[Freud for Historians, Peter Gay](#) , 1985, 019504228X, 9780195042283. Is psychoanalysis a legitimate tool for helping us understand the past? Many traditional historians have answered with an emphatic no, greeting the introduction of Freud into historical study with responses ranging from condescending skepticism to outrage. Now Peter Gay, one of America's leading historians, builds an eloquent case for "history informed by psychoanalysis" and offers an impressive rebuttal to the charges of the profession's anti-Freudians. In this book, Gay takes on the opposition's arguments, defending psychoanalysis as a discipline that can enhance social, economic, and literary studies. No mere polemic, *Freud for Historians* is a thoughtful and detailed contribution to a major intellectual debate.

[Teacher Research: Stories of Learning and Growing, Deborah Roberts, Claire Bove, Emily van Zee](#) , 2007, 1933531134, 9781933531137. "Think you don't have time to do research? How about professional growth--think that's out of reach? Let your peers take you on their journeys and inspire you through their stories in Teacher Research. You will gain insight into teacher research--the kind that can take place when you reflect on how one question is leading to another, or on a colleague's observation that offers a different lens through which to view the classroom, or on a conversation with a student that sheds light on classroom performance issues. The editors don't define research rigidly, and the book reads more like a journal than a research report. The chapter authors range from first-year elementary teachers to doctoral candidates. But, even when the authors have not set out to do formal research, they come to see that they're engaging in exploration that can bring the same insights into better teaching that more formal research provides. They ask questions about practice, collect evidence, make sense of the evidence, and share conclusions."--Publisher's website.

With an endearing affection and nostalgia for his home of over forty years, Mr Bond describes his journeys to and from Mussoorie over the years, and then delves into the daily scandals surrounding his life and friends in the (not so) sleepy hill town. The pieces in this collection are characterised by an incorrigible sense of humour and an eye for ordinary-and most often unnoticed-details that are so essential to the geographic, social and cultural fabric of a place. Accompanied by beautiful illustrations, Roads to Mussoorie is a memorable evocation of a writer's surroundings and the role they have played in his work and life.

On a sunny afternoon in March 1922, Deputy Sheriff Morton was gunned down in cold blood, and his grandson, Sherman, wants revenge. For Sherman, only an eye-for-an-eye retribution will serve the demands of justice, but elements of the community feel differently. Soon the national media ignites a frenzy amongst boys' organizations across the country, coaxing the governor to consider a stay of execution for the two youths responsible for the crime. As Sherman's anger and frustration increase, his life begins to unravel -- affecting his job and his relationship with the girl he loves. This riveting true story about the last legal hanging in Georgia captured the attention of a nation, but more importantly, it racked the soul of a boy who dearly loved his grandfather. How does one deal with the long-lasting effects of murder? Does a punishment ever fit the crime? Is it possible, or even necessary to forgive a murderer? Find out within the pages of An Uncertain Justice, a look into the scope of justice and mercy that will make you question what you believe.

[Ray K. Metzker: city stills, Ray K. Metzker, Laurence Miller](#) , 1999, . Admirers have called Metzker "an innovator who knows no rules." City Stills confirms this, with Metzker using progressive darkroom techniques and daring collage compositions to suspend concepts of time and place. Whether spliced negatives juxtaposing day anti night, or rapid-fire sequences of objects and people, Metzker's shots transform his subjects into visual patterns: a crowd of wary policemen becomes a study in texture and contrast -- shiny, black leather uniform jackets against smooth, white helmets. Other photographs demonstrate Metzker's magnificent command of light and shade: four figures wait pensively at a bus stop, as though caged in glass, staring boldly into a wedge of bright light; a lone woman stands outside a train station, engulfed in an ominous stripe of inky shadow, with only the white of her necklace and a folded newspaper as talismans to ward off the darkness. Whether the photographs capture people waiting to take action, or people already in motion, Metzker's technique estranges them from the lockstep rhythm of mundane activity and makes them stand still--just for a moment. The result is a series of photographs that demands a reinterpretation of the city, its streetlife, and its inhabitants.

A core text for ethical/legal issues courses or a supplement to marriage and family courses. In each of the three major sections, chapters address "general" issues, as well as issues specific to marriage and family therapy. A concluding chapter in each section offers case illustrations that expand upon the material covered in the previous chapter. This two-step presentation helps students attain a greater understanding of how information is used in actual practice...and helps them more effectively internalize instruction.

[Numerical Computation in Science and Engineering: Numerical methods, , C. Pozrikidis](#) , 2008, 0195376110, 9780195376111. Designed for the non-expert student, enthusiast, or researcher, this text provides an accessible introduction to numerical computation and its applications in science and engineering. It assumes no prior knowledge beyond undergraduate calculus and elementary computer programming. Fundamental and practical issues are discussed in a unified manner with a generous, but not excessive, dose of numerical analysis. Topics are introduced on a need to know basis to concisely illustrate the practical implementation of a variety of algorithms and demystify seemingly esoteric numerical methods. Algorithms that can be explained without too much elaboration and can be implemented within a few dozen lines of computer code are discussed in detail, and computer programs in Fortran, C++, and Matlab are provided. Algorithms whose underlying theories require long, elaborate explanations are discussed at the level of first principles, and references for further information are given. The book uses numerous schematic illustrations to demonstrate concepts and facilitate their understanding by providing readers with a helpful interplay between ideas and visual images. Real-world examples drawn from various branches of science and engineering are presented. Updated information on computer technology and numerical methods is included, many new and some original topics are introduced. Additional solved and unsolved problems are included.

[Before Green Gables, Budge Wilson](#) , 2008, 0141918497, 9780141918495. Before she had arrived at Green Gables, Anne Shirley had a difficult early life. Orphaned as a baby, she was sent from one foster-home to the next, caring for other people's children even though she was but a child herself, and escaping from her dark reality through the power of her vivid imagination. Curious, inventive and outspoken, even at a young age, Anne battles to make a life for herself by searching out kindred spirits, finding solace in her books, and dreaming of the day she has a family of her own. Budge Wilson has developed the seeds of L. M. Montgomery's ideas into a fully realized, beautifully written story.

The Sailor Who Fell From Grace With the Sea tells of a band of savage thirteen-year-old boys who reject the adult world as illusory, hypocritical, and sentimental, and train themselves in a brutal callousness they call 'objectivity'. When the mother of one of them begins an affair with a ship's officer, he and his friends idealise the man at first; but it is not long before they conclude that he is in fact soft and romantic. They regard their disappointment in him as an act of betrayal on his part and react violently.

[The Romance of the Faery Melusine, Andr Lebey](#) , 2011, 1908011327, 9781908011329. Springing from the heart of medieval France, The Romance of the Faery Melusine tells the story of Raymondin of Poitiers who accidentally kills his uncle while out hunting, and fleeing deep into the forest, encounters a faery by a fountain. Falling deeply into a mutual soul-love, the faery Melusine agrees to help Raymondin and to become his wife, on condition that he makes no attempt to see her between dusk and dawn each Saturday. On this basis the house of Lusignan thrives and prospers, until a series of treacherous events tempt Raymondin to violate his promise and shatter the magic which holds his faery wife to the human world. First rendered into written form in a text by Jean d'Arras in 1393, the legend of the Faery Melusine is well established in France, where she is credited with having founded the family, town and castle of Lusignan. However, it is very little known in the English-speaking world, despite the fact that Melusine originally hailed from Scotland. This new retelling by Gareth Knight translated from Andre Lebey's 1920s novel Le Roman de la Melusine captures the freshness of Lebey's telling of the legend and brings the benefit of Knight's expertise both in French literature and in the esoteric faery tradition.

This collection of challenging drills is a great resource for teaching advanced skills and for developing smart team players. You'll find 69 drills to help players: - develop the ability and confidence to handle the ball under pressure, - improve the way they see the field and make decisions, - master advanced skills that they can use in specific game situations, and - apply their skills successfully within a team framework. The drills are organized according to specific objectives, with a drill finder to help you select the drills that work on the areas you want to improve. Each drill is presented in a two-page format that includes instructions about the drill's organization and procedure, key points for learning it, a large, clear diagram, and suggested variations for adjusting the difficulty level of the drill. Coaches will especially appreciate the chapter on using drills to construct practice sessions, as well as the 1-vs.-1 player-evaluation model, which you can use as a tool for selecting team members or as a practice exercise. The drills in this book are more challenging and more fun than the basics and are particularly valuable for select youth league, high school, and college-level players. Players under the age of 12 who have a solid grasp of the fundamentals will also benefit from some of these drills. Better practice means better performance. Advanced Soccer Drills is the perfect tool for developing complete players with high-level skills and soccer savvy.

[The Albatross of Decisive Victory: War and Policy Between Egypt and Israel in the 1967 and 1973 Arab-Israeli Wars, ISSN 0883-6884, George Walter Gawrych](#) , 2000, 0313313024, 9780313313028. In 1967, the Israeli Defense Forces defeated the combined armies of Egypt, Jordan, and Syria in a mere six days. This remarkable military accomplishment would, however, have the ultimate effect of creating an albatross around the neck of the Israeli Army, as Israelis would now expect the next conventional war with the Arabs to achieve similar results: a quick, decisive victory with relatively few casualties. Although Egyptian forces were militarily inferior to those of Israel, President Anwar Sadat developed a successful limited war strategy designed to exploit this unrealistic expectation. Rather than aiming to achieve a military victory or to seize strategic terrain, Sadat merely sought to break a diplomatic stalemate with a major military operation designed to soften Israeli intransigence toward negotiations and to force a change in U.S. foreign policy toward the Arab-Israeli conflict. In support of these political aims, the Egyptian Armed Forces set out to discredit the Israeli Army's prowess by inflicting heavy casualties in a limited war. Sadat's success in regaining the entire Sinai without another armed struggle holds an important lesson for the United States. After its dramatic victory in Desert Storm, American armed forces feel compelled to win the next conventional war quickly, decisively, and with relatively few casualties, much like the challenge that faced Israel after the 1967 war.

It was December, 2011 when the body of Cadet Nicholas Argento was found lying face down in the snow at the foot of his dormitory. Was his death the result of an accident, suicide, or murder? With the backdrop of the United States Air Force Academy in Colorado Springs, Colorado, investigators Captain Samantha Rodamsky, representing the Academy's Office of Special Investigation, and Detectives Zach Fields and Mindy Reynolds from the El Paso Sheriff's office, are led through a series of twists and turns before they are able to uncover the cause of Cadet Argento's death. To complicate matters even further, there are political implications, since the victim was the son of Mario Argento, a prominent U.S. Senator from California. A turning point in the investigation occurs when Detective Fields is secretly given a diary written forty-five years earlier by Cadet Anthony Alexander. This diary details four years in the life of Cadet Alexander. It not only deals with the rigorous physical and mental challenges, but also his struggle to follow the Honor Code which stated, "We shall not lie, cheat, or steal, nor tolerate among us those who do."

This book will interest readers interested in macroeconomics. The book briefly summarizes the classical & Keynesian theories & then describes in detail the author's Post Keynesian Macrodynamics alternative framework, which the book illustrates using twelve numerical examples, derived from three "back-of-the-envelope" models. The theory in this book is a dynamic equilibrium theory which takes special pains to distinguish between real & nominal, physical & financial, supply & demand, stock & flow, expectations & actual realizations, & long-term & short-term concepts. [Badfellas, Paul Williams](#) , 2012, 0241954746, 9780241954744. A shocking true story of the triumph of organized crime Badfellas is the latest blockbuster by Irelands most respected crime writer and journalist, Paul Williams. Badfellas is the definitive account of how organized crime evolved in Ireland over the past four decades. Drawing on his vast inside knowledge of the criminal underworld, an unparalleled range of contacts and eye witness interviews, Williams provides a chilling insight into the godfathers and events - that have dominated gangland since the late 1960s. Until the explosion of paramilitary violence in the 1970s, Ireland was a criminal backwater. However, petty criminals with dreams of the big time were quick to emulate the ruthless actions of the subversives. Organized crime took hold in Ireland and soon armed robberies, kidnappings and murder became commonplace. After the introduction of heroin to Ireland by Dublin's Dunne family in the late 1970s, there was no going back. Badfellas traces how the hugely lucrative drug trade that then emerged led to the gang wars that have corroded communities and devastated countless lives. Badfellas describes in gripping detail the shocking depths to which the mobsters have sunk. Badfellas is essential reading for anyone who cares about keeping communities safe

[Composition in black and white: the life of Philippa Schuyler, Kathryn M. Talalay](#) , 1995, 0195096088, 9780195096088.

George Schuyler, a renowned and controversial black journalist of the Harlem Renaissance, and Josephine Cogdell, a blond, blue-eyed Texas heiress and granddaughter of slave owners, believed that intermarriage would "invigorate" the races, thereby producing extraordinary offspring. Their daughter, Philippa Duke Schuyler, became the embodiment of this theory, and they hoped she would prove that interracial children represented the final solution to America's race problems. Able to read and write at the age of two and a half, a pianist at four, and a composer by five, Philippa was often compared to Mozart. During the 1930s and 40s she graced the pages of Time and Look magazines, the New York Herald Tribune, and The New Yorker. Philippa grew up under the adoring and inquisitive eyes of an entire nation and soon became the role model and inspiration for a generation of African-American children. But as an adult she

mysteriously dropped out of sight, leaving America to wonder what had happened to the "little Harlem genius." Suffering the double sting of racism and gender bias, Philippa had been rejected by the elite classical music milieu in the United States and forced to find an audience abroad, where she flourished as a world-class performer and composer. She traveled throughout South America, Europe, Africa, and Asia performing for kings, queens, and presidents. By then Philippa had added a second career as an author and foreign correspondent reporting on events around the globe--from Albert Schweitzer's leper colony in Lambaréne to the turbulent Asian theater of the 1960s. She would give a command performance for Queen Elisabeth of Belgium one day, and hide from the Viet Cong among the ancient graves of the Annam kings another. But behind the scrim of adventure, glamour, and intrigue was an American outcast, a woman constantly searching for home and self. "I am a beauty--but I'm half colored...so I'm always destined to be an outsider," she wrote in her diary. Philippa tried to define herself through love affairs, but found only disappointment and scandal. In a last attempt to reclaim an identity, she began to "pass" as Caucasian. Adopting an Iberian-American heritage, she reinvented herself as Felipa Monterro, an ultra-right conservative who wrote and lectured for the John Birch Society. Her experiment failed, as had her parents' dream of smashing America's racial barriers. But at the age of thirty five, Philippa finally began to embark on a racial catharsis: She was just beginning to find herself when on May 9, 1967, while on an unauthorized mission of mercy, her life was cut short in a helicopter crash over the waters of war-torn Vietnam. The first authorized biography of Philippa Schuyler, *Composition in Black and White* draws on previously unpublished letters and diaries to reveal an extraordinary and complex personality. Extensive research and personal interviews from around the world make this book not only the definitive chronicle of Schuyler's restless and haunting life, but also a vivid history of the tumultuous times she lived through, from the Great Depression, through the Civil Rights movement, to the Vietnam war. Talalay has created a highly perceptive and provocative portrait of a fascinating woman.
