[Connecting with People: Essential Skills for Building Trust and Rapport With Others, Donald Caplin, Frank Swiatek](#) , 2003, 0972684700, 9780972684705. Are losing the connection? Modern technology was designed to make out lives more productive and efficient. We instantly communicate via fax and email, and we don't have to waste driving time to attend important meetings. We carry pagers and cell phones so we can stay connected. As technology develops faster and better ways to get the job done, it is dissolving our ability to connect with people. There are management books that teach us how to manage ourselves and others, but few broach the most important element of success-connecting with people. The authors Don Caplin and Frank Swiatek have combined their wealth of experience and expertise to show that you don't have to be tests, and techniques that will help you attain the most important key to success. This book is a necessary tool for anyone who wants to enrich both his professional and personal relationships.

[The Blue Hour, Alonso Cueto](#) , 2013, 009953309X, 9780099533092. A stunning, prizewinning novel exploring the aftermath of the Peruvian Civil War, by one of the greatest living South American writers. Adrian Ormache is a prosperous lawyer living in Lima. He has the perfect life: a great career, beautiful wife, two doting and intelligent daughters. But when his mother dies a series of events devastate his entire view of the past, his parents, and his country. Adrian's mother leaves a letter indicating that she was being blackmailed. Confused, Adrian talks to his brother, who tells him that their long dead father Colonel Ormache, who led military operations against the 'Shining Path' guerrillas during the terrible Peruvian Civil War of the 1980's, was not quite the hero Adrian had always considered him to be: he routinely had POWs and civilian women raped, tortured and executed. His mother's blackmailer is revealed to be one of the Colonel's former subordinates. When Adrian confronts him the man gives him the name of the one prisoner whom the Colonel spared and kept as a lover -- Miriam. Adrian becomes obsessed with finding Miriam. His search is cathartic and all-consuming, a journey that takes him into a country that is a far-cry from the stable, civilised Lima he's used to, a people still haunted by a harrowing, ongoing war, and some truths about his family -- and himself -- that he

could never have imagined.

[Type-theoretical Grammar](#), Aarne Ranta , 1994, 019853857X, 9780198538578. It is the aim of INDICES to document recent explorations in the various fields of philosophical logic and formal linguistics and their applications in other disciplines. The main emphasis of this series is on self-contained monographs covering particular areas of recent research and surveys of methods, problems, and results in all fields of inquiry where recourse to logical analysis and logical methods has been fruitful. INDICES will contain monographs dealing with the central areas of philosophical logic (extensional and intensional systems, indexical logics, non-classical logics, philosophy of logic, etc.) as well as studies in which these systems are applied to specific issues in philosophy, in the formal semantics of natural languages, the foundations of linguistic theory, in computational linguistics, and in theoretical computer science. Constructive type theory was first presented in 1970, by the Swedish logician Per Martin-Lof. It has become one of the main approaches used in the foundations of mathematics and computer science. But it has remained relatively unknown among linguists and philosophers, although it provides a considerable extension of the concepts and techniques of logic. The book first gives an introduction to type theory from the point of view of linguistics and the philosophy of language. Type theory is then applied in the areas of quantification, anaphora, temporal reference, and the structure of text and discourse. By virtue of the type-theoretical concepts of proof object and context, various phenomena of dependence and progression in language can be discussed in precise terms, and several well-known problems can be solved. A categorial grammar is presented to generate formally a fragment of English, together with an example of a computer implementation.

9780203871966. A one stop, comprehensive textbook, covering the three essential components of air pollution science. The Third Edition has been updated with the latest developments, especially the inclusion of new information on the role of air pollutants in climate change. The authors give greater coverage to the developing economies around the world where air pollution problems are on the rise. The Third Edition continues to cover a wide range of air quality issues, retaining a quantitative perspective. Topics covered include - gaseous and particulate air pollutants, measurement techniques, meteorology and dispersion modelling, mobile sources, indoor air, effects on plants, materials, humans and animals. Moving away from classical toxic air pollutants, there is a chapter on climate change and another on the depletion of stratospheric ozone. A special feature of this new edition is the inclusion of a fresh chapter on air pollution mitigation by vegetation, mainly its role in maintaining a sustainable urban environment. Recommended for upper-level undergraduate and postgraduate courses specialising in air pollution, both for environmental scientists and engineers. The new material included in the Third Edition extends its use by practitioners in consultancies or local authorities.

[British Social Attitudes: The 16th Report, ISSN 0267-6869, Roger Jowell](#) , 1999, 184014050X, 9781840140507. Britain is, on the whole, a well-documented nation. We know or are able to find out a great deal about our characteristics as a society - who we are and what we do. But we know much less about our character - what we think and feel about our world and ourselves. Very little systematic material is publicly available on the nation's values, whether or how they have been changing and the extent to which different sections of the population vary in their attitudes and beliefs. British Social Attitudes compiles, describes and comments upon a range of current social attitudes. The information is compiled from around 3,500 interviews carried out by the National Centre for Social Research (formerly SCPR) among a nationwide sample in an annual series of surveys. The series seeks to chart changes in British social values during the 1980s and 1990s in relation to other changes in society and is core-funded by the Gatsby Charitable Foundation. A full report is published each year. The 16th Report summarises and interprets data from the most recent survey in the series as well as making comparisons with findings from previous surveys. We focus particularly on the extent to which the attitudes of the British public mirror the politics of the new government. The dataset is publicly available through the Data Archive so that others can explore the results further within their spheres of interest.

It tells of her inner-most thoughts, as she climbs back from "the pits of hell," to that golden promise of something better. Near the beginning, she often prays to God for peace that doesn't come. Halfway through her quest, she begins to see that reality is "not so bad!" Later, she meets her younger self. At last, she discovers she has choices she never dreamed possible, in spite of her ongoing battle with Schizophrenia. This wonderful book has a bright, cherry-red cover with a sketch drawn by the author. It has 194 pages, and measures 8.5"x5.5". [Eternity Base, Bob Mayer](#) , 1996, 0891415092, 9780891415091. Maverick federal employee Sammy Pintella, obsessed with uncovering the fate of her MIA father, makes a startling discovery while rifling through some inactive government files. A dozen faded, old black and white photographs seem to prove the existence of a secret U.S. military base built in the frozen wasteland of Antarctica during the height of the Vietnam War. With her sister Conner, a Satellite News Network reporter looking for a big story, Sammy sets out to find the answers: What was a Special Forces MACV-SOG unit, supposedly operating in Vietnam, doing in Antarctica? Why has the existence of this base remained top secret for more than 25 years? Is there a link between the secret base and the equally mysterious disappearance of their father? Aided by ex-Special Forces officer Dave Riley, Sammy and Conner, with the blessing of her news network's flamboyant president, head for Antarctica to track down the mysterious military installation called Eternity Base. Caught between Sammy's fixation and Conner's career ambition, Riley's job becomes keeping them all alive - to tell the secret of Eternity Base. Riley and the two sisters, engaged in a classic struggle of survival against the elements, must not only endure in the harshest weather on the planet, but must also stop a foreign commando unit sent to steal the secret hidden beneath the ice.

[Coming to Terms with the Nation: Ethnic Classification in Modern China, Thomas Mullaney](#) , 2010, 0520947630, 9780520947634. China is a vast nation comprised of hundreds of distinct ethnic communities, each with its own language, history, and culture. Today the government of China recognizes just 56 ethnic nationalities, or minzu, as groups entitled to representation. This controversial new book recounts the history of the most sweeping attempt to sort and categorize the nation's enormous population: the 1954 Ethnic Classification project (minzu shibie). Thomas S. Mullaney draws on recently declassified material and extensive oral histories to describe how the communist government, in power less than a decade, launched this process in ethnically diverse Yunnan. Mullaney shows how the government drew on Republican-era scholarship for conceptual and methodological inspiration as it developed a strategy for identifying minzu and how non-Party-member Chinese ethnologists produced a scientific survey that would become the basis for a policy on nationalities.

[Street Foods: Urban Food and Employment in Developing Countries, Irene Tinker](#) , 1997, 0195117115, 9780195117110.

"Street foods," the term coined by Irene Tinker for the Equity Policy Center's action-research project, defines the study of all meals, snacks, and sweets currently sold on the streets of the world for immediate consumption. The culmination of fifteen years of research in provincial cities in the Philippines, Thailand, Indonesia, Bangladesh, Egypt, Nigeria, and Senegal, Street Foods is the first empirical study of those who make, sell, and eat these foods. The project detailed in this book was and will be a means to affect change on both micro and macro levels: the findings were utilized to improve the income of the vendors themselves and the safety of the food they sold, and to cause makers of public policy to recognize the value of this informal sector--instead of trying to restrict its trade. The accumulated power of the Street Food Project's data brings new insights to the nature of microenterprises, the interventions that truly help improve income and food safety, and the gender aspects of the street food trade. Challenging conventional wisdom about the informal sector and assumptions in development theory about women, Street Foods will reframe the major debates shaping research and aid policies for poor, small-scale entrepreneurs in developing countries.

[Following the Master: A Biblical Theology of Discipleship, Michael J. Wilkins](#) , 2010, 0310877253, 9780310877257. In the aftermath of the waves of discipleship programs that have swept over the church in the last 30 years, clergy, and laypersons alike are more confused than ever about what it means to be a disciple of Jesus Christ. What should a disciple of Jesus look and act like today? What is the relationship between discipleship and salvation, between discipleship and sanctification, between discipleship and ministry? How were disciples of Jesus different from other disciples in the ancient world? How did the early church carry out Jesus' agenda in "making disciples of all the nations"? In *Following the Master*, Michael J. Wilkins addresses these and many other questions that perplex the church today- not by offering another discipleship program or manual but by presenting a comprehensive biblical theology of discipleship. *Following the Master* compares other forms of master-disciple relationships in existence in the ancient Judaism and Greco-Roman world, traces Jesus' steps as he called and developed disciples, and Mediterranean world as it followed Jesus' command to make disciples. *Following the Master* lays the groundwork necessary for developing biblical discipleship ministries in the church, on the mission field, and in parachurch ministries. It is essential reading for all pastors, students, and Christian workers.

[CONTEST: the United Kingdom's strategy for countering terrorism, Great Britain: Home Office](#) , 2011, 0101812329, 9780101812320. This is the third published version of the United Kingdom's counter-terrorism strategy, CONTEST. This new strategy reflects the changing terrorist threat and incorporates new Government policies on counter-terrorism. The strategy, though, will continue to be organised around four workstreams, each comprising a number of key objectives:

pursue - stop terrorist attacks; prevent - to stop people becoming terrorists or supporting terrorism; protect - to strengthen our protection against a terrorist attack; and prepare - to mitigate the impact of a terrorist attack.

International counter-terrorism work since 9/11 has made considerable progress in reducing the threats we face. Al Qai'da is now significantly weaker than it has been for ten years. But it is recognised that the overall terrorist threat we face continues to be significant and that is reflected in this strategy. Whilst the Government is determined to maintain the capabilities to meet the aim of reducing the risk to the UK and its interests overseas it is also determined to have a strategy that is not only more effective but more proportionate, focused and more precise

Caesar's narrative offers insights into his military strategy & paints a fascinating picture of his encounters with the inhabitant of Gaul and Britain, as well as offering lively portraits of a number of key characters such as the rebel leaders and Gallic chieftains. This can also be read as a piece of political propaganda, as Caesar sets down his version of events for the Roman public, knowing that he faces civil war on his return to Rome.

Four years in the making, 'SuperFreakonomics' asks not only the tough questions, but the unexpected ones - What's more dangerous, driving drunk or walking drunk? Why is chemotherapy prescribed so often if it's so ineffective? Can a sex change boost your salary? How is a street prostitute like a department-store Santa? Why are doctors so bad at washing their hands? How much good do car seats do? What's the best way to catch a terrorist? Did TV cause a rise in crime? What do hurricanes, heart attacks, and highway deaths have in common? Are people hard-wired for altruism or selfishness? Can eating kangaroo save the planet? Which adds more value - a pimp or a Realtor? Levitt and Dubner mix smart thinking and storytelling, whether investigating a solution to global warming or explaining why the price of oral sex has fallen so drastically. By examining how people respond to incentives, they show the world for what it really is - good, bad, ugly, and, in the final analysis, super freaky.

[After Camp: Portraits in Midcentury Japanese American Life and Politics, Greg Robinson](#) , 2012, 0520952278, 9780520952270. This book illuminates various aspects of a central but unexplored area of American history: the midcentury Japanese American experience. A vast and ever-growing literature exists, first on the entry and settlement of Japanese immigrants in the United States at the turn of the 20th century, then on the experience of the immigrants and their American-born children during World War II. Yet the essential question, What happened afterwards? remains all but unanswered in historical literature. Excluded from the wartime economic boom and scarred psychologically by their wartime ordeal, the former camp inmates struggled to remake their lives in the years that followed. This volume consists of a series of case studies that shed light on various developments relating to Japanese Americans in the aftermath of their wartime confinement, including resettlement nationwide, the mental and physical readjustment of the former inmates, and their political engagement, most notably in concert with other racialized and ethnic minority groups.

[Two Lives of Charlemagne, Lewis G. M. Thorpe](#) , 1969, 0140442138, 9780140442137. Einhard's Life of Charlemagne is an absorbing chronicle of one of the most powerful and dynamic of all medieval rulers, written by a close friend and adviser. In elegant prose it describes Charlemagne's personal life, details his achievements in reviving learning and the arts, recounts his military successes and depicts one of the defining moments in European history: Charlemagne's coronation as emperor in Rome on Christmas Day 800. By contrast, Notker's account, written some decades after Charlemagne's death, is a collection of anecdotes rather than a presentation of historical facts. In these stories, which merge into fiction, Charlemagne is already half way to becoming the legendary figure of later medieval epics. Lewis Thorpe's introduction

offers a comparison of the two biographies and examines Charlemagne's influence on the development of Europe.

THE CALL OF THE SHEPHERD is a prophetic presentation of powerful truth, streaming from Spirit of God to those who have 'an ear to hear.' It is a collection of direct messages from the Great Shepherd to His sheep, concerning their walk in this world. This book is the second volume in a trilogy. In volume one, WHISPERS OF THE SHEPHERD, inspired words revealed to us how deeply we are loved, and how precious our lives are to Him. In this book, we hear God's guidance for His children to grow up and mature. With the firm gentleness of a true shepherd, the urgency of this season is heard in the message; calling us forth to live now as those who know Him, belong to Him, and live for Him.

[The Animal in Its World: Field studies, , Niko Tinbergen , 1972, .](#) Together with Konrad Lorenz, Niko Tinbergen is generally acknowledged as the founder of the young science of ethology. Professor Tinbergen has spent a lifetime of research exploring the behavior of many types of animals in their natural environments, and has founded centers of worldwide renown for research and teaching in the behavioral sciences, first in his native Holland and later at Oxford. His influence extends far beyond the borders of Europe and of zoology proper, and he has contributed substantially to international and interdisciplinary collaboration. Tinbergen's work has been characterized by many as a "breath of fresh air" in fields that were in danger of using touch with nature and of becoming bogged down in theory. He has tirelessly worked for the use of scientific methods in the study of human behavior, both normal and abnormal. Without shying away from quantification and measurement, he has made his main contribution in what Sir Peter Medawar calls "creative observation" and in the design of meaningful experiments, even in the seemingly chaotic and continuously varying

conditions if the natural habitat. In following him in what Tinbergen likes to call his seemingly aimless wanderings, the reader will catch a unique glimpse into the workshop of ethology. Even when reporting on sophisticated experiments, or when developing new theoretical concepts and arguments, Tinbergen writes simply, lucidly, and precisely. The present volume spans forty years of pioneer investigation and includes selections on the behavior of gulls; on the homing, landmark preference, and prey findings of the digger wasp; on the food hoarding of foxes; and on creatures living scattered as a defense against predators. These classic original studies will fascinate the increasing number of readers interested in the topical problems of animals and human behavior.

[Speaking in Styles: Fundamentals of CSS for Web Designers, Jason Cranford Teague](#) , 2009, 0132104393, 9780132104395. Speaking in Styles aims to help Web designers learn the "language" that will be used to take their vision from the static comp to the live Internet. Many designers think that CSS is code, and that it's too hard to learn. Jason takes an approach to CSS that breaks it down around common design tasks and helps the reader learn that they already think in styles--they just need to learn to speak the language. Jason helps Web designers find their voice, walks them through the grammar of CSS, shows them how to write their design specs in CSS, and how to prepare it for screen, printer or handheld devices. Along the way designers will learn to optimize their code, make it accessible, optimize for search engines, mix it up with Flash, and more.

[The Next Level... a Game I Had to Play!, Vernon M. Turner](#) , 2012, 0984473610, 9780984473618. 'The Next Level' is an autobiography about my life journey. When people look at me and my life from the outside, they say man, "VT has it all"; this guy actually lived the American dream. When people look at me, they see me smiling almost all the time, always with a positive attitude, always with a "glass half full" outlook on everything. But what people don't see is the bad dreams I still have to this day due to events that occurred while I was growing up. No one will ever understand the pain and regret I have inside due to my past...things that will haunt me until the day I die! Yeah, that ole cliché is so true: "The grass is not always greener on the other side." You will read about a young man that went up against some insurmountable odds to save his family and in the process, achieve a childhood dream. If I had to choose a few words to describe my story, they would have to be... sadness, embarrassment, heartbreaking, guilt, regret, anger, fear, determination, triumph and relief. This project was one of the most difficult things I have ever done because it forced me to remember things I had buried in my mind (and heart) for over 30 years. There are some events in this book that my own siblings are not aware of. I truly hope that my book connects with each and every one of you in an inspiring way. Looking back now, I can truly say that I lived an amazing life; it's the kind of life story that needs to be shared! If my story can help one person, then writing 'The Next Level' was worth it!

[Germs, Genes, & Civilization: How Epidemics Shaped who We are Today, David P. Clark](#) , 2010, 0137019963, 9780137019960. "Clear, thoughtful, and thought-provoking, Germs, Genes & Civilization makes the case that infectious diseases have played a major role in shaping society. Clark argues that religion, morals, and even democracy have all been influenced by the smallest and most dangerous organisms on our planet. While you may not accept every argument, you will be stimulated, entertained, and enlightened."---Samuel L. Stanley, Jr., M.D., President, Stony Brook University, and former Director of the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Diseases Research"Clark presents an insightful explanation of the invisible history all around us. He conveys the essential facts in a riveting and engaging manner that everyone, including the nonscientist, will find exceptionally interesting and revealing."---Michael C. Thomsett, author of The Inquisition"Germs, Genes & Civilization is a fascinating and well-balanced account of how a wide variety of different kinds of microbes have influenced human evolution, culture, society, and even religious thought. Written for a lay audience, the relationships between genes and disease resistance and susceptibility are clearly discussed, and the book concludes with a sober assessment of what may be in store for us in the future."---Irwin W. Sherman, Professor Emeritus, University of California, Riverside, and author of Twelve Diseases That Changed Our World and The Power of Plaguesho's in charge here? Humans? No way. Microbes don't just outnumber us by nearly 10²¹ to 1: They run the Earth. In Germs, Genes & Civilization, Dr. David Clark reveals the hidden web of microbial activity that shapes our planet and molds our human destinies. You'll discover how your genes have been shaped by battling against infectious diseases through the millennia. You'll learn how epidemics have transformed human history, over and over again---from ancient Egypt to Mexico, the Romans to Attila the Hun. You'll learn how the Black Death epidemic ended the Middle Ages, making possible the Renaissance, Western democracy, and the scientific revolution. Perhaps most fascinating of all, Clark reveals the latest scientific and philosophical insights into the interplay between microbes, humans, and society---and previews what just might come next. AD 452: Attila the Hun stands ready to sack Rome. No one can stop him---but he walks away. A miracle? No...dysentery. Microbes saved the Roman Empire. Nearly a millennium later, the microbes of the Black Death ended the Middle Ages, making possible the Renaissance, western democracy, and the scientific revolution. Soon after, microbes ravaged the Americas, paving the way for their European conquest. Again and again, microbes have shaped our health, our genetics, our history, our culture, our politics,

even our religion and ethics. This book reveals much that scientists and cultural historians have learned about the pervasive interconnections between infectious microbes and humans. It also considers what our ongoing fundamental relationship with infectious microbes might mean for the future of the human species. The "good side" of history's worst epidemics the surprising debt we owe to killer diseases Where diseases came from...and where diseases came from...and where they may be going Children of pestilence: disease and civilization From Egypt to Mexico, from Rome to China STDs, sexual behavior, and culture How microbes can shape cultural cycles of puritanism and promiscuity

As he learned what it truly means to be a faithful steward in the eyes of Jesus, you will discover how the lesson applies to your life as well. "Profit or Principles" will help you discover the answers to the following questions: Is there a conflict between earning a profit and remaining true to my Christian principles when it comes to investing? Is it possible to know what types of activities I am supporting with my investments? What should I do if I discover a specific investment provides resources for an offensive activity? In this economy, if my investments are making money should I be concerned about what the investments are funding? This is not a technical book describing all the workings of Biblically Responsible Investing. Instead, it is primer, an introduction to how it can help a follower of Jesus accomplish financial goals without having to sacrifice spiritual integrity. Author Dwight Short, in his first book "Kingdom Gains," provided a very thorough explanation of Biblically Responsible Investing. In "Profit or Principles," you will be motivated to investigate this type of investing. Every faithful follower of Jesus wants to be in the position to hear the Master say, "Well done, good and faithful servant." There is not really a conflict between being faithful to spiritual principles and earning a good return.

Often, the only conflict is if the investor is unwilling to make the necessary changes to accomplish both.

[The History of Jazz, Ted Gioia](#) , 2011, 0199831874, 9780199831876. Ted Gioia's History of Jazz has been universally hailed as a classic--acclaimed by jazz critics and fans around the world. Now Gioia brings his magnificent work completely up-to-date, drawing on the latest research and revisiting virtually every aspect of the music, past and present. Gioia tells the story of jazz as it had never been told before, in a book that brilliantly portrays the legendary jazz players, the breakthrough styles, and the world in which it evolved. Here are the giants of jazz and the great moments of jazz history--Jelly Roll Morton, Louis Armstrong, Duke Ellington at the Cotton Club, cool jazz greats such as Gerry Mulligan, Stan Getz, and Lester Young, Charlie Parker and Dizzy Gillespie's advocacy of modern jazz in the 1940s, Miles Davis's 1955 performance at the Newport Jazz Festival, Ornette Coleman's experiments with atonality, Pat Metheny's visionary extension of jazz-rock fusion, the contemporary sounds of Wynton Marsalis, and the post-modernists of the current day. Gioia provides the reader with lively portraits of these and many other great musicians, intertwined with vibrant commentary on the music they created. He also evokes the many worlds of jazz, taking the reader to the swamp lands of the Mississippi Delta, the bawdy houses of New Orleans, the rent parties of Harlem, the speakeasies of Chicago during the Jazz Age, the after hours spots of corrupt Kansas city, the Cotton Club, the Savoy, and the other locales where the history of jazz was made. And as he traces the spread of this protean form, Gioia provides much insight into the social context in which the music was born.

[Evolutionary Neuroscience, Jon H. Kaas](#) , 2009, 0123750806, 9780123750808. Evolutionary Neuroscience is a collection of articles in brain evolution selected from the recent comprehensive reference, Evolution of Nervous Systems (Elsevier, Academic Press, 2007). The selected chapters cover a broad range of topics from historical theory to the most recent deductions from comparative studies of brains. The articles are organized in sections focused on theories and brain scaling, the evolution of brains from early vertebrates to present-day fishes, amphibians, reptiles and birds, the evolution of mammalian brains, and the evolution of primate brains, including human brains. Each chapter is written by a leader or leaders in the field, and has been reviewed by other experts. Specific topics include brain character reconstruction, principles of brain scaling, basic features of vertebrate brains, the evolution of the major sensory systems, and other parts of brains, what we can learn from fossils, the origin of neocortex, and the evolution of specializations of human brains. The collection of articles will be interesting to anyone who is curious about how brains evolved from the simpler nervous systems of the first vertebrates into the many different complex forms now found in present-day vertebrates. This book would be of use to students at the graduate or undergraduate levels, as well as professional neuroscientists, cognitive scientists, and psychologists. Together, the chapters provide a comprehensive list of further reading and references for those who want to inquire further. PRINCIPLES OF HEAT TRANSFER was first published in 1959, and since then it has grown to be considered a classic within the field, setting the standards for coverage and organization within all other Heat Transfer texts. The book is designed for a one-semester course in heat transfer at the junior or senior level, however, flexibility in pedagogy has been provided. Following several recommendations of the ASME Committee on Heat Transfer Education, Kreith, Manglik, and Bohn present relevant and stimulating content in this fresh and comprehensive approach to heat transfer, acknowledging that in today's world classical mathematical solutions to heat transfer problems are often less influential than computational analysis. This acknowledgement is met with the emphasize that students must still learn to appreciate both the physics and the elegance of simple mathematics in addressing complex phenomena, aiming at presenting the principles of heat transfer both within the framework of classical mathematics and empirical correlations. [Inelastic Analysis of Solids and Structures, M. Kojic, Klaus-Jurgen Bathe](#) , 2006, 3540265074, 9783540265078. Inelastic Analysis of Solids and Structures presents in a unified manner the physical and theoretical background of inelastic

material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

Park jams, dance-offs, neighborhood beefs, and graffiti train rides create an exciting new buzz in the neighborhood, until Cash and his best friend Forster begin to merge the exhilarating music scene with hustling on the street. The two young women of the group, both from conventional families with middle class values, are uneasy yet intrigued by the boys' new lives. But Keya has her own worries as a struggling teenage mother, and Dawn is torn between her parents' expectations and her own desire for independence. When Cash becomes a reckless deal maker and abuses his friendship with Forster, upsetting the chemistry of the group, jealousy, competition, and shifting love interests seem inevitable. Finally, tragedy strikes, and the characters wait to see whether it signals the end of their friendship.

From the reviews: "This book offers a coherent treatment, at the graduate textbook level, of the field that has come to be known in the last decade or so as computational geometry. ... The book is well organized and lucidly written; a timely contribution by two founders of the field. It clearly demonstrates that computational geometry in the plane is now a fairly well-understood branch of computer science and mathematics. It also points the way to the solution of the more challenging problems in dimensions higher than two." #Mathematical Reviews#1 "... This remarkable book is a comprehensive and systematic study on research results obtained especially in the last ten years. The very clear presentation concentrates on basic ideas, fundamental combinatorial structures, and crucial algorithmic techniques. The plenty of results is cleverly organized following these guidelines and within the framework of some detailed case studies. A large number of figures and examples also aid the understanding of the material. Therefore, it

can be highly recommended as an early graduate text but it should prove also to be essential to researchers and professionals in applied fields of computer-aided design, computer graphics, and robotics." #Biometrical Journal#2

[Reclaiming Justice: The International Tribunal for the Former Yugoslavia and Local Courts, Sanja Kutnjak Ivkovich, John Hagan](#) , 2011, 0195340329, 9780195340327. For the first time in legal history, an indictment was filed against an acting head of state, Slobodan Milosevic, for crimes that Milosevic allegedly committed while he was in office. Seeking to change the concept of ethnic cleansing from a rationalizing euphemism to an incriminating metaphor, the International Criminal Tribunal for the Former Yugoslavia (ICTY) set precedents and expanded the boundaries of international criminal and humanitarian law. In *Reclaiming Justice*, Sanja Kutnjak Ivkovich and John Hagan add to prior literature about the ICTY by providing a comprehensive view of how people from Bosnia and Herzegovina, Croatia, Kosovo, and Serbia view and evaluate the ICTY. Kutnjak Ivkovich and Hagan ask crucial questions about international justice in a systematic and comprehensive manner, looking into the ICTY's legality and judicial independence, as well as specific issues of substantive and procedural justice and collective and individual responsibility. Kutnjak Ivkovich and Hagan provide an in-depth analysis of perceptions about the ICTY, the subsequent work of its local courts, and decisions reached by the local courts. They also examine the relationship between the views of the ICTY and ethnicity, a particularly relevant notion because the war was fought largely along ethnic lines.

Terrorism: International Case Law Reporter is an annual collection of the most important cases in security law from around the world. Handpicked and introduced by internationally renowned terrorism scholar Michael Newton and by a distinguished board of global experts, the cases in this series cover topics as diverse as human rights, immigration, freedom of speech, and organizational status. This unique series serves scholars, students, and practitioners seeking an authoritative and comprehensive resource for security law research like no other product on the market. The 2009 edition highlights the increasingly interconnected nature of terrorism as a transnational legal problem. Several cases address the interface of domestic law with international obligations in the context of armed conflict. This volume is also notable for the depth of consolidated criminal law cases. *R v. Horncastle and Others*, a case from the United Kingdom, provides an extensive analysis of the parameters for the admissibility of hearsay evidence, and thus helps readers understand the core of perhaps the most important of the controversies surrounding the ongoing trials held at Guantanamo Bay following the amendments to the U.S. Military Commissions Act enacted during the Obama administration. This series serves a unique and growing importance as the one source that juxtaposes international decisions with those emanating from domestic forums. The comprehensive index then helps the reader to synthesize the commonality of issues.

Now, IBMs leading experts reveal the way to make culture tangible to everyone involved--and how to effectively deal with a variety of culture challenges. "Can Two Rights Make a Wrong?" leverages the lessons learned during IBMs \$3.5 billion acquisition of PricewaterhouseCoopers Consulting: insight that IBM has crystallized into a powerful methodology for transforming business culture. The authors introduce "Business Practices," an actionable surrogate for "culture" that business people can identify with, gauge, and act upon. Then, one step at a time, you'll learn how to apply IBMs practical culture transformation techniques in your unique environment. You'll discover common patterns that lead to culture clashes so you can resolve or, better yet, prevent them. You'll learn to clarify your expectations so people really "get" it--and do it. connection with its jurisdiction over biomedical research and development at higher education institutions, the House Committee on Energy and Commerce's Subcommittee on Oversight and Investigations met twice to hear testimony on abuses in the indirect cost recovery practices at universities for Federal research grants and contracts. At the first hearing witnesses testified about the legitimacy and reasonableness of Stanford University's overhead charges and the adequacy of government oversight provided by the Office of Naval Research. The hearing revealed extensive abuses at the university and ineffective oversight from the Navy. Appearing were witnesses representing the Office of Naval Research, the General Accounting Office, Stanford University, and the Defense Contract Audit Agency. Two months later the committee met again to hear suggestions for changing the regulatory and staffing practices of audit agencies, and to hear about the status of audits initiated shortly after the first hearing at the 41 universities that the Office of Naval Research oversees. Appearing were witnesses representing the Department of Health and Human Services (HHS), the Office of Grant and Contract Financial Management, the Inspector General, Office of Naval Research, and the Defense Contract Audit Agency. Included are the prepared statements of the witnesses, an HHS report, "Federal Funding to Colleges and Universities in Support of Research" and various documents and letters from Stanford University. It is my belief that one of the principal things gained from deer hunting is the host of great memories that one can visit, at will, year after year. All one has to do to get into a very enjoyable conversation is find another deer hunter to share memories with. True deer hunters not only love to hunt deer, but they also love to tell about and hear others tell about hunting deer. Deer hunting is patriotic sport. The Native Americans were here and hunting deer when Europeans arrived. The settlers then hunted deer until they were almost extinct in many parts of America. With conservation they have recovered in population. And many Americans still practice the sport of their ancestors. I do. And I like to hear the stories of other hunters and to tell the stories that came to me on my deer hunting trail. The story recorded here is not so much about harvesting of deer for food but about the many experiences that come along on the deer trail. Some good and some bad.

The forces that shape economic growth: --The size of markets. Large markets make economies of scale possible and thus encourage saving, investing, and the development of new products.--The availability of information and the literacy of the population. The spread of information gives people access to scientific and technical ideas, products, and productive farming, manufacturing, and marketing techniques.--Natural resources. These seem like primary requirements but are not: they depend on markets for their commercial value.--Surplus capital--savings--that can be used as investment.--Basic economic rights such as guarantees of property and contracts.--Entrepreneurialism, creativity, and the human drive for self-improvement.--Technology and invention. While commonly seen as primary (or even the only) requirements for growth, these are strongly dependent on other factors.

important and enduringly popular of all the English poets. Wordsworth's verse declares a belief in the power of poetry to teach by appealing to the imagination and to the 'grand elementary principle of pleasure, by which man knows, and feels, and lives, and moves'. His unique relationship with the poet and political activist Samuel Taylor Coleridge, founded in the political and social ferment of 1795, produced a revolution in literature, resulting in the joint volume, *Lyrical Ballads* (1798-1805) - a landmark in the history of English Romanticism. In this edition the poems are given in the texts in which they first appeared, and were appreciated by Keats, Shelley, Hazlitt and other contemporaries. This selection, chosen from the Oxford Authors critical edition, includes all Wordsworth's finest lyrics, and a large sample of *The Prelude* (1805), his extraordinary autobiographical poem in blank verse and the first truly great achievement of a new era in English

[Samuel Johnson and the Art of Sinking 1709-1791, Freya Johnston](#) , 2005, 0199251827, 9780199251827. The traditional view of Samuel Johnson as hostile to particulars, trifles, and aesthetic mediocrity only half-explains his authorial character. *Samuel Johnson and the Art of Sinking 1709-1791* argues that, in a period dominated by social and literary hierarchies, Johnson's works reveal a defining interest in 'little', 'mean', or 'low' topics and people. Freya Johnston moves away from a critical emphasis on what literature of this period excludes, to consider its modes of including recalcitrant material. Of necessity finite, any piece of writing is informed by the subject matter it omits or to which it indirectly alludes. How can we identify the peripheral topics or characters purportedly 'excluded' from a text, unless it provides compelling inferences that oblige us to supply the omission? In which case, something subtler is at work than barefaced proscription. Rehearsing the comparative merits of great and little things, Johnson and his contemporaries tested the opposing claims of pagan and Christian authority. Ancient criticism, and its eighteenth-century adherents, held that each subject required an appropriate style: little matters call for the low, lofty ones for the high. Yet Gospel writers stressed Christ's incarnation as a praiseworthy and imitable descent to the humanly little -- one that is compatible with the most sublime style. Through a series of close readings, this book examines how Johnson conceived of his relationships to and with the margins of writing and of society. It proposes that his literary and critical practice is neither inclusive nor exclusive in its attitudes towards peripheral things.

Using personal experience and biblical examples, well-known pastor Greg Laurie illustrates how prayer works in different people's lives. In spiritual terms, Jacob wrestled with God for years. The Syro-Phoenician Woman also wrestled with Jesus, but briefly, her argument arising from a wholly different situation. Yet God brought them both to roughly the same kind of relationship with Himself. He softened Jacob's will and rewarded his submission; He honored the woman's determination and rewarded her resolve. Through these examples, readers will discover how heartfelt prayer and willing submission can bring them into their own unique, rewarding relationships with God. From the Trade Paperback edition.

The Harlem Renaissance, from 1910 to 1927, was the time when Harlem came alive with theater, drama, sports, dance, and politics. Looking at events as diverse as the prizefight between Jack

Johnson and Jim White Hope Jeffries, the choreography of Aida Walker and Ethel Waters, the writing of Zora Neale Hurston and the musicals of the period, Krasner paints a vibrant portrait of those years. This was the time when the residents of northern Manhattan were leading their downtown counterparts at the vanguard of artistic ferment while at the same time playing a pivotal role in the evolution of Black Nationalism. This is a thrilling piece of work, a classic destined to become the standard work on the Harlem Renaissance for years to come.

[The end of development?: modernity, post-modernity and development, Trevor W. Parfitt](#) , 2002, 0745316387,

9780745316383. Over the past fifteen years, ideas in the field of development studies have been highly contested. During this time, most countries from the South have come under the iron heel of the IMF and World Bank, who have imposed structural adjustment programmes wherever they have provided loan capital to governments. However, these programmes have had little success, and development studies has suffered accordingly. Many development theorists turned to postmodernist theory to try to move on from this impasse, which in the 1990s led to a new line of critical thought that heralded 'the end of development'. They argued that development studies should be replaced by new strategies of emancipation, or 'new social movements' theory, originating in groups such as the Zapatistas of Mexico. This book summarises the contested ideas of development studies and new social movements theory while rejecting calls for the end of development. Using postmodern theory to demonstrate that forms of development can be complementary to emancipatory social movement projects, Trevor Parfitt develops an alternative model of development which incorporates the needs of peoples both South and North.

[A Practical Guide To Business Writing: Writing In English For Non-Native Speakers, Khaled Al-Maskari](#) , 2012, 1118410793, 9781118410790. Nowadays, letters, reports and emails are vital components of business practice. Communication is increasingly global, but its not any easier to understand or contribute to for non-fluent English speakers. There is increasing pressure to be able to produce effective documents for a business environment but little help out there to do so efficiently, resulting in wasted time and uncomfortable business communication. This book provides a wealth of practical information for any person who aims to produce short, effective documents within the work environment. It offers sensible, valuable and helpful rules for producing effective short reports, memos, letters and e-mails that are clear, concise and easy to read for the busy manager or supervisor working in the demanding setting of modern industry or commerce. But it goes further: not only are rules provided for the inexperienced business writer, but models are proposed which provide solutions for a whole host of business situations providing help, support and encouragement for the many thousands of business writers who need to feel confident in their writing.

[Explaining Institutional Innovation: Case Studies from Latin America and East Asia, Richard F. Doner](#) , 2010, 0979077273, 9780979077272. Many believe that economic development is primarily a function of institutions that help societies reap potential gains from interdependent actors. The norms, rules, and organizations that "govern" transactions are meant to resolve the collective action problems at the heart of economic development. Recognition that institutions are key to economic growth and to the distribution of resources is reflected not only in scholarly literature on property rights and public agencies, but also in the advice of development agencies that encourage the construction of pro-market institutions. Yet claims that "institutions matter" begs an important question: Where do "good" institutions (those that facilitate efficient and equitable outcomes) come from and why do they evolve the way they do? Explaining Institutional Innovation explores these issues, adopting the argument that institutional innovation requires "tough times" during which

leaders see themselves as highly vulnerable to internal pressures and external threats yet lack the means to address them. Analyzing business associations and states in Latin America, private sector organizations in China, the Office of the Historian of Havana, the Association of Caribbean States, Caribbean universities, and sugar industries in Southeast Asia, the contributors affirm the vulnerability approach by demonstrating how various types of crises precede and stimulate institutional changes. Also, by highlighting the impact of such factors as more proximate political arrangements and structures of elite political competition, contributors suggest further avenues for institutional analyses.
