[The Origins and Development of Classical Hinduism, Arthur Llewellyn Basham](#) , 1989, 0195073495, 9780195073492. The late A.L. Basham was one of the world's foremost authorities on ancient Indian culture and religion. Modelled on his monumental work *The Wonder That Was India*, this account of the origins and development of classical Hinduism represents a lifetime of reflection on the subject, and offers an intriguing introduction to one of the richest of all Asian traditions. Synthesizing Basham's great knowledge of the art, architecture, literature, and religion of South Asia, this concise history traces the spiritual life of India from the time of the Indus Culture (around 2700 B.C.E) through the crystallization of classical Hinduism in the first centuries of the common era. It chronicles as well the rise of other mystical and ascetic traditions, such as Buddhism and Jainism, and follows Hinduism's later incarnations in the West, making it an especially comprehensive introduction to the subject. Unlike Christianity or Islam, Hinduism was not inspired by single great prophet but rather evolved organically. The wide range of influences and sources--along with the great number of sacred texts in ancient languages--can make the Hindu system of faith and practice seem almost impenetrable to the uninitiated. With its vivid presentation of Hinduism's sources--from the warrior Aryans to the wandering ascetics--and its clearly written explanations and analyses of the major Hindu texts--among them the Rg-veda, the Brahmanas, Upanishads, and the Mahabharata and Ramayana--*The Origins of Classical Hinduism* clarifies much of Hinduism's enduring mystique. With an especially helpful bibliography, numerous illustrations of Hindu art never before published, and a lucid, accessible style, this book is must reading for anyone who has ever been intrigued by this

fascinating religion.

Welcome to Finishing School. Fourteen-year-old Sophronia is a great trial to her poor mother. Sophronia is more interested in dismantling clocks and climbing trees than proper manners--and the family can only hope that company never sees her atrocious curtsy. Mrs. Temminnick is desperate for her daughter to become a proper lady. So she enrolls Sophronia in Mademoiselle Geraldine's Finishing Academy for Young Ladies of Quality. But Sophronia soon realizes the school is not quite what her mother might have hoped. At Mademoiselle Geraldine's, young ladies learn to finish...everything. Certainly, they learn the fine arts of dance, dress, and etiquette, but they also learn to deal out death, diversion, and espionage--in the politest possible ways, of course. Sophronia and her friends are in for a rousing first year's education. Set in the same world as the Parasol Protectorate, this YA series debut is filled with all the saucy adventure and droll humor Gail's legions of fans have come to adore.

[Under the cope of heaven: religion, society, and politics in Colonial America, Patricia U. Bonomi](#) , 1988, 0195054172, 9780195054170. In this pathbreaking study, colonial historian Patricia Bonomi argues that religion was as instrumental as either politics or the economy in shaping early American life and values. Looking at the middle and southern colonies as well as at Puritan New England, Bonomi finds an abundance of religious vitality throughout the colonial years among clergy and churchgoers of diverse religious backgrounds. The book focuses on 18th-century religious activity, when churches stabilized and extended their influence to all parts of the colonies, and examines the everyday life of the clergy, the tension between religious competition and religious toleration, and the attitudes and practices of churchgoers from every rank and region. The book also explores the tightening relationship between religion and politics--especially evident in the schisms of the Great Awakening, the growth of denominational factions, and the emergence of an "ideology of dissent"--and illuminates the vital role religion played in the American Revolution. Written with grace and style, Under the Cope of Heaven presents a stimulating new perspective on the formative era of American religious culture.

[Managing Complexity in Global Organizations, Ulrich Steger, Wolfgang Amann, Martha Maznevski](#) , 2007, 047051311X, 9780470513118. This book delivers new IMD insights on an emerging challenge - how to deal with overwhelming complexity. Global organizations face a complex decision-making environment. On one side, diversity of cultures, customers, competitors and regulations creates complexity; on the other, competitive pressures cause expanding countries to extract more synergies across products and regions. In such a climate, a new way of thinking, acting and organizing is needed beyond the familiar control mindset. Drawing together insights from across the expert faculty, Managing Complexity in the Global Organization presents IMDs framework on how to understand complexity and its four key drivers (diversity; interdependence; ambiguity and flux), along with solutions on specific issues in a variety of functions, industries and markets. The focus is on providing practical solutions based on real-life examples.

For your classes in Personal Health, McGraw-Hill introduces the latest in its acclaimed M Series. The M Series started with your students. McGraw-Hill conducted extensive market research with over 4,000 students to gain insight into their studying and buying behavior. Students told us they wanted more portable texts with

innovative visual appeal and content that is designed according to the way they learn. We also surveyed instructors, and they told us they wanted a way to engage their students without compromising on high quality content. This exciting text presents personal health in the context of a changing social and cultural environment. Going beyond behavior change and individual responsibility, it offers a broadened view of health that includes the impact of family, community, and society. It's a new way of looking at health: "It's not just personal..." More current, more portable, more captivating, plus a rigorous and innovative research foundation adds up to: more learning. When you meet students where they are, you can take them where you want them to be.

This book examines the myth of the journey from the village to the city and shows how this myth and the changes it has undergone provide rich insight on India's ambivalent affair with the modern city. The first section looks at the vicissitudes of the metaphor of journey, especially the imagination of the hero as it intersects with the imagined city. The next two sections profile various heroes as they negotiate the transitions from the village to the city and back to the village. The final section focuses on the psychopathological journey from a poisoned village into a self-annihilating city, and the narrative draws parallels with the violence in 1946-8, the period which saw the birth of modern India and Pakistan.

being married to a rich, handsome, powerful attorney while living in a beautiful expansive home. Your friends envied you - even wished they were you. To all who knew you, you were living the ultimate American dream. This was Mary Franklin's life. Meanwhile, hidden behind her smiles was a mountain of sorrows. Secretly, the most horrendous crime that can happen to another human was committed against her. Fear and dread consumed her - taunted her. Her dream life was nothing more than a stage with dark curtains hiding her nightmarish reality. When Mary discovers that her husband, Roger, was behind the most unspeakable act in her life, it becomes undeniably evident that she can't stay with him or feel safe even in the same city! In desperation, she assumes a different identity and flees Tucson to a small southern town in Georgia, all while towing her most prized possession in a horse trailer. In Georgia, she finds a simpler existence, yet she faces more challenges than she could have ever imagined. One such challenge begins when she meets country music star, Alan Brooks. They are instantly attracted to each other, but they're each tethered to their hidden secrets. Everything that Mary left behind seems to haunt her, and Alan struggles to face the stark reality that he's been living a lie. Knowing that their pasts are rapidly threatening to overtake them, can they fully embrace who they have become? Can Mary allow herself to love and be loved again? Will she ever be free of the fear of Roger?

In this pathbreaking study, Patricia Bonomi argues that religion was as instrumental as either politics or the economy in shaping early American life and values. Looking at the middle and southern colonies as well as at Puritan New England, Bonomi finds an abundance of religious vitality through the colonial years among clergy and churchgoers of diverse religious background. The book also explores the tightening relationship between religion and politics and illuminates the vital role religion played in the American Revolution. A perennial backlist title first published in 1986, this updated edition includes a new preface on research in the field on African Americans, Indians, women, the Great Awakening, and Atlantic history and how these impact her interpretations.

[Chechnya: Tombstone of Russian Power, Anatol Lieven](#) , 1999, 0300078811, 9780300078817. The war between Russia and the Chechen separatist forces, from December 1994 to August 1996, was a key moment in Russian and even world history, shedding a stark light on the end of Russia as a great military and imperial power. Anatol Lieven, a distinguished writer and political commentator, was a correspondent for the London Times in the former Soviet Union from 1990 to 1996 and was commended for his coverage of the Chechen War by the British Press Association. In this major new work of history and analysis, Lieven sets Russia's humiliation at the hands of a tiny group of badly organized guerrillas in a plausible framework for the first time. He offers both a riveting eyewitness account of the war itself and a sophisticated and multifaceted explanation for the Russian defeat. Highlighting the numerous ways in which Russian society and culture differ today from the simplistic stereotypes still current in much of Western analysis, he explores the reasons for

the current weakness of Russian nationalism both within the country and among the Russian diaspora. In the final part of the book Lieven examines the Chechen tradition, providing the first in-depth anthropological portrait in English of this extraordinary fighting people. In his representation of the character of the Chechen nation, Lieven contributes to the continuing debate between "constructivist" and "primordialist" theories of the origins of nationalism and examines the role of both historical experience and religion in the formation of national identity.

[The Nature Drawings of Peter Karklins, Sean D. Kirkland](#) , 2012, 0978907450, 9780978907457. The German-born, Chicago-based Latvian artist Peter Karklins creates small, pencil-and-paper drawings that capture the processes and energies just below the surface of all human life. The complexity of his organic forms is matched by the artists meticulous recording of the times and circumstances of the creation of each image on its reverse, providing viewers with added insight into these rich images. In this visually compelling collection, brief essays by an eclectic and distinguished group of scholars deploy a wide range of theoretical approaches phenomenological, psychoanalytic, deconstructive, iconographical, historical, and musicological to interpret Karklins unusual images and artistic practices. Distinctive in its subject matter and execution, this volume shows Karklins work to be a fertile topic for discussion and a vibrant example of intuitive art. The essays in this book also tackle larger questions of philosophy, aesthetic theory, and art history, while offering a fully realized portrait of Karklins as an artist.

Each edition of Introduction to Data Compression has widely been considered the best introduction and reference text on the art and science of data compression, and the fourth edition continues in this tradition. Data compression techniques and technology are ever-evolving with new applications in image, speech, text, audio, and video. The fourth edition includes all the cutting edge updates the reader will need during the work day and in class. Khalid Sayood provides an extensive introduction to the theory underlying today's compression techniques with detailed instruction for their applications using several examples to explain the concepts. Encompassing the entire field of data compression, Introduction to Data Compression includes lossless and lossy compression, Huffman coding, arithmetic coding, dictionary techniques, context based compression, scalar and vector quantization. Khalid Sayood provides a working knowledge of data compression, giving the reader the tools to develop a complete and concise compression package upon completion of his book. [Bauhaus 1919-1933: Workshops for Modernity, Barry Bergdoll, Leah Dickerman](#) , 2009, 0870707582, 9780870707582.

"The Bauhaus, the school of art and design founded in Germany in 1919 and shut down by the Nazis in 1933, brought together artists, architects and designers - among them Anni and Josef Albers, Herbert Bayer, Marcel Breuer, Lyonel Feininger, Walter Gropius, Johannes Itten, Vasily Kandinsky, Paul Klee, Laszlo Moholy-Nagy, Lilly Reich, Oskar Schlemmer, Gunta Stolzl - in an extraordinary conversation on the nature of art in the industrial age. Aiming to rethink the form of modern life, the Bauhaus became the site of a dazzling array of experiments in the visual arts that have profoundly shaped the world today. Bauhaus 1919-1933: Workshops for Modernity, published to accompany a major multimedia exhibition, is The Museum of Modern Art's first comprehensive treatment of the subject since its famous Bauhaus exhibition of 1938, and offers a new generational perspective on the twentieth century's most influential experiment in artistic education." "Organized in collaboration with the three major Bauhaus collections in Germany (the Bauhaus-Archiv Berlin, the Stiftung Bauhaus Dessau and the Klassik Stiftung Weimar), Bauhaus 1919-1933 examines the extraordinarily broad spectrum of the school's products, including industrial design, furniture, architecture, graphics, photography, textiles, ceramics, theater and costume design, painting and sculpture. Many of the objects discussed and illustrated here have rarely if ever been seen or published outside Germany. Featuring approximately 400 color plates, richly complemented by documentary images, Bauhaus 1919-1933 includes two overarching essays by the exhibition's curators, Barry Bergdoll and Leah Dickerman, that present new perspectives on the Bauhaus. Shorter essays by more than 20 leading scholars apply contemporary viewpoints to 30 key Bauhaus objects, and an illustrated narrative chronology provides a dynamic glimpse of the Bauhaus' lived history."--BOOK JACKET.

Four hours later, she sped down the Taconic State Parkway in Westchester County driving in the wrong direction. As panicked motorists swerved out of her way, she continued for almost two miles. Blowing horns, flashing lights, and waving arms did nothing to deter her. Rounding a curve in the road, she rocketed head on into an oncoming SUV. The vehicles seemed to explode as they hit. The minivan plunged downhill and burst into flames as the SUV was pushed across two lanes and struck by another SUV. In the smoldering vehicle and twisted metal scattered along the highway, lay the bodies of eight people. Days later came

[The Infected, Michael McBride](#) , 2009, 1934546151, 9781934546154. They're breeding in the darkness, underground, feasting on blood and carrion. For centuries they've been sustained by offerings of ritualistic sacrifice, propagating the contagions to be unleashed on the world through savage stingers, when the day of destiny finally arrives. Millions of sand flies, swarming through caverns riddled with human and animal remains, awaiting the vernal equinox when the serpent god Kukulcn will descend from the heavens to release them and deliver his vengeance upon those who drove his worshippers from their sacred land. The pandemic is at hand, for contained within each of the insects is a deadly combination of microorganisms capable of laying waste to the human immune system and ravaging the flesh, killing the cerebrum and leaving the victim at the mercy of the primitive hindbrain. Those contaminated become enraged creatures functioning on instinct alone, capable only of killing and spreading the disease. The sick now hunt the dwindling bands of survivors, who will soon learn that the only thing worse than dying, is becoming one of The Infected.

faced, Heather O'Brien Walker tells in Zero To SuperSHero how she has developed her own philosophy on how to turn FEAR into CONFIDENCE called Expand Your B.E.L.I.E.F. Applying this unique blueprint took her from being at "functional ground ZERO" to becoming a confident SuperSHero. This simple but powerful six-point blueprint will guarantee you unbreakable LEADERSHIP CONFIDENCE. After enduring two traumatic brain injuries in less than 40 days, Heather O'Brien Walker learned the inherent power of BELIEF as she managed to adjust to change. She made it her definite purpose to regain CONFIDENCE by recouping the ability to sit upright, speak, and walk again. After her accidents she was literally afraid of everything and her confidence was non-existent. After expanding her belief, however, and the with steadfast support of husband TW Walker, the author of Superhero Success, Heather edited his book, which went on to receive a rare endorsement from the Napoleon Hill foundation. Today, as a motivational speaker, author and coach, Heather teaches women how to overcome fear by building leadership confidence, managing change, achieving goals, and unleashing their inner SuperSHero.

This book presents new approaches to data mining and system identification. Algorithms that can be used for the clustering of data have been overviewed. New techniques and tools are presented for the clustering, classification, regression and visualization of complex datasets. Special attention is given to the analysis of historical process data, tailored algorithms are presented for the data driven modeling of dynamical systems, determining the model order of nonlinear input-output black box models, and the segmentation of multivariate time-series. The main methods and techniques are illustrated through several simulated and real-world applications from data mining and process engineering practice. The book is aimed primarily at practitioners, researchers, and professionals in statistics, data mining, business intelligence, and systems engineering, but it is also accessible to graduate and undergraduate students in applied mathematics, computer science, electrical and process engineering. Familiarity with the basics of system identification and fuzzy systems is helpful but not required. Key features: - Detailed overview of the most powerful algorithms and approaches for data mining and system identification is presented. - Extensive references give a good overview of the current state of the application of computational intelligence in data mining and system identification, and suggest further reading for additional research. - Numerous illustrations to facilitate the understanding of ideas and methods presented. - Supporting MATLAB files, available at the website www.fmt.uni-pannon.hu/softcomp create a computational platform for exploration and illustration of many concepts and algorithms presented in the book.
