

We are pleased to announce the 2018 Recruitment of HEIBRiDS, a new Research School in Data Science in Berlin, Germany. Founded in 2018, HEIBRiDS is a cooperation between the Einstein Center for Digital Future involving four Berlin universities and six Helmholtz Centers (AWI, DESY, DLR, GfZ, HZB and MDC) in the capital region and offers projects in a collaborative research environment across disciplinary borders.

## Fully funded PhD Positions

We are looking for highly motivated students (with a corresponding master's degree) with a background in computer science, physics, statistics, mathematics, bio- or geo-informatics.

### We offer:

- \* Cutting-edge research in big data science under close supervision of a team of scientific mentor and co-mentor
- \* Integrated training curriculum of scientific and professional skills taught in English
- \* Financial support for conferences and collaborations
- \* Institutions that value diversity and promote an inclusive work environment
- \* Fully-funded positions for 3 years with the option of 1 year extension
- \* Competitive salaries according to German E13
