Twins Jane and Elizabeth are twelve years old and have outgrown dolls. Nevertheless, on a cold wet spring Saturday they find themselves in an antique store, inexplicably drawn to a small, tattered old fashioned doll. Even the owner of the store seems to understand that the doll somehow belongs to the girls. Once the twins buy the doll, stranger and stranger things begin to happen, and a young girl from the past seems to be calling out to them. The search to discover the history of the little doll brings the twins terrifyingly close to the world of the supernatural as they finally solve a tantalizing mystery. [The Dream-hunters of Corsica, Dorothy Carrington](#) , 1995, 1857994248, 9781857994247. The dream-hunters, or mazzeri, are unknown outside Corsica and probably date from pre-historic times. At night they go hunting or dream they do so and kill an animal, in whom they recognise a human face. The next day they announce the death, which always takes place within a year. Where the mazzeri are harbingers of death, the signadori are guardians of life—they practise folk medicine, but more importantly, they secure release from the curse of the Evil Eye. With characteristic elegance and clarity, Dorothy Carrington investigates these extraordinary phenomena, relics of past times peculiar to this wild, inhospitable land. THE DREAM HUNTERS OF CORSICA is a fascinating insight into a forgotten corner of civilisation where the occult has retained its everyday place as an explanation of the mysteries of life.

Becca's family has fallen on hard times, and she is sent to the Shippen household to be Peggy's personal maid and to receive a finishing education. But working for Peggy, Becca gets an education in deceit and treachery, as Peggy sets her sights first on British Captain John Andre and then on American General Benedict Arnold. [Contract Negotiation Handbook: Software As a Service, Stephen Guth](#) , 2013, 0988830809, 9780988830806. Many books

have been written on negotiation tactics and a few books have been written on contract drafting, but no book has combined the two disciplines into one-until now. Resulting from over 10 years of actual negotiation experience as both buyer and seller, author Stephen Guth offers insight into a world of negotiations and contracts that few ever see. This book isn't a feel-good book on win-win negotiations. It's an insider's view into real life negotiation tactics and ploys. Readers will learn how to use negotiation tactics such as the Columbo, the Price Slice and Dice, and the Signature Limit Lasso. Readers will also learn how to spot and counter vendor ploys such as the Pop-Tart, Mirroring, and the Only Game in Town. To put it all together, readers are instructed on contract drafting tricks such as Expressly Implied Warranties, the Endless Indemnification, and the Unlimited Limitation of Liability. Readers will never look at contracts the same way again.

9780198035664. Fear, rage, courage, discrimination. These are facts of everyday life for many Americans with disabilities. The Americans with Disabilities Act (ADA), has made working, traveling, and communicating easier for many individuals. But what recourse do individuals have when enforcement of the law is ambiguous or virtually nonexistent? And how will its changing definition affect individuals' lives-as well as their legal actions-in the future? What is life like in

post-ADA America? *Voices from the Edge* seeks to challenge the mindset of those who would deny equal protection to the disabled, while providing informative analysis of the intent and application of the ADA for those who wish to learn more about disability rights. Giving voice to the many types of discrimination the disabled face - at a small Southern College, in the Library of Congress, on a New York City sidewalk - while illustrating the personal stakes underlying legal disputes over the ADA, this collection offers unparalleled insight into the lives behind the law. Contributors: Joan Aleshire on disability and the eye of the beholder. Achim Nowak on disclosing HIV. C.G.K. Atkins on being an academic liability. Stephen Kuusisto on hope without the tenure lifeboat. Leonard Kriegel on wheelchairs vs. NYC sidewalks. John Hockenberry on trying one's luck at public transit. [23 Days of Terror: The Compelling True Story of the Hunt and Capture of the Beltway Snipers, Angie Cannon](#) , 2010, 1451604483, 9781451604481. In October 2002, a nation still recovering from the 9/11 attacks found itself under siege once more -- by an unseen, unknown, and seemingly unstoppable enemy. For 23 days, the area around Washington, D.C., was the hunting ground for a pair of serial snipers who struck at random, killing from afar, only to vanish time and time again. With each attack, they raised the stakes, taunting the authorities to try to stop them -- until their luck ran out. Here, from veteran reporter Angie Cannon and the staff of U.S. News & World Report, comes the complete story of one of the most heinous crimes in American history -- a chronicle of the harrowing days in October that took ten innocent lives and wounded three others; the means and methods used by law enforcement -- and their mistakes; the suspects' backgrounds and possible motives; and the fear that gripped a region of five million people and the effect these shocking acts of terror continue to have on American society.

[Gratitude for Technology, Baruch Gottlieb](#) , 2009, 0981997279, 9780981997278. Resistance! this is the central theme of Gottlieb's dense and intense first book. The original thesis here is: if we truly want (to work towards) a society emancipated from the rule of the wealthy and privileged, if we truly want to feel empowered in our lives and our society, we must face the material and incontrovertible historical facts of how the things around us came into being. In fact, this is the radical destination of this book. That while a profound historical consciousness seems at times an immense and forbidding undertaking, Gottlieb proves that everything we need in order to develop one as far as we wish to go is immediately accessible to us right now within the surfaces of the things around us. How? The things around us, the

screen you are reading this on right now, all have a distinct history. They were assembled at a particular time and place by particular people who were working together in particular circumstances. These are what Gottlieb calls the irrefutable facts of the origin of the technological surface. If we look deeply at all the intricate relationships at play at the historical time and place where your computer screen came into being, we will find keys to a radical new way of understanding our technologized society and the things we produce. Call it a Phenomenology of Technologys Spirit. Even though the surfaces of modernity, as Gottlieb calls them, are smooth and clean, they still store the historical facts of the human relationships which made them. A deeper reckoning and acknowledgment of these relationships, Gottlieb claims, will profoundly transform our society. One tool he suggests for this is Mimeology, a kind of body language. Since this is a critique of elite culture, of the normal literary language, dominated by elites, Gottlieb proposes a form of bodily expression, more akin to that which was involved in actually creating the things we have around us. Somehow, Gottlieb is searching here for an incorruptible language of resistance. Resistance for Gottlieb is not militant, in fact, he makes no romantic revolutionary claims...actually he is quite sober in his outlook. He sees resistance like resistance in an electronic circuit, as an integral part of the political functioning of the society. Some are born resistant, some are not, if you are one of the resistant, especially if you are looking for refreshing insights on how a radical resistance can be described and manifested, this book is for you. A timely and original book in the provocative Atropos series.

[Principles of Lender Liability, , Parker Hood, John Virgo](#) , 2012, 0198299036, 9780198299035. This comprehensive book begins with a consideration of the nature of the general banker-customer relationship, the obligations it poses and the issues relating to the commencement of the banking relationship. It provides individuals and companies with valuable guidance when assessing the risks in their relationship with banks, and vice versa. The following chapters allow all parties to consider carefully the central issues and underlying general principles that might arise by addressing the various activities undertaken by a lender. The duty of confidentiality, lenders as fiduciaries, the lender's duty to advise borrowers on the imprudence of transactions as well as fraud, and banks as constructive trustees and damages for breach of contract by a lender are all considered. The final chapters explore the duties of security holders and mortgagees of land, the liability of lenders for receivers they appoint, environmental liability and lender liability as shadow directors concerning wrongful trading. The book outlines liability in negligence and contract, with specific reference to existing case law concerning banks in this field from an English law perspective, and also Scottish and Commonwealth law, thus providing valuable applicability to the banking context for practitioners in other fields.

[Asia: A Concise History, Arthur Cotterell](#) , 2011, 0470829591, 9780470829592. From one of the world's leading historians? a comprehensive narrative of the 3,000 years that have formed Asia's people, culture, and global destiny Tracing its origins in Mesopotamia to its modern role on the global geopolitical stage, historian Arthur Cotterell offers a compelling, lively, and readable account of one of the most culturally diverse, and often misunderstood, parts of

the world. Beginning with the emergence of the world's earliest civilization in 3000 BC, *Asia: A Concise History* provides a fascinating look at the global convulsions—like the rise and fall of Assyria and Persia, the medieval states that flourished after the advent of Islam, and the modern transformations triggered by the lightning conquests of imperial Japan—that have shaped the continent. Covers the great events and figures of Asian history, along with a look at the monumental remains that bear witness to those times: the ziggurats of Iraq, the Taj Mahal, the Great Wall of China, the temple of Angkor Wat. Includes fascinating slices of history, including funeral arrangements for Qin Shi Huangdi in 210 BC; an extract from Lord Macartney's journal of his 1793 diplomatic mission to the Qing emperor Qian Long; and Toyotomi Hideyoshi's edict of 1587 banning firearms in Japan. Features boxed inserts of special interest—like a Babylonian recipe for lamb stew circa 1500 BC. Contains over 100 illustrations, maps, and photos. Other books by Cotterell: *The Minoan World*, *The First Emperor of China*, *The Encyclopedia of Mythology*, and *Chariot*. Destined to become a reference staple for history buffs and students of Asian history, *Asia: A Concise History* offers readers a breathtaking narrative and wealth of detail that make the formative periods, key events, and personalities from this once remote part of the world come alive.

The dramatic story of Mussolini's fall from power in July 1943, illuminating both the causes and the consequences of this momentous event. Morgan shows how Italians of all classes coped with the extraordinary pressures of wartime living, both on the military and home fronts, and how their experience of the country at war eventually distanced them from the dictator and his fascist regime. Looking beyond Mussolini's initial fall from power, Morgan examines how the Italian people responded to the invasion, occupation, and division of their country by Nazi German and Anglo-American forces -

and how crucial the experience of this period was in shaping Italy's post-war sense of nationhood and transition to democracy.

[Functional Analysis in Mechanics, Leonid P. Lebedev, Iosif I. Vorovich, Michael J. Cloud](#) , 2012, 1461458684, 9781461458685. This book offers a brief, practically complete, and relatively simple introduction to functional analysis. It also illustrates the application of functional analytic methods to the science of continuum mechanics. Abstract but powerful mathematical notions are tightly interwoven with physical ideas in the treatment of nontrivial boundary value problems for mechanical objects. This second edition includes more extended coverage of the classical and abstract portions of functional analysis. Taken together, the first three chapters now constitute a regular text on applied functional analysis. This potential use of the book is supported by a significantly extended set of exercises with hints and solutions. A new appendix, providing a convenient listing of essential inequalities and imbedding results, has been added. The book should appeal to graduate students and researchers in physics, engineering, and applied mathematics. Reviews of first edition: 'This book covers functional analysis and its applications to continuum mechanics. The presentation is concise but complete, and is intended for readers in continuum mechanics who wish to understand the mathematical underpinnings of the discipline. Detailed solutions of the exercises are provided in an appendix.' (L'Enseignement Mathématique, Vol. 49 (1-2), 2003) 'The reader comes away with a profound appreciation both of the physics and its importance, and of the beauty of the functional analytic method, which, in skillful hands, has the power to dissolve and clarify these difficult problems as peroxide does clotted blood. Numerous exercises test the readers comprehension at every stage. Summing Up: Recommended.' (F. E. J. Linton, Choice, September, 2003)

There are tight, economical poems, free verse forms derived from the sonnet, poems leaping about the page, but my favorites are the wonderful prose poems tumbling over and under themselves toward gnomish statements that feel both didactic and self-parodying." --Tim Peterson, from the Foreword

[The Winter of Our Discontent, John Steinbeck](#) , 2008, 0143039482, 9780143039488. The final novel of one of Americas most beloved writers a tale of degeneration, corruption, and spiritual crisis In awarding John Steinbeck the 1962 Nobel Prize in Literature, the Nobel committee stated that with The Winter of Our Discontent, he had resumed his position as an independent expounder of the truth, with an unbiased instinct for what is genuinely American. Ethan Allen Hawley, the protagonist of Steinbecks last novel, works as a clerk in a grocery store that his family once owned. With Ethan no longer a member of Long Islands aristocratic class, his wife is restless, and his teenage children are hungry for the

tantalizing material comforts he cannot provide. Then one day, in a moment of moral crisis, Ethan decides to take a holiday from his own scrupulous standards. Set in Steinbeck's contemporary 1960 America, the novel explores the tenuous line between private and public honesty, and today ranks alongside his most acclaimed works of penetrating insight into the American condition. This Penguin Classics edition features an introduction and notes by leading Steinbeck scholar Susan Shillinglaw.

This best-selling volume is widely recognized for its innovation and accessibility: it equips the reader with principles, values, and practices that support teaching the majority of students with disabilities within the scope of general education programs. The authors showcase real students with real disabilities--letting their stories illustrate, as nothing else could, the challenges faced by people with exceptionalities, and the myriad factors those working with them must consider when making decisions about how, where, and what to teach. Through four engaging themes--universal design for learning, inclusion, collaboration, and multicultural awareness--this book explores the processes necessary for using "best practices" to achieve the goals set forth by the Individuals with Disabilities Education Act of 1997. Packaged with a CD-ROM that contains more than an hour of actual classroom footage, this book actually puts the reader "in the classroom." This engaging book addresses general learning disabilities, emotional or behavioral disabilities, attention-deficit/hyperactivity disorder, giftedness, mental retardation, severe and multiple disabilities, autism, physical disabilities, traumatic brain injury, communication disorders, hearing loss, and visual impairments. For special education educators, curriculum planners, therapists, school administration employees, and parents of children with special needs.

[American Ballads & Folk Songs \(1934\), John A. Loman](#) , 2007, 1406750905, 9781406750904. PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of

us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

[Jews and Samaritans: The Origins and History of Their Early Relations, Gary N. Knoppers](#) , 2013, 0195329546, 9780195329544. Covering over a thousand years of history (from the Assyrian exile in the eighth century BCE to late Roman times), this book makes an important contribution to the fields of Jewish studies, biblical studies, ancient Near Eastern studies, Samaritan Studies, and early Christian history by challenging the oppositional paradigm that has traditionally characterized the historical relations between Jews and Samaritans. The approach is multi-disciplinary, engaging exciting new discoveries in archaeology, such as the site surveys of ancient Samaria and the major excavations at the holy site of Mt. Gerizim in central Israel; new discoveries in epigraphy, such as the publication of the Samaria papyri dating to the late-Persian period (375-335 BCE), the publication of hundreds of late-Persian period Samaritan coins, and the publication of hundreds of fragmentary Mt. Gerizim inscriptions (dating mostly to the late-third and early-second centuries BCE); as well as new discoveries in biblical studies, such as the diverse collection of Pentateuchal manuscripts found among the Dead Sea Scrolls. Only by recognizing the close ties that developed between Samaria and Judah during the much of the first millennium BCE can one explain how the two communities became so similar in belief and practice, even sharing a common set of foundational scriptures (the Pentateuch). Paradoxically, accounting for how two such similar groups as the Samaritans and Jews became alienated from one another during the Maccabean and Roman periods involves explaining how the two were so closely related in the first place. The solution to this puzzle is to be found in earlier Israelite history.

Down there live the mer-folk." From the very beginning of "The Little Mermaid" we know we are in the hands of a master storyteller. [Australian Civilisation, Richard Nile](#) , 1994, 0195535049, 9780195535044. Australian civilisation is described in this book with subtlety and irony as a 'wildly problematic, discursive and sometimes cranky thing. It can be a sensitive thing. It can still be chauvinistic'. The book brings together leading intellectuals who discuss the various dynamics of civilisation in the Australian context. They debate openly and honestly the strengths and weaknesses of Australian civilisation. The contributors each narrate Australian civilisation from monographic viewpoints. By considering Aboriginality, Henry Reynolds and John Barnes produce 'History' and 'Legend'. By analysing Australia's cultural and demographic diversity

Bruce Bennett, James Jupp and Laksiri Jayasuriya produce 'Myth', 'Identity' and 'Citizens'. Sexuality and political discourse surrounding issues of gender result in 'Homosexuality' by Dennis Altman and 'Women' by Margaret Reynolds. Political culture brings forth 'Politicians' by Sol Encel and 'Intellectuals' by James Walter. The production, reproduction, dissemination and reception of culture produces 'Cringers', 'Strutters', and 'Culture' from Elaine Thompson, Chris Wallace-Crabbe and Andrew Milner. Together these monographic views narrate the central concerns of this volume. The production of a master narrative is resisted. But it is equally obvious that in the diversity of approaches - the pluralism of the monographic views - there are recurring important themes. This timely book is concerned with the tremendous changes that have overtaken Australia in the second half of this century. It demonstrates that many time-honoured beliefs have been broken up, but argues that this intensely creative period has seen Australia transformed from a provincial inward-looking society with blinkered conceptions of history and self-importance to one of the world's oldest and most successful liberal plural democracies.

[The Last Days of the Incas, Kim MacQuarrie](#) , 2007, 1416539352, 9781416539353. The epic story of the fall of the Inca Empire to Spanish conquistador Francisco Pizarro in the aftermath of a bloody civil war, and the recent discovery of the lost guerrilla capital of the Incas, Vilcabamba, by three American explorers. In 1532, the fifty-four-year-old Spanish conquistador Francisco Pizarro led a force of 167 men, including his four brothers, to the shores of Peru. Unbeknownst to the Spaniards, the Inca rulers of Peru had just fought a bloody civil war in which the emperor Atahualpa had defeated his brother Huascar. Pizarro and his men soon clashed with Atahualpa and a huge force of Inca warriors at the Battle of Cajamarca. Despite being outnumbered by more than two hundred to one, the Spaniards prevailed due largely to their horses, their steel armor and swords, and their tactic of surprise. They captured and imprisoned Atahualpa. Although the Inca emperor paid an enormous ransom in gold, the Spaniards executed him anyway. The following year, the Spaniards seized the Inca capital of Cuzco, completing their conquest of the largest native empire the New World has ever known. Peru was now a Spanish colony, and the conquistadors were wealthy beyond their wildest dreams. But the Incas did not submit willingly. A young Inca emperor, the brother of Atahualpa, soon led a massive rebellion against the Spaniards, inflicting heavy casualties and nearly wiping out the conquerors. Eventually, however, Pizarro and his men forced the emperor to abandon the Andes and flee to the Amazon. There, he established a hidden capital, called Vilcabamba, only recently rediscovered by a trio of colorful American explorers. Although the Incas fought a deadly, thirty-six-year-long guerrilla war, the Spanish ultimately captured the last Inca emperor and vanquished the native resistance.

In its every turn and crease, it bears the marks of the true." Irving Howe, New Republic "This remarkable memoir...is the autobiography of an extraordinarily acute conscience. With the ear of a poet and the eye of a novelist, Amery vividly communicates the wonder of a philosopher's wonder here aroused by the 'dark riddle' of the Nazi regime and its systematic sadism." Jim Miller, Newsweek "Whoever has succumbed to torture can no longer feel at home in the world. The shame of destruction cannot be erased. Trust in the world, which already collapsed in part at the first blow, but in the end, under torture, fully, will not be regained. That one's fellow man was experienced as the antiman remains in the tortured person as accumulated horror. It blocks the view into a world in which the principle of hope rules. One who was martyred is a defenseless prisoner of fear. It is fear that henceforth reigns over him." Jean Amery At the Mind's Limits is the story of one man's incredible struggle to understand the reality of horror. In five autobiographical essays, Amery describes his survival mental, moral, and physical through the enormity of the Holocaust. Above all, this masterful record of introspection tells of a young Viennese intellectual's fervent vision of human nature and the betrayal of that vision.

There is a lingering effect of the transmissions from the outer three planets that the personality must incorporate, develop and evolve over a span of time or Resonance Phase. This evolution takes longer than the actual ending of the mathematical transit as we know it. Time is a continuum and your natal chart resonates with the past as well as the future. Numerical links (by degree) in every chart correspond to both the past and to the future - a continuum of energy reaching backwards and forwards in time, to which we are always responding on subtler, background levels.

[The Benedictine Tradition, Laura Swan, Phyllis Zagano](#) , 2007, 0814619142, 9780814619148. When St. Benedict wrote his ?little rule for beginners? in the fifth century, he could not have known it would shape the lives of religious men and women for more than fifteen hundred years. Offering instruction on prayer and community life, Benedict?s Rule espouses

the values of humility, prayer, and hospitality that have marked the lives of Benedictines throughout the ages. Benedictines are those persons who commit themselves to the Rule of Benedict, and have been popes and widows, scholars and mystics and lay people from many religious traditions, including Catholics, Anglicans, Methodists, and Lutherans. They have lived in monasteries and ashrams, in busy urban centers, and in desert hermitages. Dedicated to God and the practices of the Liturgy of the Hours and monastic life, Benedictines have made significant contributions to chant, theology, and the preservation of spiritual works of literature and scholarship. Represented here is the work of major Benedictine figures throughout the ages, beginning with Pope Gregory's account of the life of Benedict and arriving at recent statements by the Conference of Benedictine Prioresses on conflict in the world. Along with the Rule, the writing of these Benedictines remains as relevant today as in any age. Swan and Zagano's book is a useful starting point for anyone seeking to explore the Benedictine tradition through selected primary texts with biographical introductions. It is accessible to readers of all backgrounds, and will urge them to launch out into other depths of discovery, where they will come to know more fully the author's claim that "Benedictine spirituality is enjoying a renaissance." S. Ephrem Hollermann, OSB Associate Professor of Theology College of Saint Benedict/Saint John's University

Sr. Laura Swan's *The Benedictine Tradition* is a lovely resource of Benedictine riches for anyone who desires to go more deeply into the nature of the Benedictine life of the spirit. From a 1500-year tradition, she has lovingly selected fourteen figures or groups, each representing a significant quality of Benedictine life. Each chapter begins with a quotation from Benedict's Rule giving a clue to the quality for which this Benedictine is chosen. A very useful and helpful introduction to each figure follows, along with some lovely selections from each one's writings. I found myself slowing down as I read, to be nourished at leisure by the profound words of these persons committed to the Benedictine way. Sr. Laura closes with a chapter quoting from Benedictine prioresses as they reflect in writing on the monastic tradition in light of the demands of contemporary society. Those reflections offer a mirror for the whole of Sr. Laura's book, which serves as a meditation on how to be "in but not of the world," as a witness and sign of the love of Christ. Norvene Vest Spiritual Director and Author

Laura Swan's eminently useful and enjoyable anthology fills an important gap in contemporary sources for the study of Benedictine spirituality. It stimulates a taste for the multiple, rich expressions of that fifteen century tradition and could well be a handbook for further study. This small volume includes a succinct historical overview of the tradition along with short biographies of some major teachers and writers as context for what can necessarily be only a few well-chosen, brief but substantial and often inspiring, selections from original text. I recommend it for college students, those beginning or renewing their monastic life, Benedictine oblates, and anyone looking for a sure guide to the basic but varied contour of Benedictine history and spirituality. Katherine Howard, O.S.B. St. Benedict's Monastery St. Joseph, Minnesota

In her new book *The Benedictine Tradition*, Laura Swan has gathered together a very useful collection of readings. Since these selections are gleaned from her own practice of *lectio divina*,

they will prove fruitful for the lectio of others. She has not contented herself with the usual well-known authors, but has ranged far and wide for her anthology. So we hear not only from Pope Gregory, but also from Raissa Maritain; not only from Venerable Bede, but also from Bede Griffiths. Finally, Sister Laura gives us more than little snippets; she gives us substantial excerpts for our spiritual nourishment. Terrence Kardong, O.S.B. Assumption Abbey Richardton, North Dakota

Previously published as *The Essential Rumi*, Rumi's Selected Poems is translated by Coleman Barks with John Moyne in Penguin Classics. Thirteenth-century Persian philosopher, mystic, scholar and founder of the order of the Whirling Dervishes, Jelaluddin Rumi was also a poet of transcendental power. His inspirational verse speaks with the universal voice of the human soul and brims with exuberant energy and passion. Rich in natural imagery from horses to fishes, flowers to birds and rivers to stars, the poems have an elemental force that has remained undiminished through the centuries. Their themes - tolerance, goodness, the experience of God, charity and awareness through love - still resonate with millions of readers around the world. Coleman Barks's vibrant translation conveys the directness and originality of Rumi's poetry. This edition is divided into thematic sections, each with an introduction, and includes a biographical essay on Rumi. Called 'Jelaluddin Rumi' by the Persians and Afghans, Rumi (1207-1273) was born in Balkh, Afghanistan, then part of the Persian Empire. [Rationality and Commitment, Fabienne Peter, Hans Bernhard Schmid](#) , 2007, 0199287260, 9780199287260. Rational choice theory forms the core of the economic approach to human behaviour. It is also the most influential philosophical account of practical rationality. Yet there are persistent controversies about the scope of rational choice theory in

philosophy and, increasingly, in economics as well. A leading critic is the philosopher and Nobel Laureate economist Amartya Sen, who put forward a trenchant critique of rational choice theory in his seminal paper 'Rational Fools'. Sen emphasizes the importance of commitment - those aspects of human behavior which dispose individuals to co-operate, follow norms, and identify with others. He argues that rational choice theory cannot accommodate commitment, and demands a more adequate account of rationality. The question of how to account for the rationality of commitment is very much an open issue and, if anything, even more pressing today than when Sen first raised it. In *Rationality and Commitment*, thirteen leading philosophers and economists discuss Sen's claims and propose their own answers to the question of how to account for the rationality of committed action. The volume concludes with a specially-written reply by Sen, in which he responds to his critics and provides a rich commentary on the preceding essays.

[Little Lord Fauntleroy, Frances Hodgson Burnett](#) , 1993, 0192829610, 9780192829610. Little Lord Fauntleroy is the engaging, amusing, and moving story of a boy living on the edge of poverty in New York, who suddenly learns that he is the heir to an English lord with vast lands and wealth. Travelling to his grandfather's castle, Cedric shows his trusting and democratic nature in his dealings with lawyers and clergymen, servants and farmers, but it is his relationship with his proud and unfeeling grandfather which lies at the heart of the novel, and developments there take an unexpected turn

when the appearance of an unforeseen rival claimant to the title brings the book to a dramatic climax. First published in 1886, the story soon became a huge success throughout Europe and America, and achieved unjust notoriety when its hero's costume of black velvet with lace collar created a fashion for Little Lord Fauntleroy suits which were foisted upon reluctant children. Despite this reaction, however, the warmth and humour of Frances Hodgson Burnett's story have ensured its survival as a children's classic and an enduring phenomenon of popular culture. The text is that of the first English edition with significant variations from the first serialization of the story and the first American edition recorded in the notes.

This anthology invites readers to experience the pleasures of reading by offering them a selection of readings that are accessible and diverse in style, voice, and content. Furthermore, the instructional apparatus that accompanies each reading helps readers develop vocabulary and critical reading skills. Thus readers are invited into the conversation about events, lives, and ideas that we call reading, and given the tools to help them do so in a manner that makes reading satisfying, rewarding, and essential. A multicultural collection of authors explore many facets of life through the written word. The readings are a sampling of contemporary literature from the late twentieth century as well as a few pieces written in earlier times. They are divided into seven chapters, each focusing on a different kind or purpose of reading. The majority of the readings are works of prose, but each chapter also includes a sampling of poetry. For those who are planning to begin or return to college; for GED preparation classes and workplace literacy programs; and for ESOL classes for students capable of reading and speaking basic English but in need of developing more sophisticated language skills, both spoken and written, as well as a deeper understanding of American history and culture.

[Saying what the Law is: The Constitution in the Supreme Court, Charles Fried](#) , 2005, 0674019547, 9780674019546. In a few thousand words the Constitution sets up the government of the United States and proclaims the basic human and political rights of its people. From the interpretation and elaboration of those words in over 500 volumes of Supreme Court cases comes the constitutional law that structures our government and defines our individual relationship to that government. This book fills the need for an account of that law free from legal jargon and clear enough to inform the educated layperson, yet which does not condescend or slight critical nuance, so that its judgments and analyses will engage students, practitioners, judges, and scholars. Taking the reader up to and through such controversial recent Supreme Court decisions as the Texas sodomy case and the University of Michigan affirmative action case, Charles Fried sets out to make sense of the main topics of constitutional law: the nature of doctrine, federalism, separation of powers, freedom of expression, religion, liberty, and equality. Fried draws on his knowledge as a teacher and scholar, and on his

unique experience as a practitioner before the Supreme Court, a former Associate Justice of the Supreme Judicial Court of Massachusetts, and Solicitor General of the United States to offer an evenhanded account not only of the substance of constitutional law, but of its texture and underlying themes. His book firmly draws the reader into the heart of today's constitutional battles. He understands what moves today's Court and that understanding illuminates his analyses.

Evidence is drawn from the archaeology of sacred sites, ethnographic accounts of the ancient Celts and their beliefs, medieval manuscripts, poetic and visionary literature, and early modern accounts of folk healers and seers. New translations of poems, prayers, inscriptions and songs from the early period (Gaulish, Old Irish and Middle Welsh) as well as the folklore tradition (Modern Irish, Scottish Gaelic, Welsh, Cornish, Breton and Manx) complement the text. Information of this kind has never before been collected as a compendium of the indigenous wisdom of the Celtic-speaking peoples, whose traditions have endured in various forms for almost three thousand years.

[A Tale of Seven Elements, Eric Scerri](#) , 2013, 0195391314, 9780195391312. In 1913, English physicist Henry Moseley established an elegant method for 'counting' the elements. Soon afterwards, it became clear that there were precisely seven elements missing from the periodic table those that had yet to be isolated among the 92 naturally occurring elements from hydrogen (#1) to uranium (#92). In *A Tale of Seven Elements*, Eric Scerri will present the discovery of those seven elements, five of which are radioactive and three or possibly four of which were first isolated by women. The book covers a period roughly spanning the two world wars, beginning with the discovery of protactinium in 1917 and ending with that of promethium in 1945. In some cases, the state of war directly influenced attempts to isolate some of the seven elements this is true of protactinium, when, in 1916, its discoverer, Lise Meitner, wrote of the problems she encountered in purchasing even the most basic items of laboratory equipment. During the second war, the discovery of nuclear fission, also by Meitner and her associates, quickly led to the development of the nuclear weapons program and the associated technologies of particle accelerators. Clearly, scientific discoveries occur within a social and political context and the discovery of the seven elements is no exception. This book draws together for the first time the fascinating stories of the discoveries of these seven elements, placing them in historical context.

[Kit and Kitty in Love: For When You Fall Heads Over Tails in Love.](#) , 2013, 0989122409, 9780989122405. Kit & Kitty is a picture book for adults that contains some mature sexual content. Looking for something really special for the love of your life? Tell your sweetheart you are completely and madly in love, just like Kit and Kitty. They are never too busy or proud to express that they are heads over tails in love. Vividly imagined and hand painted by W.C. Fielstra, Kit and Kitty in Love is an ode to love, to fill any romantic occasion with passion. Who are Kit and Kitty? They are an anthropomorphic fox and vixen couple. A matched set of romantic fools who cannot get enough of each other. Each scene in the book depicts a tender moment of mutual heartfelt connection. Kit is always soft, caring, and tender, trying to satisfy the every need of his adoring mate. Kitty is his persistent, playful, wanting, and willing partner. They are in an all too perfect relationship, with only a little pain and almost no pride. When they kiss in the rain, linger in bed, or splash in the tub, they are saying, I really love you - and I love you unconditionally. Why wait? Go ahead and express that you are heads over tails in love.

[Moral Ground: Ethical Action for a Planet in Peril, Kathleen Dean Moore, Michael P. Nelson](#) , 2010, 1595340661, 9781595340665. Moral Ground brings together the testimony of over eighty visionaries?theologians and religious leaders, scientists, elected officials, business leaders, naturalists, activists, and writers?to present a diverse and compelling call to honor our individual and collective moral responsibility to our planet. In the face of environmental degradation and global climate change, scientific knowledge alone does not tell us what we ought to do. The missing premise of the argument and much-needed center piece in the debate to date has been the need for ethical values, moral guidance, and principled reasons for doing the right thing for our planet, its animals, its plants, and its people. Contributors from throughout the world (including North America, Africa, Australia, Asia, and Europe) bring forth a rich variety of heritages and perspectives. Their contributions take many forms, illustrating the rich variety of ways we express our moral beliefs in letters, poems, economic analyses, proclamations, essays, and stories. In the end, their voices affirm why we must move beyond a scientific study and response to embrace an ongoing model of repair and sustainability. These writings demonstrate that scientific analysis and moral conviction can work successfully side-by-side. This is a book that can speak to anyone, regardless of his or her worldview, and that also includes a section devoted to ?what next thinking that helps the reader put the words and ideas into action in their personal lives. Thanks to generous support from numerous landmark organizations, such as the Keneda Fund and Germeshausen Foundation, the book is just the starting point for a national, and international, discussion that will be carried out in a variety of ways, from online debate to ?town hall meetings, from essay competitions for youth to sermons from pulpits in all denominations. The ?Moral Ground movement will result in a newly discovered, or rediscovered, commitment on a personal and community level to consensus about our ethical obligation to the future.

[Children and Pollution: Why Scientists Disagree, Colleen F. Moore](#) , 2009, 0195386663, 9780195386660. How does pollution impact our daily quality of life? What are the effects of pollution on children's development? Why do industry and environmental experts disagree about what levels of pollutants are safe? In this clearly written book, Moore traces the debates around five key pollutants---lead, mercury, noise, pesticides, and dioxins and PCBs---and provides an overview of the history of each pollutant, basic research findings, and the scientific and regulatory controversies surrounding it. Moore focuses, in particular, on the impact of these pollutants on children's psychological development--their intellectual functioning, behavior, and emotional states, and provides practical strategies for avoiding exposure to environmental contaminants in a final chapter entitled "Protect Your Family, Protect Our Planet." Only by understanding the impact of pollution can we prevent future negative effects on quality of life and even pollution disasters from occurring. This volume will be of great interest to child health care experts, public health officials, regulators, health and environmental advocates, and parents.

[Enchanted Evenings: The Broadway Musical from 'Show Boat' to Sondheim and Lloyd Webber, Geoffrey Block](#) , 2009, 0199741506, 9780199741502. This new second edition of Enchanted Evenings offers theater lovers an illuminating behind-the-scenes tour of some of America's best loved, most admired, and most enduring musicals. Readers will find such all-time favorites as Show Boat, Carousel, Kiss Me, Kate, Guys and Dolls, My Fair Lady, West Side Story, Sweeney Todd, Sunday in the Park with George, and Phantom of the Opera. Geoffrey Block provides a documentary history of each of the musicals, showing how each work took shape and revealing, at the same time, how the American musical evolved from the 1920s to today, both on stage and on screen. The book's particular focus is on the music, offering a wealth of detail about how librettist, lyricist, composer, and director work together to shape the piece. Block also includes trenchant social commentary and lively backstage anecdotes. Jerome Kern, Cole Porter, the Gershwins, Rodgers and Hart, Kurt Weill, Rodgers and Hammerstein, Lerner and Loewe, Frank Loesser, Leonard Bernstein, Stephen Sondheim, Andrew Lloyd Webber, and other luminaries emerge as hardworking craftsmen under enormous pressure to sell tickets without compromising their dramatic vision. The second edition includes a greatly expanded chapter on Sondheim, a new chapter on Lloyd Webber, and two new chapters on the film adaptations of the main musicals featured in the text (including such hard to find films as the original 1936 version of Anything Goes and the 1959 film adaptation of Porgy and Bess). Packed with information, including a complete discography and plot synopses and song-by-song scenic outlines for each of the fourteen shows, Enchanted Evenings is an essential reference as well as a riveting history. "A solid and fascinating work that should become a model of how to investigate and report on the evolution of a musical. Block's research is persuasive and his writing vivid. . . Indispensable for anyone who cares to know more about Broadway musicals than Playbill can provide." --Steven Bach, The Los Angeles Times Book Review

[Grand Illusions New Country, Nick Ronald, David Roberts](#) , 2013, 1448118190, 9781448118199. For some years the notion of country living has been pushed aside in favour of a more urban, minimalist approach to decorating. Now NEW COUNTRY captures the spirit of change, reinterpreting and updating the romance and individuality of country style in a glorious fusion of country and modern, electric and traditional. An introduction, New Restraint, examines the inspiration on which to draw for capturing the new approach. Next, five chapters reflect the way life is centred today - Place at Table (eating, good living and entertaining), New Colour (a loose approach to easy living and muted tones and pastels), Sleep and Dreams (relaxation, bathing and beds). Seasonal Spirit (harnessing natural elements for the home) and Through the Picket Fence (garden rooms and outdoor living). Throughout these chapters practical, step-by-step projects are included in the form of Good Ideas. Nich Ronald and David Roberts have moved out of the city to discover for themselves the way of life that is New Country. Combining specially photographed interiors, practical solutions and original ideas, this third book from Grand Illusions takes the ethos back to its natural starting point - a place which cannot fail to inspire in everyone a quest for comfort, romance and relaxed living.

Leonardo's Mountain of Clams and the Diet of Worms is the newest collection of best-selling scientist Stephen Jay Gould's popular essays from "Natural History" magazine (the longest-running series of scientific essays in history). It is also the first of the final three such collections, since Dr. Gould has announced that the series will end with the turn of the millennium. In this collection, Gould consciously and unconventionally formulates a humanistic natural history, a consideration of how humans have learned to study and understand nature, rather than a history of nature itself. With his customary brilliance, Gould examines the puzzles and paradoxes great and small that build nature's and

humanity's diversity and order. In affecting short biographies, he depicts how scholars grapple with problems of science and philosophy as he illuminates the interaction of the outer world with the unique human ability to struggle to understand the whys and wherefores of existence. Excerpt: ... their natural will, "the impulse of appetite, is slavery, and obedience to self-prescribed law alone is liberty." Thus, at a turn of the hand, the abstract individual passes into the abstract universal, and the anarchy of individual will changes into the despotism of the State. Starting with the idea of the natural independence of every individual, Eousseau ends with a social desp&\_ tism, in which every interest of life is regulated and controlled by the State. And when in the Umile this contradiction is forced upon his attention, Eousseau thinks it enough to tell us that we must choose between the natural man and the citizen, for we cannot have both; and that the defect of the present mode of education is that it is directed to two opposite ends, and therefore fails in attaining either, but only produces hommes doubles, who have neither the independence of the natural man, nor that absolute absorption in the moi commun of the State which characterised the citizens of ancient Eome or Sparta. Of any union of social and individual liberty which does not involve the suppression of one or the other, of any organic unity of society in which the freedom of the members shall be consistent with the unity of the body politic, Eousseau has no conception, and, just because of this, his theory fluctuates between one and the other. In the end he seems to despair of political life, and he seeks to educate his Emile independently of any society, or at least of any society beyond the family. The "sole natural education is the domestic education," and, when it is completed, the ideal pupil has learned to regard his civic duty as something' secondary and accidental, and not as the real object of his life. Though, therefore, Eousseau makes...
