Burbank Residents Protest Cell Tower Plan

"We'd rather look foolish in ten years and say maybe we overreacted but we're healthy than look back in 10 years and say you know these brain tumors some of us are getting, maybe we can trace those back to the cell phone towers we live underneath," Weigand said.

They also said the tower would lower property values.

Workshop on "Cell tower radiation"

at IIT Bombay on July 9, 2012

I will like to invite you for the 2nd Workshop on "Cell phone/tower radiation hazards and solutions" being organized at IIT Bombay on July 9, 2012 (Monday) from 9 am to 6pm.

First workshop was held on 20th Nov 2011 at IIT Bombay, which was attended by more than 100 people. The objective is to create awareness of health risks associated with long term cell phone/tower radiation exposure. You can see the details at: <http://www.ee.iitb.ac.in/~mwave/workshop2>

Registration fee: Rs. 6,000 (includes Cell Tower Radiation Monitor)
(RS. 6,000 = USD 120)

With regards.

Wi Fi Lawsuit?

The Israeli ministry of education is facing a lawsuit threat from Lawyer Dafna Tachover, who wrote this letter in response to the position document written by the inter-ministerial committee of the env., health and education ministries. Among the rest, Tachover demands a response in writing about conflicts of interests of Prof. Sigal Sadezky.

Radiating the kids

The number of digital applications for babies and very young children is exploding. All classrooms in public schools in Angers, France, will be equipped with digital tablets. This is a first for Europe. In the canton of Vaud, Switzerland, this is not yet the case. The pedagogical director of public education explains that 'in addition to the absence of political will, the use of tablets requires high-speed Wi-Fi connectivity and raises the problem of electrosmog.' The following article presents the issue of kids playing with tablets vs. traditional toys.

LOCAL NEWSPAPER COVERS SMART METER STORY

A local community newspaper has reported on Wilner & Associates' complaint filed with the California Public Utilities Commission concerning Smart Meter opt-out issues that is scheduled to be dismissed. The article also includes some very interesting comments by Lisa Miller of Novato, California who explains how she was made ill by a Smart Meter installed at her home, and when she left the area, her symptoms went away. Thanks to the opt-out program, Lisa now has an analog electric meter installed at her home, and the communications module installed on her gas meter has also been removed. This has made a substantial improvement in her quality of life.

Link to newspaper story:

http://marinscope.com/articles/2012/05/16/sausalito_marin_scope/news/doc4fb4047347fcd896952300.prt

Lisa also asked her neighbors to opt out to help with her health problems. They did so as a favor to her and, much to their surprise, their problems with headaches, ringing in the ears, and sleep issues that they had not attributed to Smart Meters also disappeared. This is the kind of story that should provide encouragement to those in California that fought for the opt-out option, and open up new possibilities by making their neighbors aware that they can also have analog meter instead of a Smart Meter.

Wireless radiation significantly affects sleep. This also effects our overall health.

Importance of Sleep

While sleep needs are individual, more people than not say they experience sleep problems or are just not managing to get enough sleep. This doesn't bode well when you consider that too little sleep can be detrimental to your health and can jeopardize your safety. Let's look at the importance of sleep on your overall well-being and how you can feel better rested when the alarm goes off.

How much sleep are we getting compared to the amount that we need in order to sustain a healthy lifestyle? Sleep experts recommend on average eight hours of sleep per night (though that number will vary on individual needs), but up to 40 per cent of Canadians may be sleeping less than six to eight hours a night. The result is an accumulated sleep debt. Like financial debt, sleep debt does not go away until you pay it back. How much sleep do you need to stay on a healthy track?

We all have reasons - maybe good ones - for not getting enough sleep. But once you understand how much your health depends on adequate rest, you may think twice about turning on the television, working late, or putting off getting help for your sleep disorder. Here's why you should make sleep your priority.

Tossing and turning at night? You're not alone - insomnia affects an estimated one-third of adults, not to mention the approximately 80 other sleep-related disorders that keep people from getting enough sleep.

Holland EHS recognised

Latest news is that the Dutch Government has acknowledged EHS as a 'true disease which is not psychosomatic...' I have only a Dutch report for reference and asked for an English version to be sent later.

Biological Effects

These three items confirm that there is a biological effect from microwaves. We may have known it all along but here is evidence that the same technology being used in Iraq is being converted to civilian applications. This is being done covertly in a transfer of technology from the military to big business.

It is relevant to note that the big universities - including University College Dublin and the League of European Research Universities (LERU) have TTOs - Technology Transfer Offices. These facilitate the transfer of knowledge to business/military for cash.)

This first item is old but has resurfaced today:

DNA Goes Digital with New Biometric Tracking App

<http://www.activistpost.com/2012/05/dna-goes-digital-with-new-biometric.html>

This is a logical progression in which each partner could claim that they are fulfilling their brief (in secret, of course) without public debate. The situation reflects the failure of politicians to adequately represent their constituents and the media to inform the public who would elect (not always) ethical representatives.

Ireland is central to this process because it is an incubation centre for this kind of technology. Who knows how many Irish citizens have been injured, perhaps killed by mistake, as this technology was/is being developed? Our freedom and our lives and the lives of our children are at stake.

Mysterious illness strikes hundreds of flight attendants are 'toxic uniforms' to blame or is it Fukushima?

Are Alaska Airlines flight attendants suffering the effects of nuclear radiation fallout?

16 May 2012

Hundreds of Alaska Airlines flight attendants have filed a formal complaint about uniforms they suspect might be causing their skin to rash and develop lesions, and their hair to fall out. But based on the timing of the symptoms and their relation to similar symptoms in local marine life and [polar bear populations](#), it appears as though radiation from the Fukushima Daiichi nuclear disaster may also be a potential culprit.

<http://www.wirelesswatchblog.org>

Or could it be something stupid and dangerous: "Wi Fi on planes" ?
