GLOBALHACK

# BUILD SOFTWARE TO CHANGE THE WORLD. COMPETE FOR \$1M IN CASH PRIZES.

GlobalHack VI will bring together software developers, designers, technologists, and entrepreneurs from around the world to solve a single, massive civic technology problem revealed at the beginning of the hackathon. Thousands of participants from youth, collegiate, and professional divisions will work in teams to solve this problem by building software solutions over the course of an entire weekend. A total of \$1 million in cash prizes will be awarded to the top teams, including \$250,000 in follow-on funds that will be used to take the most promising prototypes generated at the event to market.

## WHO CAN PARTICIPATE?

GlobalHack teams are composed of a well-balanced mix of software developers, front-end and UX designers, project managers and other technologists. All ranges of technical skills are invited to participate! Teams must be composed of 2 to 8 members. You do not need to sign up with a pre-formed team to compete -- we will help people find teams/team members before and at the event.

## HOW MUCH IS ADMISSION?

Admission to GlobalHack VI starts as low as \$10 depending on when you purchase your ticket (i.e. tickets will be more expensive closer to the event date). We will provide wifi, five meals, snacks, caffeine, and workspace for the entire weekend. With your admission, we will provide each attendee with a voucher for additional drinks & snacks at the event. When you've spent the balance of your voucher, you may purchase additional food at the arena on your own.

## HOW DO I SIGN UP?

Individuals may sign up for GlobalHack VI online at [globalhack.org](http://globalhack.org) starting on Monday, May 2, 2016. Questions? Email us at [info@globalhack.org](mailto:info@globalhack.org).
