[Tao: The Pathless Path, Osho](#) , 2002, 1580632254, 9781580632256. In his commentaries on five parables from the Leih Tzu, Osho brings a fresh and contemporary interpretation to the ancient wisdom of Tao. Leih Tzu was a well-known Taoist master in the fourth century B.C., and his sly critiques of a Confucius provide abundant opportunities for the reader to explore the contrasts between the rational and irrational, the male and female, the structured and the spontaneous. "Who Is Really Happy" uses the discovery of a human skull on the roadside to probe into the question of immortality and how misery arises out of the existence of the ego. "A Man Who Knows How to Console Himself" looks beneath the apparent cheerfulness of a wandering monk and asks if there is really a happiness that endures through life's ups and downs. "No Regrets" is a parable about the difference between the knowledge that is gathered from the outside and the "knowing" that arises from within. "No Rest for the Living" uses a dialogue between a despondent seeker and his master to reveal the limits of philosophy and the crippling consequences of living for the sake of some future goal. "Best Be Still, Best Be Empty" discusses the difference between the path of the will, the via affirmativa of Christianity, Judaism, and Islam, versus the path of the mystic, the via negativa of Buddha and Lao Tzu. A Q&A section addresses how Taoist understanding applies to everyday life in concrete, practical terms.

Inspiration abounds in this fun and colorful guide's stunning photos of adorable clay beads and their transformation into eye-catching necklaces, earrings, bracelets, key rings, and brooches in a range of innovative styles, from fun and funky to elegant enough for evening. Praising the wonderful versatility of polymer clay, the book is suitable for absolute

beginners as well as experienced jewelry and bead makers. The clear, step-by-step instructions are fully illustrated, and all the materials and equipment needed are described in detail. Since polymer clays can be easily shaped at home with improvised tools and baked in a standard household oven, they are shown to be an attention-getting yet inexpensive way to experiment with all kinds of beads that can be embellished with cutters, decorative stamps, powder, paint, and textured sheets.

[A Slave No More: Two Men who Escaped to Freedom : Including Their Own Narratives of Emancipation, David W. Blight](#) , 2007, 0151014310, 9780151014316. Slave narratives are extremely rare, with only 55 post-Civil War narratives surviving. A mere handful are first-person accounts by slaves who ran away and freed themselves. Now two newly uncovered narratives join that exclusive group. Handed down through family and friends, they tell gripping stories of escape: Through a combination of intelligence, daring, and sheer luck, the men reached the protection of occupying Union troops. Historian Blight prefaces the narratives with each man's life history. Using genealogical information, Blight has reconstructed their childhoods as sons of white slaveholders, their service as cooks and camp hands during the Civil War, and their climb to black working-class stability in the North, where they reunited their families. In the stories of Wallace Turnage and John Washington, we find portals that offer a rich new answer to the question of how four million people moved from slavery to freedom -- From publisher description.

THE GREAT AMERICAN SWINDLE is filled with conspiracy, betrayal, fraud, blackmail, injustice, suicide, & murder; a story which crisscrosses the United States several times between 1845 & 1971. It is TRUE. It is FULLY DOCUMENTED! Mark Hopkins, one of the Central Pacific/Southern Pacific Railroad's famous Big Four, was reputed to be the wealthiest man in the USA at the time of his death in 1878, but through unscrupulous maneuvering his massive estate was passed to greedy partners & an imposter widow without being probated through a court of law. Estelle Latta, a spunky little lady from North Carolina, spent more than 50 years gathering hundreds of certified United States documents to prove Mark Hopkins was her great Uncle from North Carolina, not a man from New York as history so adamantly attests, & that both his identity & his vast fortune were fraudulently stolen. She yelled foul when the judicial system refused to acknowledge her proof. She bucked the system & took on the rich & powerful, including the Securities & Exchange Commission, in an effort to right the wrong. Her proof answers: How was Mark Hopkins' estate stolen? By whom? Where is it, & who controls those billions/trillions today? To order contact Randolph Publishing Company, 5705 Winship Drive, Indianapolis, IN 46221- 4161.

Through this book, the reader will gain an understanding of the major environmental regulatory statutes, including those addressing air and water quality, hazardous materials and wastes, pesticides and other toxic substances, wetlands preservation, and endangered species. The reader will also be introduced to the agencies responsible for implementing and enforcing these statutes. This book also covers the common law principles which are of continuing importance in environmental law and from which modern environmental law directly descends. The reader will further gain an understanding of environmental restrictions on private property development, the increasingly important issue of global climate change, and the ability of the public to obtain access to environmental information through community right to know laws and other environmental statutes. This publication is also an invaluable reference guide for anyone already familiar with environmental law who is seeking access to the most recent information in the field.

[To Hell Or Barbados: The Ethnic Cleansing of Ireland, Sean O'Callaghan](#) , 2002, 1570983852, 9781570983856. To Hell or Barbados chronicles the transportation of over 50,000 Irish men, women, and children in 1652 to Barbados, Jamaica, Montserrat and even Virginia to serve as slaves, prostitutes, and playthings of pervert planters. Instigated by Henry. Cromwell, the English sent "man-catchers" to round up native Irish and thus rid the country of what the Puritans called "the offal of men." Of those Irish that were allowed to remain, three-quarters of them were uprooted and forced to live in the least fertile part of the country, their lands having been confiscated and given to English planters who had financed and officered Cromwell's army. The legacy of this forced Diaspora -- not one Irish slave was able to return to his homeland -- is the part of Barbados known as "Scotland, " where 300 to 400 descendants of Cromwell's holocaust eke out a subsistence living, "pallid, weak, and depraved from inbreeding."

[Face to Face with Tongues: A Verse by Verse Examination and Exposition on the Subject of Tongues, Max D. Younce](#) , 2008, 0981522521, 9780981522524. Face To Face With Tongues By Dr. Max D. Younce. Can be ordered from www.heritagebbc.com. A verse by verse examination of all the Scriptures concerning the "speaking in tongues", leading to the conclusion this is not for the Church today. Covers all Scripture relating to this subject, and also exposes the falsity of faith-healing as claimed today. This book exposes those who claim to have the "Pentecostal gift of tongues" as nothing more than a counterfeit of spirituality. Pentecostals have never duplicated the working of the Holy Spirit, as depicted in Acts 2, at any time. This book is written in simplicity, yet its scholarship will equip the reader with sound answers to the false emotionalism bound up in the tongues movement. A few of the many things you will learn from the book are: 1. The word "tongues" in the Greek is not the "jibber-jabber" you hear in Pentecostal meetings, but a known language. 2. Tongues ceased with the completion of God's word, the writing of Revelation, in about 96 A.D. 3. No one is ever to pray in tongues. 4. No one is ever to sing in tongues. 5. The difference between the Pentecostal tongues (languages) and those in Corinth. 6. No woman ever had the gift of tongues. 7. Many more facts.

The exposure of undercover policeman Mark Kennedy in the "eco-activist" movement revealed how the state monitors and undermines political activism. This book shows the other grave threat to our political freedoms - undercover activities by corporations. Secret Manoeuvres in the Dark documents how corporations are halting legitimate action and investigation by activists. Using exclusive access to previously confidential sources, Eveline Lubbers shows how companies such as Nestl, Shell, and McDonalds use covert methods to evade accountability. She argues that corporate intelligence gathering has shifted from being reactive to pro-active, with important implications for democracy itself. Secret Manoeuvres in the Dark will be vital reading for activists, investigative and citizen journalists, and all who care about freedom and democracy in the 21st century.

Following a judgment of the High Court on 14th July 2000. the Secretary of State for Education and Employment

asked the School Teachers' Review Body to examine and report on: the standards to be attained by classroom teachers at the performance threshold in order to gain access to a new upper pay scale being introduced on 1st September 2000; the procedure for assessment at the performance threshold; whether headteachers should be subject to a duty to make any appropriate contribution to threshold assessment; and whether classroom teachers should be subject to a duty to assist the headteacher in the performance of any new detail relating to threshold assessment. The Review Body recommends that the introduction of existing performance threshold arrangements for classroom teachers should be resumed. It further recommends that the Department for Education and Employment should commission a thorough and comprehensive review of the threshold standards and procedures to be available for consideration during the review which the Review Body expects to produce at the beginning of 2002.

In the worldwide globalization process, the new information and communication revolution offers multifaceted opportunities to countries, to societies and to people, if they are able to grab them. Human creativity, knowledge, productivity, innovation, skills, capacities and capabilities are becoming essential prerequisites to success. Governments that encourage investments in people, in education, in research and development and in life-long learning and training are taking the most advantage of the

globalization process. It is becoming well-recognized that people should be placed at the center of all concerns. In other words, the new information revolution needs to be humanized if one wants to prevent a new divide--namely the digital divide. During the 21st century the yardstick used for the measurement of a country's development level will be the computer-literacy rate and no longer the adult-literacy ratio. The subject of this book is this new reality. Book jacket.

[Lives of Roman Christian Women, Carolinne White](#) , 2010, 0141441933, 9780141441931. 'Perpetua shouted out with joy as the sword pierced her, for she wanted to taste some of the pain and she even guided the hesitant hand of the trainee gladiator towards her own throat' Lives of Roman Christian Women is a unique collection of letters and documents from the third to the fifth centuries, celebrating Christian women from across the Roman Empire. During a crucial period in which Christianity transformed from a persecuted faith to the official religion of the Empire, these writings reveal the women who chose to dedicate their lives to Christ, by embracing martyrdom or by adopting a life of poverty and prayer, renouncing not only wealth but also their duties as wives and mothers.

[Multimedia Introduction to Programming Using Java, David Gries, Paul Gries](#) , 2005, 0387269347, 9780387269344.

Although vital to modern software development, Java and object-oriented programming can pose significant challenges to newcomers. This text, unique in both scope and approach and accompanied by interactive content that you may find on extras.springer.com, addresses that learning curve by providing a careful, classroom-tested presentation of Java -- from the fundamentals of variables, types, and expressions to procedural concepts like loops and sophisticated object-oriented ideas. Multimedia Introduction to Programming Using Java anchors its pedagogy in the program ProgramLive that you may find at extras.springer.com, a complete multimedia module in itself. Containing over 250 recorded lectures with synchronized animation, ProgramLive allows users to see, first-hand and in real time, processes like stepwise refinement of algorithms, development of loops, execution of method calls and associated changes to the call stack, and much more. The zip file also includes all programs from the book, 35 guided instruction sets for closed lab sessions, and a 70-page hyperlinked glossary. Additional key features of this work: Provides clear and accessible treatment of all aspects of a first course, along with more advanced topics such as recursion, exceptions, interfaces, inner classes, and GUIs. Introduces objects and classes early in the exposition, rendering object-oriented programming intuitive and natural. Develops programs, rather than simply showcasing them. Supports all concepts through complementary lectures on the zip-file featured on extras.springer.com. Contains numerous self-help exercises that encourage readers to practice programming. Emphasizes rigor and accuracy through user-friendly exposition and a flexible organizational style. With its comprehensive appendices and bibliography, systematic approach, and helpful interactive programs on extras.springer.com, this exciting work provides the key tools they needed for successful object-oriented programming. It is ideal for use at the undergraduate and graduate beginning level, whether in the classroom or for distance learning; furthermore, the text will also be a valuable self-study resource or reference volume in any programmers library.

Pike offers a unique focus on the crucial quarter-century in Canadian filmmaking when the industry became a viable force on the international stage. Pike provides a lively, personal, and accessible history of the most influential filmmakers and movements of both Anglo-Canadian and Quebecois cinema, from popular movies to art film and everything in between. Along with in-depth studies of key directors, including David Cronenberg, Patricia Rozema and Denys Arcand, Jean-Claude Lauzon, Robert Lepage, La Pool, Atom Egoyan, and Guy Maddin, Canadian Cinema since the 1980s reflects on major themes and genres and explores the regional and cultural diversity of the period. Pike positions Canadian filmmaking at the frontlines of a profound cinematic transformation in the age of global media and presents fresh perspectives on both its local and international contexts. Making a significant advance in the study of the film industry of the period, Canadian Cinema since the 1980s is also an ideal text for students, researchers, and Canadian

film enthusiasts.

[The Portable Medieval Reader, Various](#) , 1977, 1101173742, 9781101173749. In their introduction to this anthology, James Bruce Ross and Mary Martin McLaughlin remind us that "no area of the past is dead if we are alive to it. The variety, the complexity, the sheer humanity of the middle ages live most meaningfully in their own authentic voices." The Portable Medieval Reader assembles an entire chorus of those voices of kings, warriors, prelates, merchants, artisans, chroniclers, and scholars that together convey a lively, intimate impression of a world that might otherwise seem immeasurably alien. All the aspects and strata of medieval society are represented here: the life of monasteries and colleges, the codes of knighthood, the labor of peasants and the privileges of kings. There are contemporary accounts of the persecution of Jews and heretics, of the Crusades in the Holy Land, of courtly pageants, popular uprisings, and the first trade missions to Cathay. We find Chaucer, Petrarch, Boccaccio, Saint Francis of Assisi, Thomas Aquinas and Abelard alongside a host of lesser-known writers, discoursing on all the arts, knowledge and speculation of their time. The result, according to the Columbia Record, is a broad and eminently readable "cross section of source history and literature...as rich and varied as a stained glass window."

BI in SAP NetWeaver 2004s is the official abbreviation for the successor of the Business Information Warehouse (BW) which has been completely revised by SAP with its latest release. Core elements of this comprehensive suite for decision making applications are functions for extraction, transformation and data management. With this new release, these functions aim more heavily at company-wide data warehousing. The book focuses on these core tasks of SAP BW and gives well-founded insights into the system architecture. As practical handbook and well-structured reference book, the book is for SAP consultants and IT staff that are responsible for or planning a BW-based data warehouse implementation. Apart from system architecture, the book focuses on detailed descriptions of data management (data models and Analytical Engine) as well as the Staging Engine which have been completely revised and deal with new data transfer process technology. The design of the controlled operations has been substantially expanded and besides a comprehensive description of automation techniques by using process chains, regular maintenance and administration tasks are also discussed (model trimming, technical validation). The book emphasizes a comprehensive view on aspects to manageability and system performance which are discussed in individual chapters but also implicitly in all other ranges of topics.

[Modeling the Dynamics of Life: Calculus and Probability for Life Scientists, Frederick R. Adler](#) , 2012, 0840064187, 9780840064189. Designed to help life sciences students understand the role mathematics has played in breakthroughs in epidemiology, genetics, statistics, physiology, and other biological areas, MODELING THE DYNAMICS OF LIFE: CALCULUS AND PROBABILITY FOR LIFE SCIENTISTS, Third Edition, provides students with a thorough grounding in mathematics, the language, and 'the technology of thought' with which these developments are created and controlled. The text teaches the skills of describing a system, translating appropriate aspects into equations, and interpreting the results in terms of the original problem. The text helps unify biology by identifying dynamical principles that underlie a great diversity of biological processes. Standard topics from calculus courses are covered, with particular emphasis on those areas connected with modeling such as discrete-time dynamical systems, differential equations, and probability and statistics.
