

Learn about the **WHY** in WiFi

WHY parents NEED to KNOW more about the Issues Surrounding WiFi in Your School

As parents, we teach our children to question and educate themselves about the world around them. Making informed decisions requires gathering information based on effective fact finding and up-to-date research, particularly when it comes to issues surrounding technology. We are not against the use of technology for learning. We believe there is a better way.

In addition to accessing these links for more information, you can attend our May 9th Information Session (see invitation on back of this flyer). You may request to be put on our mailing list at: wififreeschools@gmail.com. We will send you this information electronically.

Why are we concerned about WiFi in schools?

- 1) School WiFi can be up to 300 times more powerful than your home WiFi.
- 2) Since 2011, The World Health Organization has called WiFi and other consumer wireless devices a “possible carcinogen” and placed it on an official watch list with DDT, lead and other things we normally keep away from our children. http://www.iarc.fr/en/media-centre/pr/2011/pdfs/pr208_E.pdf
- 3) The American Society of pediatrics – 60,000 US Pediatricians – has called for stricter guidelines to protect children from the increasing wireless radiation in their lives.
- 4) The American Academy of Environmental Medicine (AAEM) – Canadian and American doctors – recommends WiFi not be installed in schools due to evidence of negative health effects in children and teachers. <http://aaemonline.org/images/LettertoLAUSD.pdf>
- 5) The former President of Microsoft Canada now leads a lobby group for safer wireless technology in Canada. As a twenty year leader in the technology industry, he has declared that wireless devices must be approached with caution. <http://www.c4st.org>
- 6) The American Academy of Reproductive Medicine published a study showing the WiFi from a standard laptop causes DNA damage and infertility in the male reproductive system in only four hours. http://www.safeschool.ca/WiFi_Damages_Sperm.html
- 7) The manufacturers of wireless devices (Apple, Blackberry, Motorola, Cisco) place fine print warnings in their manuals that states, “lab studies shown to cause cancer” ... “keep away from the lower abdomen of a teenage girl:....” <http://ehtrust.org/cell-phone-fine-print-warnings/>
- 8) Simcoe County parents and students, videotaped testimony describing the suffering caused by school WiFi. <http://www.youtube.com/watch?v=jvkxO8xLqMQ>
- 9) Wifi is easily replaced with hardwired internet connections that are safe, and better.

Learn about the **WHY** in WiFi Parents Information Session

May 9, 2013 at 7:00pm

Port Credit Legion

35 Front Street North, Mississauga

What are the implications to our children's social, financial, and healthy well being by bringing WiFi into our schools and the issues surrounding BYOD (Bring Your Own Device)?

Please join us for an open discussion and find out why you need to be informed about WiFi in our schools.

KEYNOTE SPEAKER:

Current research on WiFi radiation will be shared by

Dr. Magda Havas

of Trent University, Canadian expert on the health effects of electromagnetic radiation.

Hear opinions from:

Frank Clegg

Citizens 4 Safe Technology (Former President Microsoft Canada)

Rodney Palmer

Simcoe County Safe School Committee

Please R.S.V.P. to:

Concerned Peel Parents for the Health & Safety of ALL Children
