About this company

ZEROSPAM provides in-the-cloud email protection - stopping threats before they hit corporate infrastructure. Founded in Montreal in 2003, the security focused company operates in Canadian data centers in and is one of the few managed email security vendors to protect governments and to back its service with a comprehensive SLA. Customers ranging in size from 10 to 25K mailboxes are filtered daily.

The company serves customers worldwide and has distributors in Canada, US and Europe. ZEROSPAM puts a high value on security, integrity and customer service.

Cloud-based Managed email security is the only type of anti-spam solution that reduces Internet bandwidth usage, saves precious computing and IT resources while preserving capital and ability to scale.
