

Welcome to ETHMemphis 2018! We are excited to announce three days packed with talks, workshops, and networking activities. Our schedule is full of general and technical talks for you to choose from based on your interest.

Our keynote speakers are Sean Healy, Senior VP of Transportation, International, Planning & Strategy at FedEx Freight, on Friday night and Scott Nelson, Chairman and CEO at Sweetbridge, on Saturday before dinner.

To keep things interesting, the Decentraland team will be collaborating with the Memphis Game Developers to hold a game jam where participants will create a game within the virtual world.

Whether you're hacking or just hanging, check out the schedule below or if you're ready to register, visit us online at ethmemphis.com/applications.
