The proliferation of digital technology, and the convergence of computing and communication devices, has transformed the way in which we socialise and do business. While overwhelmingly positive, there has also been a dark side to these developments. Proving the maxim that crime follows opportunity, virtually every advance has been accompanied by a corresponding niche to be exploited for criminal purposes; so-called 'cybercrimes'. Whether it be fraud, child pornography, stalking, criminal copyright infringement or attacks on computers themselves, criminals will find ways to exploit new technology. The challenge for all countries is to ensure their criminal laws keep pace. The challenge is a global one, and much can be learned from the experience of other jurisdictions. Focusing on Australia, Canada, the UK and the US, this book provides a comprehensive analysis of the legal principles that apply to the prosecution of cybercrimes.

[Ecclesiastical History of the English People: With Bede's Letter to Egbert and Cuthbert's Letter on the Death of Bede, Bede](#) , 2003, 014190979X, 9780141909790. Written in AD 731, Bede's work opens with a background sketch of Roman Britain's geography and history. It goes on to tell of the kings and bishops, monks and nuns who helped to develop Anglo-Saxon government and religion during the crucial formative years of the English people. Leo Sherley-Price's translation brings us an accurate and readable version, in modern English, of a unique historical document. This edition now includes Bede's Letter to Egbert concerning pastoral care in early Anglo-Saxon England, at the heart of which lay Bede's denunciation of the false monasteries; and The Death of Bede, an admirable eye-witness account by Cuthbert, monk and later Abbot of Jarrow, both translated by D. H. Farmer.

A twin engined aircraft the Grumman Skyrocket, the F4D Skyray, a delta winged jet, and the P 55 Assender, a pusher canard represent real planes while the Batplane a modified p 40, the X

plane a glider and the weird thing from the 1936 movie " Things to Come " represent fantasy designs. Somehow they all work with careful trimming and building. These aircraft are designed for free flight powered with a rubber band but could be adapted to a small gas or electric motor. These models are around 1/24 th scale. The Book contains a brief description of the aircraft, design, construction and trimming and flying instructions. The book is well illustrated with photos showing each step of the way to successfully building the model. This book has been reviewed in several model magazines including Cartens Publications FLYING MODELS, MODEL FLYER (Br), Model Airplane News and MAAC Magazine.

With the end of the 1900s, the time has come for a thorough assessment of one hundred years of poetry - from the widely acclaimed to the subtly influential - and with an eye to the importance and meaning of poetry in America. Compiled by three poets and poetry scholars - including 2002 American Book Award Winner Dana Gioia - this anthology presents American poetry across the twentieth century from Stephen Crane to Kevin Young. The collected works are arranged according to the major movements in American poetry, offering a valuable teaching resource for American Literature and Poetry courses.

[The Blowtop, Alvin Schwartz](#) , 2001, 158754007X, 9781587540073. The Blowtop was the only American novel to reveal in exquisite detail how brutally the years immediately following the horrors of World War II reshaped the gentle Bohemian art world that preceded the war. Written in 1946, a year before Camus' uncannily similar "L'Etrangere", The Blowtop was not published until 1948 because of its unsparing revelations of a destructive and deadly art style. In the end, it was finally released in a mystery jacket. Soon after, The Blowtop became a cult book especially at Columbia University. In the spring of 1948 it was claimed that it sparked the "Beat" movement which presumably emerged out of discussions of a new art approach among students at Columbia, including Jack Kerouac and Allen Ginsburg. Two years later, The Blowtop was taken up in Paris by followers of Sartre and Simone de Beauvoir, whose excitement turned it into

a best seller, where in 1950 it appeared under the title "Le Cingle", published by Les Editions de L'Elan. The Blowtop opens in a Sheridan Street bar in the Village with the apparently pointless killing of a small-time marijuana dealer and slowly introduces the reader to the effect of this murder on a variety of Village types, artists, writers, barflies, academics and their various loves as it gradually uncovers the sources of an art movement that was to sweep the world with names like Jackson Pollock, Willem deKooning, and Hans Hofman. The purpose of their apparently nihilistic efforts was to get at "the things that were left over" -- that sense of value and spirit in the world that a war culminating in the atomic bomb had so thoroughly blasted away. It was this desperate effort to rediscover the things that matter through death, through sex, through art that challenges and enlightens the reader on every page of this revealing and powerful novel.

[Be Who You Want to Be: Dealing with Life's Ups & Downs, Karen Casey](#) , 2007, 1573243086, 9781573243087. For a vast majority of girls in this country, there comes an age at which self-esteem, self-assurance, equilibrium, and confidence fly out the window. Maybe it's hormones, maybe it's culture, or maybe it's just called growing up. Whatever the cause, it's real. Some girls turn, in their own fashion, to the same addictive solutions as their elders: compulsive behavior--either in the form of alcohol, drugs, food, or something equally destructive. Casey, a veteran of the "first great revival" of the recovery movement, brings the art of living one day at a time to young girls in Be Who You Want to Be. "My intention in this book is similar to the intent in my other titles: I want to foster hope and willingness in young girls to believe they can make the changes needed so they feel like they belong and have purpose." From the book's opening note to parents (and other adults who care about young girls) through to the final word, the spirit of taking steps for themselves, no matter who they are or where they are in life, comes through in an accessible tone, providing girls the toolkits they need for handling life's ups and downs.

["Daddy's Gone to War": The Second World War in the Lives of America's Children, William M. Tuttle](#) , 1995, 0195096495, 9780195096491. Looking out a second-story window of her family's quarters at the Pearl Harbor naval base on December 7, 1941, eleven-year-old Jackie Smith could see not only the Rising Sun insignias on the wings of attacking Japanese bombers, but the faces of the pilots inside. Most American children on the home front during the Second World War saw the enemy only in newsreels and the pages of Life Magazine, but from Pearl Harbor on, "the war"--with its blackouts, air raids, and government rationing--became a dramatic presence in all of their lives. Thirty million Americans relocated, 3,700,000 homemakers entered the labor force, sparking a national debate over working mothers and latchkey children, and millions of enlisted fathers and older brothers suddenly disappeared overseas or to far-off army bases. By the end of the war, 180,000 American children had lost their fathers. In "Daddy's Gone to War", William M. Tuttle, Jr., offers a fascinating and often poignant exploration of wartime America, and one of a generation's odyssey from childhood to middle age. The voices of the home front children are vividly present in excerpts from the 2,500 letters Tuttle solicited from men and women across the country who are now in their fifties and sixties. From scrap-collection drives and Saturday matinees to the atomic bomb and V-J Day, here is the Second World War through the eyes of America's children. Women relive the frustration of always having to play nurses in neighborhood war games, and men remember being both afraid and eager to grow up and go to war themselves. (Not all were willing to wait. Tuttle tells of one twelve year old boy who strode into an Arizona recruiting office and declared, "I don't need my mother's consent...I'm a midget.") Former home front children recall as though it were yesterday the pain of saying good-bye, perhaps forever, to an enlisting father posted overseas and the sometimes equally unsettling experience of a long-absent father's return. A pioneering effort to reinvent the way we look at history and childhood, "Daddy's Gone to War" views the experiences of ordinary children through the lens of developmental psychology. Tuttle argues that the Second World War left an indelible imprint on the dreams and nightmares of an American generation, not only in childhood, but in adulthood as well. Drawing on his wide-ranging research, he makes the case that America's wartime belief in democracy and its rightful leadership of the Free World, as well as its assumptions about marriage and the family and the need to get ahead, remained largely unchallenged until the tumultuous years of the Kennedy assassination, Vietnam and Watergate. As the hopes and expectations of the home front children changed, so did their country's. In telling the story of a generation, Tuttle provides a vital missing piece of American cultural history.

This volume, commemorating nearly forty years during which Professor K.A. Ballhatchet taught at the School of Oriental and African Studies in London, offers varied but coherent studies relevant to questions of ethnicity in South Asia. It goes beyond the recognition that identities are constructed, towards an understanding of the context and conditions in which particular kinds of community are possible. A secondary theme is the means and importance of the interpretation of texts. A third is the impact of the intrusions of colonial rule upon South Asia's practices and self-perceptions. The subjects are considered from pre-Mughal times to the recent past, and in both India and Sri Lanka. The contributors are K.N. Chaudhuri on the idea of the barbarian; Peter Hardy on Indo-Muslim historical writing; Avril Powell on conversions from Islam to Christianity; John

Rogers on European perceptions of, and A.P. Kannangara on caste rhetoric in, Sri Lanka; Peter Robb on the early impact of British rule on Muslims; Geoffrey Oddie on hook-swinging; Ian Catanach on plague and Bombay communities; Dagmar Engels on childbirth and Bengali women; and Rosalind O'Hanlon on approaches to communalism in Western India. [Demosthenes of Athens and the Fall of Classical Greece, Ian Worthington](#) , 2013, 019993195X, 9780199931958.

Regarded as ancient Greece's greatest orator, Demosthenes lived through and helped shape one of the most eventful epochs in antiquity. His political career spanned three decades, during which time Greece fell victim to Macedonian control, first under Philip II and then Alexander the Great. Demosthenes' resolute and courageous defiance of Philip earned for him a reputation as one of history's outstanding patriots. He also enjoyed a brilliant and lucrative career as a speechwriter, and his rhetorical skills are still emulated today by students and politicians alike. Yet he was a sickly child with an embarrassing speech impediment, who was swindled out of much of his family's estate by unscrupulous guardians after the death of his father. His story is one of triumph over adversity. Modern studies of his life and career take one of two different approaches: he is either lauded as Greece's greatest patriot or condemned as an opportunist who misjudged situations and contributed directly to the end of Greek freedom. This new biography, the first ever written in English for a popular audience, aims to determine which of these two people he was: self-serving cynic or patriot - or even a combination of both. Its chronological arrangement brings Demosthenes vividly to life, discussing his troubled childhood and youth, the obstacles he faced in his public career, his fierce rivalries with other Athenian politicians, his successes and failures, and even his posthumous influence as a politician and orator. It offers new insights into Demosthenes' motives and how he shaped his policy to achieve political power, all set against the rich backdrop of late classical Greece and Macedonia.

The New York Times bestselling second novel by the author of *The Secret Life of Bees* and *The Invention of Wings* (Viking, January 2014) Inside the church of a Benedictine monastery on Egret Island, just off the coast of South Carolina, resides a beautiful and mysterious chair ornately carved with mermaids and dedicated to a saint who, legend claims, was a mermaid before her conversion. When Jessie Sullivan is summoned home to the island to cope with her eccentric mother's seemingly inexplicable behavior, she is living a conventional life with her husband, Hugh, a life molded to the smallest space possible. Jessie loves Hugh, but once on the island, she finds herself drawn to Brother Thomas, a monk about to take his final vows. Amid a rich community of unforgettable island women and the exotic beauty of marshlands, tidal creeks, and majestic egrets, Jessie grapples with the tension of desire and the struggle to deny it, with a freedom that feels overwhelmingly right and the immutable force of home and marriage. Is the power of the mermaid chair only a myth? Or will it alter the course of Jessie's life? What happens will unlock the roots of her mother's tormented past, but most of all, it will allow Jessie to come discover selfhood and a place of belonging as she explores the thin line between the spiritual and the erotic.

[The Branch Lines of Oxfordshire, Maggs, Colin Gordon Maggs](#) , 2010, 1848683456, 9781848683457. The branch lines of Oxfordshire were not so numerous as those of some other counties, but they carried a wide variety of locomotives and rolling stock, and included specialist lines such as those for Morris Cowley, as well as branches of the Great Western Railway. Many of the lines centred on the county town, Oxford, and though a number were short, some, such as those to Fairford and Bletchley, were longer. Most of the lines were rural, but some formed part of a through route, such as the CheltenhamBanbury, PaddingtonThameOxford, PaddingtonBirmingham and OxfordCambridge lines. Among those lines which have rarely been reviewed in publications are the Bicester Military Railway, the Wroxton Quarry Railway and the Chinnor and Princes Risborough Railway. All Oxfordshire's branch lines are described here in an entertaining and informative text that brings their history to life. A brief account is given of the county's main railway routes before each branch is looked at in detail. The book is illustrated with over 190 black and white photographs, maps and ephemera which capture the history of Oxfordshire's railways. Carefully researched and attractively presented, The Branch Lines of Oxfordshire will appeal to railway enthusiasts, modellers, local historians and anyone interested in Britain's industrial heritage.

[Understanding and Applying Research Design, Martin Lee Abbott, Jennifer McKinney](#) , 2013, 1118605268, 9781118605264. A fresh approach to bridging research design with statistical analysis While good social science requires both research design and statistical analysis, most books treat these two areas separately. Understanding and Applying Research Design introduces an accessible approach to integrating design and statistics, focusing on the processes of posing, testing, and interpreting research questions in the social sciences. The authors analyze real-world data using SPSS software, guiding readers on the overall process of science, focusing on premises, procedures, and designs of social scientific research. Three clearly organized sections move seamlessly from theoretical topics to statistical techniques at the heart of research procedures, and finally, to practical application of research design: Premises of Research introduces the research process and the capabilities of SPSS, with coverage of ethics, Empirical Generalization, and Chi Square and Contingency Table Analysis Procedures of Research explores key quantitative methods in research design including measurement, correlation, regression, and causation Designs of Research outlines various design frameworks, with discussion of survey research, aggregate research, and experiments Throughout the book, SPSS software is used to showcase the discussed techniques, and detailed appendices provide guidance on key statistical procedures and tips for data management. Numerous exercises allow readers to test their comprehension of the presented material, and a related website features additional data sets and SPSS code. Understanding and Applying Research Design is an excellent book for social sciences and education courses on research methods at the upper-undergraduate level. The book is also an insightful reference for professionals who would like to learn how to pose, test, and interpret research questions with confidence.

No teacher or student of American Indian studies, no policymaker in American Indian policy, and no observer of American Indian history and law should do without this book. There is nothing in the field remotely as comprehensive, usable, and balanced as Wilkins and Stark's work."--Matthew L. M. Fletcher, director of the Indigenous Law and Policy Center at Michigan State University College of Law" ""Wilkins has written the first general study of contemporary Indians in the United States from the disciplinary standpoint of political science. His inclusion of legal matters results in sophisticated treatment of many contemporary issues involving Native American governments and the government of the United States and gives readers a good background for understanding other questions. The writing is clear-not a minor matter in such a complex subject--and short case histories are presented, plus links (including websites) to many sources of information."--Choice

[Appetite, Nigel Slater](#) , 2002, 0679312129, 9780679312123. If you decide to go through life without cooking you are missing something very, very special. You are losing out on one of the greatest pleasures you can have with your clothes on. Nigel Slater A chance comment spurred the heralded Observer columnist and wildly popular cookbook author Nigel Slater to write Appetite. A reader asked If you dont give me exact amounts in a recipe, then how will I know if it is right? Slater realized the reader had so little confidence in his own cooking that he didnt know what he liked unless he was told. Appetite is not about getting it right or wrong; it is about liking what you cook. To help the everyday cook achieve culinary independence, Slater supplies the basics of relaxed, unpretentious, hearty cooking, written with his trademark humour and candour. Slater doesnt believe in replicating restaurant-style theatricality to impress guests -- he simply loves food, and his love is evident on every page. Slater covers the philosophies of cooking, the basics to have on hand, and detailed descriptions of necessary equipment and ingredients. He tells you which wok to buy (the cheap one), and why it can pay to flirt with the fishmonger. There are sections on seasoning, a good long list of foods that pair well, and a large collection of recipes for soup, pasta, rice, vegetables, fish, meat, pastry and desserts. These are straightforward, easy-to-make dishes adapted for the North American cook -- every one a springboard to something new, different and delicious. And with full-colour photography throughout the book, Appetite is a feast for the eyes as well as the palate.

[Cities and Economic Development: From the Dawn of History to the Present, Paul Bairoch](#) , 1991, 0226034666, 9780226034669. When and how were cities born? Does urbanization foster innovation and economic development? What was the level of urbanization in traditional societies? Did the Industrial Revolution facilitate urbanization? Has the growth of cities in the Third World been a handicap or an asset to economic development? In this revised translation of *De Jericho Mexico*, Paul Bairoch seeks the answers to these questions and provides a comprehensive study of the evolution of the city and its relation to economic life. Bairoch examines the development of cities from the dawn of urbanization (Jericho) to the explosive growth of the contemporary Third World city. In particular, he defines the roles of agriculture and industrialization in the rise of cities. "A hefty history, from the Neolithic onward. It's ambitious in scope and rich in subject, detailing urbanization and, of course, the links between cities and economies. Scholarly, accessible, and significant." *Newsday* "This book offers a path-breaking synthesis of the vast literature on the history of urbanization." John C. Brown, *Journal of Economic Literature* "One leaves this volume with the feeling of positions intelligently argued and related to the existing state of theory and knowledge. One also has the pleasure of reading a book unusually well-written. It will long both be a standard and stimulate new thought on the central issue of urban and economic growth." Thomas A. [DISABILITY AND DEVELOPMENT: A CASE STUDY OF JAPANESE CHILDREN AT SCHOOL, Misa Kayama, Wendy Haight](#) , 2013, 0199970823, 9780199970827. This book examines Japanese cultural beliefs about disability and related socialization practices as they impact the experiences of elementary school-aged children. Physical and mental conditions which impair children's functioning are universal issues impacting child welfare and educational systems around the world. While the American approach is well understood and represented in the literature, cultures differ in which physical and mental conditions are considered 'disabling'. Currently, the Japanese educational system is in transition as public schools implement formal special education services for children with developmental disabilities. 'Developmental disabilities' is a new term used by Japanese educators to categorize a variety of relatively minor social and cognitive conditions caused by neurologically based deficits: learning disabilities such as dyslexia, ADHD, and Asperger's Syndrome. Children who were once considered 'difficult' or 'slow learners' are now considered to be 'disabled' and in need of special services. This transition created an excellent opportunity to explore Japanese beliefs about disability that might otherwise have remained unexamined by participants, and how these evolving beliefs and new socialization and educational practices impact children's experiences.

Our deepest fears, personal struggles and the adversity that we have faced as African American males, undoubtedly make us more alike than you d ever realize. However, to find where the differences lie, all you need to do is look at the drive, determination and vision that has helped Barack attain numerous accomplishments throughout his life. The same potential for greatness lies within us all, but unfortunately, many of us allow our vision to become cloudy before eventually succumbing to the stresses of the streets. Undoubtedly, this book will inspire you to diligently pursue all of your goals, and obtain success without sacrificing your self respect or dignity in the process. You are the embodiment of the change and hope that has always inspired our race and fueled our drive to achieve great things. Yes You Can! Believe it or not, I can honestly say that I already see the Barack in you. Now I just need you to see it in yourself.

[A Father's Angels, John Steven Waldron](#) , 2012, 0985670819, 9780985670818. John Waldron had not intended to hire an undocumented worker, or several for that matter, but he needed help with caring for his two young sons. In A Father's Angels, his affecting and redeeming tribute to four Hispanic women and their families, Waldron goes beyond simple stories of a single gay father. For more than a decade, these illegal angels helped redirect the lives of a new father and his children, and along the way provided invaluable life lessons on the true meaning of family. Paulina was first. She was large by every stretch of the imagination. Dressed in an oversized t-shirt and full cotton skirt, her size was immediately appealing to a peanut-sized three year old boy lost in her embrace. Carmen followed, Mormon bible in hand, her mission to bring order to the home. Ana, ever the playmate, came and went too quickly. And finally, there was Rosa who not only brought her love and compassion, bur her family as well. Waldron reveals the challenges and anguish of navigating through a state adoption system and the bias that still exists against single and gay parents. His journey to adopt a second child brings him to Guatemala in an effort to complete his family. Throughout, a growing tide of hostility and retribution grows in Arizona, John's home state, toward Hispanic immigrants both legal and illegal, creating a perilous situation for all. Raw, gripping and utterly redemptive, A Father's Angels humanizes the immigration discussion, and pays homage to unforgettably heroic women.

Before Cheyenne realizes what's happening, their car is being stolen. Griffin hadn't meant to kidnap Cheyenne, but once his dad finds out that Cheyenne's father is the president of a powerful corporation, everything changes--now there's a reason to keep her. How will Cheyenne survive this nightmare? Because she's not only sick with pneumonia--she's also blind.

[The modern conductor: a college text on conducting based on the technical principles of Nicolai Malko as set forth in his The conductor and his baton, Elizabeth A. H. Green, Nicolai Malko](#) , 1997, 0132514818, 9780132514811. Extensively refined and updated, this new edition on conducting posits that conducting is a time-space art. It builds basic book techniques and includes additional band scores excerpts, placed in proximity with the classic repertoire. The text adds new baton timing techniques, and shows the relationships of time, speed, and motion. Key words and principles are highlighted in boldface or italics. This book states a new principle regarding gesture-speed as related to dynamics and phrasing. Drills to train the mind and hands simultaneously are presented. Complete diagrams, all time-beating patterns, and logical classification of expressive gestures are included. Offers manual-technique photo illustrations and a wealth of music examples that show the application of techniques. Features an extensive appendix that includes seating charts, language tables (scores), less common terms, and an outline of musical form to aid in score study. For musicians.

[Why Some Things Should Not Be for Sale : The Moral Limits of Markets: The Moral Limits of Markets, Debra Satz Marta Sutton Weeks Professor of Ethics in Society Stanford University](#) , 2010, 0199718571, 9780199718573. What's wrong with markets in everything? Markets today are widely recognized as the most efficient way in general to organize production and distribution in a complex economy. And with the collapse of communism and rise of globalization, it's no surprise that markets and the political theories supporting them have seen a considerable resurgence. For many, markets are an all-purpose remedy for the deadening effects of bureaucracy and state control. But what about those markets we might label noxious-markets in addictive drugs, say, or in sex, weapons, child labor, or human organs? Such markets arouse widespread discomfort and often revulsion. In *Why Some Things Should Not Be for Sale*, philosopher Debra Satz takes a

penetrating look at those commodity exchanges that strike most of us as problematic. What considerations, she asks, ought to guide the debates about such markets? What is it about a market involving prostitution or the sale of kidneys that makes it morally objectionable? How is a market in weapons or pollution different than a market in soybeans or automobiles? Are laws and social policies banning the more noxious markets necessarily the best responses to them? Satz contends that categories previously used by philosophers and economists are of limited utility in addressing such questions because they have assumed markets to be homogenous. Accordingly, she offers a broader and more nuanced view of markets-one that goes beyond the usual discussions of efficiency and distributional equality--to show how markets shape our culture, foster or thwart human development, and create and support structures of power. An accessibly written work that will engage not only philosophers but also political scientists, economists, legal scholars, and public policy experts, this book is a significant contribution to ongoing discussions about the place of markets in a democratic society.

[Introduction To Lapidary, Pansy D. Kraus](#) , 1987, 0801972663, 9780801972669. An authoritative introduction to all aspects of lapidary is provided here by Pansy Kraus. She describes the processes, tools, and equipment of each branch of this fascinating hobby, helping the reader choose a technique, get started the right way, and determine which tools will work best to achieve specific results.––Kraus describes the considerable rewards of tumbling rocks, making cabochons, carving gem materials, lapping, cutting spheres, making beads, and faceting. She provides a coherent overview of a vast and complex field, from the elements of getting started to studio visits with lapidary artist, where we discover what may be possible.––Olive M. Colhour produces breathtaking Florentine pietre dure portraits by color-matching stones to paintings. Then, she cuts and polishes each rock separately before assembling her sculptured mosaics.––Jerry Muchna facets three-dimensional quartz sculptures. His "Great Moments in America" series includes The Spirit of St. Louis, with 695 facets, and Iwo Jima, with 6,511 facets.––Hing Wa Lee combines traditional Chinese technique - using a fixed shaft with a foot treadle - with the use of a modern flex shaft to produce carvings of astonishing intricacy. Working with traditional jadeite and nephrite - as well as more unusual materials, such as sugilite - he achieves a unique blend of antiquity and modernity.––Their work is shown in 27 exciting color plates, along with that of other artists featured in the studio visits.

Classical material was traditionally used to express colonial authority, but it was also appropriated by imperial subjects to become first a means of challenging colonialism and then a rich field for creating cultural identities that blend the old and the new.

Nobel prize-winners such as Derek Walcott and Seamus Heaney have rewritten classical material in their own cultural idioms while public sculpture in southern Africa draws on Greek and Roman motifs to represent histories of African resistance and liberation. These developments are explored in this collection of essays by international scholars, who debate the relationship between the culture of Greece and Rome and the changes that have followed the end of colonial empires.

Fitting the requirements of the National Literacy Strategy, National Curriculum in England and Wales, English Language 5-14 in Scotland, and Common Curriculum in Northern Ireland, the Oxford Literacy Web guides pupils through the core skills associated with learning to read and write with a diverse range of literary styles within the genres of fiction, non-fiction, rhymes, language, and poetry. The "Fiction" strand: there can be no better way to learn to read than through the Duck Green School and Variety story strands. Exciting stories, hilarious events, and dynamic illustrations combine to ensure diversity and enjoyment. Variety stories extend children's experience of different styles of fiction. They reinforce vocabulary but include a more challenging element to push upward toward the next level. Starter Stage Pack A is a pack of wordless stories for beginning readers to develop book knowledge and practise language skills. The "Stories We Know" cluster consists of 3 amusing retellings of traditional stories and rhymes by Keith Gaines, while the "Teddy and Me" books are original stories by Maire Buonocore about a young girl and her toys. The books are available in both standard and 'big book' format.
