respite of song is action, its silence no less. Even the bend and reach of architecture that rises out of the smolder and back, even the legs of the arc that return the way the sun returns to a black well, its trespass quiet, slow, a ghost, a coin, a wish gone deep as the day grows old. Bruce Bond teaches at the University of North Texas and is poetry editor for American Literary Review.

[Donald Judd & Josef Albers: Color, Material, Space](#), , 2013, 3937572988, 9783937572987. Donald Judd assigned Josef Albers a prime place in his search for a way past Abstract Expressionism, particularly for the German artist's use of color and of rectangular variants, which Judd explored in his final series of works. Albers overturned the traditional conception that color is either a harmoniously composed totality or symbolically allusive, and Judd likewise rejected traditional color usage in his wall pieces, stressing instead their self-reflexivity and "uncanny materiality." This most recent volume in the series "Albers in Context," sponsored by Bottrop, Germany's Josef Albers Museum, examines the affiliations between Albers and Judd, presenting a selection of their works side by side. It includes a 1991 essay on Albers that Judd wrote on the occasion of an Albers exhibition in Marfa, Texas, where Judd resided from 1971 until his death in 1994.

growing concern about environmental issues, Dr. Jeremy Benstein, founder and associate director of the Heschel Center for Environmental Learning and Leadership, explores the relationship Jews have with the natural world, the ways in which Judaism contributes to contemporary social-environmental issues, the extent to which Judaism is part of the problem and how it can be part of the solution. Drawing from the Bible, rabbinic literature, midrash, the Jewish prayer book, and Jewish theology and philosophy, Benstein examines the dilemma of having dominion over the earth while serving and preserving it; what the Jewish calendar, including Shabbat and holidays, teaches us about our relationship with nature and the environment; and how contemporary environmental challenges present new and mind-opening opportunities for growth in Jewish thought and spiritual life.

[The Early Text of the New Testament, Charles E. Hill, Michael J. Kruger](#) , 2012, 0191505048, 9780191505041. The Early Text of the New Testament aims to examine and assess from our earliest extant sources the most primitive state of the New Testament text now known. What sort of changes did scribes make to the text? What is the quality of the text now at our disposal? What can we learn about the nature of textual transmission in the earliest centuries? In addition to exploring the textual and scribal culture of early Christianity, this volume explores the textual evidence for all the sections of the New Testament. It also examines the evidence from the earliest translations of New Testament writings and the citations or allusions to New Testament texts in other early Christian writers.

[Selected Poetry, Thomas Hardy](#) , 1996, 0192832735, 9780192832733. Thomas Hardy is among the best-loved of the great English poets, perhaps drawing his great popularity from the elegaic tone of much of his finest verse and the universality of his subject matter: birth, childhood, love, marriage, age, and death. Those elegies inspired by the death of his first wife Emma are some of his best, and are well represented in this new selection of his verse. Prepared by Samuel Hynes, the editor of the definitive Oxford English Texts Complete Works of Thomas Hardy, this volume includes a selection of Hardy's poetry that spans his life, verses that influenced later poets as diverse as Robert Graves and Philip Larkin, Ezra Pound and W.H. Auden. About the Series: For over 100 years Oxford World's Classics has made available the broadest spectrum of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, voluminous notes to clarify the text, up-to-date bibliographies for further study, and much more.

[Experimental Software Engineering Issues:: Critical Assessment and Future Directions. International Workshop, Dagstuhl](#)

[Castle, Germany, September 14-18, 1992. Proceedings, ISSN 0302-9743, H.Dieter Rombach, Victor R. Basili, Richard W. Selby](#) , 1993, 3540570926, 9783540570929. We have only begun to understand the experimental nature of software engineering, the role of empirical studies and measurement within software engineering, and the mechanisms needed to apply them successfully. This volume presents the proceedings of a workshop whose purpose was to gather those members of the software engineering community who support an engineering approach based upon empirical studies to provide an interchange of ideas and paradigms for research. The papers in the volume are grouped into six parts corresponding to the workshop sessions: The experimental paradigm in software engineering; Objectives and context of measurement/experimentation; Procedures and mechanisms for measurement/experimentation; Measurement-based modeling; packaging for reuse/reuse of models; and technology transfer, teaching and training. Each part opens with a keynote paper and ends with a discussion summary. The workshop served as an important event in continuing to strengthen empirical software engineering as a major subdiscipline of software engineering. The deep interactions and important accomplishments from the meeting documented in these proceedings have helped identify key issues in moving software engineering as a whole towards a true engineering discipline.

[Essential Values-Based Practice: Clinical Stories Linking Science with People, K. W. M. Fulford, Ed Peile, Heidi Carroll](#) , 2012, 0521530253, 9780521530255. This book will help clinicians acquire and develop the processes and skills of values-based practice. The aim of most patient-clinician consultations is to improve health outcomes. Often they succeed, and patients are satisfied and empowered. However, some consultations are unsatisfactory and result in failure to improve health outcomes and dissatisfaction on the part of patients, carers or clinicians. When consultations fail to achieve the desired results, the cause is not usually a failure of evidence-based practice. Today's clinicians are trained in evidence-based medicine, educated, updated and appraised. The most likely reason why things go wrong is a failure of values-based practice - not ascertaining the relevant values perspectives and acting on them in a coherent and purposeful manner. If you rehearse and practise the elements of values-based practice detailed in this book, you will find your consultations more personally rewarding and your patients are likely to derive more benefit.

[The Knowability Paradox, Jonathan L. Kvanvig](#) , 2008, 0199556695, 9780199556694. The paradox of knowability, derived from a proof by Frederic Fitch in 1963, is one of the deepest paradoxes concerning the nature of truth. Jonathan Kvanvig argues that the depth of the paradox has not been adequately appreciated. It has long been known that the paradox threatens antirealist conceptions of truth according to which truth is epistemic. If truth is epistemic, what better way to express that idea than to maintain that all truths are knowable? In the face of the paradox, however, such a characterization threatens to undermine antirealism. If Fitch's proof is valid, then one can be an antirealist of this sort only by endorsing the conclusion of the proof that all truths are known. Realists about truth have tended to stand on the sidelines and cheer the difficulties faced by their opponents from Fitch's proof. Kvanvig argues that this perspective is wholly unwarranted. He argues that there are two problems raised by the paradox, one that threatens antirealism about truth and the other that threatens everybody's view about truth, realist or antirealist. The problem facing antirealism has had a number of proposed solutions over the past 40 years, and the results have not been especially promising with regard to the first problem. The second problem has not even been acknowledged, however, and the proposals regarding the first problem are irrelevant to the second problem. This book thus provides a thorough investigation of the literature on the paradox, and also proposes a solution to the deeper of the two problems raised by Fitch's proof. It provides a complete picture of the paradoxicality that results from Fitch's proof, and presents a solution to the paradox that claims to address both problems raised by the original proof.

The pit has now closed and Horden remains alive only in the memories of its old people. In search of his forebears Mark Hudson listens to tales of how it was of the hardships and traditions of the miner's life, of the struggles and triumphs of the union. And tales too of his ancestors, but these are curiously fickle: they flicker and fluctuate; the only certainty is the pit. COMING BACK BROCKENS is a brilliant portrait of a world that has gone for ever, an angry indictment of what has taken its place, and a search for personal meaning in the past.

[Electric Propulsion for Boats, Charles A. Mathys](#) , 2010, 0984377514, 9780984377510. After years of researching, building and testing many designs, Charlie Mathys has found the answers to inexpensive "Electric Propulsion for Boats." This book starts with an overview of his successes and failures. With each success Charlie moves ahead until you have an excellent understanding of electric propulsion for boats. This book delves deeply into the technical aspects of electric propulsion. However the information remains extremely easy to understand. The book will take you through each phase of the required work thoroughly, with detailed explanations for each step along the way. You will not find another book

that explains all aspects of this subject so completely or in such an easily understood format. Although Charlie has limited the examples to smaller boats, the processes can easily be modified for larger vessels. If you have an interest in quiet, clean and green propulsion for your boat, this book is the perfect place to start your project

[Jesus, Last of the Pharaohs: The True History of Religion Revealed, Ralph Ellis](#) , 2001, 0953191370, 9780953191376.

There is good evidence to be found within the Bible, Torah and Koran that indicates that the biblical patriarchs were pharaohs of Egypt, they were not poor shepherds but the Hyksos Shepherd pharaohs of Egypt. The biblical exodus was therefore the Hyksos exodus from Egypt, a historical event where some half a million people evacuated Egypt after a civil war with the Theban pharaohs. Having found the biblical Saul in the historical record, it became apparent that there were some 'new' historical references to the biblical Jesus. Jesus was descended from this Hyksos royal vine, a Hyksos prince in exile. He was the governor of Tiberias, the rebel leader who led an army trying to save Jerusalem from the rebel Jewish factions and he died in AD65 after the revolt failed -- some thirty years after the presumed crucifixion. Jesus, Last of the Pharaohs is a new and fantastic adventure through the Biblical texts, with dramatic re-interpretations of the old

creed at every twist and turn in the story. Yet despite the unbelievable nature of some of these claims, the fact is that all of the arguments in this book are fully supported by the established Biblical and historical texts. Theologians and historians cannot argue with the underlying thesis in this book: it is written in black and white -- they can only dispute the radical interpretation being placed upon those texts.

[A guide to biomolecular simulations, Oren M. Becker, Martin Karplus](#) , 2006, 1402035861, 9781402035869. Molecular dynamics simulations have become instrumental in replacing our view of proteins as relatively rigid structures with the realization that they were dynamic systems, whose internal motions play a functional role. Over the years, such simulations have become a central part of biophysics. Applications of molecular dynamics in biophysics range over many areas. They are used in the structure determination of macromolecules with x-ray and NMR data, the modelling of unknown structures from their sequence, the study of enzyme mechanisms, the estimation of ligand-binding free energies, the evaluation of the role of conformational change in protein function, and drug design for targets of known structures. The widespread application of molecular dynamics and related methodologies suggests that it would be useful to have available an introductory self-contained course by which students with a relatively limited background in chemistry, biology and computer literacy, can learn the fundamentals of the field. This Guide to Biomolecular Simulations tries to fill this need. The Guide consists of six chapters which provide the fundamentals of the field and six chapters which introduce the reader to more specialized but important applications of the methodology.

[Afro-Cuban myths: Yemay and other orishas, Rmulo Lachataer, Christine Ayorinde](#) , 2005, 1558763171, 9781558763173.

Romulo Lachataer (1909-1952) was the first Afro-Cuban intellectual to write extensively on Afro-Cuban religious practices. Together with Fernando Ortiz and Lydia Cabrera, he was the founder of Afro-Cuban research and made it part of the Cuban heritage. His main works offer a description of Santeria and fall somewhere between ethnology and literature. This book deals with the myths of the orishas. Since it was published in 1938 under the title *Oh, Mio Yemaya!*, it has become a classic in the field. It was the first attempt in Cuba to gather a sizeable sample of the numerous patákiés or myths characteristic of the Regla de Ocha or Santeria, the most widespread of the Afro-Cuban religions practiced on the island. The author had to overcome prejudice that considered the religion and its associated literature undeserving of intellectual attention and at the same time penetrate the secrecy in which black believers cloaked their beliefs and practices, fearful with good reason of attracting disdain, desecration, and persecution.

[Atomic Physics: Precise Measurements and Ultracold Matter, Massimo Inguscio, Leonardo Fallani](#) , 2013, 0198525842,

9780198525844. This book illustrates the history of Atomic Physics and shows how its most recent advances allow the possibility of performing precise measurements and achieving an accurate control on the atomic state. Written in an introductory style, this book is addressed to advanced undergraduate and graduate students, as well as to more experienced researchers who need to remain up-to-date with the most recent advances. The book focuses on experimental investigations, illustrating milestone experiments and key experimental techniques, and discusses the results and the challenges of contemporary research. Emphasis is put on the investigations of precision physics: from the determination of fundamental constants of Nature to tests of General Relativity and Quantum Electrodynamics; from the realization of ultra-stable atomic clocks to the precise simulation of condensed matter theories with ultracold gases. The book discusses these topics while tracing the evolution of experimental Atomic Physics from traditional laser spectroscopy to the revolution introduced by laser cooling, which allows the manipulation of atoms at a billionth of a degree above

absolute zero and reveals new frontiers of precision in atomic spectroscopy.

[Receptor and ion-channel trafficking: cell biology of ligand-gated and voltage-sensitive ion channels \(molecular and cellular neurobiology\)](#), [Stephen John Moss, Jeremy Henley](#) , 2002, 0192632248, 9780192632241. A volume in the Molecular and Cellular Neurobiology series. This book reviews the recent advances in our understanding of the molecular and cellular mechanisms that control the assembly, transport, targeting and anchoring of the protein complexes making up the most important ion channels and receptor families, fundamental to synaptic function. Improved understanding of these processes is expected to reveal novel therapeutic targets relevant to a range of disease states. The first section of the book contains three chapters dealing with cation channels and provides an accessible, succinct and comprehensive account of what is known about the structures and the assembly and targeting of these multimeric proteins. The focus of the book then moves on to cover ligand-gated ion channels with two chapters on acetylcholine receptors. The final section of the book contains four chapters covering the excitatory and inhibitory amino acid receptors. *Receptor and Ion-Channel Trafficking* provides an integrated overview of the significant recent advances in the field of molecular neurobiology and will be essential reading for all researchers in neuroscience, neurobiology, biochemistry, cellular and molecular biology.

[Plane Image: A Brice Marden Retrospective](#), [Gary Garrels](#) , 2006, 087070446X, 9780870704468. In the autumn of 2006, The Museum of Modern Art will present *Brice Marden: A Retrospective*, the artist's first major American retrospective. The exhibition, which will travel to San Francisco and Berlin, will constitute an unprecedented gathering of Marden's work, with more than 50 paintings and an equal number of drawings, balanced across the artist's career. The accompanying catalogue is the first book to take readers through the full course of Marden's work as it has developed over more than 40 years from the early 1960s to the present, showing his gradual, deliberate evolution, along with his constant exploration of light, color and surface at every turn. Marden's first 20 years of work, characterized by the luminous monochrome panels for which he won his first acclaim, will for the first time appear alongside the celebrated production of the past 20 years, which followed a shift in the mid-1980s to calligraphic gestures in shimmering grounds, and another shift in the past decade to heightened color. Two of Marden's newest paintings appear here for the first time. Gary Garrels interprets Marden's work and places it in historical context. Carol C. Mancusi-Ungaro, of the Center for the Technical Study of Modern Art at Harvard, examines issues of materials, processes and conservation. Richard Shiff, Brenda Richardson and Michael Duffy explore Marden's early use of a grid and his engagement with time and space in the studio, as well as his observation of the elemental qualities of nature, his representational links to nature, and the distinctive emotional effects of the abstract monochrome works for which he was initially recognized. Marden himself addresses his working methods in an interview, and a comprehensive chronology, exhibition history and bibliography

close the book out.

[The Jewish Jesus: Revelation, Reflection, Reclamation, Zev Garber](#) , 2011, 1557535795, 9781557535795. There is a general understanding within religious and academic circles that the incarnate Christ of Christian belief lived and died a faithful Jew. This volume addresses Jesus in the context of Judaism. By emphasizing his Jewishness, the authors challenge today's Jews to reclaim the Nazarene as a proto-rebel rabbi and invite Christians to discover or rediscover the church's Jewish heritage. The essays in this volume cover historical, literary, liturgical, philosophical, religious, theological, and contemporary issues related to the Jewish Jesus. Several of them were originally presented at a three-day symposium on "Jesus in the Context of Judaism and the Challenge to the Church," hosted by the Samuel Rosenthal Center for Judaic Studies at Case Western Reserve University in 2009. In the context of pluralism, in the temper of growing interreligious dialogue, and in the spirit of reconciliation, encountering Jesus as living history for Christians and Jews is both necessary and proper. This book will be of particular interest to scholars of the New Testament and early church who are seeking new ways of understanding Jesus in his religious and cultural milieu, as well Jewish and Christian theologians and thinkers who are concerned with contemporary Jewish and Christian relationships.

[Facing the Gods: Epiphany and Representation in Graeco-Roman Art, Literature and Religion, Verity Jane Platt](#) , 2011, 0521861713, 9780521861717. This is the first history of epiphany as both a phenomenon and as a cultural discourse within the Graeco-Roman world, exploring divine manifestations and their representations, in visual terms as well as in literary, historical and epigraphic accounts. Verity Platt sets the cultural analysis of epiphany within a historical framework that explores its development from the archaic period into the Roman empire. In particular, a surprisingly large number of the images that have survived from antiquity are not only religious, but epiphanically charged. Verity Platt argues that the enduring potential for divine incursions into mortal experience provides a structure of cognitive reliability that supports both ancient religion and mythology. At the same time, Graeco-Roman culture exhibits a sophisticated awareness of the difficulties of the apprehension of deity, the representation of divine presence, and the potential for the manmade sign to lead the worshipper back to an unmediated epiphanic encounter.

[Selected Poems, Robert Browning](#) , 2004, 0141921285, 9780141921280. Robert Browning was one of the greatest of English poets, whose intense and original imagination enabled him to transform any subject he chose - whether everyday or sublime - into startling memorable verse. In his work he brought to life the personalities of a diverse range of characters, and introduced a new immediacy, colloquial energy and psychological complexity to the poetry of his day. This selection brings together verse ranging from early dramatic monologues such as the chilling 'My Last Duchess' and the ribald 'Fra Lippo Lippi', which show his gift for inhabiting the mind of another, to the popular children's poem 'The Pied Piper of Hamelin' and many lesser known works. All display his innovative techniques of diction, rhythm and symbol, which transformed Victorian poetry and influenced major poets of the twentieth century such as Ezra Pound, T. S. Eliot and Robert Frost.
