I have just updated ai2-test.appinventor.mit.edu. The changes can be found here:

   http://bit.ly/2JOS3wf

This is the first test of release nb177 which should be happening soon (measured in days). It is mostly a bugfix release.

-Jeff

Issues:

Loaded Companion 2.52t1u on an Android 4.2.2 Tablet. Loads OK.
Attempt to load Project with Companion .. Companion displays the connect code but does not load the Project

Sorry, I cannot test this Jeff other than the following comment about the Marker.Horizontal;/Vertical tool tips.

Anchors
Why is the tooltip text ambiguous for Marker.Horizontal and Vertical... how about Anchor Horizontal; 1-Left,2-Right,3-
Center instead of The vertical alignment controls where the Marker's anchor is located relative to its width

and   Anchor Vertical; 1-Top, 2-Center,3-Bottom   Also, for Horizontal it would seem 1-Left,2-Center,3-Right would
be 'more intuitive'

Even though the test server would not load, I discovered I could use Companion 2.52t1u loaded Projects on my device
without issues.
