Music's Fascinating Fun Facts is a collection of amazing and amusing insights and revelations all pertaining to music. The text is essentially a music companion organised in alphabetical order. What sets it apart from being a straight out dictionary is its entertainment value. Whilst amusing in tone, the book divulges intriguing information on: famous musicians - How could Beethoven compose when he was deaf? well-known pieces - Which piece was written to alleviate insomnia? Who was Elise from Beethoven's 'Für Elise'? musical instruments - Which instruments were used to mete out humiliating punishments? Why is a double bass called double even though there is only one? musical styles - Why was the graceful waltz considered as dirty dancing? theoretical concepts - What's a treble? What is the 'sign of the ass'? Music's Fascinating Fun Facts will also serve as a refresher on the old terms while also shedding new light on preconceptions and clarify complicated notions. This book also explains those modern musical terms that just suddenly appear like jamming and vamping. Elusive terms like licks, riffs and backbeat are finally addressed, and the horrors associated with ghost notes and the brutality of stabs and beatboxing are demystified.

[Norrie, Simon Bronitt](#) , 2009, 1841138894, 9781841138893. The criminal attacks that occurred in the United States on

11 September 2001 have profoundly altered and reshaped the priorities of criminal justice systems around the world.

Domestic criminal law has become a vehicle for criminalising 'new' terrorist offences and other transnational forms of

criminality. 'Preventative' detention regimes have come to the fore, balancing the scales in favour of security rather than individual liberty. These moves complement already existing shifts in criminal justice policies and ideologies brought about by adjusting to globalisation, economic neo-liberalism and the shift away from the post-war liberal welfare settlement. This collection of essays by leading scholars in the fields of criminal law and procedure, criminology, legal history, law and psychology and the sociology of law, focuses on the future directions for the criminal law in the light of current concerns with state security and regulating 'deviant' behaviour.

[Opuestos, Cynthia Weill](#) , , 1933693649, 9781933693644. "Direct and charming."--Publishers Weekly Cynthia Weill's book of Mexican folk art teaches kids about opposites in Spanish and English! These whimsical little animals from Oaxaca, carved and painted by hand, make learning about opposites fun. Up and down, tall and short, left and right--all inside a beautiful book. Cynthia Weill is an educator and art historian whose expertise is the work of indigenous artisans from all over the world. She is the co-author of the very successful ABeCedarios: Mexican Folk Art ABCs in Spanish and English, the first book of her Folk Art for Teaching Kids series, and of Ten Mice for Tet (Chronicle Books, 2003). She lives in New York City. "This second work by one of the authors of ABeCedarios (2007) follows its predecessor's highly praised concept and design. Pages on the left side introduce children to a word in English and Spanish, as pages on the right side present its opposite: Asleep/Dormido (a spotted dog snoozes)/AwakeDespierto (the same dog, eyes wide open and tail sticking up). "Concepts are illustrated with photographs of unique hand-painted animal carvings created individually by Oaxacan artists Quirino and Martin Santiago. The contrast between the text colors and the bright background combines with the imaginary dialogue that children can establish with the vivacious folk-art figures to make this bilingual edition another outstanding entry in the First Concepts with Mexican Folk Art series. On some pages an external element-a sun or a moon, for instance-expands on such concepts as Day/Da and Night/Noche. "A great selection for bilingual storytimes at preschools, elementary schools and public libraries. As a work of art, its display will enhance art exhibits and cultural programs as part of Hispanic Heritage Month or Children's Day/Book Day celebrations." --Kirkus Reviews

[Insights on leadership: service, stewardship, spirit, and servant-leadership, Larry C. Spears](#) , 1998, 0471176346, 9780471176343. From INSIGHTS ON LEADERSHIP . . . Robert K. Greenleaf from "The Servant as Leader""The servant-leader is servant first. Becoming a servant-leader begins with the natural feeling that one wants to serve, to serve first. Then conscious choice brings one to aspire to lead. . . . The best test is this: Do those served grow as persons? Do they, while being served, become healthier, wiser, freer, more autonomous, more likely themselves to become servants?"Stephen R. Covey from "Servant-Leadership from the Inside Out""You may be able to buy someone's hand and back, but you cannot buy their heart, mind, and spirit. And in the competitive reality of today's global marketplace, it will be only those organizations whose people not only willingly volunteer their tremendous creative talent, commitment, and loyalty, but whose organizations align their structures, systems, and management style to support the empowerment of their people that will survive and thrive as market leaders."Ken Blanchard from "Servant-Leadership Revisited""With the traditional pyramid, the boss is always responsible and the staff are supposed to be responsive to the boss. When you turn the pyramid upside down, those roles get reversed. Your people become responsible and the job of management is to be responsive to their people. That creates a very different environment for implementation. If you work for your people, then what is the purpose of being a manager? To help them accomplish their goals. Your job is to help them win."INSIGHTS ON LEADERSHIP CONTRIBUTORSStephen R. Covey\* Larry C. Spears\* Robert K. Greenleaf\* Ken Blanchard\* Elizabeth Jeffries\* Joe Batten\* Lawrence J. Wheatley from "What Is Our Work?"Leadership without hierarchy? Organization in a whirlwind of change? Community and shared responsibility in a global village? Soul in a free-enterprise world? Robert Greenleaf's visionary theory of Servant-Leadership continues to engage many of the best minds in and out of business. Greenleaf's prescriptions for employee empowerment and organizational change continue to achieve nothing short of miraculous results in organizations worldwide. As one enthusiastic observer wrote in Fortune magazine, "Once the consensus is forged, watch out: With everybody on board, your so-called implementation proceeds 'wham-bam.'"In this sequel to the critically acclaimed Reflections on Leadership, many of today's most respected business thinkers share their insights into key

aspects of Robert Greenleaf's revolutionary thinking. Over the course of 33 essays, a dream team consisting of such luminaries as Stephen Covey, Ken Blanchard, Peter Block, Margaret Wheatley, John Schuster, and James Autry explore how Greenleaf has influenced today's business leaders and discuss a range of leadership principles at the heart of his philosophy, including stewardship, the spirit of the workplace, and the concept of healing leadership. [Francona: The Red Sox Years, Terry Francona, Dan Shaughnessy](#) , 2013, 0547928262, 9780547928265. From 2004 to 2011, Terry Francona managed the Boston Red Sox, perhaps the most scrutinized team in all of sports. During that time, every home game was a sellout. Every play, call, word, gesture on the field and off was analyzed by thousands. And every decision was either genius, or disastrous. In those eight years, the Red Sox were transformed from a cursed franchise to one of the most successful and profitable in baseball history only to fall back to last place as soon as Francona was gone. Now, in *Francona: The Red Sox Years*, the decorated manager opens up for the first time about his tenure in Boston,

unspooling the narrative of how this world-class organization reached such incredible highs and dipped to equally incredible lows. But through it all, there was always baseball, that beautiful game of which Francona never lost sight. As no book has ever quite done before, Francona escorts readers into the rarefied world of a twenty-first-century clubhouse, revealing the mercurial dynamic of the national pastime from the inside out. From his unique vantage point, Francona chronicles an epic era, from 2004, his first year as the Sox skipper, when they won their first championship in 86 years, through another win in 2007, to the controversial September collapse just four years later. He recounts the tightrope walk of managing unpredictable personalities such as Pedro Martinez and Manny Ramirez and working with Theo Epstein, the general managing phenom, and his statistics-driven executives. It was a job that meant balancing their voluminous data with the emotions of a 25-man roster. It was a job that also meant trying to meet the expectations of three owners with often wildly differing opinions. Along the way, readers are treated to never-before-told stories about their favorite players, moments, losses, and wins. Ultimately, when for the Red Sox it became less about winning and more about making money, Francona contends they lost their way. But it was an unforgettable, endlessly entertaining, and instructive time in baseball history, one that is documented and celebrated in Francona, a book that examines like no other the art of managing in today's game.

[For We Are Strangers, Warren Woodberry](#) , 2002, 0972067302, 9780972067300. In *For We Are Strangers*, Woodberry explores the difficulty in correcting or understanding the long-standing conflicts that have existed between men and women from the beginning of time. In his frustration with dogmas that women were to be subjected to any number of possessive, aggressive and violent acts decreed to be the word of God, but written by man, he realized that the best place to begin, was to research these written words, while exposing manmade religious pronouncements that women's place was preordained by God and that these instructions were handed down to man to be enforced by persuasion, laws or force. Tim Hector noted Caribbean Literary Critic and Editor of *The Outlet Newspaper*, St. John's, Antigua, says that In *For We Are Strangers*, Warren Woodberry confronts the oldest problem on earth. The battle between the sexes grows more intense by the minute, leading to the disaster of estrangement between the two essential units of life and humanity. It is to uncover our deception of man to woman, and woman to man that Woodberry turns his laser beam with an uncanny persistence. The end results a roller coaster ride, hurtling through the past, shattering preconceptions along the way. Books can be ordered: Tough Love Publisher at: P.O. of Mercia, Wessex and Northumbria tremble on the brink of great change. One man lives to bear witness to the upheaval: Godwin, barely out of boyhood and destined to become one of his country's great warriors. When Ethelred's son Edmund takes the throne, determined to succeed where his father failed, he plucks Godwin from domestic peace to be right-hand man in his loyal shield wall. Godwin must traverse the meadows, wintry forests and fogbound marshes of Saxon England, raising armies of monks, ploughmen and shepherds against the Viking invader. With epic courage and ferocity, Godwin and Edmund repel the butchering Danes in three great battles. But an old enemy, the treacherous Earl Eadric, dogs Godwin's footsteps, and as the final battle approaches, around the valiant English the trap begins to close.

Abraham Lincoln is usually told as a tale of a lone deranged actor who struck from a twisted lust for revenge. This is not only too simple an explanation; Blood on the Moon reveals that it is completely wrong. John Wilkes Booth was neither mad nor alone in his act of murder. He received the help of many, not the least of whom was Dr. Samuel Alexander Mudd, the Charles County physician who has been portrayed as the innocent victim of a vengeful government. Booth was also aided by the Confederate leadership in Richmond. As he made his plans to strike at Lincoln, Booth was in contact with key members of the Confederate underground, and after the assassination these same forces used all of their resources to attempt his escape. Noted Lincoln authority Edward Steers Jr. introduces the cast of characters in this ill-fated drama, he explores why they were so willing to help pull the trigger, and corrects the many misconceptions surrounding this defining moment that changed American history. After completing an acclaimed career as a research scientist at the National Institutes of Health, Edward Steers Jr. has turned his research skills to the Lincoln assassination. He is the author of several books about the president, including The Trial. He lives in Berkeley Springs, West Virginia.

[The Future of Arms Control, Michael A. Levi, Michael E. O'Hanlon](#) , 2005, 0815797559, 9780815797555. Arms control, for decades at the core of the foreign policy consensus, today is among the more contentious issues in American politics. It is pilloried and considered out of mode in many conservative quarters, while being viewed as nearly sacrosanct in many liberal circles. In this new book, Michael Levi and Michael O'Hanlon argue that neither the left nor the right has a correct view of the proper utility of arms control in the age of terror. Arms control in the traditional sense--lengthy treaties to limit nuclear and other military competitions among the great powers--is no longer particularly useful. Nor should arms control be pursued as a means to the end of constraining the power of nations or of promoting global government. It is still a critical tool, though, for controlling dangerous technologies, particularly those that, in the hands of hostile states or terrorist organizations, could cause massive death and destruction. Arms control and coercive action, including military force, must be integrated into an overall strategy for preventing proliferation, now more than ever before. Arms control should be used to gain earlier warning of illicit activities inside dangerous states, allowing the international community to take coercive action in a timely way. The authors propose three new criteria to guide future arms control efforts, designed to respond to today's geopolitical realities. Arms control must focus on the dangers of catastrophic technology, not so much in the hands of major powers as of small states and terrorist groups. Their criteria lead to a natural focus on nuclear and biological technologies. Much tougher measures to prevent countries from gaining nuclear weapons technology while purportedly complying with the Nuclear Non-Proliferation Treaty and procedures for controlling dangerous biological technologies will be most prominent in this framework, while lower priority is given to efforts such as bilateral nuclear accords and most types of arms control for outer space. This book provides a framework for an effective arms control strategy in a new age of international security.

[Moby-Dick: A Pop-up Book, Sam Ita](#) , 2007, 1402745281, 9781402745287. Call me Ishmael. Three of the most famous words in all literature, they begin Herman Melville's masterpiece, Moby-Dick. Now, the epic saga of Captain Ahab's obsessive quest for the white whale comes vividly to life in this three-dimensional graphic novel, the first of its kind. This phenomenal work is the creation of multi-talented artist Sam Ita, apprentice to Robert Sabuda one of the world's master paper engineers. Every amazing element is awe-inspiring: there's not just one pop-up per spread, but several, surrounded by colorful comic book-style panels that convey the story's drama. Some of the pop-ups are huge and incredibly detailed, like the Pequot itself, which rises gloriously from the page, complete with rigging. Others, smaller but no less wonderful,

hide beneath flaps and folds. In one instance, readers actually get to look through a 3-D periscope and see Ishmael through the lens, drifting in the ocean. The quality of Itas paper engineering is nothing short of breathtaking and will carry you off on an unforgettable adventure.

ICIC 2007, held in Qingdao, China, August 21-24, 2007, constituted the Third - ternational Conference on Intelligent Computing. It built upon the success of ICIC 2006 and ICIC 2005 held in Kunming and Hefei, China, 2006 and 2005, respectively. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was Advanced Intelligent Computing Technology and Applications. Papers focusing on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

[Imperfect Justice: Looted Assets, Slave Labor, and the Unfinished Business of World War II, Stuart Eizenstat](#) , 2009,

0786751053, 9780786751051. In the second half of the 1990s, Stuart Eizenstat was perhaps the most controversial U.S. foreign policy official in Europe. His mission had nothing to do with Russia, the Middle East, Yugoslavia, or any of the other hotspots of the day. Rather, Eizenstat's mission was to provide justice albeit belated and imperfect justice for the victims of World War II. Imperfect Justice is Eizenstat's account of how the Holocaust became a political and diplomatic battleground fifty years after the war's end, as the issues of dormant bank accounts, slave labor, confiscated property, looted art, and unpaid insurance policies convulsed Europe and America. He recounts the often heated negotiations with the Swiss, the Germans, the French, the Austrians, and various Jewish organizations, showing how these moral issues, shunted aside for so long, exposed wounds that had never healed and conflicts that had never been properly resolved. Though we will all continue to reckon with the crimes of World War II for a long time to come, Eizenstat's account shows that it is still possible to take positive steps in the service of justice.

Only four or five of Tauzin's extraordinary etchings have ever been seen by a wide public. For the first time the EPS have reproduced all 30 of these sensuous b/w line drawings in book form. Henri Breton's accompanying text revolves around the scandalous sexual activities of the Sea Captain and his friends as they recount to each other stories of beautiful women and strong men, their passions and sexual adventures. Charming, witty and sophisticated - and very rude - this is for the discerning collector only.

[Core Competences in Engineering, Great Britain. Further Education Unit](#) , 1985, 0946469946, 9780946469949. A framework for the education, training, and accreditation of engineering personnel in England, particularly those at the craft/technician level, is proposed. The competence-based core for engineering education and training is endorsed by the Basic Engineering Study Group, and is the result of a 2-year project to address problems of overlap, duplication, and inadequate linkage between courses. Recommendations for implementation, assessment, and accreditation are included, along with suggestions for coordinating agreement on standards. Engineering core aims and general objectives are presented for: communication skills, engineering drawing, design and decision-making, mathematics, engineering science, engineering systems, engineering materials, laboratory and practical work, tools and equipment, measurement and data evaluation, and industry and the social environment. Appendices include: an outline of the development of "Core Competencies in Engineering," a list of the study group members and their affiliations, examples of tasks suitable for competence-based learning and assessment, position statements by six interested agencies, examples of college organization for "core competencies" learning and assessment, and a glossary of terms and list of abbreviations. A bulletin summarizing the report is included. (SW)

[Looking at the Moon, Kit Pearson](#) , 2007, 0143186299, 9780143186298. Norah, an English "war guest" living with the wealthy Ogilvie family in Toronto, can hardly wait for August. She'll spend it at the Ogilvie's lavish cottage in Muskoka

whole month of freedom, swimming, adventures with her "cousins"...But this isn't an ordinary summer. It's 1943, and the war is still going on. Sometimes Norah can't even remember what her parents look like she hasn't seen them in three years. And she has turned thirteen, which means life seems to be getting more complicated. Then a distant Ogilvie cousin, Andrew, arrives. He is nineteen, handsome, intelligent, and Norah thinks she may be falling in love for the first time. But Andrew has his own problems: he doesn't want to fight in the war, and yet he knows it's what his family and friends expect of him. What the two of them learn from each other makes for a gentle, moving story, the second book in a trilogy that began with the award-winning *The Sky Is Falling*.

There are no difficult parts to be learned, and yet the singers can very soon enjoy the wonderful harmonies they are making together. HARMONIC ECHOES is a series of 10 short, simple canons which have been very successfully trialed in a number of voice workshops. With recurring themes of love, light and peace, these canons are not only a pleasure to sing, their effect on singers and listeners alike can be one of meditative stillness and joyful calm. Accessible and easy to learn, they progress from very simple to more challenging later in the collection. Although intended for a minimum of three voices or groups of voices, HARMONIC ECHOES can also be used as solo voice/unison chants if so desired. MP3 downloads of optional backings, and of sample performances (unison and canonic) of the chants are also available from [www.lulu.com/trixifield](http://www.lulu.com/trixifield).

He was a survivor--a wanderer who traded tales for food and shelter in the dark and savage aftermath of a devastating war. Fate touches him one chill winter's day when he borrows the jacket of a long-dead postal worker to protect himself from the cold. [Children's Treasury of Milligan, Spike Milligan](#) , 2000, 0753504545, 9780753504543. This unique of Spike's poems and stories for children presents his classic children's books in a way they have never seen before. The large format gives ample scope to make the most of Spike's own illustration, lovingly coloured specially for this book. The anthology comprises Silly Verse For Kids (1959), The Bald Twit Lion (1968), Unspun Socks From a Chicken's Laundry (1981), Sir Nobonk and The Terrible, Awful, Dreadful Naughty, Nasty Dragon (1982) and Starting Verse For All The Family (1987).

Spike does not regard children as small grown-ups, but as an entirely different species who live in a secret, magical world which very few adults understand. His poems were inspired by listening to his own children and subsequently his grandchildren, and marvelling at the way they could invent new words or incorporate sound effects into their everyday language. In 'borrowing' their language, Spike has created a range of poems and stories which are a delight to read to younger children, for older children to read themselves, or for grown-ups to recapture some of the magic.

[Introduction to Clinical Neurology, Douglas James Gelb](#) , 2010, 0199734844, 9780199734849. All clinicians, regardless of their specialty, encounter patients with weakness, altered sensation, headaches, "spells", dizziness, sleepiness, mental status changes, and other symptoms that reflect dysfunction of one or more parts of the nervous system. Clinicians need to know how to evaluate such patients, how to determine if the patients are likely to have a neurologic condition, and how to manage them, at least in the initial stages. This book, written by the lead author of the widely cited Neurology Clerkship Core Curriculum, covers the material that clinicians need to know in order to assess and manage the patients they will encounter in general medical practice. The focus throughout is on the "how" and "why" of clinical neurology. Naturally, the book includes extensive factual material about individual disease processes, but the emphasis is on information that is important for understanding why patients with neurologic conditions are managed the way they are. The first three chapters of the book present a systematic way to think about patients with neurologic symptoms, applying a logical approach to diagnosis rather than relying on pattern recognition. Because the neurologic examination is fundamental to diagnosis, this book provides a detailed description of how to perform each step of the examination and an even more extensive discussion of how to interpret the findings. The remaining chapters cover the management of specific disease categories and symptoms, always stressing the reasons for doing particular tests and the rationale for the various treatment options. Although the book does not cite the original literature, it reflects the most current evidence available at the time of publication.

[Urban Outcasts: A Comparative Sociology of Advanced Marginality, Loïc Wacquant](#) , 2013, 074567464X, 9780745674643.

Breaking with the exoticizing cast of public discourse and conventional research, *Urban Outcasts* takes the reader inside the black ghetto of Chicago and the deindustrializing banlieue of Paris to discover that urban marginality is not everywhere the same. Drawing on a wealth of original field, survey and historical data, Loïc Wacquant shows that the involution of America's urban core after the 1960s is due not to the emergence of an 'underclass', but to the joint withdrawal of market and state fostered by public policies of racial separation and urban abandonment. In European

cities, by contrast, the spread of districts of 'exclusion' does not herald the formation of ghettos. It stems from the decomposition of working-class territories under the press of mass unemployment, the casualization of work and the ethnic mixing of populations hitherto segregated, spawning urban formations akin to 'anti-ghettos'. Comparing the US 'Black Belt' with the French 'Red Belt' demonstrates that state structures and policies play a decisive role in the articulation of class, race and place on both sides of the Atlantic. It also reveals the crystallization of a new regime of marginality fuelled by the fragmentation of wage labour, the retrenchment of the social state and the concentration of dispossessed categories in stigmatized areas bereft of a collective idiom of identity and claims-making. These defamed districts are not just the residual 'sinkholes' of a bygone economic era, but also the incubators of the precarious proletariat emerging under neoliberal capitalism. *Urban Outcasts* sheds new light on the explosive mix of mounting misery, stupendous affluence and festering street violence resurging in the big cities of the First World. By specifying the different causal paths and experiential forms assumed by relegation in the American and the French metropolis, this book offers indispensable tools for rethinking urban marginality and for reinvigorating the public debate over social inequality and citizenship at century's dawn.

It is 127 years since the Scramble for Africa divided up the continent, imposing borders that have led to conflict rather than peace and stability. It is 100 years since the African National Congress (ANC) was founded as the first African liberation movement with pan-African roots. It is nearly 50 years since the Organization of African Unity (OAU) was founded in May 1963 and ten years since the African Union (AU) was born with a vision that seeks 'the actualisation of human dignity, development and prosperity for the entire African people ... anchored on a vision of an integrated, prosperous and peaceful Africa...driven and managed by its own citizens...and representing a dynamic force in the international arena'. The achievement of the AU vision is predicated on colonialism being dead. However, it has actually been replaced by neocolonialism, which requires extra vigilance from Africa and its diaspora in order for the unity and renaissance dreamed of to become a reality. The chapters in Africana World: From Fragmentation to Unity and Renaissance address colonial and postcolonial African realities with a view to present a holistic and

transcontinental appraisal of questions, issues and challenges that confront the continent. Contributors are drawn from different parts of the world - Africa, Europe and the Americas - and it is this eclectic range of scholarly views that lends a rich historicity to the meaning of Africanity. The book contains multidisciplinary and transdisciplinary engagements with Africa's rich cultural heritage, its lingering contemporary challenges, its multifaceted systems of knowledge and its future in the exciting context of the twenty-first century. *Africana World: From Fragmentation to Unity and Renaissance* is put together in order to help develop the study and knowledge of African liberation across the continent and the diaspora. This first volume launches a new book series, following the Scramble for Africa conferences held every May to commemorate the founding of the OAU, which will be published annually to support the scholarly study of African unity and renaissance in order to replace the lingering imagery of colonialism in Africa with a fully liberated African consciousness.

[Finding Fernanda: Two Mothers, One Child, and a Cross-Border Search for Truth, Erin Siegal](#) , 2012, 0807001430, 9780807001431. A compelling, dramatic narrative of how an American housewife discovered that the Guatemalan child she was about to adopt had been stolen from her birth mother, shedding light on the alarming and growing problem of international adoption fraud. Over the past five years, over 100,000 children were adopted into the United States, 20,000 of whom came from Guatemala. *Finding Fernanda*, a dramatic true story paired with investigative reporting, tells the side-by-side tales of an American housewife who adopts a two-year-old girl from Guatemala and the birth mother whose two children were stolen from her. Each woman gradually comes to realize her role in what was one of Guatemala's most profitable black-market industries: the buying and selling of children for international adoption. *Finding Fernanda* is an overdue, unprecedented look at adoption corruption--and a poignant, riveting human story about the power of hope, faith, and determination. From the Hardcover edition.

[MPLS: Next Steps: Next Steps, Bruce S. Davie, Adrian Farrel](#) , 2008, 0080558291, 9780080558295. SHORT DESCRIPTION: Multiprotocol Label Switching (MPLS) is a data plane and control technology that is used in packet (that is Internet Protocol) networks. Now over ten years old, it has taken root firmly as a fundamental tool in many service provider networks. The last ten years have seen a considerable consolidation of MPLS techniques and protocols. This has resulted in the abandoning of some of the original features of MPLS, and the development of other new features. MPLS has moved from a prospective solution, to a grown-up technology. Now that MPLS has reached this level of maturity, these new tools and features allow more sophisticated services to the users of the network. These tools and features are discussed within various contexts throughout several networking-related books published by MK and this presents us with a unique publishing opportunity. The proposed book is a best-of-the-best collection of existing content from several books MK has published in recent years on MPLS technology (multi-label protocol switching). Individual chapters on MPLS technology are derived from a handful of MK books and are combined in one new volume in a way that makes sense as a

reference work for those interested in new and developing aspects of this technology, i.e., network operators and designers who need to determine which aspects of their networks would benefit from MPLS technology and applications. It also serves as a definitive reference for engineers implementing MPLS-based products. This book represents a quick and efficient way to bring valuable content together from leading experts in the field while creating a one-stop-shopping opportunity for customers to receive the information they would otherwise need to round up from separate sources. Suitable and current content will be collected from the following titles: Evans, *Deploying IP and MPLS QoS* (2006); Farrel, *GMPLS* (2005); Ash, *Traffic Engineering* (2006); Vasseur, *Network Recovery* (2005); Farrel, *The Internet and Its Protocols* (2004); Nadeau, *MPLS Management* (2003); and Davie, *MPLS Technology and Applications* (2000). These chapters will be updated where necessary and two new chapters will be added at the beginning and the end of the book to bring the content into focus and discuss next generation developments. \* Coverage of major applications of MPLS such as traffic engineering, VPNs, IP integration, GMPLS, and QoS written by leading experts in the field contributes to your practical knowledge of this key technology \* Shows you how to implement various MPLS applications that will result in saving your organization time and money\* Shows you how you can evaluate MPLS applications and techniques in relation to one another so you can develop an optimum network design

[Remembering Raquel, Vivian Vande Velde](#) , 2007, 0152059768, 9780152059767. Fifteen-year-old Raquel Falcone is, as one of her classmates puts it, the kind of kid who has a tendency to be invisible. That is until the night she's hit by a car and killed while walking home from the movies. In brief, moving chapters, we hear about Raquel from her classmates, her best friend, her family--and the woman who was driving the car that struck her. The loss of this seemingly invisible girl deeply affects her entire community, proving just how interconnected and similar we all really are.

[Das Saboteur, Donald Ritchie Waddell](#) , 2009, 097720488X, 9780977204885. A TV journalist searching for a short story documentary discovers the trail of five German trained saboteurs from World War II. All five were inserted onto U.S. soil during the war by submarines and all five remained in the U.S. after the war. For over sixty years these five men living in the U.S. became naturalized citizens, started successful businesses, raised families, and were positive influences on the communities in which they lived. One man, Christolph Hoffmann, became an ordained minister and legendary pastor in western North Carolina. This man's life story recounted many of the experiences of the 371,683 German POWs interned in the U.S. during WW II. Not all German military men during WW II were staunch, hardened Nazis. In the large POW camps in the U.S. the differences were such that Nazi Germans had to be separated from non-Nazi Germans. This book discusses these little known facts of recent American History.

recognition of random notes. Quickly emulating the outstanding success of the descant tutors, these books are very

[Who Translates?: Translator Subjectivities Beyond Reason, Douglas Robinson](#) , 2001, 0791448649, 9780791448649.

Translators have long claimed that their job is to step aside and let the source author speak through them. In *Who Translates?* Douglas Robinson uses this adage to set up a series of post-rationalist perspectives on translation, all based on the recognition that translation has always been thought of in terms of the translators' surrender to forces beyond his or her rational control. Exploring this theme, Robinson examines Plato's Ion, Philo Judaeus and Augustine on the Septuagint, Paul on inspired interpreters, Joseph Smith on the Book of Mormon, and Schleiermacher, Marx, and Heidegger on translation. He traces the imaginative and historical linkages between twentieth-century conceptions of ideology and ancient conceptions of spirit-channeling, and the performative inversion of power relations by which the channel (or translator) comes to wield the source author as his or her tool. And he argues throughout for a post-rationalist conception of translation based not on the translators' rational control of words and meanings but rather on a flowing through the translator of voices and textualities.

This highly-illustrated, case-based book demonstrates how to treat the most commonly encountered treatment scenarios, describing the procedures, techniques, and sequences required in clear, concise language and in an easy-to-use format. The book takes the theory of implant restoration, using as its basis 3i implant systems, and places it directly in the operatory, concentrating in detail on each stage of the actual clinical procedures involved in treating different patients. It integrates implant treatment with the realities of running a successful restorative practice. Building on the work of the 1st edition, the 2nd edition of this successful text reflects the advances of implant

prosthetics over the intervening years, providing all new cases, exploring new techniques and technology, and demonstrating updated system components and armamentarium.

[Sixteenth Report of the Independent Monitoring Commission, Independent Monitoring Commission](#) , 2007, 0102948291, 9780102948295. This is the fourth and final report from the Independent Monitoring Commission on the progress made in the two year programme of security normalisation begun in August 2005. The monitoring is undertaken in the light of two considerations: an assessment of the paramilitary threat, and the British Government's obligation to ensure the safety and security of the community as a whole. The Commission believes the Provisional IRA is committed to the political path and has abandoned terrorism and violence. Dissident republican groups, however, continue to pose a threat to both the security forces and the community at large. Loyalist paramilitaries do not pose a threat, though the Commission notes that the UDA has made no progress in decommissioning weapons. The security normalisation is examined under several headings: the use of military in support of the Police Service of Northern Ireland; the repeal of counter-terrorist legislation particular to Northern Ireland; the police estate; and patterns of police patrolling. Of particular note is the fact that, for the second year running, the parades of 12 July were policed without the need for military assistance. Various annexes detail the closure of towers, observation posts, and military bases, and the monthly troop levels and military helicopter use in Northern Ireland over the two year period. Overall, the Commission finds that the requirements of the programme have been met.

[The Paradise of God: Renewing Religion in an Ecological Age, Norman Wirzba](#) , 2003, 0199882673, 9780199882670.

"And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." (Gen. 1:26) It has become a commonplace that Biblical religion bears a heavy share of responsibility for our destruction of the environment, and this passage from the King James version of the Bible exemplifies what is generally believed to be the Biblical attitude toward the earth. In this provocative book, however, Norman Wirzba argues that the doctrine of creation, when understood as a statement about the moral and spiritual meaning of the world, actually holds the key to a true understanding of our place in the environment and our responsibility toward it. Wirzba contends that an adequate response to environmental destruction depends on a new formulation of ourselves as part of a created whole, rather than as autonomous, unencumbered individuals. Drawing on the work of biblical scholars, ecologists, agrarians, philosophers, theologians, and cultural critics, Wirzba develops a comprehensive worldview that grows out of the idea that the world is God's creation. While the text of Genesis has historically encouraged a vision of persons as masters of creation, a more theologically and ecologically sensitive rendering, he says, would be to say that we are servants of creation. Our present culture, Wirzba believes, results from a denial of creation that has caused modern problems as diverse as rootlessness, individualism, careerism, boredom, and consumerism. The recovery of the meaning of creation can lead to a renewed sense of human identity and vocation, and happier, more peaceful lives. He concludes by offering practical advice for individuals who wish to begin the work of transformation and renewal. Moving beyond the usual political debates, *The Paradise of God* presents a compelling vision of a new religious environmentalism.

Who was privy to the pact between Lee Harvey Oswald and James Earl Ray, the romance of the artist formerly known as Prince and Princess Di, and the fate of Marilyn Monroe? Behold Max Vail (b. Maxim Valesky, 1900, St. Petersburg; d. 1999, Manhattan)--a middleman of genius who be-strode the realms of politics, entertainment, art, sport, crime and science. "I have witnessed the world," he said simply. Yet the man who knew everyone--kept their secrets, did their deals and never forgot where the bodies were buried--was himself known to virtually none. His private

diaries, here made vivid with eighty-six extraordinary computer collages, provide nothing less than the secret history of our century, confirming some long-rumored events and revealing others that are freshly shocking. In all, some two hundred iconic personalities through these pages, and their sagas--comic, ignominious, tragic, heroic and bizarre--make a strange, compelling narrative from the conflicted desires and obsessions of our times, and a rare gift to the millennium.

New York Times bestselling author Nora Roberts weaves scandal, celebrity secrets, and murder into an explosive novel of Hollywood almost too wicked not to be true: the story of a legendary actress who knows too much and the woman she's chosen to reveal it all. Eve Benedict is the kind of

subject who could make any biographers career. Last of the movie goddesses, she has two Oscars, four ex-husbands, and a legion of lovers, both famous and infamous. Now she is ready to write a tell-all memoir that has even Hollywood's richest and most powerful worried. Julia Summers never dreamed of being chosen to tell Eves story. But even if it means transplanting herself and her ten-year-old son from their quiet life in Connecticut to the withering limelight of Beverly Hills, its an opportunity too great to pass up. But Julia never imagined how far someone would go to keep Eve Benedicts book from being published until she discovers just how dark Eves secrets are. And the one man Julia hopes she can trust Eves stepson, Paul Winthrop may have the most to gain if his stepmothers story is never told and if Julias life ends before she can write a word of the truth.

[Agile Software Construction, John Hunt](#) , 2006, 1846282624, 9781846282621. In every software development project there is a need to ensure that the requirements of the user are met without compromising the ultimate goal of the project - these needs frequently change, and are often erratic. Agile software is a means of putting the software first while at the same time reacting to these user requirements in a flexible and agile way. This book covers the emerging methods and approaches (including extreme programming, feature-driven development and adaptive software development), that are loosely described as 'Agile' and shows how to apply them effectively to software development projects. It shows how to plan, organise and develop systems using agile techniques, and highlights some of the problems that may be encountered. This down-to-earth approach looking at how the different methods can work together, will be welcomed by software developers, architects and engineers, business analysts, development managers and software professionals needing an accessible source of Agile techniques and applications.
