This edition of Shakespeare's Henry IV, Part 1 uses a variety of approaches to Shakespeare, including historical and cultural studies approaches. Shakespeare's text is accompanied by an intriguing collection of thematically arranged historical and cultural documents and illustrations designed to give a firsthand knowledge of the contexts out of which Henry IV, Part 1 emerged. Hodgdon's intelligent and engaging introductions to the play and to the documents (most of which are presented in modern spelling and with annotations) offer a richly textured understanding of Elizabethan culture and Shakespeare's work within that culture.

Vortearigan has rebuilt his army and now stands ready to topple the kingdom of Etheria. In an effort to defeat him, Lask must rally the races of Etheria in an unparalleled united force, a task that has never before been attempted. Centuries' worth of venom and bitterness fester between many of the races, and as Vortearigan's war spreads, Lask must preserve the union even in the face of his fear and the anger that divides him from his own brother. Ancient feuds and secrets come to light in an epic struggle that will change the face of Etheria forever.

[The Toughest Man Alive, Gene LeBell, Bob Calhoun](#) , 2003, 0953176673, 9780953176670. The Toughest Man Alive is the action packed biography of Gene Lebell who is a former pro-world wrestling champion, and top Hollywood stuntman. His life story is a gritty and multifaceted tale which is told with unmistakable humor and candor. You'll get an intimate glimpse of many of the out-of-the ring rumbles as well as in the ring action. The Toughest man Alive gives us never before told stories about such towering sports and entertainment figures, and fighting legends as Muhammad Ali, Bruce Lee, Elvis Presley, Sylvester Stallone, Andre The Giant, Rowddy Roddy Piper, Sugar Ray Robinson, Chuck Norris, and The Rock, to name a few. Gene Lebell has done it all. He has crashed cars, jumped motorcycles, caused riots in Texas, and fought some the deadliest men on the planet. In the toughest man alive he tells you how he did it and survived.

The first full-scale history of Hannibal's Carthage in decades and "a convincing and enthralling narrative." (The Economist)Drawing on a wealth of new research, archaeologist, historian, and master storyteller Richard Miles resurrects the civilization that ancient Rome struggled so mightily to expunge. This monumental work charts the entirety of Carthage's history, from its origins among the Phoenician settlements of Lebanon to its apotheosis as a Mediterranean empire whose epic land-and-sea clash with Rome made a legend of Hannibal and shaped the course of Western history. Carthage Must Be Destroyed reintroduces readers to the ancient glory of a lost people and their generations-long struggle against an implacable enemy.

Firmly convinced that religious belief can only be justified by recourse to pure faith, he is dismissive when visited by a gangling student who claims, with evangelical zeal, that computer technology is on the brink of proving the existence of God. But when his unhappy wife flings herself into an affair with the younger man, and Roger's faith in his own placid life is thrown into question. With his marriage close to collapse, he finds himself increasingly drawn to his own half-niece, the nineteen-year-old Verna, in this cunning and comic exploration of religion, uncertainty and passion.

The assassination of President James Garfield has been variously blamed for the decline of the Utopian Oneida community where the murderer once lived, the reform of the American civil service by shocked legislators who noted that the motive seemed to be a legitimate denial of political patronage, and the movement for sterile operating conditions in light of the damage done by surgeons probing with dirty hands for the fatal bullet. The fascination continues in a killing that is a classic case of stalking and paranoia.

[Yeats's Poetic Codes, Nicholas Grene](#) , 2008, 0191552941, 9780191552946. Nicholas Grene explores Yeats's poetic codes of practice, the key words and habits of speech that shape the reading experience of his poetry. Where previous studies have sought to decode his work, expounding its symbolic meanings by references to Yeats's occult beliefs, philosophical ideas or political ideology, the focus here is on his poetic technique, its typical forms and their implications for the understanding of the poems. Grene is concerned with the distinctive stylistic signatures of the Collected Poems: the use of dates and place names within individual poems; the handling of demonstratives and of grammatical tense and mood; certain nodal Yeatsian words ('dream', 'bitter', 'sweet') and images (birds and beasts); dialogue and monologue as the voices of his dramatic lyrics. The aim throughout is to illustrate the shifting and unstable movement between lived reality and transcendental thought in Yeats, the embodied quality of his poetry between a phenomenal world of sight and an imagined world of vision.

[Perceiving God: The Epistemology of Religious Experience, William P. Alston](#) , 1993, 0801481554, 9780801481550. In Perceiving God, William P. Alston offers a clear and provocative account of the epistemology of religious experience. He argues that the "perception of God"his term for direct experiential awareness of Godmakes a major contribution to the grounds of religious belief. Surveying the variety of reported direct experiences of God among laypersons and famous mystics, Alston demonstrates that a person can be justified in holding certain beliefs about God on the basis of mystical experience. Through the perception that God is sustaining one in being, for example, one can justifiably believe that God is indeed sustaining one in being. Alston offers a detailed discussion of our grounds for taking sense perception and other sources of beliefincluding introspection, memory, and mystical experienceto be reliable and to confer justification. He then uses this epistemic framework to explain how our perceptual beliefs about God can be justified. Alston carefully addresses objections to his chief claims, including problems posed by non-Christian religious traditions. He also examines the way in which mystical perception fits into the larger picture of grounds for religious belief. Suggesting that religious experience, rather than being a purely subjective phenomenon, has real cognitive value, Perceiving God will spark intense debate and will be indispensable reading for those interested in philosophy of religion, epistemology, and philosophy of mind, as well as for theologians.

Jones has been seen on the grounds of state capitols and the lawns of college campuses, in the halls of dignitaries and the trophy rooms of entrepreneurs. But behind the art, inspiring it and informing it with a unique authenticity, stands a life of the kind that is rarely seen today. From stalking whitetails in West Virginia to chasing Cape buffalo in Mozambique, the artist's urge to create has been fueled largely by his love for hunting and the outdoors. Compelling, heartwarming, and compulsively readable, From Dawn until Dusk gives us an account, in the artist's own words, of the seminal events that shaped him as a sportsman, husband, father, friend, and artist.

[The Choice: Global Domination Or Global Leadership, Zbigniew Brzezinski](#) , 2009, 0786739835, 9780786739837. American power and a pervasive globalization are the central realities of today's world, and the source of its thorniest dilemmas. Yet while America's unprecedented might should be the source of global security, Americans today feel less secure than ever. Globalization promotes American dominance even as it breeds anti-American resentment. In The Choice, former National Security Advisor Zbigniew Brzezinski addresses the historic choice facing America at this very moment: Will it strive to dominate the world, or lead it? Reminding us that American dominance should not be confused with omnipotence, Brzezinski shows how America's well-being and the world's are entwined, and that America must find a way to be both guarantor of global security and promoter of the global common good."When it comes to what might be called the 'philosophy' of foreign policy-the relationship of U.S. power and policy to broader historical and cultural trends-no statesman of Brzezinski's generation is in his league.... A tour d'horizon of U.S. foreign policy [that] discusses the inevitable contradictions and tensions that enmesh a democratic society that is also a global hegemon, criticizes the Bush administration, and articulates his own vision of the way forward-all in a little over 200 pages. Even those who do not accept Brzezinski's critique of the Bush administration will admire the sagacity of his views; for Democrats attempting to assemble a serious and thoughtful alternative to Bush's foreign policy, The Choice is indispensable."-Walter Russell Mead, Foreign Affairs

[The Big Splash, Jack D. Ferraiolo](#) , 2011, 1613120745, 9781613120743. The treacherous, hormone-soaked hallways of Franklin Middle School are the setting for this sharp, funny noir novel about tough guys and even tougher girls. "The Frank" is in the clutches of a crime syndicate run by seventh-grader Vinny "Mr. Biggs" Biggio, who deals in forged hall passes and blackmarket candy. Double-cross him and your number is punched by one of his deadly water gun-toting assassins. One hit in the pants and you are in "the Outs" forever. Matt Stevens is a proud loner with his own code of justice. He's avoided being pulled into Vinny's organization until now: Mr. Biggs has offered him a job he can't resist, even if it means bringing down one of his oldest friends. Nominated for an Edgar Award in 2009, *The Big Splash* revitalizes the noir novel while delivering a terrific, addictive mystery that crackles with wit and excitement. Awards and praise for *The Big Splash* 2009 Edgar Award nomination "Jack Ferraiolo shines a light on middle school and reveals what we've always suspected: It's a sinister place ruled by crime bosses and thugs. *The Big Splash* will make you laugh out loud." --Jeff Kinney, #1 New York Times bestselling author of *Diary of a Wimpy Kid* "Entertaining and thrilling." --New York Times Book Review "An ingenious premise: junior high noir. . . . Spring has come and Barnaby is very happy. Only one thing would make him happier: having a class pet. He asks his teacher, Mrs. Sealey, but she decides the class first needs some practice. Everyone will make a pet egg. If they can show they are responsible by taking good care of their pretend pets, they will get a real class pet. Barnaby is sure this will be easy. He already cares for a pet--his dog, Baxter. But when his egg cracks, Barnaby isn't sure what to do. Should he lie to Mrs. Sealey? In the end, Barnaby tells the truth and the class is rewarded with a wonderful real pet--a bunny.

Sans perdre de vue l'avertissement d'Avital Ronell dans son *Stupidity* : "Mais en un sens, on peut se demander qui ne porte pas de responsabilité quand il s'agit de la bêtise. Et n'y a-t-il pas un risque, une possibilité que vous, qui la fuyez, soyez (finalement) rattrapé par quelque bombe intelligente visant votre maison ?" Car si la littérature est affrontement avec la bêtise, c'est aussi contre elle-même qu'elle doit mener ce combat. La bêtise est cet éternel Yves dont on trouve partout les traces, y compris sur les sommets où est censé souffler l'Esprit". Peut-on se fier à la littérature pour contrer la bêtise dans ses formes les plus diverses, y compris "intellectuelles" ? C'est l'une des questions que pose ce recueil de "croquis" d'anonymes et de personnages publics, et c'en est le fil conducteur. Fly a ship into uninhabited territory and just stay there, or die. ~Matt Barrok A war a hundred years old, a government power tearing down the very people it swore to protect, a generation destroyed by battle, the fate of billions in the hands of those that would destroy them, and five friends with the power to change it all. All that Matthew Barrok knows of his father's legacy is contained in broken stories, fading memories, and fragmented computer files. But within those files there is a beacon of hope. Matt's father gave his life for the Mystic Project; a super weapon he was hired to build that could change the tide of the war and alter the balance of power. Now Matt is willing to do the same. But when he discovers the Mystic Project in the middle of an enemy base, he finds that it is not only his life in danger, but also the lives of his four friends that have sworn themselves to him. Relationships change, friends become enemies, and even the strongest will is tested as Matt and his friends go undercover in search of the Mystic Project. The battles they fought before are nothing compared to the challenges they now face as they are forced to rely on the enemy and turn against each other.

OXFORD TELEVISION STUDIES General Editors: Charlotte Brunsdon and John Caughey Oxford Television Studies offers international authors--both established and emerging--an opportunity to reflect on particular problems of history, theory, and criticism which are specific to television and which are central to its critical understanding. The perspective of the series will be international,

while respecting the peculiarities of the national; it will be historical, without proposing simple histories; and it will be grounded in the analysis of programs and genres. The series is intended to be foundational without being introductory or routine, facilitating clearly focused critical reflection and engaging a range of debates, topics, and approaches which will offer a basis for the development of television studies. This book attempts to give a broad overview of British television by examining both the institutional framework and the programs that it has produced. A range of reprinted writings from the work of acknowledged experts is supplemented by specially commissioned essays on such key topics as sport and British television in the global context. It will be a key text for all students taking courses on British television and broadcasting.

The 18th-century French philosopher Denis Diderot - the principal intelligence behind the Encyclopedie and the author of idiosyncratic fictional works such as Jacques the Fatalist and Rameau's Nephew - is also considered by many to have been the first great art critic. Until now, however, Diderot's treatises on the visual arts have been available only in French. This two-volume edition makes his art-critical texts available in English. Diderot's works are among the most provocative and engaging products of the French Enlightenment. Moreover, their ruminations on many issues of perennial interest (invention versus convention, nature versus culture, and technique versus imagination; the complex

relations) between economic reality and artistic achievement give them a rare pertinence to current debates on the nature and function of representation.

[FROM EROS TO GAIA, Freeman Dyson](#) , 2013, 0307831027, 9780307831026. Readers of Freeman Dysons previous books, Disturbing the Universe, Weapons and Hope, and Infinite in All Directions, have discovered for themselves what Dyson reveals here: that he was a writer long before he became a distinguished scientist.The aim of this new book, as Dyson says, is to open windows, to let the experts inside the temple of science see out, and to let the ordinary citizens outside see in. In this process an immensely broad range of ideas, people, contemporary history, and discoveries of many sorts pass in review.Beginning with a piece of writing he did as a child and ending with recent work, he goes from Eros, the god or youthful passion, to Gaia, the fertile life-giving mother-planet Earth. The pilgrimage is a good metaphor for the life of a writer.This book is full of discoveries. In the company of one of the most lucid minds of our time, one approaches great men and problems central to our common existence. Always there is warmth, kindness, high intelligence and humor. Dyson is intimate with both science and man.Whether he is dealing with the problems of physics or politics, whether he is engrossed in astronomy or literature, whether he is concentrating on an African village of space science, Dysons view is always infinite in all directions, always following the path of diversity, always keeping his eye on the wonder of our earth and the health and happiness of its inhabitants.

Problem Solving with C++ continues to be the most widely used textbook by students and instructors in the introduction to programming and C++ language course. Through each edition, hundreds and thousands of students have valued Walt Savitch's approach to programming, which emphasizes active reading through the use of well-placed examples and self-test examples. Created for the beginner, this book focuses on cultivating strong problem-solving and programming techniques while introducing students to the C++ programming language. MyProgrammingLab is a database of programming exercises correlated to specific Pearson CS1/Intro to Programming textbooks. The exercises are short, focused on a particular programming topic, and are assignable and automatically evaluated. MyProgrammingLab provides immediate, personalized feedback which helps students master the syntax, semantics and basic usage of the programming language, freeing instructors to focus on problem-solving strategies, design and analysis, abstraction, algorithms, and style. Ellen Anne Eddy is an internationally known fiber artist whose wall tapestries transcend the traditional concept of quilting. Using hand-dyed fabrics, sheers, laces, lame's and machine embroideries she creates the illusions of water, mist and flame. Ellen's designs blend scenes from the natural world with her own dreams and visions. Her masterful fusion of techniques and materials describe life in micro and macrocosm. Fish and bugs, frogs and birds weave in and out of her quilts, serving as a media for both social commentary and personal observation. The series of quilts featured in Thread Magic offers a rich visual treat for quilters. A comprehensive technical section provides information that will enable quilters of all skill levels to add Ellen's techniques to their own creative repertoires.

[Humane Livestock Handling, Temple Grandin](#) , 2008, 1603420282, 9781603420280. Temple Grandin, North America's most influential advocate of humane livestock treatment, has spent her life developing stress-free facility designs and standards of humane management. In an environment of growing concern regarding large factory-farming practices, Grandin is a voice of reason explaining the benefits of keeping animals calm through every phase of their lives benefits that include safer working conditions, higher yields of marketable meat, better-quality meat, and, of course, more humane conditions for the animals. The first half of Humane Livestock Handling reviews the natural behavior and temperament of cattle. Working with the animals' natural instincts, Grandin describes low-stress methods for moving cattle on pastures, paddocks, and feedlot pens. Slow, controlled movement reduces stress and fear, resulting in calmer, healthier cattle. They eat better, are less likely to become sick, and do not run into fences and gates, injuring themselves and bruising the meat. Calm cattle are also far less likely to injure the humans working with them. The second half of the book is packed with construction plans, diagrams and detailed designs for putting Grandin's ideas into practice. Featuring plans for everything from gate latches to chutes, corrals, and sorting pens for full-scale facilities, there are designs that can be used in both large and small operations. In fact, half of the cattle in North America are already handled in systems designed by Grandin, and the demand for humanely processed meat continues to grow. Temple Grandin's systems are quickly becoming the industry-wide standard. No livestock operation, small or large, can afford to ignore Humane Livestock Handling.

[Classical Mythology, Mark P. O. Morford, Robert J. Lenardon](#) , 2002, . Morford and Lenardon's best-selling introduction to classical mythology is a comprehensive survey focusing on the literary tradition of Greek and Roman mythology. It offers extensive translations of original mythological sources as well as comparative and interpretive approaches to the myths. In this package, Classical Mythology, 6/e is bundled with the Oxford World's Classic Bacchae and Other Plays. The four plays newly translated for this volume are among Euripides' most exciting works. Iphigenia among the Taurians is a story of escape contrasting Greek and barbarian civilization, set on the Black Sea at the edge of the known world. Bacchae, a profound exploration of the human psyche, deals with the appalling consequences of resistance to Dionysus, god of wine and unfettered emotion. Iphigenia at Aulis centers on the ultimate dysfunctional family as emotion is tested in the crucible of the Greek expedition against Troy. And Rhesus, probably the work of another playwright, is an action-packed Iliad in miniature, dealing with a grisly event in the Trojan War.

9781595230720. The bestselling author of Shadow War and Losing Bin Laden exposes the sinister Al Qaeda mastermind behind 9/11. Khalid Shaikh Mohammed, the architect of the 9/11 attacks, has carried out many of the biggest terrorist plots of the past twenty years, including the 1993 World Trade Center bombing, the Millennium Plots, and the beheading of Daniel Pearl. As the world awaits his trial, bestselling author and investigative journalist Richard Miniter brings to life his shocking true story. Based on more than one hundred interviews with government officials, generals, diplomats and spies-from the United States, Europe, the Arab world, and Afghanistan-and on the ground reporting from Morocco, Egypt, Israel, Afghanistan, Pakistan, the Philippines, and Guantnamo Bay, Miniter reveals never-before-reported Al Qaeda plots and surprising new details about the 9/11 attacks. He also shows how Khalid Shaikh Mohammed was radicalized in America and takes us inside terrorist safe houses, CIA war rooms, and the cages of Guantnamo Bay. While thoroughly reported and strongly sourced, this is a pounding narrative that reads like a thriller.

"Because I have long worked to make accurate information on botanical remedies available to consumers as well as to doctors, pharmacists, and allied health professionals, I am delighted to see the appearance of the National Geographic Guide to Medicinal Herbs. This excellent guide is the work of a team of highly qualified botanical and medical experts, including two of my colleagues from the Arizona Center for Integrative Medicine. It offers reliable, up-to-date, practical information about 72 of the most important medicinal herbs." --Andrew Weil, M.D., from the Foreword There is a world of health and healing all around you--in your spice rack, your backyard, and on the shelves of health food and grocery stores. This informative guide is a reference you will keep at the ready, connecting 72 of the world's most common and useful medicinal herbs with the body systems they help and heal. Eight chapters focus on body systems: 1. Mental Health & the Nervous System 2. Respiratory System 3. Heart & Circulation 4. Digestive System 5. Joints, Muscles & Skin 6. Urinary & Male Health 7. Female Health 8. Wellness & Perception Each chapter begins with an overview of how plants can bring health to that part of the body, with stories about traditional herbal remedies from around the world and current scientific findings on herbal remedies for specific illnesses. Then each chapter highlights nine plants, combining botanical and medical information--therapeutic uses, effectiveness, preparations, cautions, and advice, including a round-up of current science about the active ingredients in the plant.

Every chapter includes a photo gallery showing how one of its herbs is cultivated and processed commercially--the story behind the contents of that bottle you buy in the store. Special features include "Over the Kitchen Counter"--quick and easy ways to use herbs in your everyday life, and time lines for every herb, showing how today's use of herbal remedies collects wisdom from the centuries and around the world. A functional appendix includes an illustrated index to all the plants in the book, an ailment-by-ailment therapeutic index, a glossary, and an index.

[Model Predictive Control System Design and Implementation Using MATLAB, ISSN 1430-9491, Liuping Wang](#) , 2009, 1848823304, 9781848823303. Model Predictive Control (MPC) is unusual in receiving on-going interest in both industrial and academic circles. Issues such as plant optimization and constrained control which are critical to industrial engineers are naturally embedded in its designs. Model Predictive Control System Design and Implementation Using MATLAB proposes methods for design and implementation of MPC systems using basis functions that confer the following advantages: continuous- and discrete-time MPC problems solved in similar design frameworks; a parsimonious parametric representation of the control trajectory gives rise to computationally efficient algorithms and better on-line performance; and a more general discrete-time representation of MPC design that becomes identical to the traditional approach for an appropriate choice of parameters. After the theoretical presentation, detailed coverage is given to three industrial applications: a food extruder, a motor and a magnetic bearing system. The subject of quadratic programming, often associated with the core optimization algorithms of MPC is also introduced and explained. The technical contents of this book, mainly based on advances in MPC using state-space models and basis functions to which the author is a major contributor, will be of interest to control researchers and practitioners, especially of process control. From a pedagogical standpoint, this volume includes numerous simple analytical examples and every chapter contains problems and MATLAB programs and exercises to assist the student.

[Larry E. Swedroe](#) , 2005, 1429972955, 9781429972956. Investment professional Larry E. Swedroe describes the crucial difference between "active" and "passive" mutual funds, and tells you how you can win the investment game through long-term investments in such indexes as the S&P 500 instead of through the active buying and selling of stocks. A revised and updated edition of an investment classic, The Only Guide to a Winning Investment Strategy You'll Ever Need remains clear, understandable, and effective. This edition contains a new chapter comparing index funds, ETFs, and passive asset class funds, an expanded section on portfolio care and maintenance, the addition of Swedroe's 15 Rules of Prudent Investing, and much more. In clear language, Swedroe shows how the newer index mutual funds out-earn, out-perform, and out-compound the older funds, and how to select a balanced "passive" portfolio for the long haul that will repay you many times over. This indispensable book also provides you with valuable information about:- The efficiency of markets today- The five factors that determine expected returns of a balanced equity and fixed income portfolio- Important facts about volatility, return, and risk- Six steps to building a diversified portfolio using Modern Portfolio Theory- Implementing the winning strategy- and more.

[American Juvenile Justice, Franklin E. Zimring](#) , 2005, 0195181166, 9780195181166. American Juvenile Justice is a definitive volume for courses on the criminology and policy analysis of adolescence. The focus is on the principles and policy of a separate and distinct system of juvenile justice. The book opens with an introduction of the creation of adolescence, presenting a justification for the category of the juvenile or a period of partial responsibility before full adulthood. Subsequent sections include empirical investigations of the nature of youth criminality and legal policy toward youth crime. At the heart of the book is an argument for a penal policy that recognizes diminished responsibility and a youth policy that emphasizes the benefits of letting the maturing process continue with minimal interruption. The book concludes with applications of the core concerns to five specific problem areas in current juvenile justice: teen pregnancy,

transfer to criminal court, minority overrepresentation, juvenile gun use, and youth homicide.

[The Fountain Overflows, Rebecca West](#) , 1956, 1590170342, 9781590170342. The lives of the talented Aubrey children have long been clouded by their father's genius for instability, but his new job in the London suburbs promises, for a time at least, reprieve from scandal and the threat of ruin. Mrs. Aubrey, a former concert pianist, struggles to keep the family afloat, but then she is something of a high-strung eccentric herself, as is all too clear to her daughter Rose, through whose loving but sometimes cruel eyes events are seen. Still, living on the edge holds the promise of the unexpected, and the Aubreys, who encounter furious poltergeists, turn up hidden masterpieces, and come to the aid of a murdereress, will find that they have adventure to spare. In *The Fountain Overflows*, a 1957 best seller, Rebecca West transmuted her own volatile childhood into enduring art. This is an unvarnished but affectionate picture of an extraordinary family, in which a remarkable stylist and powerful intelligence surveys the elusive boundaries of childhood and adulthood, freedom and dependency, the ordinary and the occult.

[Crimson Eros, Anne Marie Adams](#) , 2005, 0974278211, 9780974278216. This book is a combination of love, accomplishments, and regrets. Author Lolette Kuby says, "In poems love is purified; it's there for its own sake, to celebrate that which is loved." Some people ask themselves how they should feel or look to others to help them understand their feelings. Kuby searches within, and then releases her feelings. Through her book, *Inwit*, Kuby helps the reader understand and experience every feeling she has.
