A complete, interactive course covering the fundamentals of pharmacology, this book/software teaching package includes an IBM-PC compatible disk which provides useful and flexible simulations of experiments. This integrated system is adaptable to many courses in the field, and is carefully structured to take students step by step through progressively difficult subject matter. The textbook gives readers information on twenty different drugs. The software guides students through administering and monitoring the drug in question, specifying dose according to sex, age, weight, and height. After the student runs the experiment, the program provides information in tables, graphs, or disposition diagrams to help interpret the results. The authors have marshalled a formidable range and depth of expertise to develop this reliable, thorough and comprehensive educational tool. The new pharmacokinetic model on which the simulations are built uses the experience gained in developing the well-known MacDope model, making Human Drug Kinetics mathematically sound and enormously realistic.

The "growth triangle" is a form of regional economic cooperation that has gained rapid acceptance in Asia during the past decade, bringing together the resources of three countries to collectively foster economic development among each of them. Focusing on three such triangles--in southern China; on the borders of Singapore, Indonesia, and Malaysia; and in the Tumen River Delta on China's northeast border--the papers in this collection define, explore, and debate the issues surrounding the establishment of such entities. They also make informed predictions about the economic potential of growth triangles.

[Beating Back the Devil: On the Front Lines with the Disease Detectives of, Maryn McKenna](#) , 2008, 1439104956, 9781439104958. IN THE WAR AGAINST DISEASES, THEY ARE THE SPECIAL FORCES.They always keep a bag packed. They seldom have more than twenty-four hours' notice before they are dispatched. The phone calls that tell them to head to the airport, sometimes in the middle of the night, may give them no more information than the country they are traveling to and the epidemic they will tackle when they get there. The universal human instinct is to run from an outbreak of disease. These doctors run toward it.They are the disease detective corps of the U.S. Centers for Disease Control and Prevention (CDC), the federal agency that tracks and tries to prevent disease outbreaks and bioterrorist attacks around the world. They are formally called the Epidemic Intelligence Service (EIS) -- a group founded more than

fifty years ago out of fear that the Korean War might bring the use of biological weapons -- and, like intelligence operatives in the traditional sense, they perform their work largely in anonymity. They are not household names, but over the years they were first to confront the outbreaks that became known as hantavirus, Ebola virus, and AIDS. Now they hunt down the deadly threats that dominate our headlines: West Nile virus, anthrax, and SARS. In this riveting narrative, Maryn McKenna -- the only journalist ever given full access to the EIS in its fifty-three-year history -- follows the first class of disease detectives to come to the CDC after September 11, the first to confront not just naturally occurring outbreaks but the man-made threat of bioterrorism. They are talented researchers -- many with young families -- who trade two years of low pay and extremely long hours for the chance to be part of the group that has helped eradicate smallpox, push back polio, and solve the first major outbreaks of Legionnaires' disease, toxic shock syndrome, and E. coli O157. Urgent, exhilarating, and compelling, *Beating Back the Devil* goes with the EIS as they try to stop epidemics -- before the epidemics stop us.

[Words, Words, Words: Teaching Vocabulary in Grades 4-12, Janet Allen](#) , 1999, 1571100857, 9781571100856. Do you spend hours creating word lists and weekly vocabulary tests only to find that your students have "forgotten" the words by the following week? Janet Allen and her students were frustrated with the same problem. *Words, Words, Words* describes the research that changed the way she and many other teachers teach vocabulary. It offers educators practical, research-based solutions for helping students fall into new language, learn new words, and begin to use those words in their speaking and writing lives. This book offers teachers detailed strategy lessons in the following areas: activating and building background word knowledge; making word learning meaningful and lasting; building concept knowledge; using word and structural analysis to create meaning; using context as a text support; making reading the heart of vocabulary instruction. *Words, Words, Words* provides educators with a strong research base, detailed classroom-based lessons, and graphic organizers to support the strategy lessons. At a time when teachers are struggling to meet content standards in reading across the curriculum, this book offers some practical solutions for meeting those standards in ways that are meaningful and lasting.

This monograph describes various methods for solving deformation problems of particulate solids, taking the reader from analytical to computational methods. The book is the first to present the topic of linear elasticity in mathematical terms that will be familiar to anyone with a grounding in fluid mechanics. It incorporates the latest advances in computational algorithms for elliptic partial differential equations, and provides the groundwork for simulations on high performance parallel computers. Numerous exercises complement the theoretical discussions, and a

related set of self-documented programs is available to readers with Internet access. The work will be of interest to advanced students and practicing researchers in mechanical engineering, chemical engineering, applied physics, computational methods, and developers of numerical modeling software.

[Pragmatism, , William James](#) , 1975, 0674697359, 9780674697355. "It is absolutely the only philosophy with no humbug in it," an exhilarated William James wrote to a friend early in 1907. And later that year, after finishing the proofs of his "little book," he wrote to his brother Henry: "I shouldn't be surprised if ten years hence it should be rated as 'epoch-making,' for of the definitive triumph of that general way of thinking I can entertain no doubt whatever." I believe it to be something quite like the protestant reformation." Both the acclaim and outcry that greeted Pragmatism: A New Name for Some Old Ways of Thinking helped to affirm James's conviction. For it was in Pragmatism that he confronted older philosophic methods with the "pragmatic" method, demanding that ideas be tested by their relation to life and their effects in experience. James's reasoning and conclusions in Pragmatism have exerted a profound influence on philosophy in this century, and the book remains a landmark.

Although inspired by earlier illustrators of the tales, including Arthur Rackham and Edmund Dulac, Hockneys extraordinary etchings reimagine these strange and supernatural stories for a modern audience, capturing their distinctive atmosphere in a style that is recognizably the artists own. Hockneys book brings together some well-known tales, such as Rapunzel and Rumpelstiltskin, with others that are less familiar, like Old Rinkrank. Informed by great art of the past, attuned to idiosyncrasies of character and incident, and fresh in execution and content, his illustrations invite us to read each story as if for the first time.

VORSPRUNG is an innovative and lively first-year program that uses a five-skills approach, emphasizing the acquisition of communicative as well as cultural competence without sacrificing attention to formal accuracy. Utilizing "focus on form" activities in an engaging, personalized fashion, VORSPRUNG helps students develop realistic abilities in speaking, listening, and reading German. The program presents a systematic, clear introduction to the essentials of German grammar and practices high-frequency structures and vocabulary in interactive activities. In addition, it provides students with the cultural knowledge that is relevant to their own lives and then asks them to compare their cultures to the habits

and behaviors of the German-speaking people of Europe. In order to prepare students for successful communication in today's rapidly changing world, VORSPRUNG exposes them to a wealth of spoken and written authentic textual materials. To support this focus on spoken and written German, VORSPRUNG offers an array of in-class activities that fosters accuracy and provides ample opportunities for students to practice German in authentic contexts.

[The Spike: How Our Lives Are Being Transformed By Rapidly Advancing Technologies, Damien Broderick](#) , 2002, 031287782X, 9780312877828. The rate at which technology is changing our world--not just on a global level like space travel and instant worldwide communications but on the level of what we choose to wear, where we live, and what we eat--is staggeringly fast and getting faster all the time. The rate of change has become so fast that a concept that started off sounding like science fiction has become a widely expected outcome in the near future - a singularity referred to as The Spike. At that point of singularity, the cumulative changes on all fronts will affect the existence of humanity as a species and cause a leap of evolution into a new state of being. On the other side of that divide, intelligence will be freed from the constraints of the flesh; machines will achieve a level of intelligence in excess of our own and boundless in its ultimate potential; engineering will take place at the level of molecular reconstruction, which will allow everything from food to building materials to be assembled as needed from microscopic components rather than grown or manufactured; we'll all become effectively immortal by either digitizing and uploading our minds into organic machines or by transforming our bodies into illness-free, undecaying exemplars of permanent health and vitality. The results of all these changes will be unimaginable social dislocation, a complete restructuring of human society and a great leap forward into a dazzlingly transcendent future that even SF writers have been too timid to imagine.

This book describes the principles, and their application to explaining how the brain produces speech, forms memories and recognizes faces, how intellect develops, and how it deteriorates after brain damage. The models range from some well-known classics to others at the frontiers of current research. Also included is a disk with the software for running tlearn, a user-friendly simulator for connectionist modeling of cognitive processes, which will run on either PCs or Macs. Written by leading researchers in their field, this first up-to-date textbook on connectionist modeling, will provide an essential and accessible introduction to the field.

This easy-to-follow A to Z lets you pair your meals with the perfect wine, beer, or spirit, even if you know nothing about vintages or vineyards. Just look up a dish or its main ingredient to find its perfect complement. From Aioli (a French Bandol if you can afford it, otherwise a Spanish Albarino) to Zucchini (baked with tomatoes and cheese, Montepulciano d'Abruzzo or a good Valpolicella), you can't go wrong. From "red meat, red wine" to "beef teriyaki, Australian Shiraz" in one easy lesson.

As a young entrepreneur who turned a small PR business into a highly successful, international communications firm, Jennifer Prosek has experienced firsthand the power of instilling an owners mind-set in every employee. In Army of Entrepreneurs, Prosek presents an easy-to-follow action plan any company large or small can use to build a workforce dedicated to generating new business, creating new products and services, and sustaining growth. Filled with inspiring examples, the book shows readers how to: Motivate, train and reward their employees Provide everyone from interns to executives with the skills and support they need Refresh and evaluate the program over time for continuous results Great businesses are not built by a single leader or rainmaker. This book shows how to transform any workforce into a profit-generating army and reap the rewards.

[Reasonable Faith, John Haldane](#) , 2010, 0415430240, 9780415430241. In this awaited follow up to his book Faithful Reason, the well-known philosopher and Catholic thinker John Haldane brings his unrivalled insight to bear on questions of the existence of God and the nature and destiny of the human soul. His arguments weave elements drawn from philosophy of mind, epistemology and aesthetics, together with recurrent features of human experience to create a structure that simultaneously frames and supports ideas such as that the cosmos is a creation, human beings transcend their material composition, and that human fulfillment lies beyond death. As in many of his other writings this volume blends themes from Aquinas with insights drawn from analytical philosophy and further establishes John Haldane as the leading 'analytical thomist'.

[The Persian Expedition, Xenophon](#) , 1975, 0140440070, 9780140440072. In The Persian Expedition, Xenophon, a young Athenian noble who sought his destiny abroad, provides an enthralling eyewitness account of the attempt by a Greek mercenary army the Ten Thousand to help Prince Cyrus overthrow his brother and take the Persian throne. When the Greeks were then betrayed by their Persian employers, they were forced to march home through hundreds of miles of difficult terrain adrift in a hostile country and under constant attack from the unforgiving Persians and warlike tribes. In this outstanding description of endurance and individual bravery, Xenophon, one of those chosen to lead the retreating army, provides a vivid narrative of the campaign and its aftermath, and his account remains one of the best pictures we have of Greeks confronting a barbarian world.

After his exasperated wife, Victoria, leaves him, Ed finds consolation where he has always found it, in his own rich and eccentric imagination. Pursued by the demons of his own obsession, Ed embarks on a quixotic quest to find

Victoria. As he prowls the city's parking garages and motel strips, Ed begins a journey back into his past and is forced most reluctantly to confront the web of lies and self-deceptions he has woven to keep reality at bay until even his fantasies start to turn against him. Keenly observant, humane, and darkly comic, *My Present Age* is an irresistible story about what happens when an Everyman becomes a casualty of modern life. From the Trade Paperback edition.

[Mastering the Hype Cycle: How to Choose the Right Innovation at the Right Time, Jackie Fenn, Mark Raskino](#) , 2008, 1422121100, 9781422121108. It happens over and over again. Some innovation (a new product, a management trend) comes along that captures the public's imagination. Everybody joins the parade with great fanfare and high expectations. This "next big thing" promises to transform the companies that adopt it -- and inflict great peril on those that don't. Then, when the innovation fails to deliver as promised immediately, everyone starts bailing out. Investments are wasted; stock prices plunge; disillusionment sets in. It doesn't have to be this way. In *Mastering the Hype Cycle*, Jackie Fenn and Mark Raskino explain what drives this pattern and how your company can avoid its potential dangers. By understanding the hype cycle, you can ride it more skillfully -- timing your investment decisions so that the innovations you adopt stand the best chance of succeeding in the long-term. Drawing on company examples and Gartner's proven STREET (Scope, Track, Rank, Evaluate, Evangelize, Transfer) framework, the authors show how to orchestrate the key steps in the innovation-adoption process -- from choosing which innovations to take on and when in their life cycle you should adopt, to paving the way for a successful introduction. The hype cycle isn't going away. But this book arms you with the strategies you need to ride the crest of a new idea to success -- and steer clear of the trough of disillusionment.

The Power of the Zip in a Heavenly Light will help you prevent the failures and re-script what you say. Learn how to be the words, the silence and the very presence of God using the power of the ZIP, and 36 other powers that will make you a better communicator. Learn the peril of the zip and landmines to avoid. The Power of the Zip in a Heavenly Light will help you be a better manager, employee, friend, parent, and person. If you are married, The Power of the Zip in a Heavenly Light will enrich that relationship. The Bible talks about turning words into actions and thereby setting a pattern for yourself and for others. That's what I long for, for all of us, to become ..".a pattern for all (the) believers..." 1Thessalonians 7. A stunning truth is that, "just because you said something doesn't mean it was heard?" Practice using the 36 powers in this book and others will hear you, the words you say, the feelings you have, the full measure of you. The Power of the Zip in a Heavenly Light will improve your ability to assess the full measure of others. Using language well will help us be the salt and light that helps others. Even more, you will learn how to be contagious with the power of presence, the presence of God and the Holy Spirit, whenever you communicate anything to anyone.

[Liquid Crystals: Experimental Study of Physical Properties and Phase Transitions, Satyen Kumar](#) , 2001, 0521461324, 9780521461320. Originally published in 2001, this book describes in detail various experimental techniques used in the study of liquid crystals. It will be indispensable for established workers in the field as well as students embarking on liquid crystal research. Each chapter in the book is dedicated to an important experimental technique used in the study and characterisation of liquid crystalline systems. Use of these techniques on liquid crystals requires modifications of traditional experiments, special sample handling and a fresh approach to data analysis. In addition, general routes used to synthesise liquid crystals and tools to characterise liquid crystal phases are described. Attempts are also made to show structure property relationships for well known systems. This book will be of particular interest to graduate students in

physics and chemistry as well as established researchers in the fields of liquid crystals and soft condensed matter.

In this sequel to *Film, Horror, and the Body Fantastic*, Badley examines horror fiction as a fantastic genre in which images of the body and the self are articulated and modified. Badley places horror fiction in its cultural context, drawing important connections to theories of gender and sexuality. As culture places increasing importance on body image, horror fiction has provided a language for imagining the self in new ways - often as ungendered, transformed, or re-generated. Focusing on the works of Stephen King, Clive Barker, and Anne Rice, Badley approaches horror as a discourse that articulates the anxieties of modern culture.

[Introducing .NET, Patrick Dengler](#) , 2000, 1861004893, 9781861004895. .NET is Microsoft's vision of "software as a service", a development environment in which you can build, create, and deploy your applications, and develop the next generation of components, termed Web Services. All of Microsoft's major flagship products from Visual Studio to Windows, and eventually Office are gradually being integrated into the vision, and they will all offer services that will allow greater integration between products. .NET will allow developers to develop in whatever language they are comfortable with, via the introduction of a common language runtime, whilst at the same time provide "building block services" to ease application development. Introducing .NET is designed to tell you exactly what you need to know, to cut through the fog and to bring you a clear picture of what .NET is, and what you can expect to be able to do using it. Who is this Book For? This book is for experienced developers at the leading edge, or for businesses that want to stay one step ahead of the competition. The different sections of .NET are in varying stages of completion, and all are in beta programs, therefore a high degree of technical competence and awareness of technologies such as COM, COM+, ASP and VB is required on the part of the reader. Some experience of C, C++ , or Java would be advantageous to anyone new to C#, although it's not essential. What Does this Book Cover? Examines the .NET Framework in detail Explains what is and isn't part of .NET Examines how the different parts fit together Covers VB.NET and C# as two languages for .NET development Provides examples of .NET in action

The World War 2 German naval code Enigma, was broken at Bletchley Park, the center of major British Intelligence activities during WW2. But even if you are familiar with Enigma, you may have not heard about the much more complex machine cipher known as Tunny. This was the cipher used by Adolf Hitler himself and his top commanders to communicate with one another. Those who worked to break this cipher at Bletchley Park were prohibited from discussing it until the mid-1980s. The author is one of few living individuals with firsthand knowledge of the Tunny cipher. He was one of the young intelligence officers tasked with the project of breaking Adolph Hitler's personal encryption, an eyewitness to history, and arguably a history-maker himself. This is his memoir of the experience.

[The Price of Innocence, Bryan Devore](#) , 2013, . In the decade since their younger sister's death, James and Ian Lawrence have drifted apart - James to pursue a steady but humdrum career as a CPA in Kansas City, Ian to go adventuring off to Leipzig, Germany, for his doctorate in economics. But when Ian mysteriously disappears while researching the economics of organized crime, James must take a leave of absence to look for him. Risking everything, he embarks on a perilous journey across Europe, digging deeply into the business affairs of some very private, very dangerous people. But in the search for Ian, he discovers a brewing revolution that will shock the world - and change what he sees as his own place in it.

[The Arrivals: A Novel, Meg Mitchell Moore](#) , 2011, 0316122750, 9780316122757. It's early summer when Ginny and William's peaceful life in Vermont comes to an abrupt halt. First, their daughter Lillian arrives, with her two children in tow, to escape her crumbling marriage. Next, their son Stephen and his pregnant wife Jane show up for a weekend visit, which extends indefinitely when Jane ends up on bed rest. When their youngest daughter Rachel appears, fleeing her difficult life in New York, Ginny and William find themselves consumed again by the chaos of parenthood - only this time around, their children are facing adult problems. By summer's end, the family gains new ideas of loyalty and responsibility, exposing the challenges of surviving the modern family - and the old adage, once a parent, always a parent, has never rung so true.

SIX MEMOS FOR THE NEXT MILLENNIUM is the text to a series of lectures which became an obsession for Italo Calvino in the last year of his life. Drawing on the works of Lucretius, Ovid, Boccaccio, Falubert, Kundera, Perec and many more, he pinpoints the universal laws and indispensable literary values future generations might cherish -lightness, quickness, exactitude, visibility and multiplicity. It is an eloquent and lively 'defence' of literature - a fitting gift for the next millennium.

and individualized treatment plans. This book explains how a confluence of recent biological, technological and methodological developments is making it possible to provide personalized diagnoses and treatments. By virtue of treating each person's condition as unique, personal genomics and personalized medicine require health professionals to understand the nature of the data, its health implications, and its limitations. This book provides a detailed scientific treatment of the emerging disciplines of personal genomics and personalized medicine. It also includes a comprehensive treatment of both the promises and challenges of personal genomics and medicine from technological, societal and medical perspectives. It offers a wide-ranging review of the state of the art across all aspects of a highly multi-disciplinary subject. This book will be immensely useful for practicing health professionals and researchers, as well as senior undergraduates and graduate students in biomedical sciences.

[However You Want Me, Les Bexley](#) , 2007, 0977431150, 9780977431151. Pity poor Heritage College. It's hard to be a holier-than-thou Christian girls' school without a dirty little secret or two. And that was before April Cartier even set foot on campus. The banned activities listed in the college's morality code are April's to-do list; the college's dirty little secrets, her major. But it's not just the college that has secrets. Professors Jessica Rowley, Klaus Binder and Alex Gould have made secrets a way of life, and April isn't the type to leave anyone's skeletons in their closets. When this cast of characters finds itself in the perfect storm of desires and taboos, naked appetites and raw emotions, they become more exposed and more intertwined than any of them could have possibly imagined. Sexy and daring, unflinching and humane, *However You Want Me* tells the story of people whose deepest secrets are kept not from others but from themselves.

[Social Work with Latinos: A Cultural Assets Paradigm, Melvin Delgado](#) , 2007, 0195301188, 9780195301182. Despite evidence showing Latinos to be among the fastest growing populations in the US, very few social work texts explicitly address practice with Latino individuals, families, and communities. CSWE curriculum guidelines mandate that students acquire cultural competence across their coursework, and there are several books available that focus on multicultural practice, but only one outdated book on Latinos in particular. Beginning with a comprehensive definition and

demographic map of Latinos, Latino culture, and a cultural asset paradigm, the book identifies strategies for designing culturally relevant programs and services. Chapters highlight health and social concerns including issues surrounding gender, religion, language, immigration, substance abuse, health conditions, etc. but more importantly, they outline a practice framework that places cultural assets at the center. The book will provide a rich paradigm for understanding perspectives on culture, access, assets, and how they intersect to inform best practices. The step-by-step framework guides students through six stages: pre-contact assessment, initial contact and asset identification, resource mapping, relationship building, intervention, and evaluation. Each stage is heavily grounded in theoretical and socio-political considerations with particular attention to thinking critically about selecting best practices and how to sustain an evidence-based practice. Case studies, summary lessons, and key ideas make this an outstanding resource for students and professionals alike.

[Lug Your Careless Body Out of the Careful Dusk: A Poem in Fragments, Joshua Marie Wilkinson](#) , 2006, 1587296780, 9781587296789. Drawing from the paintings of Susan Rothenberg, Gwyneth Scally, and Eric Fischl as well as from the photography of Allison Maletz, Joshua Marie Wilkinson's *Lug Your Careless Body out of the Careful Dusk* is a book-length poem written in small fragments. Comprised of seven sections, the poem is formed as much by the poet's travels through Turkey, the Baltics, and Eastern Europe as it is by the movies of Rainer Werner Fassbinder, Krzysztof Kieslowski, and Bill Morrison. The painters Francis Bacon and Lucian Freud are here alongside whispers of Emily Dickinson and Wallace Stevens. *Lug Your Careless Body out of the Careful Dusk* is a book of cinematic images and fragments, of small stories overheard and quickly abandoned, of hidden letters and phone booths, and of ghosts who return with questions. Born and raised in Seattle's Haller Lake neighborhood, Joshua Marie Wilkinson is the author of one other book of poetry, *Suspension of a Secret in Abandoned Rooms*, and the chapbook *A Ghost as King of the Rabbits*. He holds an MFA from the University of Arizona and an MA in film studies from University College Dublin. Presently he lives in Denver, Colorado, where he is

pursuing his doctorate in English and creative writing and completing his first film.

Whether reductive or rich, highly programmed or passive, culturally interpretive or teeming with the phenomena of natures own

systems, the built landscapes of Hargreaves Associates emphasize the power of connection to day-to-day life. This volume presents projects from throughout the 25-year history of the firm and highlights the firm's role in advancing the reoccupation of postindustrial sites, including the reclamation of waterfronts within the United States, Europe, and Australia. Featuring color photographs and illustrations throughout, the book also shows how the firm works with cultural landscapes, urban parks, smaller plazas, and gardens. Included are details on Hargreaves' innovative entries in recent landscape architectural competitions, including its stunning design of a 270-acre Victorian-style pleasure garden for the 2012 London Olympics.

[Monkey Bread, Alcala Lo](#) , 2010, 0984079823, 9780984079827. Monkey Bread retraces the trajectory of a man who tries to come to terms with his past. Chris James was born in Dakar, Senegal. Abandoned by his mother at the age of 4, he is abused by priests running an orphanage until he is rescued, through adoption, by an American diplomat named Vernon. Chris, angry and withdrawn as a child, becomes an adult with a skewed sense of values and a darkened vision of the world. After Vernon's death, Chris returns to Senegal in the hope of finding his mother and solving the mystery shrouding his childhood. After setting up a detective agency, he is hired by a shadowy businessman named Ibrahim Sow to help solve the kidnapping of his son, Zak. In their desperate quest, Chris and Ibrahim unleash an unprecedented level of violence on the sun-baked city streets. The case strikes a deep chord in Chris. It is an opportunity to let loose, and then confront, his inner demons. It also provides him with insights into a society and a culture that, though his own by birth, remain largely alien. The challenges Chris faces mirror those burdening Senegal, a country beautiful by the grace of nature and blessed with a profoundly humane people, yet mired in poverty, corruption, and political strife.

[Destination Culture: Tourism, Museums, and Heritage, Barbara Kirshenblatt-Gimblett](#) , 1998, 0520209664, 9780520209664. Destination Culture takes the reader on an eye-opening journey from ethnological artifacts to kitsch. Posing the question, "What does it mean to show?" Barbara Kirshenblatt-Gimblett explores the agency of display in a variety of settings: museums, festivals, world's fairs, historical re-creations, memorials, and tourist attractions. She talks about how objects and people are made to "perform" their meaning for us by the very fact of being collected and exhibited, and about how specific techniques of display, not just the things shown, convey powerful messages. Her engaging analysis shows how museums compete with tourism in the production of "heritage." To make themselves profitable, museums are marketing themselves as tourist attractions. To make locations into destinations, tourism is staging the world as a museum of itself. Both promise to deliver heritage. Although heritage is marketed as something old, she argues that heritage is actually a new mode of cultural production that gives a second life to dying ways of life, economies, and places. The book concludes with a lively commentary on the "good taste/bad taste" debate in the

ephemeral "museum of the life world," where everyone is a curator of sorts and the process of converting life into heritage begins.

[Death at the Lighthouse, John Reisinger](#) , 2012, 0983881839, 9780983881834. Nothing much ever happened at the Devil's Elbow lighthouse on the Chesapeake Bay, until the keeper is found dead and splattered with blood from someone

else. The police suspect local bootleggers, but Max and Allison Hurlock soon find that the victim had a much wider range of acquaintances, and secrets than anyone knew, including several people who would be very glad to see him out of the way. Soon Max is mixed up with local jealousies, the Coast Guard, a dishonest federal agent, moonshiners, and a mysterious rumrunner boat that seems to have the ability to vanish at will. Meanwhile, Allison meets a woman who apparently can summon the dead, and runs into Houdini himself. Then Max finds that the Devil's Elbow light has another deadly secret. Now Max must find the real killer to keep two childhood friends from being framed for the crimes. Death at the Lighthouse is a Max Hurlock Roaring 20s Mystery. All Max Hurlock mysteries are set in the 1920s and are based on real-life cases from that era. In addition, each mystery contains end notes that explain the real case on which the story is based and give more details about the people and events depicted. Also included are suggested discussion questions for book groups. Other books in the series include Death of a Flapper and Death on a Golden Isle. It is a book that takes the student on a journey through nearly every aspect of dinosaur biology, geology, and the history of their discovery. The book presents facts together with current ideas, notions, and controversies. Dr. Lucas presents dinosaurs as successful, living creatures that were merely different in appearance from animals living today. Dr. Lucas has written a comprehensive book that is easily read and understood by students with little scientific background--a book that teaches students not only how to use scientific methods, but how to synthesize data to create their own ideas. In contrast with many dinosaur books from the past, Dr. Lucas, although indicating his own views, allows students the opportunity to think for themselves.

[Lost in Translation: A Life in a New Language, Eva Hoffman](#) , 1990, 0140127739, 9780140127737. The condition of exile is an exaggeration of the process of change and loss that many people experience as they grow and mature, leaving behind the innocence of childhood. Eva Hoffman spent her early years in Cracow, among family friends who, like her parents, had escaped the Holocaust and were skeptical of the newly imposed Communist state. Hoffman's parents managed to immigrate to Canada in the 1950s, where Eva was old enough to feel like a stranger--bland food, a quieter life, and schoolmates who hardly knew where Poland was. Still, there were neighbors who knew something of Old World ways, and a piano teacher who was classically Middle European in his neurotic enthusiasm for music. Her true exile came in college in Texas, where she found herself among people who were frightened by and hostile to her foreignness. Later, at Harvard, Hoffman found herself initially alienated by her burgeoning intellectualism; her parents found it difficult to comprehend. Her sense of perpetual otherness was extended by encounters with childhood friends who had escaped Cracow to grow up in Israel, rather than Canada or the United States, and were preoccupied with soldiers, not scholars. Lost in Translation is a moving memoir that takes the specific experience of the exile and humanizes it to such a degree that it becomes relevant to the lives of a wider group of readers.

From the New York Times food writers who defended lard and demystified gumbo comes a collection of exceptional southern recipes for everyday cooks. The Lee Bros. Southern Cookbook tells the story

of the brothers' culinary coming-of-age in Charleston-how they triumphed over their northern roots and learned to cook southern without a southern grandmother. Here are recipes for classics like Fried Chicken, Crab Cakes, and Pecan Pie, as well as little-known preparations such as St. Cecilia Punch, Pickled Peaches, and Shrimp Burgers. Others bear the hallmark of the brothers' resourceful cooking style-simple, sophisticated dishes like Blackened Potato Salad, Saigon Hoppin' John, and Buttermilk-Sweet Potato Pie that usher southern cooking into the twenty-first century without losing sight of its roots. With helpful sourcing and substitution tips, this is a practical and personal guide that will have readers cooking southern tonight, wherever they live.

[An Essay on the Art of Ingeniously Tormenting, Jane Collier](#) , 2009, 0199555443, 9780199555444. 'Now the sport begins!' An Essay on the Art of Ingeniously Tormenting is the first English book on the craft of nagging. A biting funny social satire, it is also an advice book, a handbook of anti-etiquette, and a comedy of manners. Collier describes methods for 'teasing and mortifying' one's intimates and acquaintances in a variety of social situations by taking advantage of their affections and goodwill. Written primarily for wives, mothers, and the mistresses of servants, The Art suggests the difficulties women experienced exerting their influence in private and public life - and the ways they got round them. In anatomizing the art of emotional abuse Collier piques readers into acknowledging their own faults, and persuades them that tormenting is a useful skill, even as she censures its effects. The Art provides a fascinating glimpse into eighteenth-century daily life, the treatment of servants and dependants and the bringing up of children, and is a thrilling precursor to the art of Jane Austen. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. [Guidance Material for Operators, Civil Aviation Authority](#) , 2008, 0117920681, 9780117920682. CAP 768 "Guidance Material for Operators" is issued for the benefit of Air Operators' Certificate (AOC) holders and applicants to provide information considered to be of long-term interest and essential or useful guidance material. The CAP consists of extracts from the now obsolete CAP 360 "Air Operators Certificates" along with information from current CAA Notices to AOC Holders ((NTAOCHs), Letters to Operators (LTOs) and Flight Operations Division Communications (FODCOMs). CAP 360 and the relevant NTAOCHs, LTOs and FODCOMs have now been withdrawn. The aim of this document is not to duplicate information found in the above documents. It has been designed to provide information for both AOC holders and AOC applicants on the administrative procedures involved in holding an AOC. It also provides amplification of items that the operator may wish to include in the operations manual. Some material may be used verbatim; other material may need to be adapted to apply to the specific operation. Finally, it offers useful information that may be of interest and relevance to the operator. Applicants and operators should refer to CAP 768 periodically to ensure that they are aware of the latest additional guidance.

[Pelham Humfrey, Peter Dennison](#) , 1986, 0193152444, 9780193152441. The fifteen years between the Restoration of Charles II in 1660 and the beginning of Henry Purcell's career saw the birth of the Baroque style in England. Pelham Humfrey was the most significant composer of this period, and his contribution to the English Baroque style was decisive. Though his career spanned little more than a decade, his output of verse anthems with strings, court odes, and theater music greatly influenced the musical style of the Restoration and provided Henry Purcell, Humfrey's pupil, with a solid foundation for his own highly acclaimed career. This study offers particularly sharp insights into Humphrey's synthesis of French and Italian styles and his creation of a distinctive English Baroque idiom.

In our many years of working with people we have watched as person after person falters when they reach the "Real World." You start out with such great dreams. You are full of energy and hope - determined to make your mark on the world. Then you face the reality of unkind people; cruel words; failed attempts; unforeseen obstacles; and a myriad of other "Real Life" situations. Your dreams crumble before the onslaught. It doesn't have to be that way! If you are prepared; equipped; and strengthened by the SECRETS OF SUCCESS learned by people who have come before, you can conquer everything that comes your way - making your dreams come true! We have learned that a single moment of Epiphany will not create lasting change. It is repeated impacts of stories, ideas & thoughts that change patterns and habits in order to achieve your goal. Knowing that, we began to collect stories of successful people. We read about their lives. We learned the true definition of success. We studied how they achieved success. We saw their struggles and fears. We saw how they overcame them to accomplish great things. Meeting these people began to create change in our own lives as we applied what we learned. Within these pages you will find the stories of 127 amazing people. You'll meet people who: \* Have overcome debilitating fears. \* Come back from devastating physical challenges. \* Started their journey to success with NOTHING. \* Have discovered their real purpose for living. \* Came back from despair to find great JOY. \* Made the choice to overcome huge obstacles Within the life lessons of ordinary people you'll learn to: \* Overcome whatever obstacles are before you! \* Harness the power of persistence! \* Master the secrets of how to gain great wealth! \* Make a difference with your life! \* Master how to attain the goals you have for your life! \* Build deep, meaningful relationships! \* Live a life of incredible joy! [Parliament. House of Commons. Agriculture Committee, Griculture Committee](#) , 2000, 0102431000, 9780102431001. The liberalisation of trade in agricultural products regulated through the World Trade Organisation is having a profound effect on the UK agricultural industry and on EU agricultural policy. The Committee believes that the WTO should not be transformed into a universal reform league if that puts at risk its ability to sustain its primary purpose as a rules based regulator of world trade agreements. The best way to assist small farms in the UK which find themselves under threat is through reform of the Common Agricultural Policy (CAP), and a gradual shift away from distorting production subsidies to

a policy based on clear objectives for environmental protection and rural development.

[The Bowel Book: A Self-Help Guide for Sufferers, Michael Levitt](#) , 2002, 0198508581, 9780198508588. It seems nowadays that we are happy to discuss almost every aspect of our health, and reveal to doctors, psychologists, phone-in hosts and their audiences, in fact almost anyone who will listen, our most personal and intimate problems. There remains one last taboo, one last subject for which people will suffer in silence - problems relating to their bowels. This reluctance is seen by many within the medical profession as being a significant cause of the increase in bowel cancer within the developing world. 'The Bowel Book' is a frank, entertaining, and accessible book offering advice on these and related problems, from the view of a medical specialist with many years experience of dealing with these problems. The book provides advice on every type of problem such as haemorrhoids, irritable bowel syndrome, constipation, and colitis. Most importantly, it highlights the early warning signals of such life threatening illnesses such as bowel cancer. Along the way it discusses and assesses alternative treatments such as colonic irrigation, and controversially contests some of the widely held views on the benefits of high fibre diets. A book that everyone will need at some point in their lives.

[Constructive Real Analysis, Allen A. Goldstein](#) , 2012, 0486488799, 9780486488790. This text introduces the methods of applied functional analysis and applied convexity. Suitable for advanced undergraduates and graduate students of mathematics, science, and technology, it focuses on the solutions to two closely related problems. The first concerns finding roots of systems of equations and operative equations in a given region. The second involves extremal problems of minimizing or maximizing functions defined on subsets of finite and infinite dimensional spaces. Rather than citing practical algorithms for solving problems, this treatment provides the tools for studying problem-related algorithms. Topics include iterations and fixed points, metric spaces, nonlinear programming, polyhedral convex programming, and infinite convex programming. Additional subjects include linear spaces and convex sets and applications to integral equations. Students should be familiar with advanced calculus and linear algebra. As an introduction to elementary functional analysis motivated by application, this volume also constitutes a helpful reference for theoretically minded engineers, scientists, and applied mathematicians.

[Reforming Trade Policy in Papua New Guinea and the Pacific Islands, Kym Anderson, Malcolm Bosworth](#) , 2009, 0980623898, 9780980623895. The countries of the South Pacific have struggled to generate sustainable economic growth since their independence. Interventionist policies have failed in the past here, as they have in all other regions. Business and government leaders in this region are now beginning to acknowledge - as has happened in many other developing country regions over the past two decades - that major reforms are needed to put their economies onto a higher growth path. This study examines the growth record of key Pacific island economies and identifies the reasons for their relatively poor performance. It then looks at the process of globalization that is affecting those and indeed all economies increasingly; and the role the WTO has played in that process.

[Rabies: Scientific Basis of the Disease and Its Management, Alan C. Jackson, William H. Wunner](#) , 2007, 0123693667, 9780123693662. Rabies is the most current and comprehensive account of one of the oldest diseases known that remains a significant public health threat despite the efforts of many who have endeavored to control it in wildlife and domestic animals. During the past five years since publication of the first edition there have been new developments in many areas on the rabies landscape. This edition takes on a more global perspective with many new authors offering fresh outlooks on each topic. Clinical features of rabies in humans and animals are discussed as well as basic science aspects, molecular biology, pathology, and pathogenesis of this disease. Current methods used in defining geographic origins and animal species infected in wildlife are presented, along with diagnostic methods for identifying the strain of virus based on its genomic sequence and antigenic structure. This multidisciplinary account is essential for clinicians as well as public health advisors, epidemiologists, wildlife biologists, and research scientists wanting to know more about the virus and the disease it causes.\* Offers a unique global perspective on rabies where dog rabies is responsible for killing more people than yellow fever, dengue fever, or Japanese encephalitis \* More than 7 million people are potentially exposed to the virus annually and about 50,000 people, half of them children, die of rabies each year\* New edition includes greatly expanded coverage of bat rabies which is now the most prominent source of human rabies in the New World and Western Europe, where dog rabies has been controlled\* Recent successes of controlling wildlife rabies with an emphasis on prevention is discussed\* Approximately 40% updated material incorporates recent knowledge on new approaches to therapy of human rabies as well as issues involving organ and tissue transplantation\* Includes an increase in illustrations to more accurately represent this diseases' unique horror

[Borrowed Beauty Queen, Amber Newberry](#) , 2013, . It has been said that ugly ducklings eventually become swans, but not without ruffling a few feathers along the way. There's a crack in Nicky Gardner's shell and she's about to be shoved out of her comfort zone. While Nicky is glad to be recently rid of her braces, she finds her new look unsettling when she

is forced to cut her waist-length locks and breaks her glasses. She tries to just get over it because juggling school and caring for her siblings keeps her too busy to worry about these changes. In an instance of emergency, Mrs. Higgins, head of the Miss Pinewood County pageant, begs Nicky to fill the remaining competition slot in exchange for her son, Adam, as a temporary nanny for her siblings. None of them realize the difficulty of the task at hand, but with a little determination and the help of her new friends, Nicky stumbles her way into the spotlight and out of her shell.

Long distance travels, lengthy investigations, sleepless nights, shady hotels, and of course chance encounters with the unknown. And that's just the half of it! This book contains factual based accounts of the Ghost Research Society as seen through the eyes of the author, Joey Tito. All aspects of paranormal research are covered in a literal and at times comedic, nonsensical fashion. Whether it be protocol or proper equipment use, you will know where and how the standard is set. The author also breaks down several investigations performed by the Ghost Research Society at well known haunted locations, private homes, and businesses alike.

[The Oxford History of the British Empire: Volume V: Historiography, Robin Winks](#) , 1999, 0191647691, 9780191647697.

The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth, British imperialism was a catalyst for far-reaching change. The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning, the meaning of British imperialism for the ruled as well as for the rulers, and the significance of the British Empire as a theme in world history. This fifth and final volume shows how opinions have changed dramatically over the generations about the nature, role, and value of imperialism generally, and the British Empire more specifically. The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire: the pressure of current events, access to primary sources, the creation of relevant university chairs, the rise of nationalism in former colonies, decolonization, and the Cold War. They demonstrate

how the study of empire has evolved from a narrow focus on constitutional issues to a wide-ranging enquiry about international relations, the uses of power, and impacts and counterimpacts between settler groups and native peoples. The result is a thought-provoking cultural and intellectual inquiry into how we understand the past, and whether this understanding might affect the way we behave in the future.

[Before Your Time: The Early Menopause Survival Guide, Evelina Weidman Sterling, Angie Best-Boss](#) , 2010, 1439134928, 9781439134924. HAS "THE CHANGE" COME TOO SOON ? DON T WORRY, YOU'RE NOT ALONE! Every year more than two million women enter early menopause and find themselves suddenly dealing with a host of unforeseen (and little discussed) issues. In *Before Your Time*, Evelina Weidman Sterling and Angie Best-Boss provide expert advice and answer all your questions, including: Is it safe to start hormone therapy in your thirties rather than in your fifties? What are your fertility options? How can you combat the long-term effects of early menopause, such as a greater risk of osteoporosis, heart disease, and diabetes? How will early menopause affect your relationships? Your sex life? Your sense of self? *Before Your Time* brings you the best-researched, most up-to-date answers to all those tough-to-ask questions. The good news: there is more research and information available now than ever before to keep you safe and healthy, and it's all right here!

[Lives of the Artists, Volume 1, Giorgio Vasari](#) , 2003, 0141919973, 9780141919973. Beginning with Cimabue and Giotto in the thirteenth century, Vasari traces the development of Italian art across three centuries to the golden epoch of Leonardo and Michelangelo. Great men, and their immortal works, are brought vividly to life, as Vasari depicts the young Giotto scratching his first drawings on stone; Donatello gazing at Brunelleschi's crucifix; and Michelangelo's painstaking work on the Sistine Chapel, harassed by the impatient Pope Julius II. The *Lives* also convey much about Vasari himself and his outstanding abilities as a critic inspired by his passion for art.

[The magic of numbers, Benedict H. Gross, Joe Harris](#) , 2004, 0131777211, 9780131777217. The Magic of Numbers was written with two goals in mind: first, to introduce the reader to some of the beauty of numbers-the patterns in their behavior that have fascinated mathematicians for millennia, and some surprising applications of those patterns; second, and equally important, to teach the reader something of the mathematical mode of thought: the feeling of exploration, excitement, and discovery that are part of how mathematics is developed. The book, written originally for the course Quantitative Reasoning 28 that the authors developed and taught at Harvard, draws the reader into the content through an engaging and informal writing style. Example-driven, it reduces to a minimum the abstract notation and formal argument that often creates a barrier between mathematicians and students, focusing more instead on the experimental aspect of the subject. Above all, the authors communicate to the reader a sense of the joy and fascination of learning mathematics. Additional exercises, problems, and sample exams are available at: [www.prenhall.com/gross](http://www.prenhall.com/gross) Principal topics include: counting and basic combinatorics, with applications to probability and games; The arithmetic of natural numbers: the Euclidean Algorithm and the unique factorization theorem; Modular arithmetic, including Fermat's Theorem, Euler's Theorem, and how to take powers and roots; Codes: how the special properties of ordinary and modular arithmetic in combination allow us to construct the public-key codes that help make data transmission secure.

CCVP GWGK Quick Reference Sheets (Digital Short Cut) Brion Washington ISBN: 1-58705-324-1 As a final preparation tool providing a review of GWGK exam topics, the CCVP GWGK Quick Reference Sheets complement the official Cisco curriculum, other books, or other exam preparatory material. This digital Short Cut provides you with detailed, graphical-based information, highlighting the key topics on the latest GWGK exam in a quick-review format. These fact-filled Quick Reference Sheets allow certification candidates to get all-important information at a glance, helping you to focus your study on areas of weakness and to enhance memory retention of important concepts. The CCVP certification recognizes a candidate's ability to create an IP telephony solution that is transparent, scalable, and manageable. Earning a CCVP certification validates a robust set of skills in implementing, operating, configuring, and troubleshooting a converged IP network. The certification content focuses on Cisco Systems Unified CallManager, quality of service (QoS), gateways, gatekeepers, IP phones, voice applications, and utilities on Cisco routers and Cisco Catalyst switches. The Cisco Gateway Gatekeeper exam (GWGK 642-453) tests your knowledge of the implementation of Cisco gateways and gatekeepers, including integration of a VoIP network to both PSTN and TDM equipment. Topics covered include implementing dial plans and advanced gateway features such as SRST and DSP resources, implementing gatekeepers and directory gatekeepers to provide hierarchical dial plan resolution, and call admission control.
