

# Electromagnetic radiation and your health

By Dr Jacqueline E CAMPBELL

I suggested to her that her insomnia may be due to her exposure to the **electromagnetic radiation** from various devices and that she limit exposure to these devices. She reluctantly agreed to give my recommendations a try. A few weeks later she called: ...

## What killed the tree at Stratford, Ontario, City Hall

This tree located in front of Stratford, Ontario City Hall was dying. City staff suggested that salt spray from vehicles was the cause and they removed the tree. The video shows that the worst damage was to the side that faced the cell phone antennas located about 150 metres away. Cars passing the tree would normally be travelling slowly at the 50 km speed limit (on Downie St), or stopping at the stop sign next to the tree. The dead areas, some of which are high on the tree, are not consistent with salt from vehicles.

There is a growing amount of scientific research which shows that microwave radiation from cell phone and other antennas is causing serious harm to trees around the world. This tree was being exposed to very strong pulsed microwave radiation. The World Health Organization classes this wireless radiation as a class 2B carcinogen.

The radio frequency meter measurements are in microwatts per meter squared.

## In Great Danger

The most telling moment for me at our Earth Day booth here in San Diego, was when a very distressed young man, no more than age 20, stopped by and wanted info. He is employed by AT&T/Verizon installing wireless antenna on school grounds. He said that he is responsible for turning on the antennas and testing them and that he is always right near them when this happens. "Did I think this is harmful to him?"

He looked totally warped out- his eyes were not connected and he looked very strange and confused. I told him to file a complaint or get a new job- that this is very dangerous. I wish I had gotten his contact info. Similar to the military, they

are using young people who do not know any better, to do their bidding.

## **Group to Host Event on Concerns over 'Smart' Meters Tonight**

Michigan Stop Smart Meters says the devices threaten residents' privacy, health, safety and pocketbooks.

"Smart" Meters were designed as advanced utility meters that can record a business or consumer's energy, water or gas usage in real time and in greater detail. Groups like Michigan Stop Smart Meters are concerned about how the meters threaten residents' safety, privacy and health. Courtesy of PG&E

[Michigan Stop Smart Meters](#) will host a public meeting in the East Community Room of the [Ferndale Public Library](#) from 6-8 p.m. today.

The event will include the presentation, "Smart" Meters "Helping Us or Hurting Us?" addressed by a panel of speakers, and will be followed by an open discussion.

Lectures will include the future of smart appliances and how residents can protect themselves from the downsides of these technological advances.

[Smart Meters](#) were designed as advanced utility meters that can record a business or consumer's energy, water or gas usage in real time and in greater detail.

Groups like Michigan Stop Smart Meters say they are concerned about how the utility-backed meters threaten residents in various ways. They point to the privacy concerns of breaking down home activity by the minute, economic concerns about the high rates consumers pay and dangers from the meters continual emission of electromagnetic radiation.

Here's a look at what the speakers will specifically cover in tonight's Michigan Stop Smart Meetings event:

**Dr. Richard Meltzer Overview:** Meltzer will take a look at how society got to the point of "smart" appliances being forced upon citizens and why regulators have failed to ask the right questions or obtain meaningful evidence on which to base decisions.

**Diana Ostermann: Harmful Radio Pulse:** Ostermann will draw on her background as a retired manager in the cell phone industry to explain how "smart" meter radiation has effects that can outweigh those from cell phone usage.

**David Sheldon: Threat to Privacy:** Sheldon's background in physics and

economics will guide him in explaining how "smart" appliances are an invasion of privacy and economically inevitable if citizens don't put a stop to it.

Admission is free and light refreshments will be provided.

## **Festival Hydro switching to time-of-use billing**

After two years of radiating the entire city with a WHO class 2B carcinogen, Festival Hydro switch to time of use pricing.

Now they are exposing all the citizens to dangerous carcinogens for a purpose!
