

Larry Blackhall Remembered

Larry Blackhall of Aldergrove BC passed away recently. He had been receiving WEEP News for several years and we exchanged several e-mail messages about EMF issues.

Larry had been trained in the field of Communications and Electronics Engineering while serving as an officer in the Royal Canadian Navy and was a specialist in Advanced Electronic Warfare.

Larry was nearly eighty years of age when he passed away in hospital, on May 1st. He had been declining from COPD for quite some time, but then contracted C Difficile and was not strong enough to fight it.

Larry recognized the dangers of widespread use of wireless radiation and warned the public about those dangers. He was one of the 'pioneers'.

A quick search on Google provided the following articles:

Probable connection between EM radiation and H5N1 Avian Virus outbreak

I have done extensive and exhausting field research on the Avian Virus outbreak here in Abbotsford BC (it began in February 2004) that strongly suggest a connection between the initial outbreak site and EM radiation from a very high power, multi frequency, military transmitter site located directly across the road from the poultry factory where it all began. I have presented my research to government agencies and ultimately to a Federal government Investigative Commission and they have apparently chosen to ignore it!

I have shared this information with quite a few people that I have met and will continue to do so. I believe the science is conclusive and more than that it was conclusive over 35 years ago !!!! The single most important fact that people tend to forget, or are unaware of is that the effects of radiation are CUMULATIVE and I strive to emphasize this point.

I truly believe that EM radiation was a vital component of the toxicities and bad management practises that ignited the H5N1 Avian Virus threat here last year.

This is my presentation to the Parliamentary Commission here in Abbotsford last Jan 18. It shows the probable connection between EM radiation and modern poultry production methods.

The science is empirical and archived at NRC Canada.

This paper is now on record with Ottawa.

Microwave Phones

Another warning from Larry

<http://omega.twoday.net/stories/448736/>

Once again I take this opportunity to remind everyone (is anyone listening?) that EM radiation effects are CUMULATIVE !! Never lose sight of that word - 'cummulative.'

It sounds very simple and basic I know and not at all profound but when taken in to the over-all picture it is probably the single most important aspect of radiation. And I will continue to harass anyone at any opportunity in discussing EMR to remember that it is CUMULATIVE.

Also, EMR effects ALL living systems. Including birds. (Thank you Milt - I owe you).

In order to raise awareness in the market we need to decribe 'cell-phones' as what they really are which is 'microwave phones'. We don't refer to trains, trucks and bus's as 'terrain re-locators' then why the h... do we refer to microwave phones by the name 'cel'? That only describes their geographical coverage pattern?

Basic Cognitive Science.

Once the public (the \$\$market) is aware that microwave radiation can be dangerous it follows they will show concern about sticking a mini microwave oven in their collective ears.

The message is simple -

1. EMR is cumulative
2. microwave phones emit EMR.

There is not a single scientist on this planet today that can deny those two brief simple statements.

Basic Cognitive Science - it could be helpful.

Bird Flu and Microwaves: Are we Killing Birds with Radiation?

http://www.newmediaexplorer.org/sepp/2007/05/29/bird_flu_and_microwaves_are_we_killing_birds_with_radiation.htm

<http://www.emfacts.com/2005/08/more-on-the-canary-story/>

Regarding the article by Imelda in Cork, Ireland:

Perhaps a valid testament could be obtained from a willing member of the Psychiatric world explaining why they are wont to practice 'trans-cranial' emf radiation as a form of some ill-defined 'cure' specifically for people diagnosed as paranoid schizophrenic.

That is exactly the treatment that has been prescribed here in western Canada. IE: trans-cranial emf. In the dark ages it was known as 'shock treatment' or EST.

Could this possibly be a case of applying the untested and theoretical quasi-science of induced emf to cure or combat an affliction (emf sensitivity) that is as yet largely denied or ignored?

Now that would be outrageously disgraceful wouldn't it. Wouldn't it?

My sincere empathy to Imelda.

Best wishes

Gorgun Shield

Dear Dr Gorgun

Please be assured that my enthusiasm for your invention is sincere. My ability to be of assistance in drawing attention to your efforts and your product is in my ability to understand your distress and communicate this vital information to the people that have the clout and determination to attract attention on a global scale.

In an Orwellian world all human beings would carry a personal transponder and Gorgun Shield that would protect them from unwanted EM Radiation. Yes! - this is possible!!! but sadly it will not happen.

I previously suggested that you make your scientific findings and your prototype Shield known to the World Health Organization and now I further

recommend that you publish your work within this organization operated by Klaus Rudolph - the 'Citizens Omega Initiative' - thereby gaining the attention that cannot be denied. You might also consider corresponding to the Microwave News.

Please take the time to read the balance of this email - particularly the information on the HAARP.

If the W.H.O. can be obliged to recognize and support the Precautionary Principle as recommended by the California State EMR report I do believe we will see gigantic progress in alerting citizens of the world to the dangers inherent in man-made EM radiation.

I have respect and admiration for your work and I am sure Klaus will take an interest also. You need attention now - to get your message and your Shield in the public purview. When that is accomplished governments and corporations (\$\$\$\$\$) will no longer be able to deny you.

Kindest regards
aye

The WHO EMF Charade Continues - Time To Stop the WHO Charade

<http://omega.twoday.net/stories/819270/> July 2005

Remarkable isn't it that the WHO is holding this farce in Ottawa Canada? I resent it.

The proverb goes that when you sleep with dogs you get fleas. So what happens when the dogs come to sleep with you? I just hope that some of our Canadian media take a bite out of this and tell the whole truth for a change - so far they have avoided it.

The Vancouver Sun is a leader at living in denial - I am really ashamed.

Larry Blackhall

Jan 2005

<http://omega.twoday.net/stories/459476/>

The practise is the very same here in Canada. Cities and Municipalities are prevented from action by our central government in Ottawa ever since the Health Ministry put in place Safety Code Six which I believe is the same as that which you describe in Israel. There is growing awareness and concern here also but we

must persevere and oblige our governments to put humans before corporate profits.

The truth is being revealed and with that we shall prevail. Any further information will be sincerely appreciated. There may be a golden opportunity coming up here in two weeks time to further our campaign and expose microwave radiation towers.

Subject: EMF

<http://www.kimrichter.com/petpeeves.htm>

Hello Kim

Congratulations on your web site -
comprehensive and user-friendly - very well designed

Briefly

I really have been busy for the past few months but I picked up on an article in the Aldergrove Star regarding council debating either cell phone towers or high power transmission lines - I'm not sure which but the point is this -

You expressed a degree of uncertainty regarding the towers and possible effects on the health of the general public and one of the other councillors seemed to be a little short of patience for the subject as - in her opinion - this subject has been beaten to death and there is NO APPARENT HARM to people.

I don't believe you debated or otherwise followed up on the subject and I am unaware of any final deliberations - however -

I wish to assure you - beyond any doubt - that electro-magnetic field (EMF) radiation IS dangerous. There is far more to it than just the thermal effect - which heaven knows can be devastating - there is also the effect of non-ionizing radiation (gamma radiation) on anything molecular - which is simply everything !

We have seen through the lies and scandal of the tobacco industry and it now is exposed. Now it's the cel-phone industry.

Can you advise me as to what scientific resources are available to Langley

Township for conclusive determination, supported by scientific research, of future policy standards regarding installation of towers and grids ?

Please and Thank you

Larry Blackhall

Dr Sarah Starkey, PhD

Hundreds concerned over smart meters

WOOD Michigan. Nearly 400 customers are speaking up about **smart meters**, including some who said they want to be able to opt out of the metering system.

<http://www.woodtv.com/dpp/news/michigan/hundreds-concerned-over-smart-meters>

370 Electricity Spies for Ontario

New \$40-million Grid IQ research collaboration centre in Markham. The company will collect and analyze Ontario's smart meter data - really, massive amounts of information.

<http://www.thestar.com/business/article/1219263--smart-grid-delayed-delivery>

More stupidity from Ontario. The Ontario Government seems to be acting more like a drunken p..., high on illegal drugs than a leader or responsible energy use. More expensive waste, at a time of serious financial concern!

The reporter is also missing the 'real story' - the danger from smart meter radiation and the huge expense of smart meters.

Martin Weatherall

Energy smart meters are a threat to privacy, says watchdog

European Data Protection Supervisor warns 'massive collection of personal data' could be accessed without safeguards.

Smart meter vote

The City of Port Moody has officially joined the chorus of municipalities against BC Hydro's **smart-meter**.

<http://www.thenownews.com/technology/Smart+meter+vote/6859482/story.html>

D'Amato: Power sector should share the burden it created

Not only did the cost of electricity go up again last month, but now some local hydro distributors are applying to the Ontario Energy Board to charge us even more, so that they can cover the cost of installing '**smart meters**' that we didn't ask for ...

I don't know about you, but whenever I open my electricity bill, I don't feel that I'm benefitting. Instead, I feel that I'm footing the bill for other people's mismanagement, over and over again.

<http://www.therecord.com/opinion/columns/article/752298--d-amato-power-sector-should-share-the-burden-it-created>

Festival Hydro proposes fee to recover smart meter costs | Your ...

The Stratford-based hydro distributor spent \$3.7 million on the purchase and installation of over 19000 *smart meters* in Stratford and in communities it serves throughout Perth and Huron counties.

If approved, residential users will pay an additional \$1.55 each month, while general service customers " who include smaller non-residential electricity users like corner stores, downtown shops and at-home businesses " would be hit with a new \$8.18 monthly charge.

http://www.southwesternontario.ca/news/festival-hydro-proposes-fee-to-recover-smart-meter-costs/?utm_source=rss&utm_medium=rss&utm_campaign=festival-hydro-proposes-fee-to-recover-smart-meter-costs

See some of the dangerous installations that Festival Hydro want unsuspecting citizens to pay for -
