

# **Iraq Government Warning about the dangers of wireless radiation**

## **School exchanges risk of cancer and ill health for a ticket booth!**

North Platte resident Tia McGuire told the council that a 10-year study conducted in Germany showed that people who live within a quarter-mile of a cell phone tower are three times more likely to be diagnosed with cancer. A similar 10-year study in Israel showed that people are four times more likely to develop cancer if they live close to a cell tower.

Has the Council and School Board gone mad?

## **Protest Picnic, Oakville, Ontario**

**May Day Picnic** : please join us Sunday, May 6th, noon, for a May Day Family Picnic on the grounds of Fire Station #1, corner of Bronte and Rebecca.

We will gather to demonstrate our desire for our community to remain healthy and safe for all: to tell Bell NOT TO TURN THE COMMERCIAL ANTENNA ON. Come out to signal your intent to carry on opposing this new use of the fire station emergency communications antenna. We invite neighbours, friends, and family to join us in visible opposition to the electrosmog pollution that these new antenna would subject us to 24/7.

Bell Canada and the Town of Oakville chose to locate these antenna here, they can choose to relocate them to locations with appropriate setbacks protecting the firefighters, the children in the day care, the churches, school and the residences that are well under the Town of Oakville's 200 meter set-back protocol. Our people and our community demand better. Mayday is an emergency procedure word used internationally as a distress signal in radio communications. The word derives from the French venez m'aider, meaning "come help me", and is used by firefighters. The call is always given three times in a row ("**Mayday Mayday Mayday**"). We invite anyone concerned about the risk of radio frequency radiation to stop by, and urge you to join us in showing your opposition. Bring your family, your picnic and a bright coloured blanket!

Please read this article on stealth towers in residential backyards, and warn your neighbours not to be taken in by salespeople offering long-term contracts. If this practice spreads, it will soon pit neighbour against neighbour in communities across Canada.

[Oakville Beaver on Stealth Towers](#) Dana Anderson, senior planning services director for the Town of Oakville says in this article "We have no jurisdiction. If one of the proponents went to Industry Canada with a proposal to put a cell tower,

under 15 metres, anywhere in the town, it's exempt. So there is no protocol, no consultation, we have no involvement." - Dana Anderson, senior planning services director. She is correct on PRIVATE property, however on Town property the Town has 100% authority. The Fire Station #1 tower is on Town property.

**VIP Town Meeting** The Town has scheduled the postponed meeting on changes to Cell Tower set-backs: Monday, May 14, 2012. Please register to speak or just come to show Council the people of Oakville CARE, we demand they respect the precautionary principle and put SAFETY FIRST: do NOT lower standards, throw up their hands and allow the telecom industry free reign in Oakville. We know better, we can do better, Oakville can take a leadership role in this, and join the World Health Organization in calling for minimized exposures.

Signalling to Council that you care enough to show your support by attending and by offering input to us in advance would be very much appreciated. To register to speak, call [905 845-6601](tel:905-845-6601) and ask to speak to the Clerk's office.

**EPIDEMIOLOGICAL STUDY** If you are interested in signing up for the Bronte Fire Station #1 Epidemiological Study, please send us an email and put STUDY in the subject, at [911mybrontefirestation@gmail.com](mailto:911mybrontefirestation@gmail.com)

This study involves voluntary participation from members of the community at three levels of involvement. This is open to anyone who lives within 1000 meters of the fire hall who is 18 years or older. Those who are younger would require a parent to complete the form weekly. As part of the study (open to a few of those who sign up for the study) professionals will conduct radiation monitoring in your home. This is in addition to baseline monitoring at different distances from the antenna several times during the coming year, to map the area for radiation.

For additional information, visit the 911 My Bronte Fire Station website at: [www.mybronte.ca](http://www.mybronte.ca)

### **Iraq Government Warning about the dangers of wireless radiation**

"Transmission devices can significantly affect human health," Kamal Hussein,

Deputy Minister of the Environment told NIQASH. And this week, two further letters would be sent to the media organisations, Al Furat, a radio and television station, and Biladi, a television channel, he said. "We will also send letters to all other offending stations, urging them to move their offices from residential areas," Hussein continued.

## **Fight those Stupid Meters**

**Please support actions in your state or neighboring states. Where legislation is up for hearing, please send testimony if you can. Even if it is not your state, states often want to avoid making similar mistakes and your testimony about problems being caused for you by smart meters, can often have a huge impact.**

**Please help move awareness forward. The mainstream media has essentially ignored the serious problems that transmitting meters are having for many people. Some rare exceptions exist. Kudos to TV3 for being one of those exceptions. Please use your email and social media connections to help make people aware of this serious health threat**

Madison TV3 News story on 'smart meters'

## **Madison to install 'smart meters' to measure water use**

**Federation of Canadian Municipalities**

Here is the link to a reported written by FCM in 2009. I believe this is a topic that should be discussed at the conference in June, if not formally then informally. More municipalities are facing the siting to transmission towers with no consideration of local concerns or objections, and this intrusion into communities

will likely increase, especially with companies like Shaw installing WiFi transmitters in every community. It is unfortunate that there is no workshop devoted to this, but if we each raise this issue with the FCM rep. hopefully it can be discussed and strategies developed.

Portland City Council's **cellphone tower** decision disappoints residents

According to code, a tower cannot emit more than 1,000 watts of ERP; however, it does not state whether it is referring to the tower as a whole or individual antennas.

<http://djcoregon.com/news/2012/04/30/residents-disappointed-over-portland-city-councils-cellphone-tower-vote/>

-----

**Smart meter's top-down agenda**

These totals do not include the emissions from each wireless "smart" appliance the grid will require of us in the future, creating a veritable soup of **electromagnetic radiation** that the WHO calls a "class 2B potential carcinogen." **Health concerns** have ...

**Are Electromagnetic Waves the Culprit?**

In two communities in Nagano Prefecture an increasing number of citizens are complaining of swollen lymph glands and muscle pain, and at the same time deformities are appearing in plants. The causes have not been clarified, but some people suspect that the electromagnetic waves from mobile phone base stations may be a factor.
