[Satyajit Ray on Cinema, Satyajit Ray](#) , 2011, 0231164947, 9780231164948. Satyajit Ray, one of the greatest auteurs of twentieth century cinema, was a Bengali motion-picture director, writer, and illustrator who set a new standard for Indian cinema with his Apu Trilogy: Pather Panchali (Song of the Little Road) (1955), Aparajito (The Unvanquished) (1956), and Apur Sansar (The World of Apu) (1959). His work was admired for its humanism, versatility, attention to detail, and skilled use of music. He was also widely praised for his critical and intellectual writings, which mirror his filmmaking in their precision and wide-ranging grasp of history, culture, and aesthetics. Spanning forty years of Ray's career, these essays, for the first time collected in one volume, present the filmmaker's reflections on the art and craft of the cinematic medium and include his thoughts on sentimentalism, mass culture, silent films, the influence of the French New Wave,

and the experience of being a successful director. Ray speaks on the difficulty of adapting literary works to screen, the nature of the modern film festival, and the phenomenal contributions of Jean-Luc Godard and the Indian actor, director, producer, and singer Uttam Kumar. The collection also features an excerpt from Ray's diaries and reproduces his sketches of famous film personalities, such as Sergei Eisenstein, Charlie Chaplin, and Akira Kurosawa, in addition to film posters, photographs by and of the artist, film stills, and a filmography. Altogether, the volume relays the full extent of Ray's engagement with film and offers extensive access to the thought of one of the twentieth-century's leading Indian intellectuals.

[Masochism, , Gilles Deleuze, Leopold Sacher-Masoch \(Ritter von\)](#) , 1971, 094229954X, 9780942299540. In his stunning essay, Coldness and Cruelty, Gilles Deleuze provides a rigorous and informed philosophical examination of the work of the late 19th-century German novelist Leopold von Sacher-Masoch. Deleuze's essay, certainly the most profound study yet produced on the relations between sadism and masochism, seeks to develop and explain Masoch's "peculiar way of 'desexualizing' love while at the same time sexualizing the entire history of humanity." He shows that masochism is something far more subtle and complex than the enjoyment of pain, that masochism has nothing to do with sadism; their worlds do not communicate, just as the genius of those who created them - Masoch and Sade - lie stylistically, philosophically, and politically poles a part. Venus in Furs, the most famous of all of Masoch's novels was written in 1870

and belongs to an unfinished cycle of works that Masoch entitled The Heritage of Cain. The cycle was to treat a series of themes including love, war, and death. The present work is about love. Although the entire constellation of symbols that has come to characterize the masochistic syndrome can be found here - fetishes, whips, disguises, fur-clad women, contracts, humiliations, punishment, and always the volatile presence of a terrible coldness - these do not eclipse the singular power of Masoch's eroticism.

[Remembering the Roman People: Essays on Late-Republican Politics and Literature, T. P. Wiseman](#) , 2008, 0191617016, 9780191617010. In the Roman republic, only the People could pass laws, only the People could elect politicians to office, and the very word *republica* meant 'the People's business'. So why is it always assumed that the republic was an oligarchy? The main reason is that most of what we know about it we know from Cicero, a great man and a great writer, but also an active right-wing politician who took it for granted that what was good for a small minority of self-styled 'best people' (*optimates*) was good for the republic as a whole. T. P. Wiseman interprets the last century of the republic on the assumption that the People had a coherent political ideology of its own, and that the *optimates*, with their belief in justified murder, were responsible for the breakdown of the republic in civil war.

An international bestseller, Conversations With Myself is an intensely personal book that complements his autobiography Long Walk to Freedom. In his foreword to Nelson Mandela's book, President Barack Obama writes: 'Conversations With Myself does the world an extraordinary service in giving us [a] picture of Mandela the man.' Conversations With Myself gives readers insight to the darkest hours of Nelson Mandela's twenty-seven years of imprisonment and his troubled dreams in his cell on Robben Island. It contains the draft of an unfinished sequel to Long Walk to Freedom, notes from Madiba's famous speeches, and even doodles made during meetings. There are photos from his life, journals written while on the run during the anti-apartheid struggles of the early

1960s, and conversations with friends in almost 70 hours of recorded interviews. An intimate journey from the first stirrings of his political conscience to his galvanizing role on the world stage, *Conversations With Myself* is an extraordinary glimpse of the man behind one of the world's most beloved public figures. Scripture teaches us that Christ's kingdom is within us and all around us. When Jesus showed His disciples how to pray, He spoke directly to His Father, Your kingdom come. Your will be done on earth as it is in heaven (Matt. 6:9). God wants us to learn how to bring the reality of the kingdom of heaven right into our midst here on earth, as Jesus did! This radical and biblically sound teaching will ignite a roaring passion for Jesus in the hearts of believers for the glory of God. Readers will discover how to access the realm of as it is in heaven in every earthly circumstance. It compels God's children to present the kingdom of God in power everywhere. Stubbs also demonstrates how to work with individual energy patterns or bio-

rhythms and use some of the many energy tools and technologies currently available for balancing the physical, mental, emotional and spiritual body systems. Volume Two delivers new information about human life in relation to the cosmos and explains why it has been so difficult for global leaders to publicly acknowledge extraterrestrial presence. Writes Stubbs: "We are part of a vast and wonderful universe. As the mystics have always known and science is currently discovering, it is much more than can be seen, heard and touched. [Hate Crimes : Criminal Law and Identity Politics: Criminal Law and Identity Politics, New York University Center for Research in Crime and Justice James B. Jacobs Director, New York University Center for Research in Crime and Justice Kimberly Potter Director](#) , 1998, 0199774552, 9780199774555. In the early 1980s, a new category of crime appeared in the criminal law lexicon. In response to concerted advocacy-group lobbying, Congress and many state legislatures passed a wave of "hate crime" laws requiring the collection of statistics on, and enhancing the punishment for, crimes motivated by certain prejudices. This book places the evolution of the hate crime concept in socio-legal perspective. James B. Jacobs and Kimberly Potter adopt a skeptical if not critical stance, maintaining that legal definitions of hate crime are riddled with ambiguity and subjectivity. No matter how hate crime is defined, and despite an apparent media consensus to the contrary, the authors find no evidence to support the claim that the United States is experiencing a hate crime epidemic--instead, they cast doubt on whether the number of hate crimes is even increasing. The authors further assert that, while the federal effort to establish a reliable hate crime accounting system has failed, data collected for this purpose have led to widespread misinterpretation of the state of intergroup relations in this country. The book contends that hate crime as a socio-legal category represents the elaboration of an identity politics now manifesting itself in many areas of the law. But the attempt to apply the anti-discrimination paradigm to criminal law generates problems and anomalies. For one thing, members of minority groups are frequently hate crime perpetrators. Moreover, the underlying conduct prohibited by hate crime law is already subject to criminal punishment. Jacobs and Potter question whether hate crimes are worse or more serious than similar crimes attributable to other anti-social motivations. They also argue that the effort to single out hate crime for greater punishment is, in effect, an effort to punish some offenders more seriously simply because of their beliefs, opinions, or values, thus implicating the First Amendment. Advancing a provocative argument in clear and persuasive terms, Jacobs and Potter show how the recriminalization of hate crime has little (if any) value with respect to law enforcement or criminal justice. Indeed, enforcement of such laws may exacerbate intergroup

tensions rather than eradicate prejudice.

A Summer in the High Sierra is based on Laurence Brauer's journal of a 38-day solo round trip backpacking through the timberline country from Yosemite to Kings Canyon. Traveling outside cultural and religious doctrines, Brauer examines the assumptions of human societies and find that neither the rational deconstructions of science nor the leap of faith of religion contain the breadth and depth of nature's message. Seeing beyond our dualistic doctrines, he redefines our concepts of human nature, evolution, and spirituality. The book features 96 full-color photographs illustrating the journey, which took the author along sections of the John Muir Trail, High Sierra Trail, and off-trail locations. An Epilogue recounting a ten-day trip one year later and an Afterword recounting a short return trip to Vogelsang in which the author reassesses the previous ten years are also included.

[The King's Spy, , Andrew Swanston](#) , 2012, 0593068866, 9780593068861. Summer, 1643 England is at war with itself. King Charles I has fled London, his negotiations with Parliament in tatters. The country is consumed by bloodshed. For Thomas Hill, a man of letters quietly running a bookshop in the rural town of Romsey, knowledge of the war is limited to the rumours that reach the local inn. When a stranger knocks on his door one night and informs him that the king's cryptographer has died, everything changes. Aware of Thomas's background as a mathematician and his expertise in codes and ciphers, the king has summoned him to his court in Oxford. On arrival, Thomas soon discovers that nothing at court is straightforward. There is evidence of a traitor in their midst. Brutal murder follows brutal murder. And when a vital message encrypted with a notoriously unbreakable code is intercepted, he must decipher it to reveal the king's betrayer and prevent the violent death that failure will surely bring.

[The Effective Way to Stop Drinking, Beechy Colclough](#) , 2009, 0141030410, 9780141030418. Alcohol is one of the most seductive drugs available to us: it makes us feel relaxed, confident and content, although we may know we are none of

those things. While heavy drinkers may be concerned about their habit, social and moderate drinkers may not wish to give up but may want to cut down or ensure that their drinking does not get out of hand. This sympathetic and authoritative book gives readers advice on how to assess whether they have a drinking problem and, if so, what to do about it. By examining the reasons why people drink and exploding the myths surrounding alcoholism, Beechy Colclough, himself a reformed alcoholic, suggests ways drinkers can change their attitudes and habits in order to move on.

John Paul II understands that the event of the Incarnation of Jesus Christ in world history continues daily in a special way in the priestly brotherhood of those who have been chosen to follow in his footsteps--and indeed in every man and woman, all called through the gift of faith to a life of holiness. In concluding Gift and Mystery, the pope writes to his brother priests, 'Learn to see in your priesthood the Gospel treasure for which it is worth giving up everything.' [GPS, Thomas G. Bandy](#) , 2011, 0986903019, 9780986903014. Travelers get up in the morning and ask three questions. Where am I now? Where am I going? What do I need to take with me? The same three questions apply to the Christian pilgrimage in daily living. Here is a clear and profound explanation of the three great anxieties that dog our footsteps every day, and the spiritual methodology through which we become open to the intimacy of God. Pilgrims go beyond the abbreviated "Serenity Prayer" that is so well known, to explore the entire prayer that has ancient origins. Learn how to reach up through intimate beginnings, life struggles, and spiritual coaching to experience Jesus Christ (fully human) ... the giver of hope for the hopeless, healing for the broken, and guidance for the lost. Learn how to see Christ (fully divine) reaching down through infinite beginnings, justice, and reason ... the giver of fresh beginnings, vindication, and dependable order. At different times, in different ways, each one of us lives life on-the-edge and life-in-between, but through it all we can occasionally experience life-at-peace. This book helps travelers support one another as a pilgrim band of true friends. Together we can find the way and arrive at a holy destination.

[The Rise and Fall of the House of Bo, John Garnaut](#) , 2012, 014356935X, 9780143569350. 2013 Walkley Book Award Finalist When news of the murder trial of prominent Communist Party leader Bo Xilai's wife reached Western attention, it was apparent that, as with many events in the secretive upper echelons of Chinese politics, there was more to the story. Now, as the Party's 18th National Congress oversees the biggest leadership transition in decades, and installs the Bo family's long-time rival Xi Jinping as president, China's rulers are finding it increasingly difficult to keep their poisonous internal divisions behind closed doors. Bo Xilai's breathtaking fall from grace is an extraordinary tale of excess, murder, defection, political purges and ideological clashes going back to Mao himself, as the princeling sons of the revolutionary heroes ascend to control of the Party. China watcher John Garnaut examines how Bo's stellar rise through the ranks troubled his more reformist peers, as he revived anti-'capitalist roader' sentiment, even while his family and associates enjoyed the more open economy's opportunities. Amid fears his imminent elevation to the powerful Standing Committee was leading China towards another destructive Cultural Revolution, have his opponents seized their chance now to destroy Bo and what he stands for? The trigger was his wife Gu Kailai's apparently paranoid murder of an English family friend, which exposed the corruption and brutality of Bo's outwardly successful administration of the massive city of Chongqing. It also led to the one of the highest-level attempted defections in Communist China's history when Bo's right-hand man, police chief Wang Lijun, tried to escape the ruins of his sponsor's reputation. Garnaut explains how this incredible glimpse into the very personal power struggles within the CCP exposes the myth of the unified one-party state. With China approaching superpower status, today's leadership shuffle may set the tone for international relations for decades. Here, Garnaut reveals a particularly Chinese spin on the old adage that the personal is political. 'Illuminating . . . By far the most carefully researched and sober analysis of a scandal that has fascinated the world' - New York Review

[Macho Sluts: A Little Sister's Classic, Patrick Califia, Wendy Chapkis](#) , 2009, 1551522608, 9781551522609. When it was first published in 1988, Patrick Califia'sMacho Sluts, a collection of S/M stories set in San Francisco's dyke bathhouses, sex parties, and S/M gay bars, shocked the lesbian community and caused an upheaval in the field of queer publishing. Nobody had ever written so frankly about the kinky potential of woman-to-woman sex (and nobody has ever done it any better). If any book is responsible for the formation of the modern lesbian leather community, this one is it. Despite its graceful language, imaginative scenarios, and abundant humor, the lesbian press trashedMacho Sluts, and it became a focal point for the infamous legal battles between Canada Customs and Little Sister's, the gay and lesbian bookstore. But readers loved it, and to this dayMacho Slutsremains a vital and moving classic that still has the power to educate,

radicalize, and expand our notions of the body's potential to provide us with pleasure, pain, and love. This new edition, part of Arsenal Pulp Press' Little Sister's Classics series resurrecting classics of LGBT literature, includes a new afterword by the author, and an introduction by Wendy Chapkis, a professor of sociology and women and gender studies at the University of Southern Maine in Portland. Patrick Califia has written many books about radical sex, queer communities, and the repression of desire. Almost ten years ago, Califia transitioned from female to male; he now lives as a bisexual transman in San Francisco.

[TCP/IP sockets in Java \[electronic resource\]: practical guide for programmers, ISSN 1555-6956, Kenneth L. Calvert, Michael J. Donahoo](#) , 2008, 0123742552, 9780123742551. The networking capabilities of the Java platform have been extended considerably since the first edition of the book. This new edition covers version 1.5-1.7, the most current iterations, as well as making the following improvements: The API (application programming interface) reference sections in each chapter, which describe the relevant parts of each class, have been replaced with (i) a summary section that lists the classes and methods used in the code, and (ii) a ?gotchas? section that mentions nonobvious or poorly-documented aspects of the objects. In addition, the book covers several new classes and capabilities introduced in the last few revisions of the Java platform. New abstractions to be covered include `NetworkInterface`, `InterfaceAddress`, `Inet4/6Address`, `SocketAddress/InetSocketAddress`, `Executor`, and others; extended access to low-level network information; support for IPv6; more complete access to socket options; and scalable I/O. The example code is also modified to take advantage of new language features such as annotations, enumerations, as well as generics and implicit iterators where appropriate. Most Internet applications use sockets to implement network communication protocols. This book's focused, tutorial-based approach helps the reader master the tasks and techniques essential to virtually all client-server projects using sockets in Java. Chapter 1 provides a general overview of networking concepts to allow readers to synchronize the concepts with terminology. Chapter 2 introduces the mechanics of simple clients and servers. Chapter 3 covers basic message construction and parsing. Chapter 4 then deals with techniques used to build more robust clients and servers. Chapter 5 (NEW) introduces the scalable interface facilities which were introduced in Java 1.5, including the buffer and channel abstractions. Chapter 6 discusses the relationship between the programming constructs and the underlying protocol implementations in more detail. Programming concepts are introduced through simple program examples accompanied by line-by-line code commentary that describes the purpose of every part of the program. The book's Web site contains many examples of command-based sockets-related code discussed throughout the book. No other resource presents so concisely or so effectively the material necessary to get up and running with Java sockets programming. KEY FEATURES* Focused, tutorial-based instruction in key sockets programming techniques allows reader to quickly come up to speed on Java applications. * Concise and up-to-date coverage of the most recent platform (1.7) for Java applications in networking technology* Provides code for all example programs via a companion Web site to let the reader see the important objects and methods in context and to understand the purpose of each line of code.

[A Romance With the Landscape: Realism to Impressionism, Janie Margaret Welker, Linda Stratford](#) , 2006, 0977954110, 9780977954117. Nineteenth-century France produced a cadre of artists whose first impulse was to escape the turmoil of Paris and seek refuge in the countryside, where they created an art grounded in their fresh responses to the natural world. Such artists as Charles Emile Jacque and Jean-Francois Millet discovered a quiet heroism and even a spiritual quality in those working the land, while others, like Julien Dupr, featured attractive young laborers toiling in picturesque settings that did not hint of hard work or the often harsh realities of agricultural labor. Social and political ideologies are coded into the landscape in subtle ways in many paintings. Rarely seen paintings from public and private collections illustrate the metamorphosis from the neoclassical ideal to the Modern over the course of the nineteenth century through the lens of landscape art. Contributors include Gabriel P. Weisberg and Janet Whitmore.

[The Neurology of Autism, Mary Coleman Clinical Professor of Pediatric Neurology Georgetown University School of](#)

[Medicine \(Emeritus\)](#) , 2005, 0198040210, 9780198040217. In *Neurology of Autism*, Mary Coleman, Catalina Betancur, G. Robert DeLong, Christopher Gillberg, Yoshiko Nomura, Lorenzo Pavone, Martin Ruggieri, and Michele Zappella use the tools of neurological analysis to address a number of the major questions that have arisen in the study of autism. The answers they present have important implications for the direction of future autism research, diagnosis, and treatment. What are the neurological signs and symptoms of autism? The latest information is presented here in an in-depth discussion of epilepsy, cranial circumference, changes in muscle tone, stereotypies, and mutism found in children with autism. In addition, a template is provided for practitioners to follow when conducting neurological examinations of a child with autism. What are the best options for the treatment of autism? The current medical, educational, and alternative therapies are thoroughly reviewed and evaluated. Is autism reversible? The question is explored for syndromic autism, where diseases may have a transient autistic phase, and reviewed in detail for nonsyndromic autism. Is autism primarily a single disease, as originally described by Leo Kanner? Research presented here suggests that autism is, instead, a syndrome involving many disease entities. Has the incidence of autism been increasing in recent years? A sophisticated, historical review of autisms prevalence rates suggests that it has never been rare. What is the relationship between autism and Asperger syndrome? The latest evidence presented here sheds light on the degree to which both syndromes share more than clinical characteristics; they also have some similar findings in imaging, neuropathological, and genetic studies. Which components of the brains neural networks need to be impaired to cause the appearance of autistic symptoms? Although there are many candidate regions, dysfunction of the cerebellum and its circuits is noted to be of great interest. Student and professional researchers, practitioners, and parents will find this book to be a valuable resource for both the latest information from basic-science research and its application to the diagnosis and treatment of autism.

This greathearted novel is the finale of Ivan Doig's passionate and authentic trilogy about the McCaskill family and their alluring Two Medicine country along the hem of the northern Rockies. Jick McCaskill, the illustrious narrator of "English Creek," returns as the witty and moving voice in this classic encounter with the American road and all the rewards and travails it can bring. Jick faces his family's -- and his state's -- legacy of loss and perseverance from the vantage point of Montana's centennial in 1989 when his daughter Mariah enlists him as Winnebago chauffeur to her and her ex-husband, the magnificently ornery and eloquent columnist Riley Wright, when their news-paper dispatches them to dig up stories of the "real Montana." Just as the centennial is a cause for reflection as well as jubilation, the exuberant travels of this trio bring on encounters with the past in "memory storms" that become occasions for reassessment and necessary accommodations of the heart.

[Welfare Benefits Up-Rating Act 2013, Part 16, Great Britain](#) , 2013, 0105416134, 9780105416135. Welfare expenditure is a significant driver of public spending, and the Government has made a commitment to deliver a more sustainable welfare system. In the Autumn Statement 2012 (Cm. 8480, ISBN 9780101848022), it was announced that in light of the national economic situation, certain working-age social security benefits and payments, and certain elements of tax credits, would be up-rated by 1 per cent, rather than prices (as measured by the Consumer Prices Index ('CPI'), 2.2 per cent), for the tax year 2013-14. The working-age social security benefits and payments in question are: the main rates of

Income Support, Jobseeker's Allowance, Employment and Support Allowance and Housing Benefit; and the work-related activity group component of Employment and Support Allowance; Maternity Allowance; and Statutory Adoption, Maternity, Paternity and Sick Pay. Also for 2013-14, the Government has decided that the basic State Pension should be up-rated by 2.5 per cent as under the 'triple lock' commitment.

[Making the best of it: following Christ in the real world, John Gordon Stackhouse](#) , 2008, 0195173589, 9780195173581.

What should be the Christian's attitude toward society? When so much of our contemporary culture is at odds with Christian beliefs and mores, it may seem that serious Christians now have only two choices: transform society completely according to Christian values or retreat into the cloister of sectarian fellowship. In Making the Best of It, John Stackhouse explores the history of the Christian encounter with society, the biblical record, and various theological models of cultural engagement to offer a more balanced and fruitful alternative to these extremes. He argues that, rather than trying to root up the weeds in the cultural field, or trying to shun them, Christians should practice persistence in gardening God's world and building toward the New Jerusalem. Examining the lives and works of C. S. Lewis, Reinhold Niebuhr, and Dietrich Bonhoeffer for example and direction, Stackhouse suggests that our mission is to make the most of life in the world in cooperation with God's own mission of redeeming the world he loves. This model takes seriously the pattern of God's activity in the Bible, and in subsequent history, of working through earthly means--through individuals, communities, and institutions that are deeply flawed but nonetheless capable of accomplishing God's purposes. Christians

must find a way to live in this world and at the same time do work that honors God and God's plan for us. In an era of increasing religious and cultural tensions, both internationally and domestically, the model that Stackhouse develops discourages the "all or nothing" attitudes that afflict so much of contemporary Christianity. Instead, he offers a fresh, and refreshingly nuanced, take on the question of what it means to be a Christian in the world today.

[American Global Strategy and the "war on Terrorism", Hall Gardner](#) , 2005, 0754645126, 9780754645122. Contemporary international events, and indeed even the US presidential election, demonstrate the continuing need for debate and discourse over the direction and emphases of US foreign policy. AAmerican Global Strategy and the War on Terrorism AA, addresses a wide range of themes that are crucial to understanding the post-11 September, 2001 crisis and to formulating an effective American and global foreign and security policy to deal with that crisis. Hall Gardner seeks to re-conceptualize the 'war on terrorism' and to analyze the nature of American domestic and international policy-making within the context of historical and structural constraints upon US policy. The book contends that US strategy needs to

shift gears and work more diligently to minimize the risks of even wider regional conflicts, possibly involving major powers, through engaging in truly multilateral strategies and through 'strengthening' the UN.

[Straight Outta East Oakland: If You Don't Know, You'd Better Ask Somebody, Harry Louis Williams, II](#) , 2008, 0978913302, 9780978913304. Firstborn Walker is a book worm who dreams of attending one of America's most competitive universities. When his best friend is shot through the forehead with a hollow tip bullet, his desire to flee the mean streets only intensifies. Unemployed, he turns to the only person who can help him secure the money he'll need to

supplement his scholarship, a childhood friend known as "Drama." Drama is a charismatic, ultra-violent block hog, an East Oakland crack dealer who makes his living with a triple beam scale and an Uzi submachine gun. So, Firstborn becomes a member of the Black Christmas Mob. Now the community college valedictorian must struggle to survive in a game laced with gold diggers, contract killers, hard hitters, marks, knocks, snitches and infiltrators; a world where witness tampering, blinding violence, safehouses, and a relentless cop named "the Hawk" become his new reality.

[A Fabled Land: The Story of Canterbury's Famous Mesopotamia Station - 150 Years of Station Life, Bruce Ansley, Peter Bush](#) , 2012, 187746063X, 9781877460630. The historic Mesopotamia Station is located in mid-Canterbury at the headwaters of the magnificent Rangitata gorge. 'Mesopotamia', named by Samuel Butler in 1860, means 'the land between two rivers': it lies between the Rangitata and Forest Creek rivers. Author Bruce Ansley has brilliantly captured the spirit of this great sheep station: from the early pioneers who first braved its harsh winters and searing summers to the ingenuity and drive of the present-day owners, the Prouting family. His description of the landscape is at once poetic and immediate and magnificent, taking the reader right to the heart of the high country. The Mesopotamia story gives an astonishing overview of the history of the area, while the imposing power of the rivers, the hills, and the weather are ever present. In this country the mountains have as much personality and character as the members of the station's longtime owners, the Prouting family. The Rangitata River flows like a rogue throughout. We ride the 'curious tide of extremes' that farming embodies: the heartache, the exhilaration, the grandiose, the bombastic, the gracious, the laconic humour. This is a man's country, where the women who wish to stay have to hold their own; a country where the past is repeated and echoed in the present. Ansley's portraits of the Prouting family and others who are drawn to this special place are insightful and perceptive. He throws open the farm gate on the iconic farming family. Laurie, the patriarch, is a gem of a man with an appealing, deep-seated humanity and a great love of the high country. The four seasons are celebrated in true 'Meso' style giving the modern-day workings of the station all set within the great amphitheatre of the mountains. Here the romance of the high country is tempered with real life and bellowing stock. Peter Bush's photographs, taken over a 50-year period, grace Ansley's story, capturing the great musters of days gone by, the dignity of the shearing teams, the majestic country and the characters who people Mesopotamia's story.

[Material Computation: Higher Integration in Morphogenetic Design Architectural Design, ISSN 0003-8504, Achim Menges](#) , 2012, 0470973307, 9780470973301. The production of architecture, both intellectually and physically, is on the brink of a fundamental change. Computational design enables architects to integrate ever more multifaceted and complex design information, while the industrial logics of conventional building construction are eroding rapidly in a context of

increasingly ubiquitous computer-controlled manufacturing and fabrication. A novel convergence of computation and materialisation is about to emerge, bringing the virtual process of design and the physical realisation of architecture much closer together, more so than ever before. Computation provides a powerful agency for both informing the design process through specific material behaviour and characteristics, and in turn informing the organisation of matter and material across multiple scales based on feedback from the environment. Computational design and integrated materialisation processes allow for uncovering the inherent morphogenetic potential of materials and thus are opening up a largely uncharted field of possibilities for the way the built environment in the 21st century is conceived and produced. In order to effectively introduce and outline the enabling power of computational design along with its inherent relationship to a biological paradigm, this publication looks at formation and materialisation in nature, integrative computational design, and engineering and manufacturing integration. Architectural contributors include: Cristiano Cecatto, Neri Oxman, Skylar Tibbits and Michael Weinstock. A scientific perspective by Philip Ball and J Scott Turner. Features: Buro Happold's SMART group, DiniTech, Foster + Partners' Specialist Modelling Group, the Freeform Construction group and Stuttgart University's Institute for Computational Design.

Stephen Mulhall presents a detailed critical commentary on sections 243-315 of Wittgenstein's Philosophical Investigations: the famous remarks on 'private language'. In so doing, he makes detailed use of Stanley Cavell's interpretations of these remarks; and relates disputes about how to interpret this aspect of Wittgenstein's later philosophy to a recent, highly influential controversy about how to interpret Wittgenstein's early text, the Tractatus Logico-Philosophicus, by drawing and testing out a distinction between resolute and substantial

understandings of the related notions of grammar, nonsense and the imagination. The book is concerned throughout to elucidate Wittgenstein's philosophical method, and to establish the importance of the form or style of his writing to the proper application of this method.

[Afro Asia: Revolutionary Political and Cultural Connections between African Americans and Asian Americans, Fred Ho, Bill V. Mullen](#) , 2008, 0822381176, 9780822381174. DIVWith contributions from activists, artists, and scholars, Afro Asia is a groundbreaking collection of writing on the historical alliances, cultural connections, and shared political strategies linking African Americans and Asian Americans. Bringing together autobiography, poetry, scholarly criticism, and other genres, this volume represents an activist vanguard in the cultural struggle against oppression. Afro Asia opens with analyses of historical connections between people of African and of Asian descent. An account of nineteenth-century Chinese laborers who fought against slavery and colonialism in Cuba appears alongside an exploration of African Americans reactions to and experiences of the Korean conflict. Contributors examine the fertile period of Afro-Asian exchange that began around the time of the 1955 Bandung Conference, the first meeting of leaders from Asian and African nations in the postcolonial era. One assesses the relationship of two important 1960s Asian American activists to Malcolm X and the Black Panthers. Mao Ze Dongs 1963 and 1968 statements in support of black liberation are juxtaposed with an overview of the influence of Maoism on African American leftists. Turning to the arts, Ishmael Reed provides a brief account of how he met and helped several Asian American writers. A Vietnamese American spoken-word artist describes the impact of black hip-hop culture on working-class urban Asian American youth. Fred Ho interviews Bill Cole, an African American jazz musician who plays Asian double-reed instruments. This pioneering collection closes with an array of creative writing, including poetry, memoir, and a dialogue about identity and friendship that two writers, one Japanese American and the other African American, have performed around the United States. [Core Economics for Managers Infotrac, Joshua Gans](#) , 2005, 0170124754, 9780170124751. In this engaging text Joshua Gans turns economic teaching on its head. Specifically aimed at the management or MBA student, Core Economics for Managers covers the essentials but does so in ways that build on and reinforce the students work experiences Beginning with the tools of decision-making, this book does not shy away from the complexities of managerial decisions but embraces them to consider both uncertainty and strategic interaction in a readily accessible way. This allows the student to move with ease to considering the principles of negotiated exchange and how prices are formed when parties interact

face to face rather than anonymously in markets. This provides a natural way of talking about competition and the gains from cooperation. The traditional topics of economics and competitive strategy can then be introduced by considering pricing; that is, how a firm chooses its price, how a firm can innovate in pricing, how prices are constrained by competition and how prices can act as signals for investment. Finally, with all of these tools in hand, the student can seamlessly move on to topics of contracting, outsourcing, the provision of incentives and the building of relationships. No other single book covers this multitude of topics in such an accessible way. Gone are unnecessary jargon from economics and strategy. All that remains is the core. And that core can be taken with the student back into their studies and commercial life.

the key figures in contemporary design. A superstar in the world of design, Patricia Urquiola's portfolio of architectural projects and product designs is as diverse as it is intensely personal from a house for Patrizia Moroso, to the interiors of boutique hotels, to industrial design, and with products that include chairs, watches, and cutlery. Since the opening of her own design practice in Milan in 2001, Urquiola has taken on an ever-expanding number of projects, and has worked with all the great international design houses, including Moroso, De Padova, B&B Italia, Bisazza, Alessi, Driade, and Flos, to name a few. Urquiola's distinctive works straddle the boundary between architecture and design, the product of a rigorous, interdisciplinary education. Her products and spaces have won her acclaim for combining a bold, passionate imagination with an innate practicality. Drawing inspiration from historical precedent, her designs are often characterized by their clear lines and formal simplicity, and their irrepressible sensuality. This inspiring book captures the fervid energy of Urquiola's life and work, in an unprecedented and striking design object as innovative and intimate as her body of work.

[Historical Atlas Of The Viking World,](#) , 2004, 1904668127, 9781904668121. From A.D. 790, Viking raiders struck fear into the coastal communities of England, Scotland, Wales, Ireland, northern Germany, western and southern France, and the Low Countries (now Holland and Belgium). Using rivers, Vikings struck deep inland to attack monasteries, towns, even walled cities. The very fabric of the Christian Church in northern Europe was threatened with extinction. Settlers followed the raiders. Eventually, the pillaging diminished as the Vikings became Christians. By the late 11th century, Viking settlers, merchants, and even armies had become intermingled and indistinguishable from the populations of northern Europe. Those Vikings who settle around the Seine estuary in France became Normans, adopted the Frankish feudal system and formed the backbone of the new medieval era. But who were the Vikings? Why did they suddenly burst beyond the confines of their Scandinavian homeland? How and why did the Viking era come to an end? How did these people live? How did they acquire such a fearsome martial reputation? And what did they believe in? Angus Konstam's Historical Atlas of the Viking World traces the story of this vibrant European culture from the mists of its mythology to its culmination as one of the most powerful trading cultures of the early Middle Ages. The book also emphasizes that even today we live with the cultural and judicial legacy of these amazing people - the Vikings.

The Fuhrer arranges for Reichsleiter Martin Bormann to flee Germany by air to Norway, where a German U-boat waits to take him to South America.... 1992. Sean Dillon, the elusive terrorist from *Eye of the Storm*, is facing a firing squad in war-torn Yugoslavia. When the "pink slime" report from ABC News aired in March 2012, retail food suppliers were faced with a risky decision. Pink slime is the common name for lean finely textured beef (LFTB), a food additive to ground beef that is controversial because it is exposed to ammonia to kill bacteria. Consumers responded negatively to the report, and retailers needed to decide whether to announce the removal of LFTB from their products, do nothing or offer their customers a choice. Bruce Malcolm Smith was a company insider who lost his job due to the company's sudden closure of all but one production facility resulting in 1,000 jobs lost. The book examines the viral effect of the internet social media along with celebrity and traditional media influences that created public consumer hysteria and panic over a lean beef product that had been sold and consumed for decades by the Americans without cause or concern.

The 1975 publication of Robin Tolmach Lakoff's *Language and Woman's Place*, is widely recognized as having inaugurated feminist research on the relationship between language and gender, touching off a remarkable response among language scholars, feminists, and general readers. For the past thirty years, scholars of language and gender have been debating and developing Lakoff's

initial observations. Arguing that language is fundamental to gender inequality, Lakoff pointed to two areas in which inequalities can be found: Language used about women, such as the asymmetries between seemingly parallel terms like master and mistress, and language used by women, which places women in a double bind between being appropriately feminine and being fully human. Lakoff's central argument that "women's language" expresses powerlessness triggered a controversy that continues to this day. The revised and expanded edition presents the full text of the original first edition, along with an introduction and annotations by Lakoff in which she reflects on the text a quarter century later and expands on some of the most widely discussed issues it raises. The volume also brings together commentaries from twenty-six leading scholars of language, gender, and sexuality, within linguistics, anthropology, modern languages, education, information sciences, and other disciplines. The commentaries discuss the book's contribution to feminist research on language and explore its ongoing relevance for scholarship in the field. This new edition of *Language and Woman's Place* not only makes available once again the pioneering text of feminist linguistics; just as important, it places the text in the context of contemporary feminist and gender theory for a new generation of readers.

[Three to a Loaf: A Novel of the Great War, Michael Goodspeed](#) , 2008, 0978160061, 9780978160067. Three to a Loaf is the First World War story of Rory Ferrall, a young Canadian officer of Anglo-German descent who, after being wounded and disfigured at Ypres, comes to the attention of British military intelligence. Ferrall's German background is valuable to the war's planners. Hundreds of German-Americans had returned to the Fatherland to fight for the Kaiser at the outbreak of war in August 1914 and the British captured one. Cleverly trained to impersonate the captured German-American officer, Ferrall is smuggled into wartime Germany to infiltrate the German General Staff and discover their top-secret plan to break the stalemate on the Western Front. A page-turning novel of war and espionage, Three to a Loaf is also a portrait of societies and individuals pushed to the breaking point, and in some cases, beyond. Michael Goodspeed artfully blends the tension of a thriller with period detail, the detached commentary of a nitty-gritty travelogue, and psychological understanding of a harried man facing soul-destroying ethical decisions.

[The Founders' Key: The Divine and Natural Connection Between the Declaration and the Constitution and what We Risk by Losing it, Larry P. Arnn](#) , 2012, 1595554726, 9781595554727. Today the integrity and unity of the Declaration of Independence and the Constitution are under attack by the Progressive political movement. And yet, writes Larry P. Arnn: The words of the Declaration of Independence ring across the ages. The arrangements of the Constitution have a way of organizing our actions so as to produce certain desirable results, and they have done this more reliably than any governing instrument in the history of man. Connect these arrangements to the beauty of the Declaration and one has something inspiring and commanding. From Chapter 2, The Founders Key Dr. Arnn, president of Hillsdale College, reveals this integral unity of the Declaration and the Constitution. Together, they form the pillars upon which the liberties and rights of the American people stand. United, they have guided history's first self-governing nation, forming our government under certain universal and eternal principles. Unfortunately, the effort to redefine government to reflect the changing and growing social order has gone very far toward success. Politicians such as Franklin Roosevelt found ways to condemn and discard the Constitution and to redefine the Declaration to justify government without limit. As a result, both documents have been weakened, their influence diminished, and their meaning obscured paving the way for the modern administrative state, unaccountable to the will of the people. The Founders Key is a powerful call to rediscover the connection between these two mighty documents, and thereby restore our political faith and revive our free institutions.

[Handbook of Plastic Surgery for the General Surgeon, Behman M. Daver, N. H. Antia, Noshir H. Antia, David W. Furnas](#) , 1995, 019563635X, 9780195636352. This handbook provides practical guidance to the general surgeon with limited experience in the field of plastic surgery, who may be called upon to undertake plastic surgery. If there are no plastic surgeons in the close vicinity, as is often the case in need-based countries or in the more remote parts of developed countries, the decision to operate or refer to a plastic surgeon is often difficult. It is hoped that with the information given in this book, the general surgeon will be able to make the right decision. Most of the conditions described are universally seen. The inclusion of a particular topic depends mainly on the frequency with which the condition is seen in general practice and the facility with which it can be tackled by a general surgeon. In order not to confuse the reader, only important principles have been defined and one or two well tried and safe methods of treatment are described for each condition. Each surgical procedure is described with the help of simple, clear illustrations and photographs.

[Prenez soin de vous, Sophie Calle](#) , 2007, 2742768939, 9782742768936. In this remarkable artist's book, French conceptual artist/provocateur Sophie Calle presents 107 outside interpretations of a "breakup" e-mail she received from her lover the day he ended their affair. Featuring a stamped pink metallic cover, multiple paper changes, special bound-in booklets, bright green envelopes containing DVDs and even Braille endpapers, it is a deeply poignant investigation of love and loss, published to coincide with the 2007 Venice Biennale--where Calle served as that fair's French representative. All of the interpreters of Calle's breakup letter were women, and each was asked to analyze the document according to her profession--so that a writer comments on its style, a justice issues judgment, a lawyer defends Calle's ex-lover, a psychoanalyst studies his psychology, a mediator tries to find a path towards reconciliation, a proofreader provides a literal edit of the text, etc. In addition, Calle asked a variety of performers, including Nathalie Dessay, Laurie Anderson and Carla Bruni, among others, to act the letter out. She filmed the singers and actresses and photographed the other contributors, so that each printed interpretation stands alongside at least one riveting image of its author, and some are also accompanied by digital documentation. The result is a fascinating study and a deeply moving experience--as well as an artwork in its own right. Already a collector's item, this is a universal document of how it feels to grieve for love.

The explosive war for independence from Great Britain was ignited in New England and soon spread southward to include all of the colonies. For a long time the issue was in doubt. Sturdy farmers, merchants, and frontiersmen were molded into superior fighting forces by General George Washington and stern, unlettered leaders born from the soil like General John Stark. The cost in lives and treasure was immense, but eventually, the torch of freedom was held high and overcame the might of one of the finest armies in the world. This is a moving story of love and sacrifice when a small colony had the audacity to fight for independence from their motherland." --Back cover.

Nothing's the matter with Kansas: Americans voting their values are responding to a real moral crisis. And in this forceful follow-up to *The Cheating Culture*, David Callahan argues that the problems for most Americans are not abortion and gay marriage but rather issues that neither party is addressing: the selfishness that is careening out of control, the effect of our violent and consumerist culture on children, and our lack of a greater purpose. As Republicans veer into zealotry, liberals can find common ground with the moderate majority. But to alleviate the moral anxieties that drove GOP electoral victories they need a powerful new vision. In *The Moral Center*, Callahan articulates that vision and offers an escape from the dead-end culture war. With insights garnered from in-depth research and interviews, he examines some of our most polarized conflicts and presents unexpected solutions that lay out a new road map to the American center.
