

High Court: Cell Tower Dangers

Syal claims she suffers from cancer while her 15-year-old granddaughter has renal failure due to continuous exposure to high-frequency radiation emanating from the BTS. HC on Friday asked the government and MTNL to answer if they can remove the tower from her house.

Addressing “Smart Meters, Not Dumb Rumors”

It was considered a “witch hunt,” at one time, when science was reporting cigarettes cause cancer. Now it is classified by the International Agency for Research on Cancer (IARC) as Group 3 Carcinogens, which means the agent is carcinogenic to humans.

At one time, tobacco, in essence, shared the same classification as the type of radiation given off by Smart Meters, which is designated by the IARC as a Group 2B Carcinogen, which means the agent is possibly carcinogenic to humans.

Understand statistical research in death rates drives the classification upward or downward. With that, note both tobacco and this radiation would have been classified by the IARC as Group 3, which translates non-cancer causing.

The FCC’s role in safety? The FCC is interested in public safety, which involves the prevention of and protection from events that could endanger the safety of the general public from significant danger, injury/harm, or damage, such as crimes or disasters. The FCC has nothing to do with determining if a Smart Meter’s has a negative impact on the human body. It is not their job or concern. The FCC approval mark means nothing in this respect.

Mr. Blankenship has a degree in electronic engineering. Note this degree has nothing to do with the study of radiation and its affects on the human body.

Word to the wise, and this includes Mr. Blankenship, do your research. Mr. Blankenship's minimization of the danger's of EMF is reckless, if not absurd.

Health or cellphone? Take your pick

Dr Sabhya Sachi Saxena, consultant, ENT at Columbia Asia Hospital, Ghaziabad, says he has experienced a rise in the number of patients with salivary gland tumor which could be because of phone tower radiation but that cannot be ascertained. "Exposure to cell tower radiation may lead to behavioural changes such as depression, memory loss, numbness in body etc," he says in a reference to the report.

"The seriousness of the health hazards due to radiation has not been realised by the common man.

Texas Activist Who Pulled Gun on "Smart Meter" Man Speaks Out

When Houston-area activist Thelma Taormina was allegedly shoved multiple times by a man trying to install a controversial so-called "**smart meter**" on her home, she had already told the public-utility subcontractor that he was trespassing and to get off her ...
